TWO LOVERS.

Two lovers by a moss grown spring;
They leaned soft cheeks together there,
Mingled the dark and sunny hair,
And heard the wooing thrushes sing.
O budding time!
O love's best prime!

Two wedded from the portal stepped!
The bell made happy carolings,
The air was soft as fanning wings,
White petals on the pathway slept.
O pure eyed bride!
O tender pride!

Two faces o'er a cradle bent;
Two hands above the head were locked;
These pressed each other while they rocked,
Those watched a life that love had sent.
O solemn hour!
O hidden power!

Two parents by the evening fire;
The red light fell above their knees
On heads that rose by slow degrees,
Like buds upon the lily spire.
O patient life!
O tender strife!

The two still sat together there,
The red light shone above their knees,
But all the heads by slow degrees
Had gone and left that lonely pair.
O voyage fast!
O vanished past!

The red light shone upon the floor
And made the space between them wide;
They drew their chairs up side by side,
Their pale cheeks joined, and said, "Once more!"
O memories!
O past that is!

—George Eliot.

PIERRE AUBERT.

There is one little corner of France which I never visit without saying to myself, "What a happy lot it would be to stay here forever!"

Villerville-on-the-sea lies on the coast of Normandy, between Honfleur and Trouville. Behind the pretty village the richly wooded land slopes in gentle undulations to the mouth of the Seine, which here widens out and spreads in all its grandeur to the far off horizon. At your feet are verdant meadows where great oxen graze, raising their heads now and then, and standing motionless as if listening to the voice of the billows.

On the right is the river, narrowing as it runs toward the promontory of Luilleboeuf, and seeming to bear in its drifting haze the memory of Paris, where it has seen so much! Opposite is Havre, with its masts, its lighthouses and its smoke; above Havre is the lovely hill of Ingonville, bedecked with white houses half buried in foliage. On the left is the roadstead, then the sea.

About ten years ago I had the pleasure of spending a month at Villerville, where for the time being I was a genuine rustic and fisherman. My room had lime washed walls, great black joists in the ceiling, the most primitive furniture imaginable, and a few engravings illuminated in indigo and vermilion.

From my window there was a beautiful view of the bay, and besides that I saw daily at low tide three or four hundred fisher women merrily hunting for mussels, while their husbands and brothers were off cruising in small fishing smacks. The latter returned home on Saturday evenings, and the arrival of the peaceful fleet made a scene full of motion, color and gayety.

My hostess, Cesarine Aubert, took no part in these joyous gatherings. She was a tall, lank woman, 40 years of age, harsh tongued and sour tempered, ever ready for a dispute, greedy for gain and watchful of her own interests—a perfect virago. As I however, paid well and in advance I was a hero, a god, to Cesarine. For me she modulated her sharp voice, and always came to meet me smiling grimly.

Strange to say, she had two charming children, a boy of 13, and a girl almost a year younger. They were of the usual Normandy type, fair skinned and light haired, and had large blue eyes with an expression of angelic tenderness, not in the least like their mother's. I was curious to see what sort of man their father was, and on the Saturday after my arrival I sat by the great chimney with Cesarine awaiting his return. The children had been watching for him eagerly, and toward dusk they rushed in, exclaiming breathlessly:

"Here he comes, mother; we saw his boat from the cliff. May we go and meet him?"

"What is the use?" replied the woman sullenly. "Pierre's old enough to find his way here without your assistance, and besides, I want you to go into the garden, both of you, and gather some salad for supper. Do you hear me?"

At the sound of the last words the children fled like frightened birds, and a few minutes later Pierre Aubert came into the house. He was about 35 years old, short and thick set, with light brown hair cut square over the forehead, but hanging in two long curls upon his shoulders, and among the locks could be seen two tiny gold earrings, shaped like anchors. His smile was thoughtful, his manner grave—even mournful, but the frank expression in his blue eyes was very winning.

Cesarine rose as he entered, but without a word or smile of greeting took down a slate that hung on the wall, and with the pencil in her hand asked abruptly:

"How much?"

The man drew a great leather purse from the pocket of his pea jacket, reported the result of each day's fishing, and laid down the amount received for his share of the week's work. While he was speaking Cesarine put down a line of figures on the slate, added them up and carefully counted the money. Then she put the whole amount into a drawer, locked it and pocketed the key, while the fisherman returned his empty purse to his pocket apparently without regret.

"A good husband," I thought, and the next minute the two children ran into the room and threw their arms around his neck.

"And a good father," I added mentally; but what was my astonishment to hear one of the children saying:

"So glad to see you, Uncle Pierre!"

He sat down, took the boy and girl upon his knees and caressed them with such evident affection that I was touched. Could it be possible that he was only uncle to these children and brother-in-law to Cesarine?

Gradually the bright flash of loving delight which the little ones' welcome had called to his eyes faded away, and the former look of hopeless sadness returned. He bade the children go and play upon the beach, and then he took a spade from a corner of the room and went out, saying that he was going to work a little. I was so much interested in him that I followed him at a short distance, and saw that he went to the end of the village street, and began digging in a small inclosure where some vegetables were growing. Suddenly, however, he stood erect, and with his hands resting upon the spade handle gazed intently at a cottage near by. One of the windows was almost covered with the leaves and blossoms of a climbing rose, and upon the white curtain there appeared the shadow of a woman's form. Motionless as a statue, Pierre stood with his gaze fixed upon that window until darkness closed around and the stars came out, and then, with a deep drawn sigh that seemed to come from a broken heart, he shouldered his spade and went home.

The next evening as I passed the church the people were coming out, and I saw Pierre in the doorway with his niece and nephew. A young woman on her way out of church was just behind him, and without looking up he dipped his finger in the holy water basin and then extended his hand to her. She was a sweet faced creature, with a pale, delicate skin, although only a peasant, soft, dark eyes drooping modestly, an angelic smile upon her lips, and though she was at least 30 years old the stamp of virgin purity was upon her brow. As her fingers touched those of Pierre a tremor passed over her, a momentary flash of joy lighted his face, and then they parted without exchanging a word.

I felt sure that it was her shadow I had seen the night before on the white curtain behind the roses, and that evening, when the tide was rising, I strolled out to see the fishermen embark. Pierre walked a little in front of me, and when he passed the cottage at the end of the street a freshly plucked rose fluttered from the window and fell at his feet.

He picked it up and hid it inside his jacket.

When I reached the shore the boats had just left their moorings, Pierre had taken his place, but his eyes were fixed upon that little cottage, and from the rose embowered window a white kerchief floated until the fleet was out of sight.

Evidently there was a tale connected with these two young people, and I was all curiosity to hear it. I knew that I could easily do so by questioning the villagers, especially the women folk, but preferred to wait and ask Pierre himself.

In a few weeks he and I had become great friends, and one day I went out in his boat to see the fishing. Night came on, and the sailors went to the cabin to sleep until the breeze should spring up and give the signal for letting down the nets. Myriads of stars were shining brightly in the clear sky. Sea and sails were motionless, and the silence was unbroken. Pierre and I were sitting together in the bows, and I seized the opportunity of asking him the reason of his settled sadness. In reply he told me his story as follows:

It is hardly necessary for me to tell you that Marie and I love each other. If you ask when our love began I can only say that God put it into our hearts when we were born, and made it grow with our growth. As little children we were always together—our first smiles and tears, our first sorrows and our first joys, all were in common. We even seemed to know each other's thoughts, and the old people of the village said that we had but one soul between us. When I was old enough to go to sea my pretty Mariette was inconsolable until I came home, and she used to wade out to meet me till the water nearly reached to her waist, and then I would put her on my shoulder and carry her to the beach. We were very happy; why could we not be children forever?

In the winter time we were always together, and when our early childhood was passed we used to join the village dances. Oh, what merry rounds we would make together, and when the dance was over how joyously we went home hand in hand through the moonlighted meadows. What plans we made, what loving promises—what hopes were ours, what dreams!

When we were old enough people began to talk about our being married, but we paid no heed to them.

"What would be the use," we said; "we are very happy as we are, and nothing can make us love each other better than we do."

Marie had her mother, but I was an orphan, and my brother, Cesaire, had brought me up and been a father to me. It was he and the good cure who urged my marriage, and at last proposed it to Marie's mother. Jeanne was much richer than we were, and Marie was her only child; yet the good widow, notwithstanding, accepted me as son-in-law.

"They were made for each other," she said.

So one fine day we were betrothed. I took a holiday, of course, and wanted my brother to do the same, but his wife, Cesarine, insisted that he should go to sea as usual. Some of the neighbors blamed her for that, but it was only just that she should think of her little children. They must be fed; their father was poor and could not afford to lose a day's work. The morning had been very bright, but toward night a few clouds gathered over the sea. Marie and I did not notice them, for we were so happy. We and the other young people were dancing, when suddenly a flash of lightning startled us; then there was a peal of thunder, and the next minute we heard cries for help.

We rushed to the beach and saw Cesaire's boat upon the rocks. What a storm that was! Never has such a terrible one been known upon this coast.

I did all I could. Three times I dashed into the water with a rope, and at last was thrown unconscious on the sand. But I did not die, alas! and when I regained my senses I saw my beloved brother lying near me, breathing his last.

"Pierre," he gasped, "be a brother to my wife and a father to my children!"

"I will never leave them, Cesaire; I swear it!" was my reply. And so he died in peace.

The preparations for the wedding were stopped at once, and Marie and I exclaimed in one breath, "We can wait." I kissed my brother's children, clasped their mother's hand, and felt that there was a compact between us just as binding as if all the notaries in the world had witnessed it.

Six months passed, and people began to ask when Marie and I were to be married, but something, I do not know what it was, seemed to have sealed my lips. I could not speak of the matter to any one, and at last the widow Jeanne herself broke the ice.

"Have you adopted your brother's children?" she asked me, and I answered "Yes."

"And his wife as well, Pierre?"

"Yes, his wife as well."

"Really adopted them all, forever?"

"Yes, forever, mother Jeanne!"

"You mean that you will never leave them?" she persisted, and with my heart turning cold I said:

"I cannot leave them; I promised my brother."

There was a long silence, and then she went on:

"Listen, Pierre! I am perfectly willing that you give Cesarine a share of your earnings, as much as you like. I am not thinking of the money at all; it is not that. But I know your sister-in-law as well as you do, and I will not consent to let my Marie live with her, or to have Cesarine come to my house to live. Never!"

I saw a gulf opening as the old woman spoke, for I knew she was right; I could not ask Marie to live with my sister-in-law—I knew Cesarine too well.

"I do not forbid the marriage," said Jeanne, "but I tell you the conditions. What do you say?"

I raised my head and saw that Marie had come into the room and was looking at me with her whole soul in her eyes, and I knew that I must either perjure myself or lose her forever.

Oh, sir, I do not know how I lived through those few terrible moments! There was a ringing in my ears and strange lights dancing before my eyes, as if I had a fever. I seemed to be stifling or to be losing my mind, my heart, my soul—all at the same instant.

"Pierre," said Jeanne sternly, "you must decide at once. "Is it to be Marie or Cesarine?"

I was just going to pronounce the name of my darling when I seemed to see before me the mangled form of my brother and to meet his dying glance, but it was not the look of peace that I had seen on his face when I gave him my promise—his eyes were full of sadness and reproach. I made a great effort, and crying out, "Mother Jeanne, I promised my brother!" fled from the house like a madman. As I went I caught sight of Marie's face; there was a smile upon her lips and she murmured softly, "Bravo, Pierre!" For a whole year the memory of those two words gave me hope, and I persuaded myself that she would find some way of shaking her mother's resolution. I did not try to meet her anywhere, but attended to my work and took no notice of what went on in the village, until I learned one day that Marie was going to get married. I did not believe that, and determined to hear the denial from her own lips.

That evening I met her on a quiet road and took her hand in mine, but there was no need of words, for she saw the question in my eyes and answered:

"Yes, Pierre, it is true!" A cry of despair burst from my lips, and she added quickly:

"I love you only, Pierre, but my mother's heart will break if I refuse to marry Jacques. She is old, and it is my duty to obey her. You have done your duty, and I must do mine."

I interrupted her with a torrent of reproaches, for I was mad with rage and despair, and to my wild, angry words she answered gently:

"You will be sorry for speaking so, Pierre, for you are brave and good. When you can think calmly you will see that I am right, and you will say to me, 'Marry Jacques.' I will wait until you say so, Pierre." She turned away and left me standing there sobbing.

After that I reflected that I had no right to condemn a girl to live single all her life merely because I could not marry her myself, and yet I was not willing to set her free. The neighbors began to show their disapproval of my selfishness.

"You are like the dog in the manger," said one of them, and they all looked at me askance.

Then I heard that Marie's mother was very ill, and people said I was the cause of it, and at last Cesarine began to reproach me.

"You ought to make Marie take Jacques," she said; "you will not be fulfilling your promise to your brother unless you cause her to become the wife of another man." That decided me. I would give Marie her liberty. I could not bear to see her again, but I wrote to her. I began several letters to her, and tore them up before they were finished. At last I wrote her two words only—"Marry Jacques." Indeed there was nothing more for me to say. I called a little boy who was passing and gave him two sous to take my letter to Marie, but even then I could not make up my mind to send it.

The child took the money and held out his other hand for the letter, but I drew back and hesitated. It seemed like throwing away my last hope of happiness, for Marie had said that she would not marry without my bidding. I turned the letter over and over in my hand, until the boy, growing impatient to spend his sous, snatched it suddenly and ran off. I looked after him as he went down the street, and saw him turn in at the widow's gate. I was trembling all over like a leaf, and had to lean against a wall to keep from falling. In a few minutes I whispered:

"She has opened the letter by this time—and she has read it. Now, she has told her mother—that is the end!" and I rushed away to the woods and wandered about like one crazed, saying to myself over and over again those fearful words, "Marry Jacques! marry Jacques!"

On the day fixed for the betrothal I was at sea, but toward evening the cruel wind persisted in driving me to Villerville's shore, and I was obliged to tack back and forth, where I could plainly see the lanterns lighted for the festivity. I have heard of the tortures suffered by the Christians long ago, of the rack and the wheel and fire, but I am convinced that no martyr's agony was ever equal to what I endured that night.

Suddenly I resolved to see Marie once more, and, landing quietly, I crept along in the darkness to the meadow where the people were assembled at the betrothal. I crouched unnoticed among some bushes, and saw her, my beloved. She was leading the singing, and as I leaned forward in my eagerness to look at her more closely a sailor, who sat near me, began to light his pipe, and the flame leaped up before I could draw back. The light fell full on my face. Marie saw me, gave a piercing cry, and fell swooning to the ground. I rushed toward her, and at the same instant Jacques, the betrothed, was at her side.

In a few minutes Marie's eyes opened again, and I was surprised to see Jacques glance from her face to mine with an air of friendly pity. What a good heart had Jacques!

He called for wine, and began drinking deeply wine, cider and cognac—quantities of cognac. He shouted and sang, quarreled with the men and frightened the girls, and toward morning took Marie home and made such a terrible scene before her mother that he was summarily turned out of doors.

"Holy Virgin!" gasped Jeanne when he had staggered off, "what an abominable fellow! Thank heaven we have found him out in time; but who would have thought he was drunkard? He shall never be my son-in-law—never, never!"

Jacques understood Marie and me, and we understood him—good, kind Jacques!

Since that time there has been nothing said about Marie getting married, and though she and I seldom meet we do not try to avoid each other. Every Sunday I give her the holy water at the door of the church, and we sit in the same bench as we used to do in the days of our youth. Cesarine and her children sit between us, it is true, but that does not matter, for we always manage to exchange prayer books, and while I am praying for Marie out of her book she prays for me out of mine. When I go to sea her white kerchief is the last thing I see on land, and whenever the night is clear I look at the light shining from her window; she is my lighthouse, my star.

Pierre Aubert stopped speaking and sat plunged in thought, but gradually his head sank upon his folded arms, and I heard the sound of heavy sobbing.

Suddenly, however, the breeze sprang up and the fisherman rose to his feet, and his face was calm, though sad, as he called his men to their work.

A few years later I paid another visit to Villerville, to find the people dressed in their holiday clothes.

"What is going on?" I asked of the cure, who was the first person I met. He smiled as he replied:

"Cesarine Aubert died six months ago."

"But all this festivity?" I asked, wonderingly.

"I am going to marry Pierre and Marie in half an hour," said the pastor. I left him and hastened to Mother Jeanne's cottage, where I found Pierre dressed in new clothes, and looking so young and so radiantly happy that I hardly knew him. A door opened and in walked fair Marie, led by Pierre's nephew, while the lad's sister came behind, arranging the bride's veil.

Pierre and Marie's happiness had come to them in the autumn of their lives; but their hearts were still young, and with love such as theirs it is always spring!—Translated for Short Stories from the French of Charles Deslys by Isabel Smithson.

The Exception Found at Last.

He sat in the lobby of one of our prominent hotels. His hair was as white as snow and matted in thin and scraggy locks over a high and creased forehead. Lines of sorrow marked his face and ran through his features as numerous as the rivers in Central Africa. In his eyes there was sadness, which bespoke a weight of sorrow on the mind, and seemed to suggest that grief had greatly assisted time in turning the hair white and furrowing the face. A number of men were sitting around him, and they had been telling stories of the "pistol which is not loaded" and its fatality. The white haired man said in a plaintive voice:

"I have a story to tell. I returned home one day from my place of business. Everything had gone my way that day, among the things a good many dollars, and I felt unusually gay and skittish. I told my wife of my good fortune and asked her to get me a match. We were standing by a dressing case, and when she refused I opened a drawer and drew forth a pistol, which I knew was not loaded, as I had examined it the night before. Leveling the pistol straight at her heart—poor woman, she's dead now!—I playfully threatened to shoot her. There was a look of trusting, confident love in her eyes—shall I ever forget that?—as she dared me. I placed my hand on the trigger and pulled it. I closed my eyes, afraid to open them. Oh, it was awful!

"After a time, it seemed hours, I opened my eyes and put the pistol back."

"But your wife—was she killed instantly?" eagerly asked three listeners.

"No-o-o."

"A lingering, painful death?" sympathetically they asked.

"No; as I said, the pistol was not loaded. My wife was unhurt, of course."

"But you said she was dead!"

"Yes, she died two years ago, of old age."

"And why did you tell this story?"

"To show you there are times when the pistol is really not loaded. There are exceptions to all rules, you know. This is the one exception to the seven instances you gentlemen have recited."—Louisville Post.

A Super Who Got a Recall.

Walter Collier says: Young actors often find themselves in tight places, but I doubt if any one was ever obliged to take eight parts at the same time without a change of clothing. We were playing at Philadelphia. "Macbeth" was the drama and Louis James took the leading part. I was one of the accusing specters that rise from the caldron. As it was the work of but a moment, and I had nothing else to do after my little act, I merely threw on the white shroud over my street clothes, intending to visit some other theatre. But when the ghosts came to waltz the master of the supers found that in his hurry he had forgotten all about the scene, and had allowed the other seven specters to go home. Evidently there was nothing for it but for me to take the place of the others. As I had appeared once, and as I walked off supposing I was done, the master caught hold of me and literally fired me back.

I had to run around behind the painted rocks in order to appear from the kettle. The rock was a huge affair of canvas, propped up from behind by two long supports. Then I began my race. I jumped out of the caldron and passed before Macbeth. I was caught again and hurled back by the manager over the long props and out of the kettle again. This seven times, remember. By the fourth time the audience caught on, and you can imagine my dismay to find that my shroud was falling off. By the sixth successful appearance the thing hung by the neck only, my black coat tails sticking out behind. By the eighth it fell off completely, and I sunk exhausted amid the plaudits of the multitude. James was so convulsed with laughter that he had to take a seat upon a rock, and the curtain went down. I was recalled by the house, being probably the only super who ever made such a pronounced hit.—St. Louis Globe-Democrat.

A Wooden Caterpillar.

One of the queerest things of Tasmania, New Zealand and other parts of Australasia is the bulrush or vegetable caterpillar. This wonderful plant is a fungus, a sphaeria, which grows seven or eight inches above the ground, generally in a single stem, round and thickly covered with brown seed for some five or six inches, ending in a curved wormlike point. It is usually found growing at the roots of a particular tree, the "rata" of the natives. When this plant is pulled up its single root is found to be the exact counterpart of a large caterpillar, say one three or four inches long, which, although it preserves every detail of such grubs, dissection proves it to be solid wood. Intelligent persons of the countries named above say that this curiosity is formed in the following manner:

A large species of moth feeds on the "rata" tree; the grub of this moth burrows in the ground; the seed of the sphaeria gets lodged between the scales on the grub's neck, strikes root and completely turns the interior of the creature into a woody substance. In every case the shell of the grub is left intact, no small rootlets puncturing it at any point. Scientists say that the above explanation is all "bosh," and that the plant develops the form of a caterpillar because it is its nature to do so. If this be true why should we laugh at the stories of the Mandrake Man and the Scythian Lamb, specimens of which are preserved in the Surgeons' museum, London.—St. Louis Republic.

The "patres conscripti" was the designation given to the Roman senators in the eras of the Roman republic and of the Cæsars. They were so called because their names were written in the registers of the senate.

DANCING MARIONETTES.

Pleasant Diversions for Long Evenings in the Family Circle.

Marionettes, says a sanguine inventor, must have an inherent life of their own. The clown, the columbine and all the figures representing animals will now caper about on their own hook.

Worn out visiting cards, matchsticks, these are the very simple materials with which people who are fond of a little nonsense now and then can fashion all the figures represented by these designs, which can at any time be set in motion like mechanical toys.

Take, for instance, a clown. First draw and paint the figure on the back of a card—the body and head first, then the two legs and arms; carefully cut out these five pieces, place the body on a table, and above it the legs and arms in a position of rest.

Now these limbs must be joined, and this is how it is to be done. Take, for instance, an arm, mark with a pencil at the shoulder end of the arm the exact spot forming the axis of rotation; pierce a hole with a pin at this point and put it through the shoulder in the body. Bend a matchstick at the center as much as possible without breaking and drop a little melted sealing wax, joining the two ligaments to the arm and body respectively, making the part forming the joint in contact with the pin. Do the same for the other limbs, remove the four pins and the figure is complete. Now we have to give it life.

All that has to be done for this is to place the side of the figure on which are the matches in a plate containing a thin layer, so to say, of water. The bent fibers of wood which have not been broken will swell by means of the moisture absorbed and will try to regain their rectilineal position. The figure will then make a series of abrupt movements which are very amusing. The legs and arms will move apart as those do which are moved by a string. Be careful to use only large, common matchsticks. The Swedish ones are impregnated with paraffine and would not move as required.

Each one can perfect the mode of fashioning these figures as he likes best. A ballet girl who can lift her foot to her forehead, and a rooster that can move its legs about, are pretty easy to make. A horse with twelve different joints is a bit too difficult for an amateur. For the horse each leg is composed of three different portions.

Instead of placing the figure on a plate we can put a drop of water on each joint with the finger or with a paint brush and the effect will be the same.—New York Herald.

Queer Facts About Beavers.

James Sherman, of Clifton, was telling recently some queer things about beaver and beaver trapping. The animal, he says, has the most acute sense of smell of any animal that exists. In setting the traps you must wait till low water, in order to have the tide when it comes in obliterate all traces of your presence. When a beaver is caught in a trap the other beavers at once enable him to make good his escape by seizing him by the tail and hauling him away until they release him, often leaving the limb in the trap as an evidence of the struggle that ensued. He caught a beaver once on Puget Island, and says that it had only two toes on a hind foot, the other three legs being amputated as close to the body as if the limbs had never existed.

Mr. Sherman says there is one faculty the beaver possesses that would be a profitable and interesting study for scientific men, and that is the power of making objects adhere to the bottom of a stream without any apparent means of securing them. The beaver lives mostly on wood, which it cuts and deposits on the bottom, where it remains, contrary to the natural laws, which would in ordinary cases cause the wood to rise to the surface. How this is accomplished it is difficult to decide, but it is nevertheless a fact, as Mr. Sherman assures us that he tried it time and time again. Beaver trapping pays well where any considerable number can be caught, the average price of the furs being from $3.50 to $5 per pound.—Cathlamet Gazette.

Thought "Ouida" a Man.

I never see "Ouida's" name mentioned but it recalls to me the circumstances under which her work was first introduced to the American public. I don't think the story has ever been printed. It was just before the war that Mr. Lippincott, the Philadelphia publisher, saw in an English magazine a serial story bearing the nom de plume of "Ouida." He was attracted to it and determined to republish it. One question, however, arose. The story was named "Held in Bondage; or, Granville de Vigne," and Mr. Lippincott feared that the name would give the false impression that the story was another of the many works on American slavery that were then flooding the country.

He therefore determined to reverse the title, and to bear him out in this he appealed to the writer. A long and pleasant correspondence took place between Mr. Lippincott and "L. de la Rame, Esq.," the former supposing the latter to be a man. "Ouida" never corrected the impression, and for a long time—in fact until Mr. Lippincott's subsequent visit to Europe—did the publisher believe that "Ouida" was a man, and many of his friends remind him today of his enthusiasm over "the new man across the water" whom he had discovered.—Edward W. Bok's Letter.

A Boy's Great Desire.

There is a little boy up town who was 8 years old a few days ago. He has so many things more than any little 8-year-old needs or wants that his indulgent mamma finally said to him in perplexity: "Harold, I really don't know what to get you for your birthday, and I think I shall let you choose this time what it shall be. Now you may say just what you would like most to do or have, and you shall have it."

"Just what I want to do?" queried Harold.

"Yes, for this one day."

"Then I don't want to have anything, mamma; but I do want to do just one thing awfully, if you'll let me. I want to put on some ragged clothes and go all alone out in the streets and lick a Mick. I know I can."

And he did.—New York Evening Sun.

Obesity.

Obesity is often a diseased state of the body, the cure for which lies in a return to healthful conditions of life. The only way to effect this is to live in a hygienic manner, to get as much fresh air as possible, and never to remain in a room with closed windows if it can be avoided. Take a daily bath, practice physical exercises, and dress in a way to promote health. If these rules be followed, coupled with the use of simple and pure diet, not only will obesity be cured, but much lurking disease eliminated. The man who discontinues to eat meat and other strongly stimulating foods finds himself possessed of steadier nerves and a more genial temperament, together with improved mental and physical powers.—Jenness-Miller Magazine.

HE GOT THE "AD."

An Editor's Heavy Head of Hair Secures Him an Advertisement.

Opie P. Read, the editor of The Arkansaw Traveler, is a very big man with a tremendously heavy head of long, black, unkempt hair. One day he was passing the office of a well known hair restorative establishment on State street, Chicago. His partner, Mr. Benham, was with him and said:

"We ought to get an advertisement out of this establishment."

Opie looked in and saw a family of country people inside.

"I'll get it for you right now," said he, and in he walked.

The countryman had just taken off his hat and was showing the manager how bald he was and asked if he thought the hair would ever grow on his head. Opie walked up to the manager and putting out his hand, warmly said:

"My dear sir, I have come a long way to thank you in person and to show you what your restorative has done for me."

Here he took off his old, black slouch hat and shook out his long and wonderfully thick, fine hair.

"There, sir," said he gratefully, "look at that. Four months ago, you remember, I was as bald as that electric lamp up there."

The manager was a little dazed. This was rather more than even he could swallow.

"What did you do for it?" put in the interested countryman.

"Used this restorer—four dozen bottles of it—according to directions."

The upshot of it was the countryman took two dozen bottles of it and went his way.

"There," said Opie to his partner, "now you talk business with this man, and I guess you'll get a pretty good advertisement out of him."

When the manager learned who Opie was he said:

"You can put me down for the biggest ad. in your paper and send in your bill when you please."—Washington Post.

He Got a Loan.

The other evening a citizen who stood at the corner of Woodward and Jefferson avenues was asked by a stranger for a nickel to pay car fare up Michigan avenue.

"You look able to walk," was the reply.

"So I am; but I'm in a great hurry."

"It strikes me as pretty cheeky for a tramp to beg money to ride on when his legs are all right."

"My dear man, this is an exceptional case. I was up that avenue today and met a citizen who pitied my forlorn condition. He didn't have any boodle with him just then, but promised to give me fifty cents if I would meet him at the corner of Fifteenth street at 9 o'clock. It is now 8:30. I can't make it on foot. If I don't get a nickel I am gone up for that half. Please look at the case with a business eye and favor me with the loan."

He was favored, and he got on the front end of the car so as to get there seventeen feet ahead of the rear platform.—Detroit Free Press.

The Transformation Marriage Effects.

"Marriage," said Jimson, "makes quite a transformation in a girl. When she is single she is one person; when she gets married she and her husband are one person; therefore she is then only half of one person, see?"

"Oh, you're away off," said Stimson. "When she is single she is of course one person, as you say, but when she's married she becomes more than one person."

"How do you make that out?"

"When she's single she's Miss, but when she's married she's Mrs."—Boston Courier.

Slightly at Sea.

Old Gent—I don't want to settle here unless they have a good school in the place.

Pat—Be jabbers, sor, it's a foine school, but divil a bit do I think they'd take sich an ould bird as you.—Munsey's Weekly.

He Never Finished.

"Isn't it strange, darling," he said, as they were parting at the front door, "when I go to ask your father's consent to our marriage I will be at pa—par, you see, and when I come to live here and occupy the room over him, I will be above par, and when"—just then there was a whiz, a bang, an unsharpened thud, and the young man was below pa by six stone steps, and as the old man retreated to his lair, he knowingly murmured, "They ain't all dead yet."—Charleston World.

No Cause for Complaint.

Irate Patron—Look here, waiter; confound it! I've been waiting at this table for fifteen minutes, and you haven't paid the slightest attention to me!

Waiter—Look heah, boss, don' git ompatient! I be'n waitin' at dis yere table fo fifteen monfs myself, an' youse haben't nebber paid me nuffin at all. Yet I ain't nebber kicked!—Light.

The Shock Was Too Great.

Travers (to office boy)—Johnny, did you take that check down to my tailor's?

Johnny—Yes, sir.

Travers—What did he do when you gave it to him?

Johnny—He fainted!—Clothier and Furnisher.

Feared for Him.

"I have," cried the rampaging orator, "in my tongue a rapier with which to kill all fools."

"Take it away from him!" yelled a man in the hall. "He's going to commit suicide!"—Lawrence Republican.

Too Much for Him.

Knicker—Did you heah what was the mattah with Chappie De Twott?

Bocker—Nervous pwostation caused by ovah exertion, I believe, aw. He twied to carwy a Sunday papah home alone.—Life.

He Didn't Smile Either.

Tom—What's the matter, old fellow?

Jack—In love.

"Why are you so glum then—doesn't your fair one smile upon you?"

"No, she laughs at me."—Yankee Blade.

Breaking the Monotony.

Clerk—Sir, I need a change. I want a day off.

Employer—How would it do to take a day on?—Epoch.

"Going Down to Mary's."

He was a queer old man who boarded the train at a small station in western New York. Two young men, who were probably his sons, brought him to the steps of the car and helped him on, and as he entered we saw that he leaned heavily on a cane and was very feeble.

"The children kept at me till I had to promise to go," he said as he sat down. "Hain't bin down to Mary's in five years, and I've got sould I dasn't wait any longer. It's purty tough on an old man like me, but I want to see Mary and the grandchildren."

"I take it you are going to spend Thanksgiving with your daughter?" remarked the man on the seat ahead.

"That's it. Mary's my oldest gal. Got five of 'em, and all married off. She lives down at ——, and she would have me come and make a visit. Mary was allus a good gal, and she married a good man. You'll tell me when I git there, won't you?"

"Oh, yes."

"'Cause they'll all be there at the depot to meet me. My son Steve writ that I was coming."

He had about forty miles to go, and when we passed the first three or four stations he was anxious for fear that he would be carried by the right one. After that he leaned over on the window and fell asleep. Just before the train arrived at —— the man who had spoken to him turned about and said:

"Come, grandpa, you get off here."

The old man did not move, and the stranger arose and shook his arm and said:

"Wake up, grandpa! This is your station, and Mary and the grandchildren are waiting. Come now."

But he spoke to the dead. The old man had died while he slept—passed away so peacefully that not a line of his face had changed. And we were yet stunned and grieving when Mary and her husband and three happy children came hurrying into the car and shouted:

"Here he is. Here's our grandpa come to spend Thanksgiving!"

But he was with his God.—New York Sun.

A Hero's Two Tombs.

There is no doubt that one portion of the body of Gen. Wayne, the hero of Stony Point—"Mad Anthony," as he was popularly termed—was interred at the place where he died, and the other in his native county. His original burial place was Fort Presque isle, upon the site of which the city of Erie, Pa., now stands; the other locality honored as his last resting place is Radnor cemetery, in Chester county, Pa. This curious circumstance was brought about in the following manner:

In the year 1815 the family of this famous man was given permission to remove his dust to Radnor, but upon opening the grave it was found that the body was partly petrified, and consequently very heavy. A medical friend of the family, recognizing the fact that it would be a very difficult and costly task to transport the remains in that condition, determined as far as possible to remove the petrified flesh from the bones, and this was accordingly done. The bones were then carefully packed up and delivered to the son, who was kept in ignorance of the operation, and he conveyed the box containing the precious portions of his father's body to his native county, where they were interred with appropriate ceremonies.

A monument was erected in 1809 over the grave by the Pennsylvania Society of the Cincinnati. What remained of the warrior was reinterred at Fort Presque Isle, and some years ago was discovered in the same state of preservation as when first exhumed, in a box bearing his name. Another memorial stone was raised in that place, and thus was commemorated the fact that all that was mortal of "Mad Anthony" Wayne found a final resting place in two localities far apart from each other.—Detroit Free Press.

She Was Curious to Know.

"Can I see well from there?" said the nice old lady with the silk mitts, as she laid a finger on the box sheet and looked over her spectacles at the ticket seller.

"Yes, ma'am—those are very good seats both for seeing and hearing," said the young man.

"They're not as good as these over here?" queried the old lady, taking a leap—with one finger still—to the other side of the house.

"Those are good seats, too, ma'am."

"Don't you think they're too far back?"

"No, ma'am."

"Then they're too close—where are those seats you showed me just now?"

"Here they are, ma'am," said the young man, taking out the coupons from the rack and beginning to put them into an envelope.

"No, I don't want them—I think I like these on this side—only there's a pillar just there, isn't there?"

"No, ma'am, there's no pillar in that section—will you take those two?"

"No, I think not—my daughter'll be 'round this afternoon and look at the plan. I don't know what she wants," and the old lady ambled amiably away, totally unconscious that she had kept twenty men and women waiting for ten minutes while she practised "shopping" on the ticket seller.—Pittsburg Dispatch.

A Poor Debtor's Hard Fate.

In a certain county in the eastern part of the state there is a case coming under the poor debtor law. A man was arrested on execution for debt and thrown into jail. He was stubborn and refused to pay, so the creditor kept him behind the bars, paying his board at $2 a week. When six months had expired the prisoner came to the conclusion that he would disclose, but in order to do this he must, under the old law, which prevailed when he was arrested, pay all the costs of disclosure and expenses. He was unable to do this, as he had no funds, and the consequence was that he remained in jail, where he has now been residing several years, his board still being paid by the creditor. It is said that the latter is determined to keep the fellow in prison, and has gone so far as to set aside $2,000 in his will to board the man after his death.—Lewiston Journal.

Due to Neglect of the Voice.

The result of widespread neglect to train men and women to good reading and speaking is apparent in the very disagreeable voices which are heard upon every side. In a fashionable parlor the women's voices when taken in concert are often a perfect babel of unmusical and irritating sounds, while those of the men are very little better. Yet all of this might easily be overcome by systematic and judicious attention to the laws governing gentle, well articulated and refined speech.—Jenness-Miller Magazine.

Mr. William K. Vanderbilt smokes a special brand, which he has imported from Cuba. Each cigar has a golden band around it, upon which is Mr. Vanderbilt's coat of arms. At wholesale in Cuba they cost him twenty-five cents each.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, JANUARY 6.....1893

The Supreme Court of California needs overhauling, and it needs it badly. Perhaps a majority of the Judges are not corrupt, but frivolous technitcalities and strained constructions are made to shield the perpetrators of gross wrongs against the public. It is notorious that for years past in appealed cases where corporations are concerned judgment is always given in their favor. And this not merely in civil suits, but in criminal cases where the accused were servants of corporations the Court has shielded them from punishmart. The latest, or one of the latest cases,—for they are not of rare occurence— is that of an election officer in San Francisco. He was known when reading the ballots to call votes in favor of certain candidates when in fact said votes were given for other candidates, the intention of the majority of voters being thus defeated. When the rascal was put upon trial the only way that his guilt could be proven was by counting the ballots. But an appeal to the Supreme Court was promptly taken, and that body of omniscient and omnipotent judges at once decided that the package containing the ballots must not be opened. Of course the rascal is at once turned loose and is free to practice his talent in some other line of villainy till more respectable scoundrels shall again need his services at the next election. Corporate influence procures the nomination of candidates for the Supreme Bench, and blind party prejudice secures their election. The law is perverted to defeat Justice and the Court that is intended to give impartial justice for all becomes the most effective instrument for the commission of the greatest injustice.

It is proposed in some States that State Conventions shall select candidates for the United States Senate, and that the Legislature shall be obliged to elect such candidates. Instead of this being an improvement upon the present method in California, at least, it would be far worse. Candidates for the Legislature must go before the people to be elected, and their election may depend upon a pledge that they will or will not vote for a certain man for the United States Senate. In this way the people have some direct voice in the choice of Senator. At the last election many of the Republican candidates for the Legislature were required to state positively that they would not vote for a certain man for Senator in order to get the votes of their own party. But very many delegates to State Conventions are self appointed, are pledged to nothing, do not represent the voters of their party, and if before the people, could not be elected to throw stones at yellow dogs. To permit such men to select candidates for United States Senators, and bind Legislators to elect them; would be to sink the Senate into a deeper hell of degradation than has yet been reached. The only way to remedy the present evil in connection with the Senators is for the people to take back into their own keeping the power now delegated to State Legislatures, and elect Senators by their own direct votes. Where the interests of the whole people are so deeply concerned as in the United States Senate, direct control of that body should not be delegated to those who may betray the trust. And such a betrayal is not a mere remote possibility, but a disgraceful fact with which every State in the Union is only too familiar.

Just stop long enough to read the following taken from an exchange. "John D. Rockefeller is having a massive oaken case, similar to a book-case, put into his stable. It has doors of polished oak with brass hinges and heavy plate glass. The inside will be lined with purple plush, and when completed, the bits which shine in the mouths of his trotters and coach horses will be arranged inside of this magnificent case in rows, ready for use, as well as an appropriate ornament for the stable." How do you like that, you poor devil who find it hard to make a bare living for your wife and children? The polished oak doors, the plate glass, and especially the purple plush lining are nice, ar'nt they. And every kerosene lamp that is used in every home in the United States, no matter how poor that home may be, every time it is lighted must pay tribute to the Standard Oil Caesar to provide all this useless and senseless splendor. And with all our intelligence as a nation we permit a few men like John D. Rockefeller—and indeed he is one of the best of them—to seize for their own use the forests, the coal, the kerosene, the fish of the lakes, and all the other natural resources that ought to belong to, and be used for, the good of the whole people, and thereby to pile up millions that inevitably lead to the wildest extravagance, corrupt every branch of the public service, and in the end menace the very existence of free institutions.

Two Ways of Taming Horses.

What is announced as being a trial of the relative merits as horse tamers of Leon, of Australia, and Sample, of America, was commenced in the theater adjoining the Westminster aquarium the other evening. A committee of between forty and fifty gentlemen, including military men, veterinary surgeons and others, has been formed to supervise the affair, and it is intended to award the winner a prize of £100. A number of intractable and vicious horses, or horses suffering from other defects of temper, will be submitted to the rival tamers, and the committee will decide as to which, in the words of Professor Atkinson, most nearly conforms to the requirements of simplicity, humanity and practicability. Owing to various causes last night's demonstration was of a rather restricted character.

Each man "handled," as the term is, two horses, and with, from his own point of view, success. Leon's system of "taming," as is perhaps generally known, consists in the subjection of the animal to be operated on by an ingenious and most effective arrangement of bits, gags and cords, while Sample, after securely boxing up his patient, brings him into close proximity with a steam engine, and having familiarized him with its noises while under restraint, afterward drives him right up to it. Both men gave demonstrations of their respective methods with a fair amount of success, and it is understood the committee will award points nightly and give their decision at the end of the fortnight.—London Telegraph.

Slavery Still Exists.

A slave dhow, captured recently by H. M. S. Blanche, has just been condemned. She was on her way to Pemba when the attention of the officer of the watch was attracted by the unusual number of Arabs in a dhow standing in toward the land. On boarding her the dhow was found to contain thirty-three slaves and to have come from Pangani. Three of the slaves were selected by chance to be examined in the prize court.

Of these two came from the neighborhood of Mombasa. One, a male, said that he had been sold by his brother on account of famine prevailing in the district; the other, a young woman, said that a year ago she had been sold by an Arab of Mombasa, and had eventually been sold to the captain of the dhow; the third slave was a little boy, and when examined he said he came from Unyamwezi with a caravan. The captain of the dhow said it was the business of the people on the coast to sell slaves, and that he had paid for every one of the thirty-three slaves and had not stolen or kidnaped any. The slaves were turned over to the missionaries, and the captain and Arab crew have been dealt with by the sultan of Zanzibar.—London Army and Navy Gazette.

Mr. Locke's Fortunate Find.

I. N. Locke, of Wayne county, was formerly an active trader. In May, 1872, he was in Chicago, and bought a lot for a small sum. He put the deed in an envelope and placed it in his pocket with other papers. A few days afterward, while getting into his buggy, he lost the envelope and all its contents. He advertised for it, but really cared only for the notes, thinking the lot of little value. John Ritchey, a victim of softening of the brain, was wandering aimlessly on the street the day Locke lost his papers. He found them and laid them away, and even after his death no notice was taken of the supposed worthless papers.

About ten days ago John Ritchey found the package and gave it to Mr. Locke, and through his attorneys his claim has been established. Had the deed remained concealed a few days longer the twenty years would have expired and no claim would have been allowable. It is a lot in the boulevard addition, and the parties occupying it have given Mr. Locke $20,000 for a quit claim. —Indianapolis News.

The Coming Car.

We believe that cable road practice has reached the stage where but little room is left for improvement. They have been developed, improved and operated by the best engineering skill which the country affords. Nearly all are on a good dividend paying basis; but whatever the past experience of the two systems has been, or whatever the present status of the two may be, we are only voicing the convictions of well informed engineers when we say that electric systems will continue to increase in efficiency (by which is meant earning capacity) until all rivals are distanced, and only one method of rapid transit is recognized—the electric car.—Electrical Engineer.

Something About Oranges.

It is orange season again, and those who are fond of them are very glad to get their favorite fruit once more. It is possible to buy oranges at any season of the year, and as nearly everybody likes them there is a steady demand for the fruit all the year round. But the orange months have always been from December until May. Oranges are sweet then and very juicy.

This year, however, it has been discovered that oranges can be easily brought all the way from Brazil, and as the Brazilian oranges are at their best in November there is a plenty of them to be found now.—Exchange.

Bishops in Convention.

As with so many similar gatherings, the really interesting side of the Episcopal general convention that recently ended its sessions in Baltimore did not come out in the daily reports of its formal proceedings. Besides the regular meetings, which were of course important in their way, there were held daily gatherings of the bishops and deputies in the hotel reading rooms, which were enlivened with many entertaining anecdotes and personal experiences.

A few of these possibly partook of the nature of the chestnut. One heard, for instance, how a boy once tried to sell some kittens to Bishop Brooks on the plea that they were Episcopal kittens, and how a few days later he tried to sell the same kittens to a Baptist clergyman walking with the bishop, alleging that they were Baptist kittens, and how he explained the discrepancy in his story to the bishop by saying that they had had their eyes opened in the meanwhile.

This and a few other stories about the bishop have apparently been touched with immortality. Like the fabled Antaeus, they renew their strength whenever they fall to the ground. But there were plenty of fresh stories also. The morning after Bishop Brooks preached in Immanuel church a deputy asked a well known Baltimore churchman who had been present how the bishop had acquitted himself. "Magnificently," was the answer. "Eleven women fainted before he began."—New York Tribune.

A Great Scotch Mansion.

Invercauld House, where Sir Algernon Borthwick has been entertaining the Prince of Wales, the Duke of Connaught and Prince Henry of Battenberg, is the ancient seat of the Farquharsons, of Invercauld, near Braemar. The place has been let to Sir Algernon Borthwick since the death of Colonel Farquharson at the easy rate of £4,500 a year. Invercauld is a very fine house, which was greatly enlarged and improved about seventeen years ago, and it occupies one of the most beautiful sites in the highlands.

The Dee flows a short distance below the house, and woods and tree clad rocks are all around, with the mountains as a background.

Invercauld has always enjoyed the reputation of being the finest situated country seat in Aberdeenshire, and in variety and beauty and grandeur the surrounding scenery is not surpassed in Scotland. The great deer forest of Invercauld is one of the best in the highlands, and the grouse moors afford first rate sport, and there is a long stretch of excellent salmon fishing in the Dee. The Farquhason estates extend to about 90,000 acres.—St. James Budget.

A Tramp's Exciting Ride.

A tramp giving his name as John Fair appeared at the police station bruised from head to foot, and asked permission to sleep in a cell until morning. Fair said he had come to Atchison from Omaha on a through stock train, and had the most terrible experience of his life. Shortly before the train pulled out of Omaha, the tramp said, he crawled into a car which was loaded with steers. The steers soon began to step on him, and seeing this would never do the tramp climbed on the back of one animal. This enraged the steer, and it lunged forward, exciting the other steers, when there was a panic.

The maddened steers dashed about, hooking each other and striking the tramp on all sides. He put his arms about the neck of the steer which he was riding and held his grip until the train stopped at Atchison. The tramp's head had struck the top of the car a number of times, and it was badly bruised.—Atchison Globe.

She Did Not Go to the Theater.

He and she are married and reside at the west end. She wanted to attend the theater. He didn't. There was another man in the case, and the other man was of course only too delighted to accompany the wife. She had a new and very chic costume and donned it for the occasion. We do that for "the other man," naturally, though maybe we wouldn't for our own private and particular man. She came down to dinner adorned in the elegant frock and maybe boasted a bit to the husband. She asserted that she was going to the theater with Mr. ——, etc. He chewed a cigarette and said nothing. The bell rang, and the servant announced the arrival of the escort. He (the husband) still said nothing, but he picked madam (his wife) up in his arms, and when he sat her down it was in the bathtub filled with water. The new costume shared the ducking. That's all. N. B.—Madam didn't go to the theater after all!—Boston Courier.

Salmon on the Northwest Coast.

The fall run of salmon at Coos bay, Alsea, Nestucca, Yaquina and other points along the coast has been unusually large, and the fish are very fine. In a few places canneries have been in operation, and considerable quantities of fish have been packed at some of them, but in some places the cans ran out and further supplies could not be obtained. In other places the catch of fish could not be utilized, as no salt or barrels were to be had. Parties offered to make contracts for salt salmon, but as last year the fall run was light, no one thought it worth while to lay in a supply of salt and barrels for this season. So when a good run of fish came no profit was made out of them.—Portland Oregonian.

How Gold Coin Loses Its Weight.

The loss which gold coin suffers in circulation was illustrated in the custom house yesterday. George W. Sheldon & Co. sent $15,000 in gold coin to pay duties on imports, and the amount was counted and sent over to the subtreasury. A little while later the subtreasury sent it back with notice that the amount was $1,935 short. On investigation it was found that though the face value of the coin was $15,000 by weight the gold lacked nearly $2,000 of that value. The paying bank was notified and sent a gold certificate for the balance.—Chicago Tribune.

Cold Nerve in a Robber.

The bold thief who a few weeks ago tried to kill Charles Wonnell when the latter refused to quietly submit to seeing his house robbed returned to Wonnell's house about 4 o'clock yesterday morning, and knocking at Mr. Wonnell's window until he was aroused made a proposition to sell the watch secured upon the night of the burglary. Wonnell replied that he couldn't buy the watch then if he wanted to, as he had no money in the house, and added that he did not care to buy the watch back.

"Well," replied the man outside the window, "you will surely give something for it. Will you give me ten dollars for it?"

Wonnell asked how he knew it was the stolen watch, and was told that a brother knight in Wonnell's lodge, K. of H., had told him that it was, and that it had the proper initials engraved upon it. The man said he had bought the watch, but refused to give his name, saying when asked, "Oh, you wouldn't know me if I told you my name." Wonnell finally told the man that if he would leave the watch at Frank Hosbrook's grocery he (Wonnell) would leave ten dallars at the same place.

The man departed, but the watch was not left at the grocery. Mr. Wonnel thinks he recognized the voice of his last visitor as that of the burglar, and believes that the proposition to sell the watch was but a ruse to induce him to open the door, when he would be overpowered and compelled to submit to another robbery.—Indianapolis Journal.

A Baby Climbs a Ladder.

Think of a baby twenty-four hours old climbing a stepladder! It was rather an undersized infant for that age too. Of course it could not climb up by itself, so the nurse carried it in her arms. It did not cry, but clapped its hands delightedly. The child was a little boy and the climbing of the stepladder took place in the very room where he was born. The mother regarded it as an important event evidently. It was by her orders that the performance took place. Her interest was none the less because it was all for the sake of gratifying an old time superstition.

Monthly nurses all agree that if a baby goes down stairs before it goes up stairs its path in life will be downward and ill luck will attend it. Accordingly precautions should be taken against such an omen. In this instance the child having been born on the top floor of the house it could not be carried up stairs, and therefore its mother had suggested the ingenious plan of having a stepladder brought into the room so that nurse could mount it with baby in her arms.

But that was not all. A small Testament was attached by a string to the child's arm and in its chubby little fist was placed a gold dollar. Thus reasonable certainty was secured that the boy would grow up both rich and pious. At the same time it seems very odd to see such superstitious observances practiced in the city of Washington in the year 1892.—Washington Star.

MISCELLANEOUS.

ORDER FIXING TIME AND PLACE FOR HEARING OF PETITION TO LEASE CERTAIN REAL ESTATE AND DIRECTING NOTICE TO BE GIVEN.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the Estate of John William Meyer, deceased.

Upon reading and filing the petition of John W. Lacey, praying that the Administrator of this estate of John William Meyer, deceased, be authorized, empowered, and directed to lease real estate belonging to said estate, which is described as follows, to wit:

The N. E. ¼, the N. ½ of the S. E. ¼, and the N. E. ¼ of the N. W. ¼ of Section No. 24, and the S. W. ¼ of the S. E. ¼ of Section No. 14, all in Township 14 South, Range 35, East, M. D. M., in the County of Inyo, State of California,

It is ordered that all persons interested in said estate appear before the above-entitled Court on the 16th day of December, A. D. 1892, at the hour of 10 o'clock a. m., at the Court-room of said Court, to show cause if any they can, why the said real estate should not be leased for the annual rental of $200.00, as is more fully set forth in said petition, reference to which is hereb made for further particulars.

It is further ordered that a copy of this order be published at least two successive weeks in the Inyo Independent, a newspaper of general circulation, printed and published in said Inyo County.

Dated November 23rd, 1892.

GEO. M. GILL.
Judge of the Superior Court.

[Endorsed.]
SUPERIOR COURT, COUNTY OF INYO.

In the Matter of the Estate of John William Meyer, deceased.

Order fixing time and place for hearing of petition to lease certain real estate and directing notice to be given.

Filed November 23rd, 1892.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY, the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hannah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North-west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence Northwesterly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North-East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the Northwest quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and alls bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

BORN.

GORMAN—At Independence, January 1, 1893, to Mr. and Mrs. J. S. Gorman a son.

MARRIED.

BURTON—VASEY—At Bishop, Dec. 24, 1882, by Rev. C. L. Logan, Alexander Burton and Miss Nellie Vasey.

LEETE—FORD—Near Bishop, Dec. 25, 1892, by Rev. C. L. Logan, B. M. Leete and Miss Nettie W. Ford.

KENDALL—PEELER—At Bishop Dec. 25, 1892, by Rev. G. W. De La Matyr, assisted by Rev. C. L. Logan, Rev. W. W. Kendall and Mrs. E. Peeler.

THOMAS—MCCALL—At Lone Pine, Jan. 1, 1893, by Rev. H. J. Winsor, John William Thomas, and Mrs. Mary Mc Call.

DIED.

BOLAND—Killed at Cerro Gordo, Dec. 29, 1892, Henry B. Boland a native of Pennsylvania, aged about 42 years.

T. C. Bolond came up from Keeler early in the week. He is able to walk about but is still weak and lame.

No trace of Crapo had been found at latest reports from Cerro Gordo. Sheriff Gorman is expected back from there to-morrow morning.

The Trustees' meeting called for Dec. 31, 1892, is postponed to Jan. 7, 1893, when bids will be opened for proposed new Church at Lone Pine.

The company are still busy studying their parts in the play of "Caste," to be performed at Independence on Washington birthday. Reserved seats for the entertainment can be secured at Rhine's store.

The Supervisors met on Tuesday. The two new members, Freeman and Wilson, took their places, all the old members present. The Board at once went to work and are still busy, with much yet to do. A full report will be given next week.

The Firemen's Fund and Commercial Union are two of the strongest and best Insurance Companies in existence. Both Companies have paid large sums for insurance in Inyo county without trouble to insurers. A. W. Eibeshutz is agent for these companies.

Tax-payers may be interested to know that the sum of four hundred and sixty-five dollars has been allowed by the Supervisors at this meeting for coyote scalps. A large proportion of the whole goes to Indians. There are needed improvements for which this money could be used to much better advantage; for instance, a fire proof vault for county records, improvement of roads and bridges, and other useful ways. This law should be repealed without delay. Every farmer in Inyo County wishes it had never been enacted.

J. J. Moore leaves here to-morrow morning for Fairhaven, Washington. One of the oldest settlers in Inyo county, he carries with him the esteem and respect of all who knew him. Repeatedly elected to the office of County Treasurer, having the care, year after year, of large sums of public money, there never was found in his accounts any discrepancy nor one cent missing. He declined a renomination for the same office at the last election. As Postmaster at Independence several years he was ever ready to serve the public in season and out of season with patience and courtesy that never tired. It is but echoing the general voice to say may good fortune attend him in his new home.

To Hunt For Diamonds.

It is reported that there are indications of diamonds in Inyo county, and that parties in San Francisco are preparing to make a thorough search for the gems. If the prospectors fail to find the glittering stones we can show them plenty of eyes among our girls that will outshine the brightest diamonds they ever saw.

FOR THE STATE EXHIBIT.

A Fine Collection of Indian Work.

The World's Fair Manager at San Francisco has written to Mrs. Eibeshutz of Independence, asking her to send a collection of Indian bead work, baskets and other things she is possessed of, to the preliminary display of State products to be held at San Francisco soon. In the collection are collars, belts, hatbands and other articles of bead work. The work on these is really beautiful; the designs and management of colors show true taste in art, and the patience needed to accomplish so much is wonderful. Every article in the collection was made by Indians of Owens Valley. A person who should see the articles, but who is unacquainted with Indians, would surely think that the designs must have been originated by artists trained in form and color, and executed from patterns. But all this work was done by ordinary Indian squaws, the selection of colors and arrangement of design confined to the mind of the worker. The most delicate colors are blended and harmonized as well as in work from the best art schools. To see these women sitting in their wretched huts, or in the sand among the sage brush, their fingers busy with the small beads, it would never enter the mind of a civilized person that such beauty should come from such sordid surroundings; but just as the most exquisite and delicate colors may be developed in a rough and ugly looking sea shell, so nature shows her wonderful power here. An extensive assortment of basket work makes part of the collection. These articles are of graceful form and the work so fine that the vessels hold water like earthenware. One of the baskets has twelve figures of men worked in colored strips plaited in with the other material of the basket. All the articles have figures worked in colors. There is also a fine collection of spear and arrow heads of obsidian. There is one specimen that was of especial value among the Indians, this is a belt of buckskin upon which are fastened circular pieces of abalone shells from the size of a ten cent piece up to pieces of two inches in diameter. Before the coming of the whites this was used as money among the Indians, and as they very rarely travel outside the territory of each small tribe, the shells mus have passed through many hands coming from the ocean, two hundred and fifty miles away, before it reached the Indians of Owens Valley, and been proportionally valuable. The collection will certainly attract a good deal of attention at the State exhibit.

A silver butter knife, the handle inlaid with shell work, and blade and handle handsomely engraved, have been added to the collection; also some more very fine basket work from Saline Valley. The knife is the work of an Indian now in prison. The whole collection is now packed and ready for shipment to San Francisco to-morrow. It will be exhibited along with a beautiful display of Inyo marble.

An Explanation in Order.

Since the late meeting of the Grand Jury there has been some talk effecting a prominent county officer, and the talk is spreading. The County Assessor is the officer spoken of, and if the assertions made are not true it would be very unjust to Mr. Chalfant to allow them to be repeated without contradiction or explanation. The talk is to the following effect:—The Sheriff is ex-officio Tax Collector, and is allowed a fee of six per cent upon all taxes collected by him; but he is paid a salary in full compensation for all official services, and all the fees he collects are turned in to the County Treasury. It is alleged that Mr. Chalfant made a proposition to a number of tax-payers, that if they would pay their taxes to him he would retain the six per cent fee for collection and divide equally with the tax-payer. The names of a number of parties are given as having entered into this arrangement, and among the rest several members of the Grand Jury. Other names are given of parties to whom, it is alleged, Mr. Chalfant has made the same proposition, but who refused to enter into any such scheme. If these discreditable charges have no foundation in fact they ought to be met publicly, so that the talk must cease and the character of the officer be protected from injustice.

Nine Hundred Dollars Reward.

A reward of nine hundred dollars is offered for the arrest of William Crapo for the murder of H. B. Boland. Supervisors offer four hundred, and upon a presentation of the facts to the Governor by Assemblyman Mack, he promptly offered a reward of five hundred dollars, all the money at his disposal for that purpose. A description of Crapo is as follows:—Height about 5 feet 7 inches; weight about 147 pounds; eyes large and blue, or steel gray; beard long and gray; age about 47 years, but looks older; a native of Illinois; served in the Union Army during the rebellion. Crapo is a surveyor of experience, much better educated than the average man and at times apt to be dictatorial in manner when talking with men whom he regards as not so well informed as himself. He was engaged in mining at Cerro Gordo many years. About twenty years ago he went from Inyo county to Wood River, Idaho, but did not stay away long till he returned to Cerro Gordo.

An Old Score.

At several past meetings the Supervisors have considered a bill without taking final action thereon. At one time the County Superintendent of Schools ordered printing to the amount of eighty-two dollars. There was no authority in law for this action. The Supervisors would like to pay Mr. Chalfant for his work, but will not exceed their lawful authority to do so. District Attorney Forbes has not been able to find any law under which the bill may be paid and has consulted the State Attorney-General. It would surely not be expecting too much from a County Superintendent that he should know the law governing his own action.

J. J. Jones and family left Keeler last Tuesday to make their future home at Oakland. Since the Soda Works first started Mr. Jones had been at Keeler in charge of the machinery.

Quite a sensation was made in Sacramento last Monday evening when W. Foote formally withdrew from the Senatorial contest. Mr. Foote said he would not be the cause of a contest that might prevent the election of a Senator by the Legislature, and thus put it within the power of the Governor to appoint some Republican. This virtually left Stephen M. White without any opponent. Republicans were calculating that the populists would stand firm for a candidate of their own; and as neither Democrats nor Republicans would then have a majority on joint ballot, a Senator could not be elected, and in that event the choice of a Senator would lie with the Governor. But some of the Populists said they would not be so blind as persist in a course that might lead to M. H. DeYoung being chosen Senator, and when it came to a final vote would support a candidate who could be elected.

MISCELLANEOUS.

DELINQUENT SALE NOTICE.

STEVENS DITCH COMPANY.

Manufacturer of Comb Foundation.

Have you written me yet? If you haven't, do so and intelligent ambition engaged write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address,

E. C. ALLEN, Box 420, Augusta, Maine.

27% Difference

The "Royal" the Strongest and Purest Baking Powder.

Whether any other baking powder is equal to "Royal," let the official reports decide. When the different powders were purchased on the open market and examined by Prof. Chandler, of the New-York Board of Health, the result showed that Royal Baking Powder contained twenty-seven per cent. greater strength than any other brand.

When compared in money value, this difference would be as follows:

If one pound of Royal Baking Powder sells for 50 cents,

One pound of no other powder is worth over 36 cents.

If another baking powder is forced upon you by the grocer in place of the Royal, see that you are charged the correspondingly lower price.

Repentance without amendment is like continually pumping without stopping the leak.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Every man has two educations—that which is given to him and that which he gives to himself.

TRADE S.S.S. MARK.

CURES SCROFULA

Mrs. E. J. Rowell, Medford, Mass., says her mother has been cured of Scrofula by the use of four bottles of S.S.S. after having had much other treatment, and being reduced to quite a low condition of health, as it was thought she could not live.

INHERITED SCROFULA

S.S.S. Cured my little boy of hereditary scrofula which appeared all over his face. For a year I had given up all hope of his recovery, when finally I was induced to use S.S.S. A few bottles cured him and no symptoms of the disease remain.

SHE WAS HUNGRY.

How the Poetic Youth Was Reminded of the Realities of Life.

They were sitting on the piazza of the hotel at the beach, watching the moon as it slowly rose out of the slumbering sea. Silence was around them, naught being heard save occasionally the faint clatter of dishes in the adjacent restaurant or the musical hum of an aristocratic musquito that was making as vain a search for a blue blooded person as Diogenes did for an honest man. It was the hour for love, sweet, pure, delicious love. The youth felt it in his soul as he sat there by the side of the beautiful maiden whose silken hair almost touched his shoulder. Suddenly he spoke in low but thrilling and passionate tones:

"To the poetic temperament, to the soul that is capable of feeling the tenderest emotions, that throbs in unison with the harmony of nature, and is susceptible to the influence of the beautiful, there is a peculiar fascination in a scene like this. The balmy air, the rising moon, the twinkling stars, the contiguity of one of the fairest of creation's most perfect work, all unite to awaken in the heart its softest, tenderest feeling—love. Don't you think so, Mehitable?"

"I do. Oh, George, don't them baked clams smell nice!"—Boston Courier.

Checked Eavesdropping.

Corrigan—I want a warrant for Tim Hogan's arrist.

Sergeant—What's the charge?

Corrigan—Ungintlemany assault. He run a rid-hot poker out through th' kayhole av his dure an' near broiled th' ear av me lasht night.—Judge.

Detroit Is Way Behind.

"I've had all of Detroit I want," observed a man who was waiting for a train at the Wabash depot the other day.

"Don't you like the place?" queried the one addressed.

"Naw! I came here hopeful, but am going away disgusted."

"What were you looking for?"

"Why, I was thinking of going into the milk business. That's my business in St. Louis."

"Do you find it overcrowded?"

"Not exactly overcrowded, although there are enough in it, but I find that there is a law under which milk is inspected."

"But shouldn't it be?"

"It's an insult on the dealers, sir—a regular insult. It's the same as saying that they would be dishonest if they could. I wouldn't stand it one minute, sir—not a minute!"

He got up to walk around and cool his wrath, and a paper which fell from his pocket was picked up and passed around the group. It read:

"To one pound of whiting add four gallons of water and mix with ten gallons of milk."—Detroit Free Press.

An Insulted Poet.

Caller (hesitatingly)—I have here a little production of my own which I should like to have you use for your poet's corner if——

Editor (facetiously)—Poet's corner? Certainly. We're all poet scorners in this office. The janitor, perhaps, may find some use——

Caller (stiffening up)—The poem, sir, is descriptive of my patent hedge trimmer, and I was going to ask you if a dollar a line would be sufficient compensation for publishing it as an advertisement. I don't mind your allusion to the janitor, but that diddledy-dad banged chestnut about the poet scorner makes me tired. Don't get between me and the door, sir, if you please. I don't want any explanations or apologies. You shouldn't have this poem now if you got down on your knees for it. Good morning, sir, and be hanged to you.—Chicago Tribune.

Juvenile Jokes.

A little girl on Fourteenth street saw a tally ho coach come down the hill the other day and heard the music of the horns.

"Mamma," she asked thoughtfully, "can cows blow their horns like that?"

A small boy in Le Droit Park was told by the nurse that if he was bad the devil would come up out of the ground and carry him off. That afternoon he was discovered on the brink of a deep hole which he had dug in the back yard, defiantly calling, "Debble, debble!"—Washington Post.

M. Zola attacks his critics for being angry with him for stating the whole truth about the war. To do so was, he declares, a duty. France was nearly ruined because she believed in the French trooper "as the conqueror of the world, singing as he runs across fallen kingdoms." He resolved to teach his fellow countrymen that war was "a thing too serious, too terrible for us to lie about." "I concealed nothing, I sought to show how a nation like our own, after so many victories, could be so miserably beaten, and I wished also to show out of what depths we have raised ourselves in twenty years, and in what a blood bath a strong people can be regenerated. My profound conviction is that if the falsely patriotic lie begins again * * * we shall again be beaten." That at least is sound advice.—London Spectator.

What Becomes of the "Tomboy."

And what of that little nondescript known as the tomboy? What become of the romping, hoydenish girl who much prefers the society of the naughtiest boys to the nice, well behaved daughters of respectable neighbors, and who cannot endure the quiet game with the aforementioned cherubs and their meek dolls, who have such a tiresome fashion of forever smiling up into one's face.

Does she still continue to enjoy masculine sports when she has arrived at years of discretion? Is she still inclined to torn frocks, disheveled locks and an abhorrence of all those things girls hold most dear? As far as our observation goes we would most flatly say no, quite the reverse. The greatest tomboy we ever knew turned out to be the most demure creature at twenty that we could imagine.

She took to fancy work and hospital visiting with a vigor that seemed must be meant to atone for all those years when she could not be induced, save under the threat of being kept in the house, to take up a needle and struggle with the unhappy bit of patchwork that never seemed to progress beyond a most unsightly square that had been used to wipe away the tears from a very dirty little face bent over the obnoxious bit of ladylike employment, and the hospitals served to make up for the abhorrence of those childish days of anything that savored of respectable self sacrifice.

Many other instances we have known where the most charming women have been evolved from the rude little tomboy girl; therefore, mothers, do not despair if the small daughter shows a decided penchant for tops and marbles rather than dolls and sewing.—Philadelphia Times.

A Story from Paris.

I was residing in Paris as representative of a London firm. An English girl, who accompanied my wife to the French capital as upper servant, was married soon after our arrival there to a young French artisan, who almost immediately disappeared. He had been knocked down by a runaway team and wounded in the head. He was conveyed to a hospital, and when he recovered his past life was a blank to him. He could not even remember his name. He drifted about, living upon charity, until strong enough to work, when he secured employment, and by industry and economy acquired a snug little sum of money.

One day his wife met him and threw herself into his arms. He did not remember her, but seemed delighted to meet one who knew him and tell him of his past life. He came home with her, and both my wife and myself identified him. He did not yet realize his relationship to the young woman, but asked if she was not his sister. I thought the young wife's heart would break. I believed the fellow was shamming and spoke to him pretty sharply. He then told his story and referred me to the hospital physician, who certified to its truth. He was perfectly sane, but could not recall a single instance in his life prior to the time he was run down in the streets. He accepted his wife, resumed his name and they are very happy together, but the first twenty five years of his life are still a blank to him.—Interview in St. Louis Globe-Democrat.

A Joker Among Birds.

The bluejay is the most persistent practical joker in the feathered kingdom. He will conceal himself in a clump of leaves near the spot where small birds are accustomed to gather, and when they are enjoying themselves in their own fashion will suddenly frighten them almost to death by screaming out like a hawk. Of course they scatter in every direction, and when they do so the mischievous rascal gives vent to a cackle that sounds very much like a laugh. If he confined his pranks to such jokes as this, however, he would not be such a bad neighbor to birds smaller than himself, but when he amuses himself by breaking the eggs in their nests and tearing the young to pieces with his bill he becomes a pestilent nuisance, and they often combine their forces to drive him out of the neighborhood. They do not always succeed, for he is as full of fight as of mischief, but a severe conflict teaches him that they, too, have their rights, and this induces him to mend his manners.—Toronto Mail.

Fishing for Sponges.

The British consul in his report on the trade of Tripoli remarks that the sponge fishery on that coast is entirely in the hands of Greeks, and is carried on by means of numerous small craft, employing about 700 men among them. The fishing takes place in the summer months only and is effected by machine boats provided with proper diving apparatus, or by trawlers and harpoon boats. The diving machines, as the divers have time to select and cut them, naturally secure the best sponges, but the trawl nets and harpoon boats, which can only fish in comparatively shallow waters, to a greater or less extent damage the sponges by tearing them from the bottom.

The best sponges are found to the westward of Tripoli, the quality becoming inferior toward the east. The diving is dangerous, owing to the presence of sharks, and other accidents to be met with, such as remaining too long under the water or diving beyond the proper limits, which often exhausts the divers and proves fatal to them.—English Mechanic.

Hardly an Encore.

A quartet was giving a concert before the patients of the insane hospital and was singing a number into a rather mournful cadence and a subdued refrain. The audience, with the best of good humor, such as invariably characterizes the audiences at the hospital, heard it to the bitter end, and when its last note had died away an old lady with a virtuous and dignified air of reconciliation on her face popped suddenly up out of the audience, and turning toward the stage said reverently, "O Lord! forgive them, for they know not what they do."—Lewiston Journal.

A Young Hopeful.

"Are your children doing well at school?" was asked of a fashionable woman.

"Very well, particularly Clarence. I have great hopes of him. Why, I can't read a word he writes. I think he is going to be literary."—Arkansaw Traveler.

Solicitous.

Railway Official—M'sieu, your valet has been run over and cut into a dozen pieces!

Languid Englishman—Haw! Be good enough, please, to bring the piece that—haw!—contains the key of my hat box—haw!—Half Holiday.

The Deserter and His Pipe.

A Commonwealth avenue physician had been dining with a few professional cronies, and as the cigars were lighted the talk drifted to the tobacco habit, first, in its effect upon the race at large, and then to its peculiar effects upon various individuals. I know a man, said the elder physician—in fact, he is now in my employ—who is a victim of the strangest whims in regard to the use of the weed that ever came under my observation. He is a Scotchman, about 60 years old. Twelve years ago he deserted from the English navy and came to this country, when I gave him a position as coachman. One morning I went into the stable, and noticed that a hole about two feet square had been cut in a partition between two stalls, and a little shelf had been nailed up underneath it. I wondered what on earth it had been done for, but Donald was away at the time and when he came back it had slipped my mind.

It was a week afterward before I had occasion to go into the stable again, and when I did I found Donald standing on a stool, leaning his elbow on the shelf, with a long clay pipe in his mouth, smoking away like a good one and blowing the smoke through the little window he had cut. Upon my questioning him he told me that of the twenty years he had passed in her majesty's service ten of it had been on board a powder ship where the rules against smoking were very strict. During all this time he had been accustomed four times a day to stand upon a chest and lean out of a porthole to smoke, so that no one would smell it, and when at last he took French leave he found that he could not get any satisfaction out of a pipe unless indulged in the old posture, and so you can find him after each meal and for half an hour before going to bed, standing on that stool blowing his smoke through the little window.—Boston Herald.

Too Willing to Be Acceptable.

A needy Frenchman once heard that a marriage was on the tapis between the daughter of a certain wealthy merchant and the son of a rich banker. The dowry that was to be given to the bride was 500,000 francs. The merchant was well known to be on the lookout for a good bargain or to save a dollar, so on this the Parisian founded his hopes on a good dinner at least.

He accordingly called at the merchant's residence and asked the privilege of seeing him on very important business. After a while he was admitted to his presence.

"The matter, sir, on which I call," he began, "involves for you the practical saving of 250,000 francs. I"——

"Oh, my dear sir," interrupted the merchant, "this is too serious to be discussed before dinner, and as it is now my hour for dining, pray take dinner with me, and we will afterward consider your proposition at our leisure."

Having partaken of a meal that left a pleasant flavor in the unfortunate's memory the rest of his life they returned to the merchant's study.

"And now I am ready to hear your proposal," he remarked.

The Parisian after a moment's thought began:

"I understand, sir, your daughter is to be shortly married to the son of the banker D'Argent."

"Yes, that is true."

"And that her dowry is half a million?"

This was also assented to.

"Well, then, here is my idea. I am ready to take her for half that sum, and thus you will save or gain exactly 250,000 francs.—Philadelphia Times.

A Newspaper Proprietor's Whims.

"James Gordon Bennett's methods are peculiar," said an old newspaper man in an interview with a reporter. "He once brought up a man from an outside town to work the police courts. After a day or two he just as quickly sent him back to work there on space rates. The boy got rather rattled and declared he would get even with Bennett. He did. There was a bad smash-up on the road, and he sent an exclusive account to The Sun. Bennett of course wanted to know why The Herald was beat, and when he learned it was his whilom police man who had scooped him he sent for him again and made him assistant dramatic editor. He said he should not beat him again.

"Shortly afterward, when in Paris, Bennett cabled this man to come there and act as city editor of the Paris edition. He went, and remained for two weeks, when Bennett, who had gone elsewhere, telegraphed him to go to London and report to Oakey Hall, who then had charge of the London edition. Hall told him he had no work for him, and sent a message to Bennett to that effect. Bennett then at once replied, 'Tell him to go to hades.' Probably he did, for he remained in London."—Pittsburg Dispatch.

Test of Quickness in Fencing.

A very interesting method of testing the quickness of a sword thrust consists in photo-chronographic measurement. The movement of the foil point is too quick to be measured by the eye, but by the aid of the photo-chronographic apparatus it can be plainly shown. The fencer is dressed in white, placed in front of a black background, the foil is chalked and a metallic "spangle" is fastened to the tip by wax. The photo-chronographic machine being set in rotation, the trajectory of the tip of the foil during the movement of the fencer is shown by a series of dots.

As two successive images are one-fifteenth of a second apart in time, it follows that by counting these images the entire time occupied from the beginning to the end of the movement can be determined. In a recent test it was found that the stroke occupied a little less than four tenths of a second. By this means two swordsmen can be compared, and their relative quickness easily and exactly determined.—New York Commercial Advertiser.

Over 40,000 Hotels in the Country.

Does any one dispute my assertion that there are 40,000 hotels in this country? I have only to point out to you that there are over 60,000 postoffices enumerated in the official directory by the authority of the government, and as every one knows there is never a postoffice anywhere but a hotel is a nearby and necessary adjunct, and as there are many hotels in great cities where there is but one postoffice it is reasonable to conclude that there are as many hotels as postoffices in the United States. Therefore I maintain that my estimate of 40,000 hotels is considerably below a reasonable estimate.—Hotel Register.

After "Potluck."

She—Wasn't Mrs. Tiptop's supper delightful?

He—It was horrid.

"What nonsense! I never in my life saw such a display of silver. And such china! It must have cost a fortune."

"She sets a mighty mean table."

"Table? It's solid mahogany inlaid with ebony and gold."—Good News.

To My Canary.

Sing, sing, my bird! Lift high your song;
Strike every note both full and strong;
Nor need you, like jail birds, when caught,
Discomfort self with this dire thought:
Sing sing, my bird
—Carlyle Smith in Harper's Bazar.

Self Preservation.

Wealthy Old Gent—What! Marry my daughter? You are being supported by your father.

Suitor—Yes, sir, but my father is tired of supporting me, and I thought I'd better get into another family.—New York Weekly.

THE HERCULES.

In placing the Hercules Gas or Gasoline Engine in the field in competition with other gas engines, we do so with the utmost confidence that we are "in it." Our system of operating this engine is so far ahead of all others that it needs but an introduction in any community to insure an immense sale. A woman can handle it. It requires no engineer. It can be started in an instant. No electric spark to get out of order. It oils itself. It beats all others. Write Palmer & Rey, 405 407 Sansome St., San Francisco for particulars. The price and capability will surprise you.

For Simplicity it Beats the World. It has Fewer Parts, and is therefore less likely to get out of order than any other Gas Engine now built.

Running Printing Machinery.

The engine is a daisy! It is up and in splendid running order, and *operates our presses in excellent shape*. We are more than pleased with it, and feel confident that we will be able to introduce the "Hercules" in this county in a manner largely to your interest. REED & HUTCHINSON.

ANGELS, CAL., Feb. 24, 1892.

Daily Newspaper and Job Office

We have used your four horse-power "Hercules" Gas Engine for nearly two months now, and have not yet failed to get our edition off on time; on the contrary, we find it the best investment we could have made. For convenience it cannot be beat. Unlike the steam engine it is clean, no coal to shovel into a furnace, no fires to get up, no water to watch to keep the boiler from going through the roof—indeed it is simple and economical in all respects, and we feel that in changing from steam to gas we have secured a donation of $100 per year to the office, independent of all other considerations, and that means that $100 is the difference in the cost of fuel per year between steam-power and gas power. Thanking you for past favors, including the great service done by you in putting an engine like the "Hercules" on the market, we are,

Yours truly, PENNYCOOK & HARRIER,
VALLEJO CAL., Jan. 14, 1892. Props. *Chronicle*.

Printers Pleased With It.

We beg leave to report to you on the success of one of your "Hercules" Gas Engines which is now in operation in our office. It is a one horse-power, and readily runs a large power press, and a jobber at the same time, and is then not working up to its full capacity. We have had no trouble whatever with the engine, and for neatness, convenience and power we consider it the best in the field. We are delighted with it, and with the experience had with it, and can heartily recommend the "Hercules" Engine to anyone. Truly yours,

SUTTER PUBLISHING CO.
Per L. H. Woodworth.

YUBA CITY, CAL., June 24, 1892.

A Leading San Jose Printer Says.

The two horse-power "Hercules" Engine bought last December, more than fulfils every promise you made for it. Am running two jobbers and a Cottrell Cylinder with it, and I am satisfied it would run as much more machinery with ease. I have not had the least trouble with it, and I can cheerfully recommend your engine to any one desiring a reliable and economical power. Have had considerable experience with other makes of gas engines, and do not hesitate to say that the "Hercules" beats them all. The hollow "tube" is a great improvement over the unreliable "spark," and what especially pleases me is that your engine developes more power than you claim for it—something that cannot be said of any other make of gas engine coming under my notice. I never bought a piece of machinery that has given me the satisfaction your engine has.

M. C. HARRIS.

SAN JOSE, CAL., June 24, 1892.

If some folks had their way about this world, says John Wright, how few people could live comfortably in it.

A HOUSEHOLD REMEDY.

ALLCOCK'S POROUS PLASTERS are the only reliable plasters ever produced. Fragrant, clean, inexpensive, and never failing; they fully meet all the requirements of a household remedy, and should always be kept on hand. For the relief and cure of weak back, weak muscles lameness, stiff or enlarged joints, pains in the chest, small of the back and around the hips, strains, stitches, and all local pains, ALLCOCK'S POROUS PLASTERS are unequalled.

Beware of imitations, and do not be deceived by misrepresentation. Ask for ALLCOCK'S, and let no solicitation or explanation induce you to accept a substitute.

The old-fashioned schoolmaster differed from ligature, because he struck several times in one place.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 808 Market street, San Francisco.

Mrs. Watts—How is your husband's rheumatism? Mrs. Potts—Better I think; or, at least I am getting more used to it.

A continuation of a Cough for any length of time causes irritation of the lungs, or some chronic Throat Disease. *"Brown's Bronchial Troches"* are an effective Cough Remedy. Price 25 cts. *Sold only in boxes.*

Attes must have learned something about the weight of the world.

Use Enamelne Stove Polish; no dust, no smell.

How to Come to a Stop.

SAINT JACOBS OIL

When we least expect them, accidents will befall us, a verification of the old adage that the unexpected always happens. The following recites how an active business man was suddenly brought down.

THE TRAIN STOPS.

CINCINN., O.—"Recently while in the act of alighting from my car, I stepped upon a stone, which, turning suddenly under my foot, threw me to the ground, with a severely sprained ankle.

THE MANAGER STOPS.

Suffering exceedingly, I was helped into my car, and my man rubbed me most generously with arnica and kindred remedies, but to no avail.

A POINT TO STOP AT.

Reaching a station where St. Jacobs Oil could be procured, two bottles of it were bought, and the application of it resulted at once in a relief from pain, which had well nigh become unbearable. I was out and about my work in three days."

W. W. PEABODY,
Prest. & Genl. Man. O. & M. R. R.

THAT'S THE ST. JACOBS OIL POINT

The Pain Stops.

A SOVEREIGN REMEDY.

Dr. Parker's Sure Cough Cure. One dose will stop a cough. It never fails. Try it. Price 25 cents a bottle. For sale by all druggists. Pacific Coast Agent, Geo. Dahlbender & Co., Druggists, 214 Kearny St., San Francisco.

Professor Swift of the Warner University says there are six comets now visible in the heavens—a regular posse comet at us, as it were.

A HERALD OF THE INFANT YEAR.

Clip the last thirty years or more from the century, and the segment will represent the term of the unbounded popularity of Hostetter's Stomach Bitters. The opening of the year 1893 will be signalized by the appearance of a fresh Almanac of the Bitters, in which the uses, operation and action of this world famous medicine will be duly set forth. Everybody should read it. The calendar and astronomical calculations to be found in this brochure are always astonishingly accurate, and the statistics, illustrations, humor and other reading matter rich in interest and full of profit. The Hostetter Company, of Pittsburgh, Pa., publish it themselves. They employ more than sixty hands in the mechanical work, and more than eleven months in the year are consumed in its preparation. It can be obtained without cost of all druggists and country dealers, and is printed in English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish.

Tom—Poor girl, she is rich and beautiful, but she has St. Vitus' dance. Jack—Is that all ails her? Somebody said she had got the Delsarte.

STATE OF OHIO, CITY OF TOLEDO, } ss.
LUCAS COUNTY,

COPYRIGHT 1891

You're through with Catarrh, finally and completely—or you have $500 in cash.

That's what is promised you, no matter how bad your case or of how long standing, by the proprietors of Dr. Sage's Catarrh Remedy.

Catarrh can be cured. Not with the poisonous, irritating snuffs and strong, caustic solutions, that simply palliate for a time, or perhaps, drive the disease to the lungs—but with Dr. Sage's Remedy.

The worst cases yield to its mild, soothing, cleansing and healing properties. "Cold in the Head," needs but a few applications. Catarrhal Headache, and all the effects of Catarrh in the Head—such as offensive breath, loss or impairment of the senses of taste, smell and hearing, watering or weak eyes—are at once relieved and cured.

In thousands of cases, where everything else has failed, Dr. Sage's Remedy has produced perfect and permanent cures. That gives its proprietors faith to make the offer. It's $500, or a cure. They mean to pay you, if they can't cure you. But they mean to *cure* you, and they can.

ASTHMA CURED by SWEDISH ASTHMA CURE. *Sample mailed free.* COLLINS BROS. MEDICINE CO., St. Louis, Mo.

THE GUARDIAN ANGEL.

Baby, sleep and dread no harm; clasped in that protecting arm,
Not a breath of ill shall come to thy angel guarded home.
Older eyes may weeping waken, older hearts may grieve forsaken.
Thou art safe in cradled rest, birdling in a happy nest.
'Tis a weary world, no doubt, but thou hast not found it out;
Only love has sheltered thee, from a thousand perils free.
Coming to the world a stranger, thou hast known nor fear nor danger;
Little king from morn till night, ruling in thy sovereign right,
Golden head on pillow laid; violet eyes 'neath silken shade;
Dimpled hands and dainty feet; cheeks like roses, flushed and sweet.
Gift of gifts to mother given, making home an earthly heaven,
'Neath the spreading angel wings, where the child's own angel sings.
Far and wide the angels fly, sweeping down the starlit sky,
Some to watch o'er beds of pain, some to hover o'er the main.
This to bid a bright dream perish, that a sunny hope to cherish,
But the dearest angel still guards the household pet from ill.
Here and there are brawl and strife, there and here is buoyant life—
Dancing feet that trip to measure, hearts that throb with gayest pleasure.
In the baby's day is calm, isles of peace in seas of balm,
And the baby has no care, yet too young for guile or snare.
Life shall bring thee many a grace, baby, in this holy place,
Health and wealth and youth and fire, love and joy and heart's desire.
Never in the time to be shall the angel turn from thee,
Never, till the heavens are dim, cease to chant thy cradle hymn.
As I watch the angel light in that guardian form to-night
Something dual baffles thought, strangely are my fancies wrought.
Could the look be less Elysian if the radiant heavenly vision
Wore no pinions floating wide, wore no beauty glorified,
Only looked as mothers do when the mother heart breaks through
Eyes that were the baby's sky, though no seraph waited nigh?

—Harper's Bazar.

GIRLS AWAY FROM HOME.

Valuable Suggestions to Young Women Who Are Obliged to Travel.

The girl who is going away from home quite by herself, and who will have to travel for several days and nights on the cars, who will be at a strange hotel by herself, wants a little advice about what to do. Her number may be many, so I prefer to tell her in this little paragraph: In buying her ticket for the trip she also buys a ticket for her sleeper, and the railway official will arrange that if she does not get the entire section the other birth is also occupied by a lady. When she wishes to go to bed the porter, at her request, will arrange the berth for her, and then out of the small sachel that she has provided she will take the dark flannel or delaine dressing gown in which she intends to sleep, and go to the toilet room and put this on. Her clothes are hung by the berth, and while she is advised to remove her dress, skirt and corsets and her shoes, it will be wiser to retain some of her underwear and her stockings, not only because of the draught, but because of the facility of getting into things the next morning. Get up early and go to the toilet room, but do not monopolize it for hours.

When you reach a strange city get into the stage that belongs to the hotel to which you wish to go, get out at the ladies' entrance, go into the reception room and say that you wish some one sent from the office to you. Tell whoever comes exactly what kind of a room you want, and ask the price of it. Give him your name to register, and remember while you are alone in a public house it is not wise to dress in any except a quiet way. No trouble about ordering your meals should be experienced, as the bill of fare shows exactly what is served, and you can take your choice.

As to "tipping," you will certainly give a small tip to the porter who straps and locks your trunks for you, and to any bell boy in the hotel who shows you some special service. If you are only there for a few hours it is not necessary for you to tip the waiter nor the chambermaid, unless she also should do some act of kindness for you such as brushing your gown, getting the piece of soap that you have forgotten, or putting a stitch in a ripped frock.

Although it is not pleasant to be alone, still I do firmly believe that a well bred girl with a clear head and an understanding mind can go without any trouble from California to New York, and receive nothing but courteous attention.

The dont's are these:

Don't dress loudly.

Don't make any acquaintances on the car or in hotels.

Don't sit alone in public parlors. Better by far stay in your own room and read than make yourself an object of comment.

Make up your mind to be courteous and polite, but reserved, and all men will be like Chevalier Bayards to you, and all women will give you what you demand—respect.—Ruth Ashmore in Ladies' Home Journal.

The Limenas.

Every traveler who has visited Lima writes enthusiastically about the charms of the ladies, and attempts to analyze the characteristics of their features and gait. All that has been said in praise of the Limenas is well merited, except the comparisons which would give them a unique position in the hierarchy of feminine beauty. Pretty ladies with white skins, regular features, fine liquid black eyes, and a well ordained distribution of flesh are to be seen by the score in Lima; but, as a rule, it seems to me that their beauty is shown to singular advantage by the extreme simplicity of their costume, which allows only the face to be seen, the whiteness of the flesh and the brilliancy of the eyes being set off by the contrast of the dull black manta. In modern Parisian costume the Limenas look less remarkable, and from the point of view of combined beauty, elegance and vivacity, I should be inclined, so far as concerns South America, to give the first place to the beauties of the Banda Oriental, and especially of its capital, Montevideo. Nevertheless, far be it from me to disparage the Limenas.—Theodore Child in Harper's.

Remarkable Age and Remarkable Name.

At San Martin, near Atacapotzal, there resides a pure Indian woman who is believed to be 115 years of age. Her descendants are numerous, and count among their number sons and daughters, grandchildren, great-grandchildren and great-great-grandchildren. She owns documents proving that she carried on lawsuits with Viceroy Venegas while Spain still held dominion in Mexico. Her husband died about eight years ago in his ninety-eighth year. The name by which she is known is Torres, but her true name is Ixcahuaxochitl.—City of Mexico Universal.

Ownership of a Letter.

Under the postal regulations of the United States and the rulings of the highest courts a letter does not belong to the person to whom it is sent until it is delivered to him.

The writer has a right to reclaim and regain possession of it, provided he can prove to the satisfaction of the postmaster at the office from which it was sent, that he was the writer of it.

Even after the letter has arrived at the office which is its destination, and before it has been delivered to the person to whom it is addressed, it may be recalled by the writer by telegraph through the mailing office.

The regulations of the postoffice department of course require that the utmost care shall be taken by the postmaster at the office of mailing to ascertain that the person who desires to withdraw the letter is really the one who is entitled to do so, and the postmaster is responsible for his error if he delivers the letter to an imposter or an unauthorized person.

The vital principle in our political system lies at the bottom of this matter. In this country the state is the servant or agent of the citizen—not his master. It remains merely his agent throughout the transmission of a letter. The state may prescribe regulations under which its own servants may carry a message for the citizen, but it cannot shirk its responsibility to him.—Youth's Companion.

Abandoned Farms a Blessing.

So far as has come under our notice, the well known general abandonment of hill farms in New England is almost universally bewailed. Though a sentiment of slight melancholy must usually attach to an abandoned homestead, we take a brighter view of the conditions, since these are to the advantage of the country at large. Abandoned hill farms especially will be allowed to grow up forests, and these afford their chiefest advantage to climate when they exist in elevated situations.

In such positions they not only serve to prevent evaporation of the moisture stored in the soil from rain falls, but are more influential as rain producers than in equal extent on low lands. In such elevated position they are generally regarded as preventives of lightning, as they serve to quietly equalize the electrical conditions of the atmosphere and earth, especially in the seasons of thunder storms.

The abandonment of these hill farms is the states' opportunity, since they may be purchased at a low figure, rescued from the greed of the dealer in cord wood and preserved forever to please the eye and to improve the climate of the country about.—Practical Electricity.

The Welsh Tongue.

The author of "Yorkshire Folk Talk" tells an amusing story of an English bishop's struggles to master the Welsh tongue. He had been appointed to the Welsh see of St. David, and on taking up his abode in Wales engaged a native Welsh scholar to give him instruction in the language. The pronunciation, and especially the ll, bothered the bishop, and the Welshman was almost at his wit's end to explain the lingual process by which the formidable sound was to be uttered.

At last a bright thought struck him, and being very obsequious in manner he thus addressed the bishop: "Your lordship must please put your episcopal tongue to the roof of your apostolic mouth and then hiss like a goose."

Tennyson's First Money.

Lord Tennyson, the poet laureate, is one of twelve children of a poor country clergyman, the Rev. George Clayton Tennyson, rector of Somersby, Lincolnshire. He began writing verses at a very early age. When his grandmother died, his grandfather asked him to write a poem on the sad event, and when the boy had read it to him he presented him with a shilling, remarking:

"There, that's the first money you have earned by writing poetry, and take my word for it it's the last."

This was an unfortunate prediction, for he has earned more money by his poems than any other person in the history of the whole world.—London Tit-Bits.

Chickens Eat Grasshoppers.

Common barnyard fowls are very efficient destroyers of grasshoppers. In one case referred to by a special agent of the department of agriculture an almond orchard containing 360 acres was attacked by migrating swarms. The house and barn were situated in the middle of the orchard, and the chickens browsed around them over an area of six or eight acres, which by August looked like a green oasis in the desert, the trees everywhere else having been stripped of their leaves by the voracious insects.—Washington Star.

Great Discoveries.

All great discoveries come in simple form and are ushered in without music or loud rejoicing. The greatest inventions come with the least outward show and noise. The scientist generally makes his experiment when wearied and discouraged, and when he is about ready to abandon the study.—New York Telegram.

THE INQUISITION.

An Institution of Torture That Existed in Spain for Generations.

CRUEL TREATMENT OF PRISONERS.

Victims are Numbered by Hundreds of Thousands.—Jews and Heretic Christians Put to Death.

Perhaps those who have accused Christopher Columbus of narrow, sectarian bigotry and of cruelty have not sufficiently taken into account the spirit of the age in which he lived. The intolerance, the bigotry and the merciless cruelty of that time are sufficiently illustrated in that most monstrous of institutions, the Spanish inquisition.

What is called the modern inquisition was established in Spain under the reign of Ferdinand and Isabella—sovereigns who possessed many of the elements of greatness, and who certainly brought Spain to a high position among the nations of the world. Yet it was under the reign of these two sovereigns that the monstrous inquisition was established.

This inquisition consisted of a commission consisting of several judges, whose duty it was to hunt out heretics and punish them. The primary object of the inquisition was to extirpate every trace of heterodoxy, and make a land where none but the orthodox could live. It succeeded in its attempt, but the history of its proceedings furnishes one of the most bloody narratives to which the race has ever listened.

The attention of the inquisition was first directed against the Jews. This thrifty race of people then, as now, were conspicuous for their financial importance. In the course of time many Christians became their debtors, and it is probable that the desire to escape these just debts frequently occasioned the seizure of these unfortunate Jews for heresy. The Christian not only did not feel it incumbent upon himself to pay his debts to heretics, but even all their property was confiscated.

These heretics could be accused anonymously, and it was not considered necessary to bring the accused and the accuser face to face. The accused heretic was seized without warning, conveyed to the chambers of the inquisition and rigidly kept from all intercourse with the outside world. No relative or friend to condole with him or to advise him was permitted to come into his presence. He was kept in ignorance of the charge upon which he was incarcerated. Counsel was allowed him, but this was a mere formality, for this counsel was not allowed to confer with him.

If the prisoner refused to confess his guilt, or was caught in evasions or contradictions, he was conveyed to the torture chamber, where he was submitted to the intensest agony which it is possible for human nerves to sustain. Doubtless many innocent men declared themselves guilty under this exquisite torture in order to escape the terrible agony. Indeed death was preferable to the torment.

The evidence upon which the heretics were convicted seems to us entirely insufficient. "The presumptive proofs," says Prescott, "by which the charge of Judaism was established against the accused are so curious that a few of them may deserve notice. It was considered a good evidence of the fact if the prisoner wore better clothes or cleaner linen on the Jewish Sabbath than on other days of the week; if he had no fire in his house the preceding evening; if he sat at table with Jews, or ate the meat of animals slaughtered by their hands, or drank a certain beverage held in much estimation by them; if he washed a corpse in warm water, or when dying turned his face to the wall; or, finally, if he gave Hebrew names to his children—a provision most whimsically cruel, since, by a law of Henry II, he was prohibited under severe penalties from giving them Christian names. He must have found it difficult to extricate himself from the horns of this dilemma."

While Torquemada was inquisitor general, a period of eighteen years, over 10,000 heretics were burned at the stake, nearly 7,000 burned in effigy and almost 100,000 subjected to heavy and ignominious penalties. This makes an average of over 6,000 persons annually.

The present degradation and degeneracy of Spain is due to this cause more than any other. Wherever fetters are put upon the human mind the race decays, shrivels and degenerates. Wherever freedom of thought is prohibited a race of intellectual pygmies must necessarily result. Humanity progresses through the influence of original minds, which do not think along the accepted lines of thought. This order of men it is which leads the world up to ever higher and higher conceptions, to higher and higher planes of living. It was this kind of men that the Spanish inquisition could find no better use for than burning at the stake.

So all the noblest thinkers of Spain were burned, all her original thinkers were either killed or suppressed and only commonplace minds, which accepted existing standards without investigation and without thought, were spared. It is no wonder that Spain dropped into an intellectual lethargy from which she has never revived. The inquisition was one of the most colossal mistakes in all history.—S. Watterson Ford in Yankee Blade.

It has frequently been noticed that the fingers of silk weavers are very long and taper, and, what is more curious, after several generations have been in the trade the children are born with excessively long fingers, and they can acquire the trade in about one-third of the time taken by an outsider born of parents engaged in other pursuits.

ALL HYENAS ARE NOT COWARDS.

Illustrative Encounters with Them in Somaliland.

Hyenas are noted as great cowards, but I have come across a few exceptions. When about sixty miles from Berbera, on my return journey, I camped close to a Somali zareba. Soon the head men came in and asked me to shoot a pack of six hyenas, as they had killed a great many sheep and goats. That morning they killed two sheep, and the same night jumped into the zareba and carried off a sheep and badly bit a young cow.

Next morning I saw two Somali men running after a hyena with spears, but he only kept about 100 yards in front, and as soon as they stopped he did the same and had a look at them, and on their returning he quietly walked on.

I was busy with a koodoo head at the time, so did not go after him, but evidently he wanted to see what I was doing and so came toward me. When about 100 yards off I put a bullet through his shoulders.

So much for No. 1. He knew how far a Somali could throw a spear, but not how far a rifle would carry.

Next day at noon we heard a great shouting about a mile off. After awhile I made out that a lion had killed one of my camels. I took the 4.50 express and started off. On arriving on the scene I found it was not a lion, but a hyena, and that the camel was not dead, but badly bitten on the hind parts.

A woman said the hyena was behind some low bushes about 150 yards off. The bushes, three in number, were only 2½ feet high and on an open plain. As the Somali men had been making a great noise I said nothing would stop there. However, I went to have a look, and when about seventy yards off the bush up came a head and took a good look at me, and then went down slowly, like a lion crouching. I went twenty yards closer, when up came the head to have another look. I took a steady aim, and next moment an express bullet between the eyes of a hyena finished him.

He was a very large and fat beast, with a good coat of hair, and had a good portion of a sheep in his inside.

Now I could imagine one going for a a camel if starved, but not when fat, and at midday, with a man and woman accompanying the camels—a thick bush within 200 yards on the left, if he had wanted to get away. Instead of doing so he kept to the open country, with three bushes hardly large enough to conceal him, and then held his ground until shot dead. I think it showed great pluck. End of No. 2.

In the night the men heard some of the others howling, so at daylight I went over to where I shot No. 2, and there, sure enough, were three more hyenas.

Just then one of the three picked up the dead one by the back and carried it in his mouth, with his head thrown up to keep it off the ground, only the feet trailing. He took it about sixty yards and put it under a bush. I lay still for a few minutes, and then the vultures came down, but the three hyenas drove them off. I then sat up and one of them saw me. As they were only 125 yards off, however, I had a good shot, and a hollow bullet behind the shoulder finished No. 3. The other two made off, so I left them.

In the afternoon one of my Somali men said there was a hyena keeping off the vultures. I went out with the glass and saw he had taken the last dead one about 200 yards up a stony hill with some large rocks on the top. He was just going back to the rocks after having made a sortie upon the vultures. I then went up toward the rocks, when out he came and took a good look, standing facing me.

It was a long shot, over 200 yards; but by good luck I put a bullet in the center of his throat, killing him instantly. This made the fourth. Next morning I went to take a look and there was one with the dead one shot the day before.—London Field.

Voices of Hens.

"Hens," says B. F. Taylor, "are vocal but not musical, unless one has an ear for filing and sawing. Their language is too rich in consonants; it is decidedly Saxon and without the softening accents of the Norman French. The call of something 'found' is quite as intelligible as the town crier with his bell. The defiant voice of the cock is a challenge in honest vernacular, and his triumphant crow is a hurrah in plain English. The announcement of an egg laid is expressive if not eloquent. The mother's cluck, cluck is veritable baby talk, and the yeep, eep, eep of the little chicks denotes happiness at home."

How soon these little fellows learn the cluck, cluck of the mother warning them that the robber hawk is soaring watchfully above, seeking whom he may devour.

The blue jay hates yet dreads the hawk, and frequently insults it by following and imitating its notes so exactly as to deceive those well acquainted with both.—Troy Times.

Mails in Early Days.

Boston's first newspaper, The News-Letter, contains the following advertisement, which is an exact copy of the original spelling, capitalization, etc.:

By order of the Post Master General of North America:

These are to give Notice, That on Monday night, the Sixth of this instant, December, the Western Post, Between Boston and New York, sets out at once a Fortnight the Three Winter Months of December, January and February, and to go Alternately from Boston to Saybrook and Hartford to Exchange the Mayles of letters with the New York Ryder on Saturday night the 11th Currant. And the second turn He sets out at Boston on Monday Night the 20th Currant to meet the New York Ryder at Hartford on Saturday night the 25th Currant to Exchange Mayles. And all persons that send Letters from Boston to Connecticut from and after the 13th Instant are Hereby Notified to first pay the Postrates on the same.

How Age Affects the Sexes.

Very few women grow old without becoming more patient, and the years seldom add up on a man's shoulders without making him more fretful.—Atchison Globe.

HE LIT OUT.

New Version of the Departure and Return of the Wayward Boy.

THERE WAS NO FATTED BOVINE.

An Aggrieved Youth Who Attempted to Follow the Example of the Prodigal Son of Bible Fame.

I am reminded of a certain willful boy—we have all either known or been just such a one—an aggrieved, unappreciated boy, who grew to dislike his own home very much, and found his parents not at all up to the standard of his requirements as a son and disciplinarian. So he brooded sullenly over his disheartening surroundings and limitations; and of course knowing the outside world would afford him advantages never to be found at home, he lit out one morning before breakfast, and climbing over the back fence and bitterly shaking his fist at the woodpile, he "vanished himself away" down the turnpike. Yes; he had at last put into execution his long muttered threatenings. He had run away from home!

His parents, at the discovery of his flight, bore up first rate—especially the father. Possibly he had been a much abused boy himself some time, and divined that even then his wayward son was disporting himself in the delights of the swimming hole—where in reality he was, and where he stoically remained throughout the day—save at one famishing interval in which he sneaked far enough away to raid a neighboring orchard. The other boys went home at dinner time—but he, alas! he had no home!

At least he tried to think these very words, and with very biting irony, but his lip trembled frequently that long, long feverish afternoon, and there was getting to be a knotted, rigid sort of an aching spot in his throat that seemed to hurt worse when he didn't notice it than when he did. It was a very curious, self-assertive, opinionated sort of a pain. But he wrestled with it and swallowed at it until almost dark; then, with the last straggling crowd of his companions, he moved torpidly in toward home, or rather oozed that way, with a loathful, hesitating, reluctant, late-election-returns characteristic, somewhat heightened perhaps by the inward resolve of chopping an armful of wood as he went in by way of the kitchen. And he did this, but the hired girl, who was washing the supper dishes, made no comment of any kind.

He ranged through the pantry with apparent carelessness, but the cupboard was locked. He went out to the porch, where, at least, the pump met him kindly and shook hands with him, and he drank long and deep to their more enduring acquaintance. The back yard, in the settling gloom, was lonesome, but it looked good, and the lightning bugs, against the grapevines, blinked at him with a kind of sallow gladness over his return. His heart was softening. He walked thoughtfully to the rain barrel at the corner of the house and peered in at the few faint stars reflected there. Then, moved by some strange impulse, he washed his feet.

He then went into the house and on straight into the room where sat his parents by the evening lamp. The father was intently reading the paper, the mother intently sewing. Neither looked up at his entrance, even reproachfully, and neither spoke. The boy drew a long, quavering sigh, and sat down on the remote edge of a chair. All was still in the room for a long time—very still; but everything seemed so kind and restful and old fashioned and homely and kin to him! Only if somebody would say something—or come and box him, anyhow!—anything. Why, Lord bless 'em, wasn't he there, ready to gratefully accept anything from them? But that silence! If the clock would only strike and drown the whispering, sifting sound of the katydids outside in the dewy grass.

From afar off, down some alien street, he heard the faint halloo of the boys at their nightly game of "town fox" with no desire whatever to be a participant in their sport—no, never again in the world! He just wanted to stay in of nights—right there at home—always. He coughed—hoarsely, too—and shifted his position—but no vaguest parental notice or solicitude in response—no word—no look. Oh, it was very still. He couldn't just remember any prior silence that at all approached it in point of such profundity of depth and density of hush. And he felt that he himself must break it; so, summing every subtle artifice of seeming nonchalance to his aid, and gazing pensively at the cat curled in its wonted corner of the hearth, at last he spoke out airily and said, "I see you've got the same old cat."—Indianapolis Journal.

Changed Methods of Attack.

There is no question that the gun is master in the gun armor fight. Armor has been driven from the complete covering of the broadside to narrow belts and isolated gun stations, and now it seems that the water line belt is likely to go. This latter change is not due so much to increased gun power as to change in the composition of the batteries, the introduction of high explosives and improvements in ship construction tending to lessen the danger of sinking if pierced at the water line.

It is not proposed to change materially the total weight of armor carried, but the weight of water line belt armor is to be distributed among the gun stations, loading tubes, conning tower, engine hatches, protective deck, and in the form of light side armor three to six inches thick, to prevent shells containing high explosives—nitroglycerine, melinite and similar compounds—from penetrating and exploding between decks. So far as known at present comparatively thin armor is sufficient to cause all the violent explosives to burst before penetration.—New York Herald.

She Got Her Dinner.

Not long ago a woman physician whose name would bring her honor anywhere, save—as it appeared—in a hotel, entered the cafe of a leading hotel early in the evening. She was alone, and when she asked to have dinner served the waiter told her that she could not be entertained there because she was unaccompanied by a man. She looked him full in the eyes, and then in tones whose authority there was no disobeying she said, "Bring me my dinner, and bring it at once!" And he did.—New York Evening Sun.

A Suggestion.

Frank—You won't be at the masquerade ball?

Jack (tall, thin and with a head of upright hair)—No. Can't decide on a character costume.

Frank—Powder your hair and go as a whitewash brush.—Pittsburg Bulletin.

NATURAL ICE IN SUMMER.

A Remarkable Phenomenon in the Caves of Northern California.

A correspondent who has recently visited certain sections of northern California reports an interesting phenomenon which scientists have up to this time been unable to explain.

There are holes in the ground—crevices and cracks in the lava beds—where ice forms the year around. There is no water to be seen, and if there is anything hotter than a lava bed in July it must be the same place in June. There are a good many of these natural ice factories in the remote corners of Shasta, Modoc and Siskiyou counties. The one that is most patronized is about fifty miles east of Sisson, fifteen miles from Little Hot Spring valley.

Once upon a time this country was a trembling, bubbling sea—not a sea of water, but of boiling, seething, molten rock. And the waves as they rose and broke became solid and fell back as blocks of lava. And when the surface was all cool the liquid fire inside burst through it and tore it apart, and now for twenty miles and more the country is covered with these torn, irregular blocks piled in fantastic shape on every side, and among them are strange gorges and corridors out of which come vague, uncanny sounds. The blocks ring like metal when your horse's hoofs strike them. It is a country of unexplained noises. From the bowels of mountains comes the noise of escaping steam. Out of the seemingly bottomless pits and gorges rises the rumble of what may be rivers, but peer into the depths until your head swims and you cannot see the water.

The ringing ground sounds hollow to your steps. It is hot walking over the lava beds, for of course you cannot traverse much of it on horseback.

It is rather weird to toil over them under the blazing sun until you are almost ready to drop from heat and exhaustion, and then step down into a break and find yourself standing on ice, no man knows how thick. It is cool in the caverns—cool, though the sun that has caused you so much trouble and fatigue outside shines right in upon the glassy floor.

There is a lava cliff thirty feet high, and at the base of it is an opening right into the rock. It is arched and generally bears a resemblance to a prospector's tunnel. The floor of the tunnel inside the cliff is hardly four feet below the level of the entrance. The floor is of perfectly smooth ice, and the sun beating in at the open area seems to make absolutely no impression on it.

From this cave the citizens of Fall River valley, Swazey and Fall River mills have for years taken their supply of ice.

A WORLD'S FAIR MANAGER.

A Colored Teacher of New York Who Has Been Highly Honored.

One of the managers of the New York state exhibit at the World's fair is a colored woman. She is the first of her race in the empire state to hold such a position. Her name is Imogen Howard, and she is one of the teachers in New York Grammar school, No. 81, the pupils of which are colored boys and girls. She is particularly intelligent, and is well educated. When Imogen Howard was still very young she was sent to the public schools of Boston, where her parents then lived, and she developed such a remarkable aptitude for study that she was graduated from the high school at the age of seventeen. In 1868 she removed to New York city and became a teacher in colored Grammar school, No. 81, in West Seventeenth street. There she has been ever since and there she proposes to remain, as she declares that her life is consecrated to the education and "lifting up" of the people of her race. She says that her scholars are bright and orderly, and the success with which so many of them have met after leaving school has encouraged her to continue in the work which she has laid out for herself.

IMOGEN HOWARD.

Imogen Howard is, however, no mere teacher, content to go through the world with the education she received at school. In fact, exactly the reverse is the case. She attended the Saturday sessions for teachers in the New York Normal college, and received the degree of A. M. During the present year she completed a three years' course in the school of pedagogy of the University of the City of New York and received the degree of doctor of pedagogy, being the only colored woman in the class.

New York's colored manager will serve on the committee on education. She will endeavor to interest people, especially those whose work is among the colored people, in woman's part in education in the Empire State.

Interesting Census Returns.

The census returns furnish some very interesting reading. For instance, there were 334,194 families in the state of Tennessee with an average of 5.29 persons to a family. There were 323,136 dwellings in the state with an average of 5.47 persons to a dwelling. Of course there was no decimal fraction of a person in any dwelling, but the figures make the averages stated. The total number of dwellings in the United States in 1890 was 12,483,318 and the average number of persons to a dwelling was 5.45. The total number of families in this country was 12,690,152 and the average number to a family 4.93.

The Growth of Canada.

The figures on last year's census in Canada are now coming out in very interesting bulletins. From that on manufactures it appears that in ten years the population in towns and cities has increased 38 per cent. and those engaged in manufactures 58 per cent. The establishments have increased 76.8 per cent., the capital employed 102 per cent., the wages paid 74 per cent. and the annual product 62.2 per cent. Each workman in 1881 received $284.26 and in 1891 $343.26; in the former year each produced $1,467 worth and the latter $1,600 worth.

Hebrews in the French Army.

The Marquis de Mores put forth a general insult to all the Israelites in the French army. One Captain Meyer challenged him and was killed, which brought out the fact that there are about 500 Hebrew officers in active service in the French army, among them being General Hinotin and five captains of artillery. Among the retired Hebrew generals are Lambert, Lewy, See, Brisac and Abraham. In the military school of St. Cyr there are at present fifteen Hebrew cadets.

NEGRO BELIEFS.

Queer Superstitions That Prevail Among the Darkies of the South.

BALL OF FEATHERS IN A PILLOW

The Grewsome Custom That is Practiced in the City of New Orleans.—A Difficult Task.

Webster defines superstition as a "belief in omens and prognostics," and further, "omen, a sign, a presage; prognostic, foreboding, token." Of all these definitions the only one used and understood by that most superstitious of all races, the African, is "sign." A sign of trouble, of sickness, of joy, of sorrow, of visitors, of accident, a voyage, a death!

If the cat washes her face with dainty touches of velvety paw, "Dat a sho' sign hit gwine to rain, Miss Nannie!" If Senor Cockalorum crows lustily three times before the door, "Gwine hab visitors dis day, Miss Nannie, sho's you' bawn!" If sparks scatter in golden showers from the chimney, "Don' move, chile, hit won't burn yo'; dat a sign money comin' to you." "Don' burn the egg shells, honey, case dat bring you sorrow." "Fo' de Lawd's sake, see dat rat run 'cross dat heyth [hearth]! You's got a bad enemy, chile, gwine to do you sum dirt." "Wha' for you kim back, honey? Don' you know you mustn't turn back arter you git sta'ted? Dat sho' sign you gwine to hab bad luck while you out. How cum you let Miss Flo lay her parasol on de bed? You an her be bad friends, sho', you see."

BALLS OF FEATHERS.

These and hundreds of similar sayings and superstitions are as familiar to southerners as the blue skies and fragrant blossoms of their sunny clime.

In the extreme south, more especially in Louisiana, and in New Orleans worst of all, where French, Spanish, Italian and African—all races peculiarly susceptible to occult influences—predominate, superstition runs riot.

Perhaps the most peculiar of the many methods adopted to work upon the superstitious negroes was the insertion by apparently supernatural means of balls of feathers into pillows and beds. I have myself examined these creations, and marveled at the skill displayed in their manufacture. The closest scrutiny failed to discover rip or newly sewed seam in bed or pillow tick, and yet the balls were found buried in the mattresses and among the soft feathers of pillows. They were made of soft, highly colored feathers, brilliant and gaudy, scarlet and gold, bright blue and vivid green, and were about the size and shape of an orange.

A peculiar odor was exhaled, and when lightly struck an almost impalpable powder arose. An inquisitive Jack of the family cut one of the queer objects in halves, and we found therein such an assortment as Shakespeare puts into his witches' caldron, as they brewed in darkness and tempest:

Fillet of a finny snake,
Eye of newt and toe of frog,
Wool of bat and tongue of dog,
Lizard's leg, and owlet's wing.

ALL SAINTS' DAY.

Certainly there were all sorts of horrible, unnamable objects. The soft, whitish powder that arose in high clouds when the balls were touched was undoubtedly some subtle, insidious poison, the secret of its composition perhaps handed down from the alchemy of the ancient Egyptians, and its constant inhalation during sleep was to cause a slow, lingering and eventually fatal illness, without apparent cause, to beset the unfortunate victim selected.

The creole negroes of New Orleans have a grewsome fashion of invoking a consummation of their wishes that I believe is entirely indigenous to the soil of that quaint cosmopolitan semi-foreign old city. Among the numerous fete days, high days and holidays that are scattered so liberally among the too sober pathway of the twelve months of the year none is more beautifully observed by the New Orleanaise than the first of November. This is by legal statute a state holiday, and in the Catholic and Episcopal church calendars All Saints' day, but in Louisiana, and particularly in the Crescent City, it is a day for the remembrance of the dead.

That tomb is, indeed, neglected and its occupant forgotten that does not bear a memento. From the simple conch shell, or perhaps only a little mass of white, glistening sand, with a paper rose stuck in its midst, to the elaborate, expensive floral tribute that crowns the lofty marble of the rich man's resting place, not one is left without decoration. A general pilgrimage to the many cemeteries in and around the city takes place, and its observance is universal to a surprising degree.

It is on that day the old cradle superstition tells you to pursue the following method if you want to have your wish, the dearest desire of your heart, fulfilled.

You must purchase beforehand a handkerchief, and it must not be used, but kept clean and white for this occasion.

On the eventful morning you must leave home as early as possible and also as quietly, and not a word or a sound must escape your lips from the time you close the door behind you until you return. You must go to a cemetery, enter the main gate, walk from there to the opposite wall, on the main avenue, and somewhere on its length you must pick up a piece of dirt; tie this in one corner of the new handkerchief, naturally expressing your most heartfelt wish.

Leave the cemetery by the same gate you entered, and make your way to a second; enter this and pursue the same course, tying a bit of dirt from the main walk into a second corner of the handkerchief with a second wish. Visit a third cemetery, and tie a third bit of dirt into a third corner of that blessed handkerchief, with a third and last wish. Return home, roll the handkerchief into a compact little ball, and toss it upon the top of an armoier, or on the cornice of a high window, or, perhaps, on the tester of the bed. Any high place that is likely to be undisturbed, save by spiders, will answer.

Then, and not until then, must you speak. The charm is broken if a single audible sound escapes during this rite. When it is remembered that you are most likely to meet your dearest friend and foe among the crowds that pass to and from the cemeteries, attending their own and viewing others' decorations, it will be seen that it is not an easy matter to keep absolutely quiet; but those wishes will come true before twelve moons have shed their rays upon you, and many and fearsome are the tales told by the old creole negresses of the "granted wishes" that in many cases proved to be indeed "scourges that sting."—St. Louis Republic.

Miss A. and Miss L. Thornton, sisters, of Butte City, Mont., have each $1,000,000, and yet they are attending college in Philadelphia.

INYO INDEPENDENT.

Ivy. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, JANUARY 13 1893

If for no other reason than the great rarity of the thing it will be a high gratification for the people of California to have a representative in the United States Senate. It is many and many years ago since California sent any man to the Senate who represented anything but corporations. Our Senators were our enemies by design and never our friends even by accident. Had the Republican party carried the State in the last election, a man would have been sent to the Senate who would have done all in his power to help the Central Pacific accomplish the gigantic steal for which they have long been preparing. Stephen M. White long ago, and again and again, strongly denounced the proposition to let the Central Pacific escape payment of the vast sum of money loaned them from the public treasury, and when the matter comes up in the Senate he can be relied upon to do his best to defeat the huge steal. Among many causes that helped to free California from the grip of the railroads, the certainty that Mr. White would be the choice of the Democrats was not the least. The people can safely congratulate themselves that in him they, and not corporations, are represented.

In his message to the Legislature the Governor says: "I know of no State in the Union with so cumbersome, expensive and inconvenient a systemof assessing property and collecting taxes as ours." So determined were the people of the State to put an end to the gross abuses that had grown out of the system of officers collecting fees, that a provision to remedy the evil was incorporated in the constitution adopted in 1879. In Article XI, Section 5, it is provided that the Legislature shall provide for the compensation of all county officers, and for the strict accountability of county and township officers for all fees which may be collected by them. Yet in spite of this constitutional provision to the contrary, it appears that under our system of assessment, officers do collect and retain fees, notwithstanding they are paid a salary in full compensation for all their services. Doubtless the Legislature will act upon the suggestion of the Governor and amend the law, so that without openly stealing, officers cannot convert to their own pockets money that belongs to the County Treasury. Several useful reforms in the system of assessment are suggested in the message.

The railroads owe over three millions of dollars delinquent taxes to the State. If the owner of a little home should be overtaken by misfortune so as to be unable to pay taxes, the little home would be promptly seized and sold at auction, even if the owner were a widow with a lot of helpless children. But these great railroad corporations, who have robbed the public of millions of dollars, set the law at defiance by aid of corrupt Courts and refuse to pay one dollar of this vast sum. An effort will be made in the Legislature to recover at least a part of what is due. Meantime every newspaper in the State that is under railroad influence is either silent about this gross wrong, or boldly tries to defend the robbery.

A Fall in Indianapolis.

"I once saw President Harrison in a very undignified position," said John G. Hunter, an Indianapolis traveling man. "Indianapolis was one of the first cities afflicted by the roller skating craze. A young man named Fenton, living there, was the inventor of the contrivance, and he soon had the city wild. Russell caught the infection and became an expert. One night he prevailed upon his father to visit the rink. The future president looked on the maze of skaters gliding over the smooth floor. It seemed easy enough. He was a famous ice skater in his boyhood, and like most others believed that a man who could keep his head off the surface of a frozen pond could not be easily downed. He secured a pair of skates, examined them critically and looked irresolute. In those days the man who hesitated was lost. Half a dozen ladies—old, young and middle aged—pirouetted about him on wheels and urged him to the trial.

"An attendant had his feet chained down to the starmakers before he hardly realized it. He struck out with his left, followed with his right, and did amazingly well. It was no trick after all! But he got no farther. One foot shot out to the east; the other made a Columbian voyage of discovery to the west. They circled around each other like an erratic comet chasing its tail, and the future hope of the nation came down with a crash that made the gas jets flicker. In less than three seconds half of Indianapolis was on top of him, and his head was just visible peering out from the wilderness of striped hosiery and crushed hats. He sat up when he got an opportunity, removed the skates went over to the attendant, handed him the offending rollers with a polite bow and walked out. That was his first visit to the rink and his last."—St. Louis Globe-Democrat.

Farmer Bratt Rides Down.

Eight years ago Emery Bratt, an aged farmer and one of the largest farmers in Genesee county, "came down Salt river" when Cleveland was elected. He rode a mule, which was decorated as profusely as himself. Four years ago Mr. Bratt was among the first to acknowledge that he was beaten, and following his established custom rode through the main streets of Batavia upon his mule "on his way up Salt river."

Mr. Bratt had made a statement publicly since the campaign opened to the effect that he was fattening his mule, and that they were coming back this year. Hundreds of citizens and business men gathered about to see Mr. Bratt "come down" Wednesday morning. The mule was attired in red, white and blue, with Mr. Bratt upon his back blowing a large tin horn. A hundred enthusiastic boys were soon in his wake blowing tin horns, and the drum corps was soon in line also. The sidewalks were devoted to the unique parade, and all pedestrians gave way. Mr. Bratt's quadrennial parade is becoming historical.—Cor. Buffalo Courier.

An Editor Honored.

Saturday all his brethren of The Public Ledger, of Philadelphia, united in giving a reception at the Drexel institute in honor of Colonel M. Richards Muckle. The colonel is one of the oldest and most popular members of The Ledger family. He has been in its service for half a century, and the reception was in graceful recognition of that fact. A German by descent, although born in Philadelphia, he has always been prominent in efforts for the welfare of the Germans.

For this work, and especially for assisting in the restoration of the Strasburg library, which was destroyed in the Franco-Prussian war, he was twice decorated by the old Emperor William—once with the ribbon and the patent of the Order of the Crown, and again with that of the Black Eagle, which is only conferred upon kings and foreign potentates. He has the distinction of being the only native American to be thus ennobled.—New York Tribune.

Fine Sport in Georgia.

The greatest nimrod of the age, Bink Savage, told Bill Hilsman that there were several flocks of turkeys doing great damage to his pea crop on the swamp. He therefore baited several places with corn, and on finding that the game was eating his bait, decided to go next morning and kill a lot of them. That night he examined "Old Betsy" carefully and found her in fine fix, but on looking up his ammunition found that he had not a grain of powder or an ounce of shot.

An old darky standing near by saw his dilemma. He had just returned from town with a gallon of pure corn whisky, and, says he, "Mars' Bink, let's soak the next lot of corn in the whisky, an if dey eat dat dey is sho' drunk." Bink caught on. The result was he found a flock of sixteen fine wild turkeys on a high old drunk, and with his walking stick soon killed the whole flock.—Albany (Ga.) Herald.

Something New in Peanut Roasters.

"Peanutta, machina roasted!" said an Italian peanut vender in the Bowery yesterday to a group of people who stood around a small model of a working steam engine, to which he pointed with pride. The steam engine had a little metal manikin turning a glass cylinder, and the engine puffed and turned out the roasted peanuts in a stream. The machine looked too costly a toy for the Italian to own. It evidently is an experiment, and means an eruption of peanut roasting machines in every sheltered nook down town. The Italian did a fine trade, the novelty of the contrivance attracting nearly every passerby, and about one out of every five became a purchaser.—New York Sun.

A Chance for Inventors.

A prize of 3,000 francs has been offered by Baron Leon de Lenval, of Nice, to the inventor of the best application of the principles of the microphone in the construction of a portable apparatus for the improvement of hearing in deaf people.

A Peculiar Find.

Mrs. J. W. Hood had a peculiar experience a few days ago. She was searching for a mislaid article and was rummaging about on the closet shelves, when she laid her hand on a lady's gold watch. It did not belong to her, and she was at a loss to understand how it came there. The incident worried her so that she finally went to the office where Mr. Hood is employed to tell him about it. Mr. Hood was as much surprised as his wife, and advised her to make a further investigation. Upon her return home she again went to the closet shelf and there found her silver spoons, which she had packed away in a trunk in another room a few days before.

The only satisfactory explanation they could find was that burglars had been in the house and had the gold watch with them. They probably found the silver spoons, and were looking in the closet for other valuables when they became frightened and hurried away, leaving the watch and spoons lying on the shelf. Mrs. Hood has advertised the watch, but so far has failed to find an owner.—Chicago Journal.

Plant Shade Trees.

Again the time of year has rolled around when deciduous trees shed their leaves. The best time to transplant deciduous trees is during the fall of their leaves in the autumn and the bursting of the buds into leaf in the spring. There is little choice in many portions of this country as to what particular time during the period mentioned trees should be transplanted so that the soil is in proper condition. In this section, where winter is well defined, the planting period is divided by cold weather into fall and spring, and the relative advantages of the seasons are less a matter of moment than the fact that not nearly as many trees are planted in either as there ought to be. However, this is an opportune time to remind those who have a place to plant a tree that fall is a better time than spring to set out trees.—McKeesport Times.

ORDER FIXING TIME AND PLACE FOR HEARING OF PETITION TO LEASE CERTAIN REAL ESTATE AND DIRECTING NOTICE TO BE GIVEN.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the Estate of John William Meyer, deceased.

Upon reading and filing the petition of John V. Lacey, praying that the Administrator of the estate of John William Meyer, deceased, be authorized, empowered, and directed to lease real estate belonging to said estate, which is described as follows, to wit:

The N. E. ¼, the N. ½ of the S. E. ¼, and the S. E. ¼ of the N. W. ¼ of Section No. 23, and the S. W. ¼ of the S. E. ¼ of Section No. 14, all in Township 14 South, Range 35, East, M. D. M., in the County of Inyo, State of California.

It is ordered that all persons interested in said estate appear before the above-entitled Court on the 6th day of December, A. D. 1892, at the hour of 10 o'clock a. m., at the Court-room of said Court, to show cause if any they can, why the said real estate should not be leased for the annual rental of $200 00, as is more fully set forth in said petition, reference to which is hereby made for further particulars.

It is further ordered that a copy of this order be published at least two successive weeks in the Inyo Independent, a newspaper of general circulation, printed and published in said Inyo County.

Dated November 23rd, 1892.
GEO. M. GILL,
Judge of the Superior Court.

[Endorsed.]
SUPERIOR COURT, COUNTY OF INYO.

In the Matter of the Estate of John William Meyer, deceased.

Order fixing time and place for hearing of petition to lease certain real estate and directing notice to be given.

Filed November 23rd, 1892.
J. N. YANDELL, Clerk.

Mack & Laird, Attorneys for Administrator.

DELINQUENT SALE NOTICE.

STEVENS DITCH COMPANY.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death, in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 89-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South east quarter, and the North-west quarter and the North east quarter of the Northwest quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-nine and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Religious Services.

Rev. H. J. Winsor will preach on Sunday at Lone Pine 11 a. m., Georges Creek 2:30 p. m; Independence 7 p. m.

Sunday Schools, Fort and Lone Pine 10 a. m.; Independence, 2 p. m.

Special Evangelical services each evening next week in M. E. Church.

Mr. and Mrs. W. A. Chalfant made a short visit to Independence at the end of last week.

John Reddy will go down on the train this afternoon on his way home to Darwin from Sacramento.

Mr. Caminetti is hard at work in Congress, pushing through several bills for the benefit of California.

Mrs. D. J. Hessian and her children came to Independence yesterday. Mr. Hessian has leased the Reddy place and will occupy it with his family during his term of office as County Clerk.

To-morrow night the officers of the Masonic Lodge at Independence will be publicly installed at Masonic hall. After the installation the members of the Lodge will meet at a banquet at Mairs'.

C. W. Rathbun, teacher at Georges Creek, left here yesterday for Stockton. His family live there, and a telegram came stating that his daughter, aged 10 years, had died. He said that it was not his intention to return here.

It is now the proper caper in amateur theatricals for the leading lady to stab the leading gent through the heart. Bert declares that the play to be offered at Independence on Washington's Birthday will be up to the times if he has to offer his own "buzzom" to the deadly digger.

The first meeting of the re-organized Board of Supervisors was watched with a good deal of interest. There was an unusual amount of business to be done, and since the Board adjourned expressions have been heard from all sides that the work was accomplished in a prompt, fair and business-like manner.

The Sheriff has not yet got any trace of Crapo. A man named Johnson started from Cerro Gordo a day or so after the murder of H. B. Boland; he went to Saline valley thinking Crapo might have gone that way. Nothing has yet been heard from Johnson, and some days ago the Sheriff sent an Indian upon his trail, fearing that something may have happened to him. The region toward which Johnson went is an utter desert.

Last Monday afternoon Doctor I. J. Woodin of Independence was called by telegram to Big Pine. Next day a telegram called him from there to Lone Pine, and since then telegrams from both places have kept him on the road from one to the other night and day. When passing through Independence going from one place to the other he has only stopped long enough to look after his patients here and then drive on. The distance from Big Pine to Lone Pine is forty-three miles, and these repeated journeys night and day, with but scant time to eat or sleep must be trying.

We are so used to clear skies and bright sunshine that we rarely ever mention weather, except to growl if an unpleasant day occurs once in a long while. But since Christmas the weather has been so delightful that occasional remarks prove some folks are conscious of the fact. In truth the stolidity of an ox might be moved enough to make him raise his head and look in admiration over the long grassy plains of the valley, while the meadow larks sing around him and the mighty mountains on either side tower with their snow covered summits into the clear blue sky.

Assemblyman Mack of this District has been placed upon the following committees: Ways and Means, Judiciary, Mines and Mining, Public Buildings and Grounds, Swamp and Overflowed Lands, and Chairman of the Committee on Public Lands. These are the most important Committees of the Assembly. Our member is on more committees than any other member of the Assembly, and has thus received more recognition than was ever before accorded to any member from this District. He has introduced the following bills: To pay expenses of witnesses in criminal cases. To make it a felony to sell or give liquor to Indians. To increase salaries of Mono county officers, and a bill to tax legacies, bequests and inheritances. This last is an especially good measure; if it becomes a law large estates of deceased persons will be made to pay at least enough to cover the heavy expense coming out of the public treasury, when such estates are settled up.

THE DISTRICT ATTORNEY.

OFFICE OF DISTRICT ATTORNEY,
INDEPENDENCE, INYO CO., CAL.,
January 9th, 1893.

ED. INYO INDEPENDENT:—In the last issue of the Inyo *Register* I noticed an article wherein the gifted editor of that journal of civilization attempts to cast reflections on the performance of the duties appertaining to the office of the District Attorney, the personel of that office not meeting the approbation of that most eminent critic and guardian of the public weal.

I hereby challenge the aforesaid gifted editor to point his ponderous finger to any law or duty that has been violated by the District Attorney in the matter mentioned. If the District Attorney has any discretion in such matters it is safe to say that such discretion will not be exercised by any seven by nine editor in the County of Inyo or elsewhere.

In mentioning the action of the Grand Jury in the case of the People vs. William Crapo, wherein he is charged with an offence against the elective franchise, the *Register* says: "The Grand Jury Report was filed in the Superior Court on Saturday, December 24th. The warrant for his arrest, now in the possession of the Sheriff, was not issued until Friday, December 30, 1892, the next day after the shooting at Cerro Gordo; so says the *Index*." Now the *Index* says nothing of the kind, only mentions dates; neither does the *Index* attempt to establish any connection between the issuance of the warrant and the shooting at Cerro Gordo, as the *Register* evidently attempts to do, and in which he has doubtless succeeded; but how he has succeeded will ever remain a mystery, except that the editor is gifted with the spirit of prophecy, which seems to be ever gushing forth from this inexhaustible fountain in never failing streams. The *Register* adds: "The reasons for the possibly fatal delay in this matter are not at all apparent to the public."

Now Mr. Editor, surnamed the "Public," allow your humble servant to propound a few simple questions and submit some brief observations thereon.

If the aforesaid gifted editor knew that the shooting at Cerro Gordo was to happen, which some might doubt, why did he not inform the unfortunate victims of that lamentable occurrence; and surely, aided by the spirit of prophecy, he cannot fail to explain the connection between the shooting and a warrant for the apprehension of a party for an offence committed long prior hereto. Perhaps had the Sheriff attempted to serve the warrant prior to the shooting, provided it had been issued, might not as serious consequences have followed in one case as in the other. Now Mr. Editor, sieze your divining rod, wrap your brawny person in the mantle of prophecy and solve this mystery, or Witch of Endor like, call up Samuel—don't raise Ned.

Brian, the Monk, at the behest of Roderick Dhu, wrapped himself in the reeking hide of Duncraggan's milk white bull that he might thereby be aided in divining the result of the clash of arms then threatening between that immortal Scottish Chieftain and the forces of King James. But no such dire resort as the "Taghairn" appears to be at all necessary in the present case. The abnormal hide of an abnormal editor appears to be more efficacious than the traditional bull hide above mentioned.

If the District Attorney has violated the law or his duty in this matter, it surely would be proper to investigate such violation and the *Register* is hereby invited to institute such investigation; not to indulge in cowardly thrusts to provoke an answer, or wage a newspaper war where no good can ensue, where the public would be surfeited with malodorous and unseemly articles as have been heretofore inflicted, where the weapons are entirely in the hands of one party. No such investigation has been hinted at by the *Register*; therefore it is difficult to discern how the public or the Editor of the *Register*, that synonym therefor, can in any manner be benefited by the tracks of his gifted pen. (Query) It is better to suffer the shafts and slings of outrageous fortune than to fly to evils we know not of.

Why should this editor attempt, even by imputation, to lay the blame of a homicide at the door of the District Attorney, when he confesses that his only ground therefor is his inability to understand the situation, which of course implies grave complications.

On the 22nd of December, 1886 two indictments were filed in the Superior Court of the County of Inyo; yet no steps were ever taken for the apprehension of the parties charged by the then incumbent of the District Attorney's office; yet the *Register*, who had then more knowledge to the square mile of his carcass than he now possesses, and who was then as much the public as he is at present, never penned a line nor uttered a protest there-against, though the parties charged were daily within the view of a peace officer. Perhaps his glances into futurity disclosed no "possibly fatal delay," hence his vigorous silence in that matter contradistinguished from the course pursued in this; might lead unreflecting persons to imagine him to be a respector of persons, one greatly above another, and not the actions of the aforesaid persons; a peculiarity not shared with him by the great Creator of the universe.

Even had said Editor conveyed to the District Attorney the visions of his prophetic soul, and the said Crapo been arrested, could he not have given a bond for his appearance for trial? Could he not have returned to Cerro Gordo, and could he not then have taken the added vengeance due for this interference with his august person. The *Register* will scarcely forget having published a complete vindication of the conduct of Crapo on election day, and why this remarkable change of front? I would rather be a toad and live on the vapors of a dungeon than be the wretched chaff that may be blown from post to pillar by the slightest breath of altered circumstances.

Say *Register*, you had better behave, and save your space for explanations that have been already demanded, and probably founded on unjust accusations, and wherein the "public" will doubtless get more than it pays for.

Regretting that it has been necessary to at all notice this malicious sling, whatever may be the future course of the *Register*, I will endeavor to refrain from further answering my assailant.

P. W. FORBES.

Miss Teresa Walker of Olancha is in town since New Year, visiting with friends, of whom she has many at Independence.

For several days I. H. Mulholland has been confined to his bed by sickness. He is now getting better and expects to be able to get about again in a few days.

SUPERVISORS' PROCEEDINGS.

TUESDAY, Jan. 3, 1893.

On the above named day the Board of Supervisors met in regular session, all the members present.

Supervisor Love was elected Chairman.

Ordered, That all Election Officers be allowed six dollars per day.

Ordered, That a reward of $400 be offered for the arrest of Wm. Crapo.

WEDNESDAY, Jan. 4, 1893.

The sum of $555 was allowed for coyote scalps.

Ordered, That $2 50 be a fixed price for conveying indigent sick from Independence depot to the Hospital.

The following claims were allowed:

C S Meroney, taking testimony	$ 3 30

THURSDAY, Jan 5, 1893.

Frank Elijah allowed $10 for coyote scalps.

Ordered, That warrant in favor of Buffalo Portable Steel House Co. be revoked and a new warrant drawn in sum of $244 53.

The Board then proceeded to pass on various bills.

Proposals for new fire-proof vault were examined. R. Way presented bid in sum of $4,185.

FRIDAY, Jan. 6, 1893.

Board examined, accepted and approved Quarterly Reports of Treasurer and Auditor.

Contract for building vault was let to R. Way, and he was ordered to give a good and sufficient bond for perfotmance of the work.

Resignation of H. E. Wilkinson as Justice of the Peace accepted.

SATURDAY, Jan. 7, 1893

Ordered, That County Clerk be authorized to procure books for use of County Hospital.

Reports of the various Road Overseers accepted and claims allowed.

Upon petition A. C. McDonald was appointed Justice of the Peace in 24 Township and C. Mulholland in 34 Township.

S. A. Densmore was allowed rebate of taxes.

Ordered, That the sum of $135 be apportioned out of the Bridge Fund for repairs of Independence bridge by O. Hampton.

Ordered, That $122 be set aside for a pile driver.

Claim of Margaret Lewis allowed, $175.

Ordered, That $265 be set aside for a bridge at Collins' ford.

Ordered, That each Supervisor be authorized to take charge of all roads in his respective district.

Ordered, That the Auditor be authorized to draw his warrant on the Bridge Fund for $200, in favor of Supervisor Wilson.

Petitions for reduction of liquor license rejected.

MONDAY, Jan. 9, 1893.

Pursuant to order of Superior Court the Board proceeded to select Grand and Trial jurors.

Ordered, That the Chairman and Clerk of the Board be authorized to issue a certificate to the effect that the proposed World's Fair Exhibit by Mrs. Golda Eibeshutz, consisting of Indian curios, etc., is of genuine product and representative of Inyo County.

TUESDAY, Jan. 10, 1893.

Petition from citizens from Township 2, asking appointment of S. G. Gregg as Constable. The appointment was made as requested.

Petition from citizens for an appropriation to build approaches to bridge across Owens river east from Bishop, received and laid over till next regular meeting of the Board.

A claim of J. W. Murphy for $35 30 had been allowed to the extent of $23 30. The matter was reconsidered and having been found a just claim was allowed in full.

The rates for county printing were fixed and an ordinance passed naming the INYO INDEPENDENT as the County Official paper.

Ordinance No. 33, passed February 5, 1891, was repealed. This was an ordinance relating to the road tax and was made of no effect by a later act of the Legislature.

An Ordinance was passed providing fo collection of a Road Poll Tax of $2 for the current year.

Ordered, That an advertisement be published asking for proposals for boarding prisoners at the county jail and the branch jail at Bishop. Bids to be opened on Thursday, April 6, 1893.

Also advertisement for publishing delinquent tax list; bids to be opened April 6, 1893.

Also advertisement for care of indigent sick, bids to be opened on same date; also proposals for medical attendance for indigent sick and for prisoners in charge of Sheriff.

The sum of $5 each was allowed to A G McGovern, Luke Coyle and Gregory Kelly for services on election board at special election at Cerro Gordo.

The Board appointed Mrs. Golda Eibeshutz agent to the Columbian exhibit to have charge of and display Indian products of Inyo County, and such other products of the county as may be added to the collection.

WEDNESDAY, Jan. 11, 1893.

Supervisor Wilson offered a motion that the sum of $400 be appropriated for a bridge across Owens river at Georges Creek, provided, that the people to be benefited by said bridge shall build at their own cost suitable approaches, grades, banks, piles and abutments necessary for said bridge.

Ordered, That $1,000 be transferred from the Hospital fund to the General Expense fund, and that a further sum of $1,500 be transferred from the Salary fund in like manner.

Ordered, That the sum of $48 be allowed the election Board at Lincoln precinct.

Ordered, That the Clerk communicate to A. O. Collins, Sheep License Tax-Collector, the contents of a communication received by the Board from J. C. Miller.

The Board adjourned for the term.

Feels Badly.

The *Index* feels very bad because the INDEPENDENT was appointed the County Official paper. It has not the good manners to accept defeat gracefully. The *Index* says the appointment was made by a purely partizan vote. Now what in the name of common sense did the *Index* expect? Did it think that the Republicans would support the INDEPENDENT also? Does the *Index* remember how it received the appointment a year ago? By a purely partizan vote; Messrs. Love, Watterson, Steward and Stewart, all Republicans. The *Index* also says that the fact of a paper working consistently for years to build up a country cuts no figure in the distribution of county patronage; while this may be true as to the past two years, the fact of the appointment of the INYO INDEPENDENT this year proves that a Board has been elected that can appreciate merit, and uphold straightforward, righteous action. For twenty-three years, under several different managements the INYO INDEPENDENT has upheld every legitimate enterprise, and worked tirelessly for the general good. During the comparatively few years of the *Index's* existence it has worked unceasingly in the interest of the people—of Nevada. Neighbor, you have sung the same little song before. Now, please point a single instance where you have started or assisted any enterprise that has benefited the people of Inyo County. In the interest of the Carson and Colorado railroad you fought the teaming project from its inception, and make your proud boast that you defeated it. Has that benefited Owens Valley? Black eye No. 1. You advocated strenuously the annexation of Inyo County to Nevada, merely to curry favor with your Carson supporters. Black eye No. 2. You have openly and avowedly declared yourself to be the paid servant of the railroad corporations, particularly the Carson and Colorado. Black eye No 3. And so on *ad infinitum*. No man can serve two interests without one of them suffering. And this is your exact attitude as between the people of Carson and the citizens of Owens Valley. The majority of the present Board of Supervisors are Democrats, and because like honorable gentlemen, they support the journal that advocates the political opinions to which they ascribe, you show the cloven hoof, and in a manner all the more reprehensible from the form of low cunning in which the insinuation is endeavored to be conveyed, you attack their integrity and honesty of purpose. The "soreness" which gives rise to such a puerile attack will defeat the object sought to be attained.

The Sierra Club.

To explore the Sierra Nevada Mountains thoroughly, properly describe and publish all their grand scenery so that world wide attention may be secured and tourists attracted; to help preserve the noble forests and secure better access to the more remote and grandest parts of the mountains, such are the aims of the Sierra Club. Among the members of the Club are many of the leading professional and business men of the State. No part of California can be more interested in the work of the Club than Inyo County. Here we have the culmination of the Sierra Mountains, their least known and yet their grandest features. Mr. W. D. Armes, of the State University at Berkeley is secretary of the Club and will promptly answer all questions in regard to membership or other matters in connection with the Club.

MISCELLANEOUS.

IRWIN'S SALOON

Cor. Edwards and Market Streets,

Independence . Cal.

THE PUBLIC GENERALLY ARE RESPECTFULLY invited to call and inspect my establishment, which has been entirely rebuilt an furnished in a style second to none on this side of the mountains. A SPLENDID NEW BILLIARD TABLE provided for the amusement of patrons.

THE BAR

Is supplied with the most celebrated brands o pure Wines and Liquors and the Finest Havana Cigars.

JOHN C. IRWIN, Proprietor.

Wm. Muth-Rasmussen.

Bee Keeper.

Manufacturer of Comb Foundation.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

HAVOC AMONG WINDMILLS.

Imagine what a stripping and levelling they have had! That notorious individual the "oldest inhabitant" has rarely ever seen such a storm of wind and rain as that which has just passed over the length and breadth of the Pacific Coast. Among the many features of damage and loss which this storm has caused is an immense destruction of windmills. And this is not strange for they are flimsy rattling things at best, not fitted for standing such a strain. The wonder is, why so many windmills are to be seen in every direction, while they are practically a thing of the past, a by-gone age, by no means keeping pace with the modern, more effective and more reliable gas engine for doing the work of pumping water for domestic or irrigating purposes. "Ah! the wind don't blow to-day and our tank is dry." We were all right yesterday but to-day we have a water famine and all the household are suffering and unhappy! Why continue to pin your faith on the wind? What is more uncertain than the wind? What is less to be depended upon than the wind? When you don't want it to blow it blows! When you want it to blow it don't! Why bother yourself about the wind any longer? Put your faith in a sure thing, a thing that never fails. A thing that makes the whole household happy from morning until night. And why? There is no longer a famine. There is water, and plenty of it.

The particular engine which is best adapted to bringing about this much desired end is the "Hercules," a giant in strength, reliable and economical.

These Engines, Gas or Gasoline, are manufactured in San Francisco, a Pacific Coast invention, having no superior on this continent. Send to Palmer & Rey, 405 Sansome Street, San Francisco, for a catalogue.

George Kirkham, a Lane county, Or., farmer, did not go to town until several days after the election. When he did he learned of the election of Cleveland, which greatly elated him. He started home, and when nearly there commenced waving his hat and shouting for Cleveland, which frightened his team and they ran away. They ran through two fences and broke the wagon all to pieces, and then one of the horses dropped dead.

"Going Down to Mary's."

He was a queer old man who boarded the train at a small station in western New York. Two young men, who were probably his sons, brought him to the steps of the car and helped him on, and as he entered we saw that he leaned heavily on a cane and was very feeble.

"The children kept at me till I had to promise to go," he said as he sat down. "Hain't bin down to Mary's in five years, and I've got so old I dasn't wait any longer. It's purty tough on an old man like me, but I want to see Mary and the grandchildren."

"I take it you are going to spend Thanksgiving with your daughter?" remarked the man on the seat ahead.

"That's it. Mary's my oldest gal. Got five of 'em, and all married off. She lives down at ——, and she would have me come and make a visit. Mary was allus a good gal, and she married a good man. You'll tell me when I git there, won't you?"

"Oh, yes."

"'Cause they'll all be there at the depot to meet me. My son Steve writ that I was coming."

He had about forty miles to go, and when we passed the first three or four stations he was anxious for fear that he would be carried by the right one. After that he leaned over on the window and fell asleep. Just before the train arrived at —— the man who had spoken to him turned about and said:

"Come, grandpa, you get off here."

The old man did not move, and the stranger arose and shook his arm and said:

"Wake up, grandpa! This is your station, and Mary and the grandchildren are waiting. Come now."

But he spoke to the dead. The old man had died while he slept—passed away so peacefully that not a line of his face had changed. And we were yet stunned and grieving when Mary and her husband and three happy children came hurrying into the car and shouted:

"Here he is. Here's our grandpa come to spend Thanksgiving!"

But he was with his God.—New York Sun.

A Hero's Two Tombs.

There is no doubt that one portion of the body of Gen. Wayne, the hero of Stony Point—"Mad Anthony," as he was popularly termed—was interred at the place where he died, and the other in his native county. His original burial place was Fort Presque isle, upon the site of which the city of Erie, Pa., now stands; the other locality honored as his last resting place is Radnor cemetery, in Chester county, Pa. This curious circumstance was brought about in the following manner:

In the year 1815 the family of this famous man was given permission to remove his dust to Radnor, but upon opening the grave it was found that the body was partly petrified, and consequently very heavy. A medical friend of the family, recognizing the fact that it would be a very difficult and costly task to transport the remains in that condition, determined as far as possible to remove the petrified flesh from the bones, and this was accordingly done. The bones were then carefully packed up and delivered to the son, who was kept in ignorance of the operation, and he conveyed the box containing the precious portions of his father's body to his native county, where they were interred with appropriate ceremonies.

A monument was erected in 1809 over the grave by the Pennsylvania Society of the Cincinnati. What remained of the warrior was reinterred at Fort Presque Isle, and some years ago was discovered in the same state of preservation as when first exhumed, in a box bearing his name. Another memorial stone was raised in that place, and thus was commemorated the fact that all that was mortal of "Mad Anthony" Wayne found a final resting place in two localities far apart from each other.—Detroit Free Press.

She Was Curious to Know.

"Can I see well from there?" said the nice old lady with the silk mitts, as she laid a finger on the box sheet and looked over her spectacles at the ticket seller.

"Yes, ma'am—those are very good seats both for seeing and hearing," said the young man.

"They're not as good as these over here?" queried the old lady, taking a leap—with one finger still—to the other side of the house.

"Those are good seats, too, ma'am."

"Don't you think they're too far back?"

"No, ma'am."

"Then they're too close—where are those seats you showed me just now?"

"Here they are, ma'am," said the young man, taking out the coupons from the rack and beginning to put them into an envelope.

"No, I don't want them—I think I like these on this side—only there's a pillar just there, isn't there?"

"No, ma'am, there's no pillar in that section—will you take those two?"

"No, I think not—my daughter'll be 'round this afternoon and look at the plan. I don't know what she wants," and the old lady ambled amiably away, totally unconscious that she had kept twenty men and women waiting for ten minutes while she practised "shopping" on the ticket seller.—Pittsburg Dispatch.

The Why of It.

The Hindoo fatalist extends to the intellectual side of life. In grammar with them, as in destiny, a thing is so because it is so; fatalism kills out reason as it kills out spiritual effort and aspiration. I shall never forget trying to get an explanation from a Hindoo teacher of finding, in some of their writings, a plural substantive mated to a singular verb.

"Why does not this plural noun take a plural verb?"

"Because it takes a singular verb."

"Why?"

"Because it is right that it should do so."

"Why wouldn't it be right that it should take a plural verb?"

"Because it would be wrong."

"But I thought plural substantives always took plural verbs?"

"They do."

"Yet this one does not?"

"No; this one does not."

"What rule governs it then?"

"There is no rule. It does so because it is right that it should do so."—

Nature as Our Kind Help.

Nature is always on the side of the right and the good, whether in morals or in physics. Moral health and physical health are, in the higher and the lower sphere respectively, perfect well being, and where there is an absence of moral or physical health nature provides for its restoration. A bad man, not utterly lost, may become good. A diseased man, not too far gone, may become sound again.

The simplest form of physical recuperation is the healing of a wound. Bring the parts together and keep them so, and soon the dissevered muscles and nerves and blood vessels come again each to his fellow, and all the life processes go on as before. If it is impossible to unite the parts, nature, taking more time for it, fills up the gap with new flesh and leaves nothing but a scar.

Even parts of internal organs, brain, stomach, liver, intestines, etc., may be cut away and perfect healing take place. In the case of wounds or ulcers too large to be otherwise healed, bits of skin may be transferred to them from other parts of the body or from the body of some other person, or even from some young animal, and each bit will become the center of a new growth, and the wound thus be healed completely and with little or no disfigurement.

And this power of recuperation is not confined to the flesh. Not only do broken bones readily grow together, but even if large portions are removed, new bone may fill up the space between the severed parts and thoroughly reunite them.—Youth's Companion.

How It Feels to Be a Millionaire.

I have yet to find the man who doesn't wish to be rich, but I have always felt curious to know how it feels to be a millionaire. The opportunity of getting an answer to this question presented itself to me one day, and the man to whom I addressed the question was none other than George M. Pullman, who is worth $50,000,000 at least, who has made fortunes for others, and who has no one to thank for his success but himself. Mr. Pullman looked at me very curiously as I asked the question, and then replied in a slow way. "I have never thought of that. But now that you mention it, I believe that I am no better off—certainly no happier—than I was when I didn't have a dollar to my name and had to work from daylight until dark.

"I wore a good suit of clothing then, and I can only wear one now. I relished three meals a day then a good deal more than I do three meals a day now. I had fewer cares; I slept better, and I may add generally that I believe I was far happier in those days than I have been many times since I became a millionaire. And yet it is a comfortable feeling to be rich." And with that he buttoned up his frock coat around his snug form, slowly walked down the hotel steps, painfully crowded his way into a coupe, and was driven off. In his younger days he would have walked, and would have been better for it.—Brooklyn Times.

Fashion Spoiled.

A curious instance of how a fashion was nipped in the bud took place in New York during the early part of this century. A party of young swells—possibly the advanced guards of the present army of Anglomaniacs—one day rigged up a coach-and-six and drove around town in style. This incited another clique of young men, who, not to be outdone at this sort of thing, immediately fitted out a coach and eight and appeared upon the principal streets in great splendor. So amusing was this to the workmen of the town that a party of sixteen carmen, determining to burlesque the whole affair, dressed themselves in clean white frocks and appeared in the most fashionable parts of the town in a new coach, which was driven by no less than sixteen horses tandem.

Each man had his hair powdered. Thirteen acted as postilions, and the extraordinary appearance of this singular vehicle sent a loud guffaw from one end of the town to the other. So ridiculous did the carmen make this absurd custom of emulation appear that no further attempt was made on the part of the young swells, who, however, took the thing in such good part that one of them wrote an ode called "Carmen Triumphe."—Clothier and Furnisher.

Judged by Her Hearth.

A certain wise old lady said to the writer recently: "I always judge a woman by the hearth she keeps. Show me the fire she sits by and I'll tell you her character." She was right, as you will know if you think a minute. From time immemorial the cheery hearth has been a symbol of home and its comforts, but when it is disorderly, unswept or choked with ashes, it ceases to be a joy or a luxury.

The room may be poor and the fire a tiny one, but if the dogirons are bright and erect, the poker, tongs and shovel marshaled side by side in military order, the bricks as red as scrubbing brush can make them, and the fire blazing cheerily, the hearth swept clean, the scantiness of the furniture will not matter, and home will seem the dearest thing on earth. By the way, will anything ever take the place of the old open fireplace? Beside it the furnace in the cellar is an abomination, and the grate is a new fangled make believe.—Dorothy in St. Louis Globe-Democrat.

Universal Suffrage in the French Republic.

The election of deputies is by popular universal suffrage. Every citizen 21 years of age who has not been deprived of his civil rights deposits his vote in the ballot box. This is simply justice. The deputy who is commissioned to vote a tax should be chosen by all the taxable; the maker of the law should be elected by all who come under its jurisdiction. This system, besides, is equalizing and democratic. The property test regime which it has succeeded makes political rights depend on wealth. It is therefore contrary at once to the principle of equality and to the dogma of the sovereignty of the people. No government, even a reactionary one, would dare to re-establish the property test. The present moment, besides, when capital is attacked from every side, would be badly chosen for conferring upon it the monopoly of political power.—Jules Simon in Forum.

Mr. Disraeli's Dress.

"His dress," Mr. Froude says, speaking of Mr. Disraeli's earlier years, "was purposed affectation. Lady Dufferin told Mr. Motley that when she first met him at a dinner party he wore a black velvet coat lined with satin, purple trousers, with a gold band running down the outside seam; a scarlet waistcoat, long lace ruffles falling down to the tips of his fingers; white gloves, with several brilliant rings outside them, and long black ringlets rippling down upon his shoulders." Such was Mr. Disraeli when in 1832 he stood for Wycombe.—London Tit-Bits.

The exports of Indian tea to the United States have steadily increased, and we now take over 500,000 pounds of Indian tea every year.

Eating Superstitions of the Fijis.

The coasters of the Fiji islands will not eat until they can sit flat upon the ground directly over a triangle made of three small fishbones; then they only handle the food with the left hand.

The inhabitants of the interior of the same islands will not partake of food while a cloud is in sight, especially if the cloud lies in the west, fearing that the "Great Air Whale," whose bellowing (thunder) is often heard in that country, will pounce upon and utterly annihilate them for such irreverence.—St. Louis Republic.

BEACONSFIELD'S NEPHEW.

Coningsby d'Israeli, a New Member of the British Parliament.

Coningsby d'Israeli, who has taken his seat as a member of the new house of commons from the Altrincham division of Cheshire, is already a somewhat conspicuous figure in British politics despite the fact that he is but twenty-five years old. His career will be watched with a great deal of interest, for the reason that he is believed to have inherited, besides the Buckinghamshire property of his distinguished uncle, Lord Beaconsfield, much of the remarkable intellectual force of his grandfather, Isaac d'Israeli, the father of that great premier, who insisted, in the face of the fiercest opposition, on having Queen Victoria proclaimed empress of India.

It is a strange circumstance that, while the founders of the d'Israeli family in England laid the basis of greatness for their descendants by their remarkable faculty for accumulating money, this propensity seems to have died out suddenly, and in its stead there was developed a peculiarly strong mentality which has never failed to manifest itself in at least one member of each generation since it first appeared a century and a half ago.

CONINGSBY D'ISRAELI.

If this record is to be maintained in the present generation young Coningsby d'Israeli is destined to become one of England's great men if he should live to a reasonable age. In appearance, especially in the shape of his head, the young man strongly resembles his illustrious uncle, and it is said that he is proud to be regarded as his successor in every possible way.

Coningsby d'Israeli was born in 1867. His education was obtained at the Charterhouse and New college, Oxford. During this time he was the secretary of the well known Chatham club. His father, the late Ralph d'Israeli, was for a long time deputy clerk of parliament. Coningsby d'Israeli inherits the combative and aggressive tendencies of the family, which played so important a part in the advancement of Lord Beaconsfield. As a newspaper controversialist he shows remarkable ability and has successfully disputed intricate points with some of twice his age and experience. At the recent elections, which resulted in the accession to power of Mr. Gladstone for the fourth time, Mr. d'Israeli was returned as a Tory.

Coningsby d'Israeli is essentially a man of original ideas, and while at Oxford was the co-occupant, with the younger Robert Peel, of a house in the Cornmarket. Not satisfied with that, however, he afterward took up his residence with a member of the family of Mr. Gladstone, apparently being broad enough in his views to be able to unqualifiedly divorce his political from his social life. Taken all in all, if Coningsby d'Israeli shall fail to sustain the prestige of his name, it will be because the promise of a brilliant future, which now seems arrived, will not have been fulfilled.

A Remarkably Full Vote.

Whatever else may be thought about the recent British parliamentary elections, there can be no doubt that the constituencies as a whole were pretty nearly polled out. The actual number of voters who went to the polls was in round numbers 4,100,000. This is not so high a total as that for 1885, which was not far short of 4,400,000. But at that election, being the first after an extension of the franchise and a redistribution of seats, very few constituencies were uncontested. Making an allowance for the uncontested seats on this occasion, we arrive (roughly speaking), says an English exchange, at 4,500,000 as the total number of voters. The total number of electors on the present register is 6,161,456, so that as near as possible three electors out of every four may be taken as represented. That was about the proportion in 1885 also.

A Character to Please Thackeray.

Thackeray was never so happy in his style as when engaged in describing some odd character. There passed away by the death in London recently of Sir Charles Cox a man whom the great novelist would have delighted to portray. Sir Charles was a man whose unusual stature and excessive thinness would have made him noticeable in any circumstances, and these physical eccentricities were accentuated by his singular attire. He wore invariably a dress coat of antique cut, gray trousers, open buff waistcoat, high Gladstonian collar and an immense neckcloth. His hat was of a style of several generations ago. Sir Charles was a constant perambulator of the streets and a noted attendant at weddings.

A Bright Young Westerner.

George Remsburg, a young man living near Atchison, Kan., has been attracting considerable attention lately by his researches in the state for prehistoric remains. He has found eleven mounds on the high bluffs along the Missouri river, from which he has taken one complete skeleton and a great many relics of the aboriginal races. In excavating a mound near Leavenworth recently he discovered a large number of charred human bones. He also found a stone oven in which the dead were undoubtedly cremated. The ancient Maya tribes offered human sacrifices, and archæologists say the remains are those of that extinct race.

GEORGE REMSBURG.

Remsburg, although but twenty-three years of age, is writing a book, which is entitled "Prehistoric Man in Kansas."

Better Than Presence.

She—How did you excuse your absence from Miss Hiffler's wedding?

He—Too easy! I sent a present!—Munsey's Weekly.

One day Francis I of France was struck on the chin with a piece of tile. Of course the wounded part could not be shaved. Thus beards came again into fashion, after having been out for nearly a century.

The coinage of a sovereign costs the English mint 8d.

Internal Revenue Commissioner Mason's report estimates that 120,000 certificates will be required for the Chinese if they conclude to offer themselves for registration, and 70,000 certificates will be required for the collection district of California and Oregon.

Ellsworth Wyatt, one of the Dalton gang of desperadoes, was captured at the home of his uncle in Corey, a hamlet twelve miles distant from Terra Haute, Ind. Wyatt was taken unawares, but showed fight, and only surrendered with the muzzle of a shotgun in his face.

Dr. Parker's Sure Cough Cure. One dose will stop a cough. It never fails. Try it. Price 25 cents a bottle. For sale by all druggists. Pacific Coast Agent, Geo. Dahlbender & Co., Druggists, 214 Kearny St., San Francisco.

Justice O'Halloran—Have you any children Mrs Kelly? Mrs. Kelly—I hov two living, an wan married.

MEDICAL TESTIMONY.

W. Thornton Parker, M. D., Recorder, Association of Acting Assistant Surgeons of the U. S. Army, writes:

"SALEM, MASS., March 23, 1891.

"When at Stuttgart, Germany, during the Winter of 1881-82, I was suffering from a severe attack of Bronchitis, which seemed to threaten pneumonia. I met, at the Hotel Marquardt, Commander Beardslee, of the United States Navy. In speaking of my sickness, he remarked: 'Doctor, you can cure that chest trouble of yours by using an ALLCOCK'S POROUS PLASTER.' 'That may be true,' I answered, 'but where can I get the plaster?' 'Anywhere in the civilized world, and surely here in Stuttgart. Whenever I have a cold, I always use one and find relief.' I sent to the drug store for the plaster, and it did all that my friend had promised. Ever since then I have used it whenever suffering from a cold, and I have many times prescribed it for patients.

"The ALLCOCK'S PLASTER is the best to be had, and has saved many from severe illness, and undoubtedly, if used promptly, will save many valuable lives. Whenever one has a severe cold they should put on an ALLCOCK'S PLASTER as soon as possible. It should be placed across the chest, the upper margin just below the neck; some hot beef tea, or milk, will aid in the treatment.

"This is not a patent remedy in the objectionable sense of that term, but a standard preparation of value. The Government supplies for the U. S. Army and Indian Hospital Stores contain ALLCOCK'S PLASTERS, and the medical profession throughout the world are well aware of their reliability and excellence. I shall always recommend it, not only to break up colds, but as useful in allaying pains in the chest and in the back. It is a preparation worthy of general confidence."

You will find ninety-nine men finding fault with somebody else's work to where you will find one doing his own right.

DON'T GIVE UP and say there is no help for Catarrh, Hay Fever and Cold in head since thousands testify that Ely's Cream Balm has entirely cured them.

I HAVE been bothered with catarrh for about twenty years; I had lost sense of smell entirely, and had almost lost my hearing. My eyes were getting so dim I had to get some one to thread my needle. Now I have my hearing as well as I ever had, and I can see to thread as fine a needle as ever I did, my sense of smell seems to be improving all the time. I think there is nothing like Ely's Cream Balm for Catarrh.—Mrs. E. E. Grimes, Rendrill, Perry Co., O.

Apply Balm into each nostril. It is quickly absorbed. *Gives Relief at Once.* Price 50 cents at Druggists or by mail.

ELY BROTHERS, 56 Warren St., New York.

"Your sealskin sack is rather short, is it not?" "Yes; when I got it my husband was short."

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

The man who does not comb his hair looks best with a chrysanthemum in his buttonhole.

For Throat Diseases and Coughs, use "*Brown's Bronchial Troches.*" Price 25 cts. *Sold only in boxes.*

The people who need your prayers most are those you don't like.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted .....

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

The Best Cure is that which truly cures, Promptly and Permanently, and St. JACOBS OIL Shows a Thousand Proofs of the worst cases of Pain It Has Cured.

An Only Daughter Cured of Consumption.

When death was hourly expected from *Consumption*, all remedies having failed and Dr. H. James was experimenting, he accidentally made a preparation of Indian Hemp, which cured his only child, and now gives his recipe free on receipt of two stamps to pay expenses. Hemp also cures night sweats, nausea at the stomach, and will break a fresh cold in twenty-four hours. Address Craddock & Co., 1032 Race St., Philadelphia, Pa., naming this paper.

"Yes, we should all think of the poor on Thanksgiving." "So we should. Did you give anything this year?" "Oh, yes." "What?" "Thanks."

A HERALD OF THE INFANT YEAR.

Clip the last thirty years or more from the century, and the segment will represent the term of the unbounded popularity of Hostetter's Stomach Bitters. The opening of the year 1893 will be signalized by the appearance of a fresh Almanac of the Bitters, in which the uses, derivation and action of this world-famous medicine will be lucidly set forth. Everybody should read it. The calendar and astronomical calculations to be found in this brochure are always astonishingly accurate, and the statistics, illustrations, humor and other reading matter rich in interest and full of profit. The Hostetter Company, of Pittsburgh, Pa., publish it themselves. They employ more than sixty hands in the mechanical work, and more than eleven months in the year are consumed in its preparation. It can be obtained without cost of all druggists and country dealers, and is printed in English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish.

A Thanksgiving Echo—"Did the turkeys celebrated Thanksgiving, mamma?" "Well, not exactly, Harry, but—" "But they were 'in it,' eh?"

CATARRH CAN'T BE CURED

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you have to take internal remedies. Hall's Catarrh cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is no quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

COPYRIGHT 1891

Fixed just right

—Liver, Stomach, and Bowels, by Dr. Pierce's Pleasant Pellets. They do it in just the right way, too—by using Nature's own methods. That's why they're better than the dreadful, old-fashioned pills, with their griping and violence.

But they're better in every way. In size, for instance, and dose. They're the smallest and the easiest to take; only one little Pellet is needed for a gentle laxative—three for a cathartic. They cleanse and regulate the system thoroughly—but it's done easily and naturally. Sick Headache, Bilious Headache, Constipation, Indigestion, Bilious Attacks, and all derangements of the Liver, Stomach and Bowels are prevented, relieved, and cured.

They're the *cheapest* pill you can buy, for they're *guaranteed* to give satisfaction, or your money is returned. You pay only for value received.

Something else, that pays the dealer better, may be offered as "just as good." Perhaps it is, for *him*, but it can't be, for *you*.

GENERAL SUMMARY.

We are very slightly changed
From the semi apes who ranged
India's prehistoric clay;
Whose drew the longest bow
Ran his brother down, you know,
As we run men down today.

"Dowb," the first of all his race,
Met the mammoth face to face
On the lake or in the cave,
Stole the steadiest canoe,
Ate the quarry others slew,
Died—and took the finest grave.

When they scratched the reindeer bone
Some one made the sketch his own,
Filched it from the artist—then,
Even in those early days,
Won a simple viceroy's praise
Through the toil of other men.

Ere they hewed the Sphinx visage
Favoritism governed kissage,
Even as it does in this age.

Who shall doubt the secret hid
Under Cheop's pyramid
Was that the contractor did
Cheops out of several millions?
Or that Joseph's sudden rise
To comptroller of supplies
Was a fraud of monstrous size
On King Pharaoh's swart civilians?

Thus the artless songs I sing
Do not deal with anything
Now or never said before.
As it was in the beginning,
Is today official sinning,
And shall be for evermore.

—Rudyard Kipling.

Failures in 125 Years.

There have been eighteen great financial crises during the last century and a quarter, viz.: In 1763, at Amsterdam, originating with the house of De Neufville and involving seventy-seven failures. The failures in Holland in 1773 exceeded £10,000,000. In 1799 in Hamburg there were eighty-two failures, involving £2,000,000. There was a panic in Liverpool in the same year, which was, however, somewhat mitigated by parliament lending £500,000 in exchequer bills on goods. In 1814 240 banks suspended payment in England. In 1825 at Manchester failures occurred to the amount of £2,000,000.

The Calcutta failure of 1831 involved £15,000,000. The "wildcat" prices in the states in 1837 caused all their banks to close. In 1839 the Bank of England was saved by the Bank of France. A panic in France during the same year caused ninety-three companies to fail for the sum of £6,000,000. In 1844 a crisis in England brought about the reformation of the Bank of England.

The English failures of 1847 involved £20,000,000. During the great panic of 1857 in the states 7,200 houses failed for £112,000,000. The Overend, Garney & Co. failure, nearly a quarter of a century ago, involved failures costing upward of £100,000,000. "Black Friday," in Wall street, was on Sept. 24, 1869. The shoe and leather trade crisis in Boston, U. S. A., in 1883, caused losses amounting to over £2,000,000. The Grant & Ward failure, in New York city in 1884, involved many financial and business houses and a loss of over £5,000,000.—London Financial News.

"Done!"

That inveterate joker Sothern had made an appointment with Toole to dine at a well-known restaurant. The hour of meeting was fixed, and Sothern arrived some few minutes before the appointed time. An elderly gentleman was dining at a table at some little distance from that prepared for the two actors. He was reading a newspaper, which he had comfortably arranged before him, as he was eating his dinner. Sothern walked up to him, and striking him a smart blow between the shoulders, said:

"Hallo, old fellow! who would have thought of seeing you here? I thought you never——" The assaulted diner turned round angrily, when Sothern exclaimed: "I beg you a thousand pardons, sir. I thought you were an old friend of mine—a family man whom I never expected to see here. I hope you will pardon me."

The old gentleman growled a reply, and Sothern returned to his table, where he was presently joined by Toole, to whom he said:

"See that old boy? I'll bet you half a crown you daren't go and give him a slap on the back, and pretend you have mistaken him for a friend."

"Done!" said Toole; and done it was immediately, with a result that may be imagined.—London Tit Bits.

Mr. Childs' Country Home.

"Wooton," Mr. George W. Childs' place at Bryn Mawr, is one of the handsomest and most expensively maintained country places in the United States. The annual expenditure is not far from $30,000, of which $12,000 is paid to house servants and other employes. Twenty men and twelve horses are kept busy all the year round in caring for the farm and grounds, and in summer six additional men are required to look after the lawn, while as many more assist the gardener.—New York Ledger.

The Reading Habit.

I saw a young man enter a restaurant for breakfast the other day, approach the cashier's desk, address a word to the cashier and receive a book. I asked what it all meant, and learned that the customer always had in the keeping of the cashier some volume that he read while at breakfast. "They are always good books," said the cashier with a smile, "and I read them between times."—New York Star.

Upon two pitchers in the British museum are to be seen domestic cats in the interior of a school of music. One is tied by a string, and the other stands upright on a stool, and a young man is offering a cake to it. All these pictures, which are authentic, and which date back more than 2,000 years, reproduce the image of a cat, perhaps a little slimmer than ours, but like the animal as we know it.

It was recently maintained before the Paris Academy that shortness of sight was a defect incident to civilization or to an artificial condition of life. An examination of the eyes of wild animals shows that those captured at the age of six or eight months remain long sighted, while those captured earlier or born in captivity are near sighted.

The men of today use on the average each year ten times as much iron and steel as our forefathers of the Revolution could command, and by the use of this, the most profitable, if not the most precious, of all metals, they command the land with their railways, and the sea with their steamships.

To inquire the price of anything is not good form. It is scarcely permissible even among intimates, and then only when the question is asked for purposes of information.

An intelligent, faithful woman bread winner furnishes a shining example to the world. She is the embodiment of truth—the consummation of honesty's ideal.

Hour Most Fatal to Life.

Have the hours most fatal to life ever been ascertained? was the question recently asked of a prominent Philadelphia physician.

Yes, to a certain extent, was his reply. I have the data here of some very interesting conclusions ascertained in 2,880 instances of death at all ages. The examples are taken from all conditions of life, and during a period of several years. If the deaths of these 2,880 had occurred indifferently at any hour during the twenty-four, 120 would have occurred each hour, but this was by no means the case.

There are two hours in which the proportion was remarkably below this—two minima, as it were—namely, from midnight to 1 o'clock, when the deaths were 83 per cent. below the average, and from noon to 1 o'clock, when they were 20¾ per cent. below. From 3 to 6 a. m., inclusive, and from 3 to 7 p. m., there is a gradual increase, in the former of 23½ per cent. above the average, in the latter of 5½ per cent. The maximum of death is from 5 o'clock to 6 o'clock a. m., when it is 40 per cent. above the average; the next during the hour before midnight, when it is 25 per cent. in excess.

A third hour of excess is that from 9 o'clock to 10 o'clock in the morning, that hour being 17½ per cent. above the average. From 10 a. m. to 3 p. m. the deaths are less numerous, being 16¼ per cent. below the average, the hour before noon being the most fatal. From 3 o'clock p. m. to 7 p. m. the death rate rises 5 per cent. above the average, and then falls from that hour until 11 p. m., when it averages 6½ below the mean. During the hours from 9 to 11 o'clock in the evening there is a minimum of 6½ below the average. Thus it will be seen that the greatest mortality is during the hours from 3 to 6 o'clock in the morning, the midday hours, from 10 to 3 o'clock, furnishing the least average hourly death rate.—St. Louis Republic.

Danger in Choice Reading.

"Why on earth do you read such books?" said a sensible man a few evenings ago to a woman of highly sensitive and suffering organization, who had just been through the thousand pages of Stanley's "In Darkest Africa." "Such books are simple poison to you. You ought never to read a line of them." "What!" she answered, "do you think I should be justified in keeping ignorant of the misery and degradation of millions of my fellow creatures?"

"Yes," was his answer, "the more ignorant of such things persons like you keep themselves, the surer their chance of being sunny and helpful influences in the world. The record of these horrors simply paralyzes you. It works on your sympathetic imagination till the whole head is sick or the whole heart is faint. At night you lie down, and in the morning you get up in darkest Africa yourself. Had you spent your time in reading something beautiful and cheering you would have been healthier and happier and a hundred times more use to your husband, to your children and to society."

In the especial case in hand the man was right, and the case stands for thousands of like ones. Overwrought sensibility to the suffering side of life, and the gloomy spell this exerts over the imagination, is an actual disease of the day. Numberless are the people whose constant aim in life ought to be to get away from the contemplation of distressing objects, and who should take as much pains as the florist with his roses to expand the broadest possible expanse of clear glass to the rays of the sun. Without sunshine, and plenty of it, they can never thrive. Just as some plants can flourish under the densest shade, while others mildew beneath it, so it is with different human organizations.—Boston Herald.

Influence of a Laugh.

Do you know, my dear, that there is absolutely nothing that will help you to bear the ills of life so well as a good laugh. Laugh all you can, and the small imps in blue who love to pre-empt their quarters in a human heart will scatter away like owls before the music of flutes. There are few of the minor difficulties and annoyances that will not dissipate at the charge of the nonsense brigade. If the clothes line breaks, if the cat tips over the milk and the dog elopes with the roast, if the children fall into the mud simultaneously with the advent of clean aprons, if the new girl quits in the middle of house cleaning, and though you search the earth with candles you can find none to take her place, if the neighbor in whom you have trusted goes back on you and decides to keep chickens, if the chariot wheels of the uninvited guest draw near when you are out of provender, and the gaping of your empty purse is like the unfilled mouth of a young robin, take courage if you have enough sunshine in your heart to keep a laugh on your lips. Before good nature half the cares of daily living will fly away like midges before the wind; try it.—Chicago Herald.

No Eye for Architecture.

A dear old Scotch friend of mine paid a bad compliment to the shade of Sir Christopher Wren. Visiting London for the first time, he was of course advised to include St. Paul's cathedral among the notable sights to be "done" during his stay in the metropolis. On his return, in narrating his adventures down south, he created some astonishment by the assertion that he "didna care" for the glorious fane. "I went," said he, "but I couldna hear what the meenister said, so I cam' oot again!" It never occurred to him to go at any other time than on Sunday morning, or for any other purpose than to attend the service. Very practical, very proper and very Scotch!—All the Year Round.

How to Clean Chinaware.

All ordinary china or earthen ware is porous, and the fine pores will fill up with grease or fatty substances, which in time becoming rancid will give an offensive odor and taste to any food put into such vessels. Soap should not be used for washing such ordinary china and earthen vessels (the solution of soda is better), and all vessels should be afterward well rinsed with clean, hot water, free of any fatty substance. Soda forms with any grease on the vessels a soapy compound, but, acting stronger than soap, it will remove the grease more thoroughly.—New York Journal.

Having the Bulge.

A broker in Boston has brought a box of cigars regularly every month for the man in the office on the floor above him. His reason is that the man could leave the water running in his washbasin, and thereby flood the room below. The one above probably accepts the cigars on the ground that the one below could start a smudge and smoke him out.—Detroit Free Press.

If your child is cross, do not punish him, but divert his mind from the subject that annoys him. If he continues to be cross, suspect his stomach, and assure yourself that this is in perfect order; a troubled digestion is the root of bad temper.

SELF-SUPPORT.

Experience of One Accomplished Young Girl Trying to Earn a Living.

HER TALENTS NOT APPRECIATED.

Thought She Could do Anything that Anybody Could do.—A Story With a Moral for Young Women.

Miss Chester, in her book "Girls and Women," has a chapter with the title of "Self Support." In it she relates the experience of "an agreeable girl whose great failure was her self conceit;" who fancied—until she tried—that "she could do everything that anybody could do." How she was cured of this delusion, and then of the discouragement which followed the cure, may well be of interest to many young women who have their own way to make in the world.

As she did not look down on other people's efforts her self conceit was amusing rather than annoying. She was always ready to write a poem, or sing a song, or paint a picture, and as she was a society girl and lived in a grand house, her little doings were often favorably mentioned in the local papers, so she may be pardoned for believing she had a variety of talents, though no one who read her poems or heard her songs agreed with her.

Then came a crisis in her affairs. She was thrown on her resources without a moment's warning. She had to earn her living or starve. She had plenty of energy and was willing to work. She took a rapid view of her powers. Then the scales fell from her eyes. She felt very doubtful if there was one among her accomplishments which could furnish bread for her.

She would have said that all her conceit was gone. But it was not so. As her need was so urgent she tried to find work, first in one way and then in another. She was prepared to have the editors reject her manuscripts, and she was not surprised that she could not sell her pictures; but it was amazing to be told that her grammar and spelling were faulty, and it was hard to see the amusement in the faces of the art dealers when they regarded her most cherished paintings.

No woman can earn a living without some mortifying experiences, but the more conceited she is the more such experiences she meets, because she is inclined to attempt things preposterously beyond her. So this poor girl, who had always held her head high, was snubbed by every one. She was told the truth with almost brutal frankness, and in time she learned her lesson.

She was not a dull girl nor a weak one. There was one thing she could do well at the outset, though she had so little discrimination in regard to herself that it did not occur to her that this would be her lever for moving the world. She was a beautiful housekeeper. She remembered this finally, and acted accordingly.

I cannot say that she enjoyed her experience with a series of widowers; but she did her work well and was paid for it. She also had a talent—strange to say, it was for drawing. She did not realize this either, for she could not discriminate enough to see that her amateur work as an artist was at all different from her amateur singing and playing.

At first she had thought she could do everything well, and then she thought she could do nothing well. But by slow degrees and through much tribulation she began to set her faculties in order, and when she found her germ of a talent she cultivated it. Ten years later she was able to support herself by her drawings.

By this time her one fault had vanished. She was simple and modest and self respecting, while she retained the courage and cheerfulness which had made her attractive as a girl. "If you wish to cure a girl of conceit," she once said to a friend, "let her try to earn her living. As long as she does not ask to be paid everybody will praise her work, but let her offer to sell her services and then see."

I have not told this story to discourage girls who wish to be independent, but to show them the difficulties in their way.

Snakes in the Dead Letter Office.

A few years ago there came to the dead letter office a tin can on which no address was found. The can was opened and sixteen lively looking rattlesnakes made their escape. There was a scene in the dead letter office for a few minutes. Everybody got on the chairs and tables, and the rattlers were left in full possession of the floor. Finally they were dispatched, and fifteen of them were pickled in alcohol. One was missing, but nobody knew it. It was supposed that fifteen were enough and that none had escaped. A few days later, one sunny afternoon, a long, sleek looking rattlesnake crawled from among the papers in the chief clerk's desk, and, unobserved, made his way to where a young lady visitor was sitting. His snakeship slyly crawled to her feet. The young lady noticed the intrusion, and hastily looking down saw the wily serpent, was horrified, and very properly fainted. The rattlesnake offered no further insult nor injury, but fled in alarm. He was killed, and, artistically incased in a glass jar, he now adorns the cabinet.—Washington Cor. St. Louis Globe-Democrat.

The Popular Notion of Liberty.

To do what one likes with one's own, and to have as much as possible of one's own to do what one likes with—that, I take it, is the ideal of life usually set before themselves by those who are commonly accounted men of understanding. That is the liberty wherewith we are made free by the much boasted civilization of the Nineteenth century, which has so largely converted "business" into schemes of gambling called speculation, and into processes of fraud on "the windy side of the law."

And if we pass from private life to the public order, the most common and popular notion of the state is that it is a machine for securing person and property, in the unfettered employment of which, at one's own will, liberty is held to reside.—W. S. Lilly in Forum.

In a country trip the writer took a family meal at the house of a New York state farmer. There was at one end of the table a platter with a huge piece of boiled salt pork, with potatoes floating about it in the greasy, watery gravy. A plate of soda raised biscuit, yellow and tough, flanked the pork and potatoes, and a large leather looking apple pie filled in the middle distance. The hostess presided behind a two quart teapot of boiled tea, and this meal, which was an ordinary home dinner, at which the stranger was unexpectedly present, was eaten with relish by the nine persons who made up the farmer's family. Is it any wonder that farmers' wives in America, who work ceaselessly and for the most part within doors, are notoriously short lived if such diet is common?

WHY CHINESE NEVER SAVE LIFE.

They Regard It as Interfering with the Intention of the Creator.

Much has been written of the peculiarities and eccentricities of the Chinese, but it is not generally known that the people of the Celestial empire will not rescue one another from accidental death.

At a fire in San Francisco several years ago six Chinese were imprisoned in a room by three half inch iron bars, which could easily have been broken away. There were two or three ladders in the neighborhood which could have been placed at the windows and the unfortunates easily rescued from a horrible death. There were hundreds of their countrymen looking on at their frantic efforts to escape. Yet they offered no assistance and gave no evidence of sorrow.

A man who has saved many lives, in speaking with a Chinese once said they were very heartless and cited this San Francisco fire as an example, whereupon the Celestial exclaimed:

"I tell you. You sabee Joss! Gol Almighty, alle samee. Cinaman call him Joss; Melican call him God. Call him anything. Alle samee. Now you say Gol Almighty make ebleting?"

"Yes, everything."

"Make alle men?"

"Yes."

"Know ebleting?"

"Yes."

"Now, do you think you know more than Gol Almighty?"

"No, I do not."

"He makee allee men. He see one man. He think him no good. He say, 'You no use; go die.' You think you know bette Gol Almighty. You go swim; you no let man die. Gol Almighty he say: 'He velly smart. He catchee man I tell go die. Velly well, that man begin new. He cally that man's life all him sins, all him troubles, all him bad luck. You hab heap good things?'"

"No."

"No hab much houses, much money, much land?"

"No; not much."

"All light, you nebbe hab much luck. How many you save?"

"About fifty."

"Oh, you nebber get out. You cally all fifty life. Ebleting you do, no finisin, work allee time heap trouble. You nebbe get old; you live long time. Sabee fifty life. You live hundlet years—had bad luck allee time. Gol Almighty he sabee best."—Fire and Water.

Catching Boas.

"To catch a boa constrictor is a difficult and dangerous task," says a man who makes it his business to capture wild animals and reptiles for menagerie purposes. "It is accomplished by a labyrinthian tangle, embracing sixty square feet of ground. The labyrinth is made by joining together, end on end, pieces of matting. This web is eight feet high usually, and placed so that the opposing walls will be two feet apart. All sorts of crisscross and diverging combinations are made with the matting—it is supported here and there by stakes—making, when it is set, a geometrical puzzle that might well challenge the ingenuity of man.

"The trap is baited with a live pig, which is placed in a pen in the corner of the labyrinth. By and by along comes the boa constrictor. It is easy enough to get in. He scents the prey; he is very hungry; the pig is devoured, and here the boa comes to grief. For hours he tries to release himself, but finally he grows tired and stretches himself out for a nap. Then is our time. We open the labyrinth and catch him."—Golden Days.

Where Vessels Capsize Frequently.

The capsizing of a vessel tied up to a pier is common enough in the Bay of Fundy and its tributary streams. The usual rise and fall of the tide along that bay is from forty to fifty feet, and high tides sometimes exceed sixty feet. With the fall of the tide all craft are left high, but by no means dry, with an area of chocolate colored mud all about them. This mud is too shifting to hold a vessel in safety, so each pier is provided with one or more strong wood frames called shoes, fixed at the bottom of the stream or bay.

Upon these shoes all vessels rest at low tide. It frequently happens, however, that a vessel does not get her shoe snugly on, so to speak, and if a strong wind comes when she is thus ill balanced, over she goes into the mud, to be buried forty feet under the next rising tide.—New York Sun.

Cats Among the Egyptians.

The tutelar deity of cats was Diana, and according to Plutarch the cat was not only sacred to the moon, but was an emblem of it. Hence cats were treated with peculiar consideration in the land of the Pharaohs, the death of one being regarded as a great family misfortune. Egyptian cat funerals were celebrated with the greatest pomp and ceremony, their late owners showing respect by shaving off their eyebrows and wearing sackcloth for nine days. In the time of Moses it was a capital crime to kill a cat, and we are told by Diodorus how a Roman soldier who killed one was tried, sentenced and finally put to death.—St. Louis Republic.

Foot Notes.

Never wear a nice pair of shoes when you must needs wear rubbers. It spoils them more quickly than anything else. Have an old pair to wear under rubbers, and thus save your good shoes and enjoy the comfort the older ones give. When soles are worn thin use insoles—they will save both shoes and stockings. These are cut from sole leather. When suffering from corns cut out the place over them from an old shoe and cover with a neat patch. It is a sure cure.—Detroit Free Press.

Venice Has No Carriages.

Venice is built on eighty islands, great and small, which are connected by 400 bridges. There is not a carriage in the city.—Boston Globe.

CHINESE ORDERS

Description of a Secret Organization and its Signs and Passwords.

GREAT ANTIQUITY OF THE TIEN-TI

It has a Membership That Reaches to all Parts of the World.—How the Society was Founded.

There are three grand secret societies in China, the Tien-Ti, "Heaven and Earth," or "Triad;" the Wu-Wei Keaou, "White Lily," or "Do Nothing," and the Ko Lao, "Elder Brother." Of less important associations the name is legion. All those rites appear to have some relation to Freemasonry; but it is indirect, no doubt, in the case of the latter two, which modelled their procedure upon that of the Tien-Ti. This tremendous organization is older than all records. Its supreme grand master—if one there be—has more subjects probably than the pope of Rome. His sway extends all over China, and, in theory at least, over all emigrant lodges from the Philippines to Burmah and San Francisco and Melbourne. As for his "potentialities of wealth," a mere member of the council in a subordinate lodge may be worth two millions sterling. But who he is or where he dwells no man knows; the Chinese government would dearly like to get that information. If death be the penalty for belonging to the Tien-Ti in Dutch and Spanish colonies (in some English also), to be suspected of belonging entails the same fate in China. The word must not be uttered in presence of natives. With what patience, tact and labor—it must be added with what good luck—Gustave Schlegel gathered the materials for his striking book, "The Hung League," under this state of things may be imagined. So far as I know, it is still our only authority for the secrets of the association at home. At Singapore, however, when all Hoeys were recognized for a good many years before the suppression lately, abundance of facts were collected by Mr. Pickering.

HOW TIEN-TI WAS STARTED.

Unfortunately, these emigrants have lost all traditions of the craft in its early form—or it may be they disregard the record. At one point of the ritual, indeed, the lodge master asks, "Do you know that there is a Greater and a Less Tien-Ti?" and the "vanguard officer" replies, "Yes. The Greater was founded in heaven; the Lesser at the waters of the Three Rivers"—in Hok-Kien. But this is all. For unlearned members the league had its beginning in the year 1674, and perhaps it will be best, with a great subject to discuss in little space, to tell the story of the foundation as recited in the books of ritual. The Manchu Tartars expelled the native dynasty in 1644. Twenty years later the Eleuth Tartars invaded the realm and overran a great part.

The emperor made a desperate appeal to his subjects, and a certain Buddhist abbot, Kim-Tat, of Hok-Kien, putting himself at the head of his monks, drove them out. But a traitorous general denounced the victor and received orders to murder him, which was done, and the monastery burned, after surprising adventures. Five monks escaped and took refuge in a temple. As they walked along the bank of the Sam-Po they beheld a censer floating, which upon examination proved to be inscribed, "Overthrow the Cheng; restore the Beng"—that is, "Drive out the Manchus; restore the native line." So, under persecution, the late defenders of the emperor became rebels. After this a number of miracles occurred, all teaching the same lesson.

Five horse dealers joined the monks, and a hermit—all very famous in the after time. They swore brotherhood on the miraculous censer, adopted its motto, and prepared to overthrow the Cheng. A grandson of the last Chinese emperor revealed himself, and the insurgents marched under command of a giant, Ban-Lung. They met the imperial army at the "Mountain of the Phœnix" and routed it, but Bang-Lung fell in the moment of victory, and Kin-Lam, second in command, perceived that the day of success had not yet dawned. Gathering the army around him he dismissed each man to his own house, there to enlist recruits for the good cause, living always in secret, concealing even their names. Thus the Tien-Ti was founded.

LODGES OF TIEN-TI.

For the mother lodges, with which Schlegel dealt, this legend does not represent the establishment but the transformation of the society. And thus it becomes intelligible. The original password, almost forgotten in the emigrant lodges, was "Obey heaven and do righteousness." Men who accepted that rule of life would submit to a conqueror, as by all accounts the Tien-Ti submitted to the Manchus for twenty years. But the second emperor, as we may guess, feared and harassed them. In the province of Hok-Kien they rose, stirred up by monks, perhaps, and headed by those champions whose names are still revered. The rebellion was stamped out, and a charitable brotherhood of high philosophic aims developed into a vast conspiracy. With scarcely a pause it has raised disturbances, greater or smaller, since that date. The Taeping rebellion was its work. And every Chinaman, as every Manchu, is well assured that sooner or later the Tien-Ti will triumph.

In the first place the original aim of the society, still professed in China, was the search for pure light—that is, truth. The grand symbol of the league is a triangle, formed by the Chinese character Juh, to "enter into," like an inverted "V," and Yih, "one," a dash; thus heaven and earth combine to "enter into" man. The triangle appears in every ceremony, while the foot rule, the scales and weights are laid in the sacred "bushel" upon the altar before the opening of a lodge. The lodge must be square, standing due north. It has four gates, of which the eastern is holy and bears two significant inscriptions—one declaring that myriads stream through when it is opened at the general's command; the other, "Toward the east, in the wood, it is difficult to walk fast. The sun which appears above the hills rises in the eastern sea."

That expression "in the wood" constantly recurs, alluding to the persecution which the initiated suffer. After receiving assurance that the lodge is "tiled," the master asks, "How high, brother, is this lodge?" The Tsong-Li, first officer, replies, "As high as our eyes can see." "How broad, brother?" "As broad as the two capitals and thirteen provinces," meaning the whole world. "Whence do you come?" "I come from the east." "At what time did you come?" "I came at sunrise, when the east was light."—St. James' Gazette.

Bismarck's inseparable companions are two large Danish hounds. At dinner they eat beside their master, and he occasionally feeds them with his own hands. After dinner the prince smokes three pipefuls of tobacco, that being the amount allowed him by the doctors.

A Painful Operation.

A farmer shaving is one of the most painful sights ever witnessed outside downright butchery. For some reason beyond the present depth of knowledge the man who "beards" in the country always has a beard like a new hairbrush, and he can never learn how to sharpen a razor. He gets on the back porch with his shaving utensils, and after rubbing the razor over the strop in an awkward fashion until whatever trace of edge it may have had has been destroyed he hangs up his broken glass, and takes a position alongside the kitchen door, where the old lady will be sure to jostle his arm when she goes out to empty her dishwater.

With a brush that has but little handle remaining he manages to stir up a lot of lather from soap that would raise a blister on the bottom of a boy's foot, and with this he coats his face till nothing but his eyes and the back of his head are visible. With his thumb dipped in warm water he goes over the stubble again with a vigor that makes his flesh creep, until he feels that all reasonable precautions for comfort in the subsequent operations have been taken.

Taking the razor and looking at it suspiciously over the top of his glasses, he runs his thumb along the edge, fails to draw blood as he had hoped, and then with a sigh grabs himself by the nose, shuts his eyes and gives a scrape that makes his hair stand on end, as a bunch of bristles seems to come out by the roots.

But, once at it, a terrible desperation seems to nerve him, and, with his teeth set, he goes right on with a determination to get the agony over as soon as possible.

Howls of woe break from him now and then as an expression that poisons life steals over his face and stops there till the last nerve has been pulled out of the socket by that terrible razor and the last bit of stubble has been laid low.

Then, and only then, with a sigh of relief, he strikes up a hymn of thanksgiving and joyfully throws his shaving paper into the ash pit near by.—Chicago Inter Ocean.

Benefits of Bicycle Riding.

Among the main reasons which bicycle riders give for their choice of locomotion are the following:

Bicycling is a popular, clean, healthful sport, and a wheel is good company.

The wheel is a time saving machine, and in this busy age time is money.

Exercise on the wheel is better than walking, because the weight of the body is principally supported by the saddle. Strength is economized and the exertion of force distributed more generally throughout the muscles of the legs, arms and body, and equal results in progress reached by far less exertion, or proportionately greater results by the same exertion. In other words, the wheelman rides ten miles in an hour with less fatigue than he would walk four in the same time, because in walking almost all the muscular exertion is thrown on the legs.

Few people breathe properly. They use only the upper portion of the lungs and leave a large residuum of impure air. Bicycle riding causes thorough respiration and tones up the general circulation. It is particularly beneficial to men and women of sedentary habits, and gives them such exhilarating pleasure that they do not feel the labor involved.—New York Ledger.

A Small Piece of Justice.

In a small town not many miles from Erie, Pa., there was a case before the justice of the peace that was settled very summarily.

It appears that a Mr. Jones had beaten Mr. Brown's dog with a club for chasing his chickens. They met at the office of the justice, each accompanied by a lawyer, and bound to see the thing through, no matter what it cost. As Jones and Brown were prominent citizens of the town a large crowd assembled at the trial, expecting to hear some great oratory from the lawyers.

The justice was a very pompous and ignorant old fellow, who was great on big words, no matter whether appropriate or not. The case was called, the witnesses who had seen the clubbing gave their testimony, and Jones' lawyer arose to open for his client, when the justice said:

"Hold on, Mr. Lawyer, there is no use argifying or condisputing about this matter, as there is no case of assessity for it. Mr. Jones was highly unwrong in beating Mr. Brown's dog, so I fine him ten dollars for cruelty to dumb animals, and that is all there is about it."—Detroit Free Press.

An Impressive Part of a Funeral.

A very beautiful and impressive adjunct to an aristocratic official Parisian funeral is the presence in the procession of the coupe of the deceased, the horse or horses, led by grooms in mourning liveries, and the lanterns lighted and veiled in long streamers of semitransparent crape. The effect is at once somber and picturesque, and is especially striking at the obsequies of some great personage, such as M. Theirs, Gambetta or Victor Hugo. Nobody, not even the nearest relative of the defunct, is permitted to occupy the vehicle.—Paris Letter.

A Bright Four-year-old.

The clergyman was a guest at dinner one day. Cream was offered him with his dessert, but he declined, gallantly saying "that would be painting the lily." A few days later Hattie's aunt, who had artistic tastes, sent the child to pick for her a brilliant lily which she wished to copy. The little four-year-old started on the errand, but as she reached the foot of the piazza steps she turned, looked up at her aunt and said, "Would you paint the lily?"—New York Tribune.

A Case of Convenience.

Dashaway—Why don't you wear your diamond pin in your Ascot tie? It's proper, isn't it?

Travers—It may be proper, but it isn't always convenient.—Clothier and Furnisher.

JEWS AT TABLE.

A Reporter's Visit to a Restaurant Where the Food is Koscher.

TWO PRAYERS BEFORE THE MEAL.

Ablutions and Covered Heads.—Excited, but Friendly Disputants.—Closed on Saturday.

Some time ago the Jewish Ministers' association, which includes the leading rabbis of New York, considered means of improving the observance of the Jewish Sabbath. Among other things that were discussed incidentally was the rapid decline of the observance of the Mosaic dietary laws. It was frankly admitted that many Jews no longer remained loyal to them. This was declared to be the case even with those who were otherwise good Jews.

But there are some wealthy Jewish merchants who still adhere to the strict letter of the dietary laws, and the most prominent of these meet every noon in a Jewish restaurant in Mercer street. It is the most typical place of the kind in this country. Here may be observed the Jewish customs in regard to meals as they are in vogue in the most orthodox communities of Russian Poland.

TWO PRAYERS BEFORE THE MEAL.

A reporter accompanied Coroner Levy to the Mercer street restaurant the other day. It was noon when they reached there. A large sign which hung suspended from an iron rod outside the restaurant described its character through the three mysterious looking Hebrew characters which spell the word "koscher." The interior was in no way unlike that of any other restaurant, except that the decoration was odd and old fashioned and that the floor was bare.

The reporter's first inclination upon entering the place was to remove his hat, but his hand was checked on its way to his head, for he noticed that all at the tables wore their hats. There were about twenty-five men there, all solid looking business men, with unmistakable Hebraic features.

The rear end of the room was divided off by means of curtains from the space reserved for the tables. Just inside of these curtains was a washstand, with running water, hidden behind a screen. As each customer came in he would take off his overcoat, hang it up, and then go to the washstand and wash his hands, looking very devout in the meantime, and moving his lips in rapid muttering. He was repeating in Hebrew this prayer:

"Blessed be Thou, O Lord our God, King of the universe, who hast sanctified us with Thy command, and hast ordered us to wash our hands."

Having thus performed his first duty he took his seat and ordered his dinner. He began this by cutting off a little piece of bread, which he dipped in salt. Before touching it he repeated this prayer:

"Blessed be Thou, O Lord our God, King of the universe, who bringest forth bread from the earth."

Then he bit off a piece of the salt bread and swallowed it before touching anything else. The meal was an elaborate one. There were two kinds of soups, four entrees, five roasts, a lot of vegetables, four kinds of dessert, and coffee. All the dishes were of the German-Jewish type—that is, they were German dishes prepared in the Jewish way. There was goose breast, and stuffed goose neck, and calves' tongue with sour-sweet sauce, and almond cake. Excepting the abundant grease, everything was well cooked.

The portions were very large; still with nearly every course the diner was asked by the waiter whether he did not want more. Of course there was no butter served. Butter being made of milk cannot, according to the dietary laws, be eaten with meat or any substance containing blood. There were three waiters, all of them remarkably attractive in appearance and typical in character.

SOME OF THE DINERS.

At half-past 12 the restaurant was pretty well filled. The talk at the table was very loud, and at some of the tables it was extremely argumentative. From the way in which the clinched fists came down on the tables, making the glasses and plates jump, and from the loud and savage words, the reporter expected to see blows struck. But the differences, if there were any, were smoothed over, and apparently those engaged in the controversies remained as friendly as ever.

One man who came in alone attracted the coroner's attention. He was very solemn looking, with a gray beard, deep set gray eyes, and heavy eyebrows. Before going to the washstand he removed his hat and replaced it with a little skull cap.

"That man," said Coroner Levy, "is a very wealthy Broadway merchant, and is noted for his great piety. Even in his own home he never sits down to a meal with his head uncovered. The Jewish theory, you know, is that it is an insult to the Deity to appear before him with uncovered head. I know one very wealthy uptown Hebrew, who is noted for his Talmudic knowledge and devotion to religion, who I believe would rather cut off his right hand than sit down to a meal with his head uncovered. He has half a dozen children, all boys, and several are not more than 4 or 5 years old. It is very odd to go to a dinner at his house and see all the male members of the family come down to the table wearing their little caps. Then they all say grace, even the little shavers."

"I have been here a number of times," said Coroner Levy, "and always find about the same persons. Very few of them will eat anywhere else unless they have absolute assurance that the meals are prepared according to the dietary laws. This is the only Jewish restaurant in New York that is sanctioned by Chief Rabbi Joseph. It closes every Saturday, but is open on Sunday. Occasionally you see a man come in here and take off his hat in a defiant manner, as though he wished to impress upon the others present that he has outlived the regard for the old custom which they follow. Everybody looks at him angrily, and he must be pretty thick skinned if he can stand the glances and remarks directed at him."

For a moment after emerging into the busy street the reporter felt lost. The American character of everything around him seemed foreign to what he had just seen, and he felt like a traveler returned from strange lands to his native heath.—New York Sun.

A Stage Victim.

An amusing incident occurred recently at Essegg in Austria. In a play called "Die Hochzeit von Valein" the heroine has to die, her death being brought about by a villain who shoots her with a pistol. At the critical moment the weapon misses fire; but the actor was equal to the emergency, and exclaimed at once, "Die, then, the first victim of smokeless powder!"—San Francisco Argonaut.

INYO INDEPENDENT.

Ivy H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, JANUARY 20. 1893

In his message to the Legislature the Governor gives the items for State Printing for the past two fiscal years, showing that the total amount was $219,650 37. This does not include the cost of printing school text books. The Governor says he is well satisfied with the management of the office. This showing proves the wildest extravagance in the State Printing Office, there is nothing like it in any other State in the Union. Only gross stupidity or gross corruption could squander such a sum for State Printing. The whole work could be done equally well for less than one fourth of the amount stated; and, in fact, a responsible Publishing Company is ready to give bonds to any amount if a contract be given to them to do the work for $50,000. The State Printing Office should not be supported at vast cost to the tax payers, only to make it an asylum for political bummers, some of whom are such bungling workmen that they cannot hold a job in any good printing office. The Legislature will likely overhaul this rotten mess.

The sheepmen are in force at Sacramento, trying to have the license law repealed. They have one Assemblyman from west of the mountains who is working in their interests, but the representatives from the mountain counties appear to be standing together to prevent the repeal of the law and have the best chance for success

NEW YORK'S DIALECT.

Absurd Though It Is, It Is Taught in the Public Schools.

How many persons know that New York city has a dialect all its own, and one that it maintains in purity by teaching it in the public schools? Many persons have commented on the precision with which a New Yorker can spot a stranger the instant the stranger undertakes to pronounce the name of the principal streets in the town. We call it Broadway, emphasizing the last syllable very strongly. It appears to be quite a trick to do this, and it is evidently an unnatural pronunciation, for we notice that the very great majority of strangers say Broa-wa. So we spot them on the instant and ask them from what part of the country they hail, just to show them that there is something about them that is not cityfied, and to set them puzzling about whether it is in the shape of their hat, or the style of their shoes, or what it is.

People from the south betray the fact by calling our Houston street "Hewston street," as that name is pronounced from Texas to the Chesapeake, but we play as strange a trick with another name, for we call Coenties slip "Quincy slip." As no one would do that naturally, we detect strangers by that pronunciation. The name of Hoboken is another that we trifle with, calling it Habbucken. But in ways and bywords other than these I can pick out a New Yorker anywhere that he and I may meet, whether it be in Boston or in the Rocky mountains. I can do this by noticing how he pronounces the "ur" sound in such words as birth, bird, earth, heard, etc. All the rest of the country pronounce those words burth, burd, urth and hurd. Not so the New Yorker. He is carefully taught not to do so in all the public schools, as well as by his parents at home.

The queer little twist that enters so largely into our language in marring one of the cardinal sounds that compose it is thus expressed by our tongues; ur-yith is how we say earth, bur-yid is how we say bird. We say hur-yid for heard and mur-yid-der for murder. All of us who were born in New York have heard the public school teachers insisting upon this peculiar twist, commanding the pupils to put on the trademark as fighting men once wore the coat of arms of their feudal masters. Most of us, too, have heard nice, careful little girls on the way home from school correcting careless companions by insisting that "you mussint say burd; you must say it nicely, bur-yid."

Of all the senseless and unmusical and bad things that are done to English that is one of the worst, because one expects to hear a language at its best in the greatest city of a country, and thither foreigners repair to study English and then perhaps to go back home and teach it with a whole lot of little tricks like that in their heads, to be solemnly taught and scattered, until no one knows where the mischief will end. Of course I do not want the reader to understand that very nice people murder the language in these or any other ways, but the great masses of New Yorkers, those who get their learning in the public schools and whose tongues were trained in old New York homes of the middle class—these are the victims of this most peculiar habit.—Cor. Providence Journal.

Nineteen New York babies were named after Columbus during the week following the celebration.

A PERPLEXED HOST.

A TURKEY DINNER AT WHICH THE BIG TURKEY WAS ABSENT.

How a Crowd of Country Lads Spoiled a Nicely Planned Feast—Mysterious Disappearance of a Roast Turkey—The Flight of a Tender Morsel.

A gentleman noted for his originality made the following improvement to the old saying, "There's many a slip 'twixt the cup and the saucer," the other day in speaking of a disappointment a friend of his had experienced in losing his dinner through missing a train—a dinner to which he had been invited and at which he had been selected to respond to one of the toasts.

The simple missing of the dinner was more than set off at the old General Shields hotel, on the West Chester pike. A company of twelve Philadelphians interested in real estate developments had gone out in the country for the purpose of looking about for profitable investments, and had sent word to the proprietor of the old hostelry of their coming and ordered an old fashioned turkey dinner to be ready at 6 o'clock.

The order put the proprietor in his best humor and the entire establishment into an unusual flurry of exciting preparation. The hostler hurried to the nearest farmhouse, where he purchased the finest turkey to be had, and carried it back to the hotel in triumph. Taking it into the stable he dispatched and plucked it in great haste. Everything was excitement in the large kitchen from the time the order was announced until late in the afternoon, when the last dish was ready to be carried to the dining room.

The news of the gentlemen coming spread through the village, and every one felt duty bound to go to the hotel and see them, and none took a greater interest in the affair than the boys. They had finished their chores unusually early and were promptly on hand long before the hour of serving the supper. Of the entire community none felt his personal importance more than Dave Peters, the colored waiter.

Dave was of portly build and prided himself in his appearance, and if he had a hatred for one thing more than any other, that thing was a claw hammer coat, which he said belonged to society gentlemen and not to a waiter, consequently he held to the old fashioned roundabout jacket. Just before the time for announcing that dinner was ready a number of the village boys stood peering through one of the dining room windows, watching Dave arrange the different dishes on the table and admiring the display made by the twelve napkins in as many cut glass goblets.

After viewing the effects of the table with a countenance beaming with satisfaction, Dave strutted toward the door and disappeared by descending the stairs leading to the kitchen, and a few moments later reappeared, carrying on a large dish the turkey, done to a lovely brown and beautifully garnished with carved roses, sprays of parsley and celery tops. Walking toward the table he found that no room had been left for the central and chief adornment of the table. Taking the situation in at a glance, Dave saw his mistake, and hurriedly set the dish down upon the broad sill of the window through which the boys were peering, and began rearranging the table to make room for the turkey.

No sooner had he turned his back to the window than one of the boys softly and quietly raised the sash, while another grabbed the turkey from the dish and fled across the hotel yard toward the old stable, followed by his companions. After making room for the large dish Dave turned around, stepped to the window, raised the dish and placed it in its position in the center of the table, never noticing that the bird had flown. Going to the sideboard he picked up the supper bell and gave it a violent ring, thus notifying the host that dinner was ready.

"This way, gentlemen; this way, please," spoke the proprietor to his guests; "step this way, gentlemen," leading them through a narrow passage from the bar to the dining room. No sooner had he reached the dining room than his gaze fell upon the empty plate, when he exclaimed, "David, where in the name of General Jackson is that turkey?"

Poor Dave! Never was a man taken more by surprise. When for the first time he noticed the broken platter his broad smile vanished. In an instant his jaw fell and his large eyeballs stared most frightfully, while his whole frame shook with a terrible tremor. All he could say in reply to the abrupt and emphatic question was, "Don't know, sir; it was dar, it was dar," and hurrying to the kitchen stairs he shouted down, "You, Phœby, whar in deb'l's dat turkey?"

"Go erlong now, you's got it up dar long ergo." The disappearance was not only a mystery to the waiter and cook, but to the proprietor as well, who in an apologetic manner asked the guests to repair again to the barroom while a thorough investigation could be made. Every one in the house, including the hostler, was questioned and cross questioned, yet no light could be thrown on the mystery. After wasting an hour in trying to find the missing bird, and after a consultation with the guests, fried ham and eggs were substituted for the turkey.

It was not till two hours later, when the guests were about to depart, that the proprietor learned what had become of the turkey. One of the boys, more bold than his companions, came back to the hotel to see how the joke worked, and thinking the story of the bird's disappearance too good to keep, told it to one of the men that were loitering about the outside of the hotel.

The next morning the picked bones of the turkey were found scattered about on the ground back of the stable, where the boys had, after carving it with their pocketknives, greedily devoured the well cooked bird.—Philadelphia Times.

Skulls from the Catacombs.

Among the Philadelphia constituency in Europe this summer was a large party chaperoned by Dr. William D. Hastings, who now prides himself that the winds of twenty-four languages have wafted through his long whiskers. The party included, among others, Lewis E. Beitler, who is Mayor Stuart's right bower, and William B. Gill, who is the local head of the Western Union Telegraph company. Beitler and Hastings one day visited the catacombs of Paris, the great underground graveyard where thousands of corpses repose. While there Dr. Hastings quietly told the superintendent that Beitler was the man next to the mayor in Philadelphia, and that guide was more than gracious.

"Suppose a fellow was to tuck one of those under his arm?" asked Beitler suggestively, pointing to one of the grinning skulls. "If monsieur would like them we will send him some." Before they reached the hotel the keeper of the corpses had wrapped up three moss covered skulls and sent them to the suite of rooms at the Hotel Continental which the travelers occupied. When Mr. Gill entered the room before the return of the others he saw the package, and thinking it was a nice present some of the fellows had bought he opened it and was horrified at the contents, which rolled out on the floor. He fled in hot haste from the room and could not be induced to go back again. He sent a bell boy up to the room. Mr. Gill by close association became reconciled to the newest accessions to the party and was finally induced to accept one of the skulls, which he is having mounted as a tobacco box. Beitler's has been changed into a drinking cup, and Colonel Hastings' will do service as a hairpin holder.—Philadelphia Record.

Lucky Magee and Unlucky Ah Ping.

When the Pacific Mail steamer City of New York arrived from Panama, J. A. Magee, a New York sporting man, was one of the passengers. When he got up he forgot nine $100 bills in a small pocketbook that he had placed under his pillow the night before, and when the tug came alongside, while the steamer was at anchor in the stream, he made haste to land. No sooner had he reached the Baldwin hotel than he discovered his loss, and hiring a coupe made for the Pacific Mail dock, which he reached just as the steamer was made fast. An inquiry for the lost bills proved that they were safe in Captain Johnston's hands. Ah Ping, a Chinese in the steward's department, while making up Magee's berth, had found the bills and taken them to the captain. Magee was handed his money, and called for Ah Ping, to whom he gave twenty-five dollars.

The Chinese had hardly time to appreciate his good luck when Chief Steward Cottrell was angry because the stray bills had not been given to him to return to the owner, instead of the captain, and ordered that Ah Ping should be discharged. Unless the wealthy seward is called down by some of the head officers of the company Ah Ping will have to leave the steamer for being honest. Had he chosen he could easily have secreted the valuable paper bills so that no one could have found them and made away with the whole sum.—San Francisco Chronicle.

A Prisoner's Inventions.

Visitors to the World's fair will have an opportunity to judge of the merits of some of the inventions of Tobias Hudson, a prisoner in the Maryland penitentiary. Hudson was convicted of horse stealing in Washington county, and has two years yet to serve. His being crippled makes it impossible for him to do the regular prison work, and he has perfected a number of inventions in his spare time. Three of these—a lock which is used in the prison, an electric lamp and an electric socket—have been patented for Hudson by Mr. Robert S. Wiesenfeld and Warden Weyler.

Mr. Wiesenfeld has secured space at the Columbian exposition for a display of Hudson's electric lamps, which will be entered in competition with the others on exhibition. Hudson says he has twenty-two inventions that he will patent from time to time, and he hopes to derive a revenue from them that will keep him in easy circumstances after his term expires. He asserts that he would not sell his electric socket patent for his liberty and $10,000.—Baltimore Sun.

A Heroic Dancer.

One of the dancers in the Black Crook company, who is known by no other name to the employees of the Academy than Annie, or "Walking Lady No. 17," was standing in the wings Friday night waiting for her turn to go on with the rest of the ballet. She wore a blond wig and was costumed in the scant attire demanded by the exigencies of the occasion. She seemed nervous and looked pale and ill, but nobody noticed it. Suddenly she reeled and fell.

When a doctor was summoned it was found she was suffering from lack of food. It was also subsequently discovered from other sources that the young woman had sent all her wages away to her two little sisters who were in want and had reduced herself almost to starvation. These facts I know to be true.—Cor. New York World.

Sour Florida Oranges.

If they only knew it the Florida growers are hurting their market by sending sour, unripe fruit. For weeks after these oranges appear in the market they are a disappointment to buyers and injure the reputation which Florida oranges gained and can easily keep under suitable conditions.—Hartford Courant.

Ex-Governor Merryweather, of Kentucky, attained the age of ninety-three recently. Besides serving the Blue Grass State as its chief magistrate, he was also United States senator, succeeding Henry Clay in that office.

Not content with achieving success in literature, Mr. J. M. Barrie is said to have political ambitions and to desire to represent his native place in Scotland in parliament.

Two Hundred Years Ago.

There was celebrated recently in the the town of Danvers, Mass., the 200th anniversary of the death of Rebecca Nurse, who was hanged in Salem in 1692 on account of her religious convictions and because she would not confess to being a witch. Her body was stolen from the gallows by her sons and hidden in an unmarked grave. It is only recently that some of her descendants have unveiled a memorial tablet in honor of the forty persons who maintained her innocence before the New England court that tried her.—Harper's Bazar.

The Sum to Get Married On.

No man has a right to get married on less than $1,500 a year. At least that is the conclusion reached the other day at the close of a long discussion on this subject. Of course that means if the man is going to take for his bride a sweet and lovely young woman, who while being happily provided for at home has not been overindulged in extravagances, and who has the sense to know that she can hardly expect a box at the opera and lots of diamonds from the young man who has only so lately firmly established himself in business. And even if the girl is one of those who has known what it is to be out in the world at work for herself, she can hardly be expected to marry a fellow who cannot do as well for her as she did for herself. She has managed to get along beautifully by herself on fifty or sixty dollars a month, with plenty of nice, sensible clothes, a trip to the theater every now and then, and every summer, or maybe every other summer, a nice little jaunt away somewhere, to forget the little unpleasantnesses of everyday office life. And the way this money was to go was very nicely settled too.

The young man won't be likely to have a home of his own to take his winsome bride to, and there is the unfailing call of the landlord on the first of the month to be met, and that meeting means twenty dollars sure, and maybe more. Sixty dollars will disappear early in the action by the time the butcher and baker and candlestick maker's and some other people's monthly bills have been settled: $150 a year is placing the estimate at very modest figures for the wearing apparel of each during the year, and when all this is added up $1,260 is cared for, and something must be put away for rainy days and doctors' bills and occasional treats to the theater and the lake, and $1,500 is gone! Still there are others who think they can get along first rate with a good deal less than this.—Boston Herald.

A Thoughtless Old Gentleman.

It was the night "rush hour" on the Brooklyn bridge trains. More people were crowded into one of the cars at the New York terminus than had any right to be there without risking suffocation. Through the side entrance to the car came three young and pretty girls, swept on by the tide of humanity. The car was crowded, but that didn't matter. In the crush the girls were helpless. They couldn't help being pushed into the car, and an instant later they couldn't withstand the counterpush which seated one of them, willy nilly, on the knees of an old gentleman. In the jam her two companions were thrust against this young woman, and prevented her from rising. It was not until the train was well on its trip toward Brooklyn that the crowd gave way a little and she was enabled to regain her footing. She begged the old man's pardon sweetly enough, but to her friends she said not a word until the three were safely out of the car and on the platform of the Brooklyn station. Then she freed her mind.

"That's what I call an impolite man," she declared.

"Why?" said one of her companions, "I thought he behaved beautifully. He didn't say a word."

"That's just the trouble," snapped the other. "He didn't have the grace even to say, 'Keep your seat, madam.'"—New York Times.

Twenty Girls Enough.

In the Quaker City there is a well known business and society man who pursues a strikingly original line of conduct. In his business he is quiet, regular and industrious, and particularly prides himself upon the neatness and accuracy which characterized his books of account. During the social season he flits about from entertainment to entertainment, frequently attending operas and playhouses, always having with him some one of a score of girls to whom he pays more or less attention. When asked why he had so many girls he said: "Oh, all girls talk as they write—very much alike, but still there is more variety in twenty than in one. Besides, I keep a regular set of books at home in which I enter every cent I spend on them, and it affords me considerable amusement. For instance, I charge cost of theater tickets, flowers, supper and carriage hire, and then credit it with the amount of pleasure I had—'Passable time enjoyed,' 'Enjoyed the evening hugely,' etc. The girls who afford me the most enjoyment receive the greater number of invitations, so I think I may fairly say that I seek relaxation and pleasure in the same way that I attend to my business—on a system."—Philadelphia Press.

MISCELLANEOUS.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount, I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district of county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, and rare. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of Oak Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hallhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispicada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

DIED.

BURKHARDT—At Lone Pine, Jan. 13, 1893, Mrs. Burkhardt, mother of Fred. Burkhardt, aged about 66 years.

William McDonald and A. C. McDonald were down from Big Pine on Saturday evening attending the installation of officers at the Masonic Lodge.

A large company attended the installation of Officers at the Masonic Lodge last Saturday evening. All present were invited to a banquet at Mairs' hotel after the ceremonies were ended.

For several days I. H. Mulholland has been hovering between life and death; he is now improving a little, and Dr. Woodin is confident he will recover. This illness will account for the want of matter in the present issue of the paper.

F. G. Brooks came to Independence yesterday. It is nearly three years since Mr. Brooks first came here, and in the meantime he has been trying to carry through his project of making a canal to carry water to Salt Well Valley. He is still sanguine of success.

J. S. McQueen, dentist, is at the Norman House, where he will be engaged in practice during the next ten days. He intends going from here to Keeler and after completing his work there will go to Lone Pine. His room at the Norman House is No. 17. Parties wanting work done will please call as soon as possible.

The Mojave Stage Line has been improved by the addition of some good wagons and more horses. A new station will be placed in Volcano valley, a few miles north from Little Lake, that shortens the drives and admits of better time being made. Mr. Miller returned lately from Ventura, where he had gone to make these purchases.

This morning Mr. C. W. Craig, proprietor of the *Index*, came to this office and offered the use of his press for printing the present issue of this paper. Not only did he offer the use of his press, but the use of his whole office, and if any personal service he could render while the Editor of this paper is disabled by sickness. The offer of the *Index* press was gratefully accepted, and while the proprietor of this paper sincerely hopes that the proprietor of the *Index* may never be disabled by sickness, yet should that or any other cause ever call for similar journalistic courtesy, it will be tendered as freely as in this instance.

Some Chopping.

A few days ago A. D. McEnery, near Big Pine, chopped seventy cedar posts in four hours. He is a young Canadian. If any of our young natives can make chips fly to beat this let them speak now or forever after hold their peace.

A Costly Joke.

In sixteen months $183,850 was paid out of the State Treasury for coyote scalps. If this scalp bounty were continued coyote breeding would be a better paying industry than raising cattle or horses. The law itself is a specimen of what the wooden headed dolts who generally make a majority in the Legislature imagine to be a joke. It is such dull ignoramuses as these who are the blind tools of boodlers like Bruner and other tricky scoundrels of his kind.

More Than Satisfied.

George Possell and J. B. Goodrich, both from Wisconsin, have been with Mr. A. O. Collins at Warm Spring during the past week. Both are young men and farmers, and have decided to make their future home in Owens Valley. They are interested in the purchase of the Collins place. Particular inquiry was made of both men to ascertain if they had been disappointed in any expectations they had from descriptions given them of Owens Valley. Both said that they found soil, water and climate much better than their expectations. Mr. Possell left yesterday to attend to some business at Los Angeles, intending to return in a few days.

Meteorological Summary.

KEELER, CAL., Jan. 15, 1893.

The Chief of the Weather Bureau directs the publication of the following data, compiled from the record of observations taken at this station during a period of seven years, for the month of February.

TEMPERATURE.

Mean or normal temperature, 45.2°.
The warmest Feb. was that of 1885 with an average of 52.5°.
The coldest Feb. was that of 1887, with an average of 40.0°.
The highest temperature during any Feb. was 73° on the 10th, 1886.
The lowest temperature during any Feb. was 19° on the 23d, 1890.

PRECIPITATION.

Average for month of Feb. 0.53 inches.
Average number of days with .01 of an inch or more, 3.
The greatest monthly precipitation was 1.21 inches in 1888.
The least precipitation was T inches in 1889.
The greatest precipitation recorded in any 24 consecutive hours was 0.88 inches on Feb. 16th, 1890.
The greatest amount of snowfall recorded in 24 consecutive hours (record extending to winter of 1884-5 only) was 1.9 inches on Feb. 15-16, 1887.

CLOUDS AND WEATHER.

Average number of cloudless days, 17.
Average number of partly cloudy days, 7.
Average number of cloudy days, 4.

WIND.

The prevailing winds have been from the S. E. and S. W.
The highest velocity of wind during any Feb. was 48 miles on the 13th, 1890.

H. E. WILKINSON, Observer.
Weather Bureau.

Rumors About Crapo.

A day or two after H. B. Boland was killed at Cerro Gordo, the citizens of Keeler equipped a man named Johnson to go in search of Crapo, the murderer. Johnson said he preferred to go alone, and objected to have anyone accompany him. The Sheriff was not consulted about this matter, nor had he any knowledge of the movements of Johnson until some days after the latter had left Keeler. When the Sheriff was informed of the matter he employed an Indian tracker to follow Johnson; the Indian was told in Saline Valley that Johnson had stayed there on the night of January 24. The tracker followed the trail of Johnson toward Furnace creek, in Death Valley; but being satisfied where Johnson was headed for, did not keep on after him to that point. The Indian says Johnson had not found any trail, and it is possible that the man was making out of the country with the horse and equipments provided by the people of Keeler. The horse belonged to Mr Richards of Keeler, and Sheriff Gorman says he will give the owner at least as good an animal. It was reported a day or two ago that Crapo had been seen in Lida Valley, across the Nevada line, a few days after he had left Cerro Gordo, and appeared to be traveling north. It is supposed he may be making for Idaho.

A Defunct Organ.

For many years the *Territorial Enterprise* was one of the best known and best paying papers on the Pacific Coast. Some of the brightest men on the coast wrote for it for years. It was backed by plenty of capital. John Mackay alone put in $30,000, and the other bonanza kings backed it liberally. From the beginning the paper was the organ of corporations and gradually this fact made it lose public confidence. The course pursued by the paper in the late election killed it outright, and a few days ago an article was published, stating that all legal advertisements would be turned over to the Virginia *Chronicle* and the *Territorial Enterprise* was ended. The *Chronicle* was always devoted to the cause of the people; it had not the great financial backing of the *Enterprise*, yet it still prospers, while the other is dead.

Crowds Interested.

Letters from San Francisco and parties from Inyo who have visited the Columbian exhibit, say that the collection sent by Mrs. Eibeshutz attracts a great deal of attention. While there are larger collections of Indian work, there are no finer samples of skill in basket and bead work. The whole collection so far as quality is concerned compares very favorably with similar displays at the show. The display of Inyo marble is very beautiful and attracts much attention.

ORDER FIXING TIME AND PLACE FOR HEARING OF PETITION TO LEASE CERTAIN REAL ESTATE AND DIRECTING NOTICE TO BE GIVEN.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the Estate of John William Meyer, deceased.

Upon reading and filing the petition of John W. Lacey, praying that the Administrator of the estate of John William Meyer, deceased, be authorized, empowered, and directed to lease real estate belonging to said estate, which is described as follows, to wit:

The N. E. ¼ the N. ½ of the S. E. ¼, and the N. E. ¼ of the N. W. ¼ of Section No. 23, and the S. W. ¼ of the S. E. ¼ of Section No. 14, all in Township 14 South, Range 35, East, M. D. M., in the County of Inyo, State of California.

It is ordered that all persons interested in said estate appear before the above-entitled Court on the 10th day of December, A. D. 1892, at the hour of 10 o'clock a. m., at the Court-room of said Court, to show cause if any they can, why the said real estate should not be leased for the annual rental of $200.00, as is more fully set forth in said petition, reference to which is hereby made for further particulars.

It is further ordered that a copy of this order be published at least two successive weeks in the Inyo Independent, a newspaper of general circulation, printed and published in said Inyo County.

Dated November 23d, 1892.

GEO. M. GILL,
Judge of the Superior Court.

[Endorsed.]
SUPERIOR COURT, COUNTY OF INYO.

THE SONG OF THE TEXAS CORN

I was dry and dusty;
I was weak and weary;
Now I'm glad and lusty,
And the earth looks cheery.
Oh, the soaking,
Mirth provoking,
Laughter making rain;
Soft and silky,
Mild and milky
Grows my golden grain.

Listen to the laughter
That my leaves are making,
When the wind comes after
Kisses, softly shaking.
Oh, healthgiving,
Breathing, living,
Heaven pouring rain!
Come, caress me,
Kiss me, bless me,
Once and once again!

Let your hearts be singing;
Peal your paeans, peoples;
Set the joy bells ringing
In the lofty steeples.
Praises render
To the sender
Of the joyous rain;
Of the living,
The life-giving,
Of the precious rain.
—John P. Sjolander in Galveston News.

How Greeley Helped Lincoln.

"In McClure's 'Lincoln and Men of War Times,' I see," said aged Charles Wister, of Germantown, yesterday, "that the colonel gives Andrew Curtin a great deal of credit for Lincoln's nomination at Chicago in 1860. I sat in a chair beside Colonel McClure in that convention, and I think Curtin and all others were totally overshadowed by Horace Greeley. Greeley bore Seward a bitter grudge. He said he had made Seward governor, and he thought him ungrateful. On Seward's refusal to act as he wished, Greeley declared, 'My time will come at last.' When the convention time arrived we all saw what seemed to be a band of soldiers marching up the street. What was it but old Horace Greeley in his famous plug hat and white coat stalking along after a brass band at the head of the New York delegation. They were the pick and flower of the state too. They were given a rousing reception in the convention hall.

"Greeley had corresponded with the ablest Republicans throughout the Union, and for two years had been planning against Seward's ambition. When the battle was fought and Lincoln was nominated Greeley came down stairs from his room in the hotel with his carpetbag in his hand. As he bade goodby his words were, 'My mission is accomplished.'"—Philadelphia Record.

Change for the Wedding Fee.

A clergyman in Cumberland county had married a couple, and was surprised by the groom's asking him the amount of the bill. He had not been accustomed to receive anything of much value, and said that the matter was left to the groom to decide. "But I'd rather you'd state the figures," was the reply, and finally the minister said, "Well, anywhere between one and ten dollars." The groom handed him a five dollar bill and departed.

In about a fortnight he returned to the minister's house and said, "Look here, when I gave you that five dollar bill I expected some change back." The astonished minister happened only to have two dollars about him. He took that from his pocket and gave it to the man, and there the transaction ended.—Lewiston (Me.) Journal.

Three Remarks About Marriage.

James Lane Allen has a story entitled "John Gray," in which he has three remarks to make apropos to the subject of marriage: "Some women in marrying demand all and give all; with good men they are happy; with base men they are broken hearted. Some demand everything and give little; with weak men they are tyrants; with strong men they are divorced. Every bachelor is really the husband of an old maid. For every single man carries around with him the spirit of a woman to whom he is more or less happily wedded. When a man actually marries, this inner helpmate wisely disappears in the presence of her external contemporary."

Bacteria in Croton Water.

The examinations of artificial ice made from the distilled Croton water have shown that when it does contain a few bacteria these are not of many different species, as is the case with the undistilled Croton, but they are almost all of one single species, and this a hardy, harmless form which multiplies readily and rapidly in pure water.—T. Mitchell Prudden in Harper's.

Driving the Brain

at the expense of the Body. While we drive the brain we must build up the body. Exercise, pure air—foods that make healthy flesh—refreshing sleep—such are methods. When loss of flesh, strength and nerve become apparent your physician will doubtless tell you that the quickest builder of all three is

Scott's Emulsion

of Cod Liver Oil, which not only creates flesh of and in itself, but stimulates the appetite for other foods.

S.F.N. U. No. 548. New Series No. 51

Wedding Presents.

Some years ago, outside of what the wife brought to her husband as a dower, and the gifts she received as keepsakes from her friends, there was none of what we understand now by the now comprehensive term "wedding presents." For some time, though, the custom has been verging upon the absurd, and the funny paragrapher has pointed his wit with the father's blank check, the presents hired for the occasion, the tributes from employes, and has reveled in the snobbish ostentation of the display of gifts, set apart in an upper room, all properly tagged, with a policeman or a private detective in full evening dress to watch both the gifts and the guests. How much this public display of wedding presents has had to do with the increase in their number and cost would be well worth the study.

It is safe to say that there are many people eager to shine in society, and not quite sure of their position, who would willingly pay a wedding present as the price of having their gift laid alongside of the one sent by a more prominent person. Thus would they be assured to gain the coveted honor of having their plebeian names mentioned among the alleged patricians. Under the prevailing custom of wedding present displays no one who wishes to gain or preserve the reputation of being in the social swim can afford to send a mean or a poor present. This factor is carefully taken into account by those making out their lists of invited guests. This many a young man has found out to his cost.—Di Vernon in San Francisco News Letter.

Liveried Maids for Servitors.

The head man in one of the biggest cafes in this city spoke confidentially as follows:

I am waiting for somebody who has the nerve to employ maids in livery to serve tables in restaurants, cafes and the dining rooms of hotels. I would prefer, as a man, to see my own sex employed, but I see enough every day to convince me that men do not make good waiters at the tables. In this country especially you can never get the idea out of a waiter's head that he isn't as good as the man whom he serves. If they are not tipped they act sulky, and I don't dare to correct them for that. There is no curse like that of tipping a waiter.

One man who has more money than he knows what to do with will, foolishly, give a waiter nearly as much as an ordinary man pays for an ordinary dinner. If the ordinary man does not tip likewise he gets the worst of it. There is no use of talking about remedying the evil by making a rule against it. The only way is to remove the cause. You ask me if girls won't take tips. No. You can tell a girl she mustn't, and nine times out of ten she won't. Girls are better waiters in every way than men, and somebody will take the English step of employing them as servitors one of these days in this country, and then people will see the difference.—Chicago Tribune.

The Child at the Table.

So long as custom and necessity render it advisable to have a child at the same table with his parents these should fix upon a plan of action and adhere to it. Desiring to have their children looked upon as comforts and not as spoil sports, they should enforce strict obedience, exact quiet at table and inculcate stringently the once honored maxim—of late years fallen sadly into disuse and disrepute—that little boys and girls should be seen and not heard. Remembering how much easier it is to check a habit at the outset than to break it off after it is fully formed, the father and mother should watch their children's table manners and repress at once the carelessness and unpleasant tricks which seem, possibly through original sin, to come naturally to most little folk. The correct handling of spoon, fork and knife should be taught as soon as they are permitted to use these implements, and slovenliness should be rebuked and held up as a disgrace. Not least in importance is it that the father and mother should, after due consideration, establish an outline of diet for the youngsters and allow no divergence therefrom.—Mrs. Christine Terhune Herrick.

Water, Cold or Hot?

About the cold water or the hot every lady must decide for herself. For young ladies I should say the cold water unless they are very delicate, when the cold water will give them red noses and hands from the reaction. I should never advise any one with red hands or a red nose to use cold water. Always in such a case use it hot as can be borne and lave the nose and soak the hands five or six minutes, keeping the water hot all the while. I think ladies should have a kettle of hot water for their toilet at all times—one of those pretty bronze kettles to boil over the gas or a lamp.

For women who do not call themselves young warm or hot water is indispensable to cleanse the skin, to stimulate it and keep off wrinkles. If they like they may dash tepid water over it after the hot bath, but then the warm, dry towel, always the warm towel, madam. Women wash their faces in such a hurry, with water and soap anyhow, and wipe on a damp, soiled towel that roughens the skin. Only a beauty in her first prime can endure it, when one endures anything.—Shirley Dare's Letter.

Good Homes.

There is nothing that society or church needs so much as it does good homes, and the power and charm of the home is most of all the mother. Every tendency is therefore to be deprecated that operates to cheapen woman's material possibilities, and to make it appear that she can subserve her mission just as well outside of domestic relations as within them. I believe that it is good sense and good scripture to say that about the best thing that can be asked for a woman is that she should marry a man, have health enough to bear children, and mind and womanliness enough to fit those children to be useful members of society.—Rev. C. H. Parkhurst.

Washing Made Comfortable.

One of the most singular of recent patents is a rocking chair washing machine. The rocking chair, which is placed in a tub in which are water, soap and the clothes to be washed, has a rack on its rockers provided with a grooved roller. The washtub has projections on its vertical ends, and allows of the full play of the rocker of the chair. The result of this arrangement is that the mother of the family can rock her child to sleep in her arms, and at the same time be washing the family linen.—New York Telegram.

To Clean Silver Filigree.

A ready mode of cleaning silver filigree is afforded by dipping it in a solution of cyanide of potassium. This, however, is a dangerous liquid to have much around, and a solution of hyposulphite of soda, which is perfectly harmless, will serve the purpose nearly as well. If it is a matter of absolute certainty that there is no metal but silver in the jewelry, it can be easily and effectually cleaned by boiling it in sulphuric acid.—New York Commercial Advertiser.

A strange custom is followed by Mexican farmers. They use oxen of one color in the morning and another color in the afternoon. They do not know why, but they know that it must be the right thing to do, because their forefathers did it.

The best words of Richard III were: "Not one foot will I flee so long as breath bides within my breast, for he who shaped both sea and land this day shall end my battles or my life. I will die king of England."

THEY EMPTIED THE TANK.

Seven Thirsty Elephants and How They Quenched Their Thirst.

One day a circus and menagerie train halted at the railway station on its way through a town. Of course there was great curiosity among the railroad men to inspect this queer special train, and among others the engineer and the fireman of one of the locomotives in the yard left their posts for a short time to see the different menagerie cars.

When they came back and were ready to move their locomotive they noticed that the cover of the water tank was open. Further, they luckily discovered that the tank was nearly empty, although it had been full to the brim when they left it.

Such an extraordinary thing had never happened before! No wonder there was great surprise on all sides; every one knew the tank was full when the men had left it; in fact, some of the "hands" had seen it filled, neither was there a leak in it, and yet the tank was empty. The question was, where had the water gone?

Seven thirsty elephants, shut up all day and all night in a car that gave them hardly room to move, their warm bodies fairly touching one another, a paltry allowance of water to quench their thirst, and then to be left standing on the hot railroad track, the sun's rays pouring down upon the roof of the car, and with only such air as could come through the small open windows! Was it any wonder when their keen scent told them that water was near that they should search for it? How were they to know that it was not there for their convenience?

At any rate, no sooner were the men gone when through a small window of the elephant car the dusky trunk of an elephant made it way sinuously out. Another followed its example, then another, until seven trunks had felt and snuffed around over engine, tender and coal. What they sought was not there; but they still kept moving about, and coming to the water tank one of them stopped, felt all over the cover, and at last managed to get the fingerlike end under the edge of the cover. Then slowly and carefully it was opened, when behold! there was what the elephants wanted—water, and plenty of it.

The owner of that particular trunk took a long draught, its companions meanwhile shoving and pushing one another in their anxiety to drink. One after another they filled their trunks with the cool water and poured it down their dry, parched throats. How grateful! how refreshing! after the long, dusty ride. With what keen enjoyment they squirted the water over their tird, hot bodies until they were cool and comfortable!

The mystery of the empty tank was a mystery but a short time. The keeper of the elephants on visiting the car had found it and the elephants deluged with water. A few inquiries, and the matter was explained to every one's satisfaction.—St. Nicholas.

Brooklyn's Roomy Park.

Brooklyn is becoming quite a town for parks, and the taxpayers have never been known in recent years to object to having their money spent for such purposes. There was a great outcry thirty-five years ago, when the laying out of Prospect park was suggested, but nobody now worries because the project was carried through. The city made a very profitable bargain in buying the 516 1-6 acres contained in that park and paying only $3,918,370.70 for them. Since then the city has expended $5,348,860.35 on construction account, making this one park represent an expenditure of $9,268,231.05, but if it was put on the market tomorrow it would easily sell for twice that amount.

This is the biggest breathing spot in the city. It contains 110 acres of woodland, 77 acres of lakes, 70 acres of meadow land and 259 1-6 acres of plantations. To accommodate owners of horses there are 9 miles of drives and 3 1-10 miles of bridle roads, while the most enthusiastic pedestrian ought to be satisfied with his 12 miles of walks. In addition the national guard and the baseball players are provided with a plot of level greensward known as the parade grounds, and covering an area of 40 acres.—New York Times.

Protecting Sea Beaches.

It is estimated that about 1,000,000 acres on the Atlantic and Baltic shores of Europe have become since the destruction of the forests a moving desert of sand dunes, rolling inland, burying the fertile soil and rendering the land barren by the sand showers sprinkled over it, while following the landward roll of the dunes came the resistless march of the victorious sea.

The endeavor of these threatened countries has been to regain by slow degrees the protection of the forests so rashly destroyed. First, a breakwater or dike is constructed—occasionally a mere plank fence—against which the sand from the beach soon forms long rows of dunes. These sand hills, usually the enemies of the land, being thus hindered from drifting inland, are impressed into the service of the land and become its coast guard against the invading waves.

The second step is to plant them with beach grass, or some other sand loving plant, to bind the sand together and by the succession of growth and decay finally form a soil.—Agnes E. Carter in Popular Science Monthly.

Scotch Dress.

The dress of the last century survived to within living memory. Dr. Gregor, the venerable minister of Pitsligo, thus described to me his mother's preparations for church: "On her head she placed a skull cap to keep the hair up, and over that a fine linen cap, lying quite flat, followed by a broad ribbon going round the head and fastened behind. Over all came a band of thin cambric, drawn into a ruching on the top and having a broad, flat border, showing the hair on the edge. Her outer dress was a red cloak with a hood and made of fine wool. Her ordinary errand going cloak was a duffel of bluish gray. My father at kirk and fair wore a long coat, with brass buttons, of bluish cloth, and for a working dress homemade clothes, with a smaller coat of homespun wool. On all occasions he wore knee breeches."—Blackwood's Magazine.

How Gold Wire Is Made.

I making what is called gold wire a cylindrical ingot of silver well gilt is drawn successively through a number of small round holes in a steel plate, each hole being less than the other, till the thread is no wider than a hair. This can now be flattened by passing between two small rollers of polished steel, and so fit it to be used in the making of brocades, laces, embroideries, etc. Spun gold is, in fact, flattened gold wire wrapped over a thread of silk by twisting with a wheel and iron bobbins.—Chambers' Journal.

About 90 per cent. of the wild animals used for the beast fights of the Circus Maximus came from northern Africa, and the Algerian coast towns are still the favorite rendezvous of international pet dealers.

According to a somewhat cynical old proverb the meed of nightly sleep justly due to average human beings should thus be distributed: "Six hours to a man, seven to a woman and eight to a fool."

How to Keep Shoes Soft and Pliable.

When shoes are only blacked the leather soon becomes hard and dry, the best fitting pair will be uncomfortable, and here and there little cracks will appear, which will soon become chasms. Every week or two the blacking should be wiped off with a damp cloth, the shoe should be allowed to dry and then be rubbed with the best harness oil. Every part, including the sole and the seams, should be oiled and the oil given a chance to soak in. The toughest leather can be made soft in this way, and good leather will, after this treatment, feel like kid. The shoe will wear three times as long and be infinitely more comfortable in the wearing. Vaseline is thought by some to be superior to harness oil. The easiest way to clean rubber overshoes that have become muddy is with vaseline. A little "swab" of flannel on the end of a stick is good for this purpose.—New York Journal.

A Generous Lord.

Lord Tollemache, who died in London at the age of 82, was known as the best landlord in Great Britain. Although the most uncompromising of Tories, he divided his vast estates into small holdings, allotted three acres to each laborer for garden, grazing and tillage, demanded that a cow and a pig be kept, had his tenants taught butter and cheese making, and allowed them time to cultivate their holdings, the results of his liberal policy appearing in a large increase in the valuation of his property, and the most prosperous and contented tenantry in the United Kingdom.—Harper's Bazar.

Taking Children to Church.

Children should be taken to church once every Sunday, not more until they are old enough to desire it. The habit is invaluable, and this invests it with the charm of association. The remembrance of the father's reverent manner and the mother's earnest devotion, the stillness and the calm of the sacred atmosphere, will form a chain too strong to be broken to bind them in after life to the service of God's house.—Elizabeth Scovil in Ladies' Home Journal.

A VALUABLE REMEDY.

BRANDRETH'S PILLS purify the Blood, stimulate the Liver, strengthen the Kidneys, regulate the Bowels. They were introduced in the United States in 1835. Since that time over sixty millions of boxes of BRANDRETH'S PILLS have been used.

This, together with thousands of convincing testimonials from all parts of the world, is positive evidence of their value.

BRANDRETH'S PILLS are purely vegetable, absolutely harmless, and safe to take at any time.

Our little Johnnie has begun
Exceeding good to be.
All Sunday Schools he used to shun
And now he goes to three.

CATARRH CAN'T BE CURED

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you have to take internal remedies. Hall's Catarrh cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is no quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

Lottie—Is there any good ground for the report that you are engaged to young Plunge, dear? Tottie—Yes, the seven corner lots his rich uncle has given him.

"YOUR WORK IN LIFE."

A series of 13 articles by successful men in as many pursuits is one of the many strong groups of articles which are announced in *The Youth's Companion* for 1893. "The Bravest Deed I Ever Saw" is the topic of another series by United States Generals. The prospectus for the coming year of *The Companion* is more varied and generous than ever. Those who subscribe at once will receive the paper free to Jan. 1, 1893, and for a full year from that date. Only $1.75 a year. Address THE YOUTH'S COMPANION, Boston, Mass.

The more liquid a man puts down his throat the less chance there seems to be of drowning his voice.

For Coughs, Sore Throat, Asthma, Catarrh, and other diseases of the Bronchial Tubes, no more useful article can be found than "*Brown's Bronchial Troches.*"

A man who likes anything that is good for him is a curiosity.

MUSEUM OF ANATOMY.

Dr. Jordan & Co.'s Rooms at 1051 Market Street, San Francisco.

It has been comparatively but a few years since the importance of personal knowledge has occurred to the public mind. Physiculture and outdoor recreations with a close attention to the rules of hygiene have superseded the languor of the fashionables of the last century. The first step in the right direction has been taken and paved the way for common sense to step in and carry on the work of education and enlightenment.

It is an historical fact that the stronger, healthier and more physically perfect a nation grows to be, so in proportion are the mental and moral endowments, and this can best, and in fact only, be effected when people are educated into a thorough knowledge of their physical person. As "prevention is worth a pound of cure" so should they understand from cause to effect. All the physicians in the world cannot help a man if he does not help himself. Many diseases and mush suffering might be entirely obviated if in the first place avoidances or proper precautionary measures had been taken. The great importance of this cannot be too highly impressed upon the mind, and especially that of youth.

Dr. Jordan & Co.'s Museum of Anatomy, 1051 Market Street, between Sixth and Seventh, San Francisco, has been established thirty years. It is well known all up and down the coast, but never so favorably as now, when self-knowledge daily demonstrates its advantage in delightful health over the suffering wreck resulting from ignorance or a misapplied and false idea of time-worn modesty. It is also a serious and most interesting study and can be pursued under the greatest advantages, as Dr. Jordan's Museum afford's every facility by the best and finest casts, each taken from a special subject. No subject is treated in an immodest or sensational style, but only true to nature and of the utmost importance and benefit to man and woman, as well as to generations yet unborn.

There are also many curious specimens and relics, one of which is the head of Joaquin Murietta, the famous California bandit, of which the city newspapers frequently speak as having disappeared. It is in Dr. Jordan's museum, carefully preserved in spirits, and many of those who saw him in life have readily recognized his well-known features. In the same jar is the hand of the equally famous Three-Fingered Jack, one of Murietta's lieutenants.

Dr. Jordan has shown wonderful judgment in the selection of the casts and curios that comprises his remarkable collection. They are from all parts of the world, have been carefully selected and represent a large sum of money. A cursory glance is not sufficient to exhaust the resources of this place; many hours can be profitably spent in studying this collection and every one who goes once realizes this fact.—*S. F. Report.*

The only man on earth who thinks twice before he speaks once is the man who stutters.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet, Drs. Porterfield & Closey, 838 Market street, San Francisco.

Leap-year parties have but a short time to live. Make hay while the sun shines.

Enameline Stove Polish: no dust, no smell.

They all Testify

To the Efficacy of the World-Renowned **Swift's Specific.**

The old-time simple remedy from the Creeps swamps and fields has gone forth to the antipodes astonishing the skeptical and confounding the theories of those who depend solely on the physician's skill. There is no blood taint which it does not immediately eradicate. Poisons outwardly absorbed or the result of vile diseases from within all yield to this potent but simple remedy. It is an unequaled tonic, builds up the old and feeble, cures all disease arising from impure blood or weakened vitality. Send for a treatise. Examine the proof.

An Only Daughter Cured of Consumption.

When death was hourly expected from *Consumption*, all remedies having failed and Dr. H. James was experimenting, he accidentally made a preparation of Indian Hemp, which cured his only child, and now gives his recipe free on receipt of two stamps to pay expenses. Hemp also cures night sweats nausea at the stomach, and will break a fresh cold in twenty-four hours. Address Craddock & Co., 1032 Race st., Philadelphia, Pa., naming this paper.

There is hope that the next international muss won't be on the Isthmus.

A HERALD OF THE INFANT YEAR.

Clip the last thirty years or more from the century, and the segment will represent the term of the unbounded popularity of Hostetter's Stomach Bitters. The opening of the year 1893 will be signalized by the appearance of a fresh Almanac of the Bitters, in which the uses, derivation and action of this world-famous medicine will be lucidly set forth. Everybody should read it. The calendar and astronomical calculations to be found in this brochure are always astonishingly accurate, and the statistics, illustrations, humor and other reading matter rich in interest and full of profit. The Hostetter Company, of Pittsburgh, Pa., publish it themselves. They employ more than sixty hands in the mechanical work, and more than eleven months in the year are consumed in its preparation. It can be obtained without cost of all druggists and country dealers, and is printed in English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish.

The sinners on the front seats are hardest to hit.

A SOVEREIGN REMEDY.

Dr. Parker's Sure Cough Cure. One dose will stop a cough. It never fails. Try it. Price 25 cents a bottle. For sale by all druggists. Pacific Coast Agent, Geo. Dahlbender & Co., Druggists, 214 Kearny St., San Francisco.

LET THE GRASS GROW.

Let the grass grow over your graves of sorrow
and sin and care;
Let the grass grow over your saddened shame
and your misery of despair;
Let the grass grow over your long nursed woe
and the fear of that awful doubt;
Let the grass grow over the sin and the hate
that brought the trouble about.

Let the flowers grow over your grave of folly
and crime and fears;
Let the flowers cover the ghastly past with the
beauty of better years;
Let the flowers cover the awful plan of vengeance
and thought of wrong;
Let the flowers grow, let vengeance stay where
vengeance doth rightly belong.

Let darkness cover your grave, let the soft
years murmur by;
Let repentance break their loneliness with the
sad and bitter cry;
Let affection twine, and the virtues bloom
and cover the naked sod;
Let the grass grow over the grave, my child,
and leave it alone with God!

—Theater Magazine.

When Money Was Plenty.

There is a class of men, particularly in the western country, who get into the habit of stretching the truth of incidents which occurred in their pioneer days until they become to believe them as facts. One of the most scientific of these is Jim Hawthorne, whose home now is near White Pine, Gunnison county. Here is one of Jim's stories: "Me and my pardner," he observed, "made more money in them days than we knew what to do with. For instance, when we had that big government contract for wood we was rollin in money. Money was commoner than chipmunks, and it wasn't much good to us neither, 'cause we didn't have no stores to spend it at. That contract was for 50,000 cords of wood. We got $175 a cord, and we made money very easy." "What was the government doing with so much wood?" "Well, I don't know. Some of it was used by the Indians. The government just had it left around handy for clambakes.' "Clambakes?" "Why, cert; clambakes were very common in them days on the Platte." "Did you deliver the full contract?" "No. We kind of let up after we had delivered 40,000 cords. We didn't want to bust the government. I just tell this to show you how plenty money was in them days."—Colorado Sun.

Keene's Pipes.

A good deal has been written in various quarters with regard to the little Elizabethan pipes in which the late Charles Keene took such great delight. I cannot help thinking that the persistent smoking of these pipes must have done no little injury to his health. The pipes were so short, they became so charged with nicotine and he so persistently smoked them at every opportunity that I cannot help thinking he must have absorbed a large amount of poison into his system.

No one, unless he had smoked one of Keene's pipes, could have the least idea of its strength. I remember trying one at his studio one evening, and though a pretty tough tobbaconalian I shall never forget how my head was affected and all the pains I endured in consequence. I had all the symptoms of suffering from the effects of a powerful narcotic poison.—London Graphic.

An Apparent Impossibility.

The phrase "squaring the circle" is another way of saying "attempting an impossibility." The allusion is to the mathematical question whether a circle can be made which contains exactly the same area as a square, and the difficulty is to find the precise ratio between the diameter and the circumference of a circle. Popularly it is 3.1459, etc., but the numbers would go on to infinity. This problem has given rise to an amount of labor only equaled by that bestowed upon the equally impossible one of discovering perpetual motion.—Brooklyn Eagle.

Saving to No Purpose.

It has sometimes happened that persons little deserving, and even rulers, have reaped the harvests which misers have painfully sown. The life of Vandille is a proof of this. This man lived upon bread and milk, with the addition of a small glass of sour wine on Saturdays. At his death he left £800,000 to the king of France. Audley, the commonwealth miser, saved £400,000, all of which reverted to the government.—Cassell's Journal.

Time to Swear Off.

The Rev. Dr. Primrose—I'm glad to hear your husband has given up melon stealing. It is some comfort for me to feel that perhaps my poor words have had something to do with his reform.

Mrs. Johnson—Dat wasn't de reasun, sah. Yo' see ob late de po' man wuz gitin kotched ebery time.—New York Evening Sun.

English and American Games.

A careful examination of the catalogues of English dealers in games shows that the popular games in England are in every way identical with those in the United States, and not a single game could be found in any of them that is not well known and current in this country.—Philadelphia Ledger.

American Tips Too Large.

Frenchman—Vat you gif zat wataire?

American—I gave the waiter half a dollar.

Frenchman—Mon dieu! Zat ees not von teep; zat ees von bribe.—New York Weekly.

There is a man in Montezuma, Ga. who has had his arm dislocated at the shoulder thirty-eight times and his leg dislocated at the hip eight times.

Rubies have been obtained up to the present time from the old beds of streams, having been washed out of the rocks originally by the water.

The father of Haydn, the composer of "The Creation," was a wheelwright and often scolded his son for neglecting business.

Cannon were invented in 1330, were used by the Turks at Adrianople in 1453 and were made in England in 1547.

The Author of an Old Campaign Song.

There is satisfactory evidence that the words of "Tippecanoe and Tyler, Too," were written by A. C. Ross, of Zanesville, O. This was the original song. The words then comprised only a comparatively few verses. The song was such a success that additions were made to them in all direction. Here is an instance in point. The Whigs unexpectedly carried the state of Maine, electing Edward Kent by a very small margin for governor. This verse immediately appeared:

Have you heard from Maine, Maine, Maine,
good news and true?
It went, hell bent, for Governor Kent, and
Tippecanoe and Tyler too.
And with them we'll beat little Van, Van,
Van.
Oh, Van is a "used up man," etc.

As regards the music, it was adapted from a familiar air of the times, which had the not very attractive name of "Little Pig's Tail." Henry Russell was an Englishman, and at that period was the most popular concert singer in this country. He was a composer, but he did not compose this tune, and probably would not have been very proud if he had been credited with its authorship. It is altogether likely that the Whigs engaged him to sing it in Boston, as he told our correspondent that he did sing it as he stood in a window near the corner of Washington and Milk streets. Mr. Russell must be a gentleman well advanced in years by this time. It is a great many years since he ceased to sing in public in this country. It may be interesting to know that he is the father of W. Clark Russell, the popular writer of nautical novels.—Boston Herald.

Coins of Value.

"Some pennies are worth a good deal of money," said a dealer in coins. "If you come across an old collection of copper cents in an out of the way corner you will do well to examine their dates carefully. From the point of view of the numismatist their value depends largely upon their condition. For example, for a cent of 1799 in a fair state of preservation we pay five dollars, but for a specimen of the same issue in first rate condition we would pay from ten to twenty-five dollars, and for a perfect cent of 1799—that is, as bright and sharp as the day it was coined—we will pay $100.

"Do not attempt to clean coins that are in fine condition. They should be held only by the edges in handling them, and ought to be kept wrapped carefully in chamois skin or soft tissue paper or laid on velvet. Gold and silver coins may be rinsed, not washed, in hot water and soap. Copper coins should be placed in sweat oil only to remove grease and dirt. Acids and scouring will ruin any coin of worth. Age does not necessarily make value in coins. The old Spanish silver pieces current in this country from 1700 to 1800 are worth no more than their face, and the same is the case with cents of 1798, 1802 and 1803, as well as with half dollars of dates between 1805 and 1835."—Washington Star.

An Old Question Asked Anew.

The old question has been lately asked anew, Why fill the infant mind with images of cruelty and horror? Why suggest to innocence the dreadful vision of ogres fattening captives like sheep for their table? Why torture it with that appalling cabalistic bloody invocation, Fee, faw, fum? Why permit the hoary murderer Blue Beard to terrify the young before in historical sequence they reach Henry VIII, in no extenuating page of Froude, but as the grisly murderer and defender of the faith of the older annals? And why perplex the callow pilgrim scarcely embarked on the journey of life, which the reverend and the wise describe as a moral warfare, by the rhyme which declares the greedy thief of a plum from the copious pudding a good boy?

Why is a glutton who triumphs in his gluttony to be commended in honeyed measure as good, while nothing is said in praise—nay, he is not even mentioned—of the virtue of the unnamed comrade, who was undoubtedly present and who restrained his desire to pull out plums, and who, so far as posterity knows, not only had no plum, but also forbore the sauce?—George William Curtis in Harper's.

Railroad Speed and Obstructions.

Two years ago a cow was seen in the middle of the Monon tracks in front of a train. The engineer tried to stop, and the result was the locomotive was derailed and the engineer killed. A few months ago the writer was riding on an engine on the Chicago division of the Pennsylvania, and a herd of cattle got on the track. The train was running almost forty miles an hour, but when the engineer saw them he "threw her wide open," and went into them at full seventy-five miles an hour.

No damage was done except to "muss up" the engine extensively. The engine man was asked why he had thrown on the extra speed. His reply was that had he been running slow it was eight chances to ten that he would have left the track.—Indianapolis News.

Standing Bear.

A book could be written about Standing Bear. Properly speaking he is not a Sioux, but a Northern Cheyenne. With Crazy Horse, Hunting Hog and old Chief Gall he has been at the head of nearly all the notable Indian wars for twenty years. He routed the Pawnees and once killed ten white men in a lonesome canyon single handed. On another occasion he defied and defeated alone thirty cavalrymen. It was Standing Bear who under Sitting Bull routed the United States forces when Custer died on the Little Big Horn.—San Francisco News-Letter.

A Plain Statement.

A Hartford girl called on a physician recently who is as plain in his speech as his patient is in respect to her face. He tried to cheer her; her ailment being only a trifling matter, he said. "Oh, doctor," she groaned, "I feel worse than I look." Then, my dear young lady, there is no hope for you," replied the doctor.—Philadelphia Ledger.

DREAMS AS PROOF.

Peculiar Testimony Recorded in the Law Books of Centuries Ago.

STRANGE ACTIONS OF A CORPSE.

Dreaming of a Crime Before it Was Committed.—A Mother Sees Her Son Killed and Avenges His Death.

Law reports of the Sixteenth and Seventeenth centuries contain numerous references to supernatural occurrences in court and on the scaffold. One of the most remarkable records of this kind is connected with a murder trial which took place in England early in the reign of the first Charles. Sir John Maynard, one of the first lawyers of the century, is the authority for the supernatural events of the trial, and in his quaint preface to his notes he says he "thought good to report the evidence which was given, which many did hear, that the memory thereof might not be lost by miscarriage of papers or otherwise."

One Johan Norkett, a farmer's wife, had died, and at the coroner's inquest evidence was given proving that the woman's throat had been cut from ear to ear. At first the jury favored a verdict of felo de se, and the body was interred; but rumors became general pointing to foul play, and the body was exhumed. Thirty days after the death the jury assembled before the body, and four suspected persons were brought in. The only evidence against the prisoners was that they slept in an adjoining room, and that no one had passed that room; "therefore, if she did not murder herself, they must be the murderers."

QUEER ACTIONS OF A CORPSE.

What took place at the remarkable post mortem inquiry may best be described in the words of a witness at the subsequent trial, who was described as "an ancient and grave person, minister to the parish where this murder was committed." This estimable gentleman said: "They (the prisoners) did touch the dead body, whereupon the brow of the dead, which was before a livid and carrion color, began to have a dew or gentle sweat arise upon it, which increased by degrees till the sweat ran down in drops upon the face, the brow turned and changed to a lively color, and the dead opened one of her eyes and shut it again, which she did three several times. She likewise thrust out the ring or marriage finger three times, and pulled it in again, and the finger dropped blood on the floor."

Naturally enough such remarkable evidence as this was received with some suspicion by the court, although the witness, to again quote Sir John Maynard, "was a reverend person about 60 years of age, as could be guessed. His testimony was delivered gravely and temperately, but to the great admiration of the auditory." Ample confirmation of an obviously impartial character was, however, forthcoming, and the "admiration" turned to horror, so much so that the prisoners were convicted, and two of them suffered death at the hand of the common hangman. Neither of the victims, one of whom was an aged woman, could ever be prevailed upon to confess any complicity in the crime.

SAW THE CRIME IN A DREAM.

In 1751 an Irish murderer was convicted largely upon dream evidence. A Waterford publican named Rogers dreamed one night that he saw a man murder another man on a green spot on the summit of an adjoining mountain. He was able next day to describe both men with perfect accuracy, and did so to many of his friends. One of the men was exceptionally strong, the other weak and puny; but it was the latter who, in the vision, committed the murder. Rogers persuaded the parish priest to accompany him to the spot, which he found without difficulty, but where there seemed to be no traces of a murder or a struggle. Hence Rogers got rather laughed at. Next day, however, two men entered the public house, and Mrs. Rogers at once recognized them from her husband's description as the heroes in the vision. Much alarmed she fetched her husband, who was also certain they were the two men.

When they rose to leave Rogers begged the one he expected to be murdered to remain, but without avail. He nearly fainted with fright after the men had left, and finally persuaded a neighbor to accompany him to the green spot on the hill, where, sure enough, the tragedy of the dream had taken place in reality. The murderer was tracked and caught, and Rogers was the principal witness. His recital of his dream was so vivid that the prisoner at once confessed, adding that he killed his companion exactly as foretold in the dream. The weapon used was a knife, and as eight stabs were seen by Rogers in his dream, so the murderer admitted that he drove his knife up to the handle in his companion's body exactly that number of times.

A MOTHER'S VIVID DREAM.

In 1810 a woman named Kraeme appeared before a Frankfort justice and asked to be sworn, as she had valuable information about a crime committed in a remote village in Russia, many days' journey from her German home. The story she told the justice was this: Ten years before her only son had left home. She heard nothing of him, and had no [illegible] at all where he was living until the night before, when his spirit appeared to her and told her what she now hastened to relate. The revelation was that after leaving home the young man had wandered about Europe till he had finally found permanent work in the village of Kiaf, in Russia. Here he had fallen in love with a serf's daughter who had a Russian beau. On the preceding night this latter had inveigled the young Teuton into the country, where he had stabbed him and then concealed the body in a cave off the highway.

The justice knew that his informant was poor and had never been outside of her native town, and he was so struck with the vividness of her description of victim, assailant and location that he forwarded it to a notary in Kiaf.

Meantime Carl Kraeme had been missed, and on the receipt of the dream story the police hunted for the cave, found it exactly as located, and also found the body, with a wound corresponding with that described in the vision. The murderer was at once arrested, and the Widow Kraeme undertook the long journey to avenge her son's death. Her recital in court was vivid in the extreme, and she screamed with fright when she first saw the prisoner, whom she identified and picked out from among a crowd of men in a dimly lighted cell. She also identified the woman who was at the bottom of the trouble.—St. Louis Globe-Democrat.

She Was an Artist.

"I'll admit Emmeline de Corridor is a popular actress, but she's no artist."

"And yet she draws good houses, you'll admit?"—American Grocer.

EARLY OVERLAND JOURNEYS.

Interesting Paper Read Before the California Historical Society.

R. A. Thompson read a paper before the California Historical society upon "The Overland Journeys of Jedediah Smith in 1826 and 1827." Capt. Smith and his band of hardy trappers were the first white men known to enter California by the overland route. He, with Jackson and Sublette, constituted the Rocky Mountain Fur company in 1826, and they determined to project their operations westward from the Rocky mountains to the Pacific coast, and contest with the Hudson Bay company for the wealth of furs and skins supposed to be obtainable along the western coast. While the other two partners turned northwestward from Salt Lake and journeyed toward Oregon, Smith left the rendezvous at Salt Lake in August, 1826, with fifteen men and started for southern California.

Following up the Sevier river, and across the divide to the head of the Virgin, he went down the latter to the Colorado, and was piloted across the Mojave desert to San Gabriel mission, where he arrived in December, 1826. The Mexican governor of California, then at San Diego, summoned Smith to his presence, and learning of his intention to go up the coast to the Columbia river, forbade the journey, and ordered Smith and his party to return to United States territory by the route he had entered the Mexican province. But the hardy American did not propose to abandon his purpose so readily, and in January, 1827, he quietly set forth on his journey northward.

He entered the San Joaquin valley, and proceeded as far as what is supposed to be the Sacramento or American river, where he encountered hostile Indians. Turning back to where he had encountered a more friendly tribe, he made a permanent camp, and with two men started back for the company's rendezvous at Salt Lake for re-enforcements. Crossing the Sierras by Walker's Pass, the trip to Salt Lake was made in twenty-eight days.

With eighteen men and two women, wives of members of his party, he started on his return to his camp by the route originally traversed, but in August he was attacked on the Colorado by Indians, and ten of his men and two women were killed. After much suffering and renewed difficulties with the Mexican authorities in southern California the survivors reached the camp in the San Joaquin valley. Six months were spent in trapping along the upper Sacramento, and after securing $30,000 worth of skins the party started for the Columbia river, but all except Smith and three others were killed by the Indians.

He reached Vancouver destitute, but was well received by the Hudson Bay company's manager there. A portion of his possessions was rescued from the Indians by aid of the Hudson Bay company's men, and Smith finally reached his partners, and in 1830 returned to St. Louis. In 1831 he started with a wagon train for Santa Fe, but was killed by the Comanches at the crossing of the Cimarron river.—San Francisco Bulletin.

Influence of a Simple Invention.

One cannot always tell, until after the event, on what apparently insignificant act his whole future hinges. Dr. Cyrus Hamlin, president of Middlebury college in Vermont, and formerly of Maine, in a recent address at Woodford's said his life depended on the making of a screw. When at Bowdoin college in 1832 he made a brass screw for Professor Smith's theodolite, and that led to his making a steam engine, the first one built in Maine.

He had never seen one in all his life, but he asked the professor if he thought he could sell an engine, if he could make one, for as much as he could earn by teaching in the vacation. The professor thought he could, he had made the screw so perfectly. So he went to Portland, and went to work in a clockmaking establishment. At the end of ten weeks' vacation the engine was completed, and sold to Bowdoin college for $175. He could have earned but $40 teaching. The price of the engine was sufficient to pay a year's expenses at Bowdoin in those days.—Bangor News.

Credence in Medicinal Charms.

It is not only among the rude savages of India that the virtue of medicinal charms is implicitly credited. The illiterate and simple minded of England repose all necessary faith in the same fascinating delusions, and there is no ancient woman in any of our remote villages, who professes the customary knowledge and superiority of her age, who has not a specific charm for whooping cough, ague, teething, convulsions, epilepsy and every other common ailment and disease.

Every one is acquainted with the efficacy of the "royal touch" in cases of the king's evil, or scrofula, and scarcely a week passes that we do not see in our newspapers an advertisement for the disposal of a child's cold or a serious form of deafness.—London Tit-Bits.

Sickness and Superstition.

For the cure of epilepsy, or the falling sickness, numerous are the charms that have been invented. A very common remedy among the poor people about London, and particularly in Essex, was to cut the tip of a black cat's tail in order to procure three drops of blood, which are to be taken in a spoonful of milk and repeated three days successively. If the patient was informed of the composition it lost its efficacy. The patients also were to creep head foremost down some three pairs of stairs three times a day for three successive days.—London Tit-Bits.

Dried Mushrooms in Soups.

The indiscriminate use of dried mushrooms in soups and stews on the continent has led to unfortunate results in many cases, especially, it would seem, in Berlin, where the police are stated to have issued a caution against their consumption. The assertion that poisonous fungi are sometimes dried with edible mushrooms is sufficiently probable to cause no surprise.—London Hospital.

A LEADER'S FATE.

A Story of the Vigilante Days When Montana Was But a Territory.

HANGING A ROUGH FOR TREASON.

Summary Justice that Taught a Lesson to the Lawless Element.—Holding Court in a Grocery.

I was chief of the vigilance committee, and we had successfully engineered about forty or fifty hangings, when we became imbued with the idea that a little more lawful form of government would be to the better interests of our camp, Virginia City then having about 10,000 population. So one evening we gathered together on the outskirts of the town in an informal mass meeting, and proceeded to choose from among ourselves officers for our local government. Our organization was the simplest thing in the world. We would turn to one of our members and say, "You are a pretty square sort of fellow, and we know you to be as straight as a string, so you shall be our judge," and to another, "You are a heavy built chap and have plenty of grit, and you shall be marshal." I was district attorney because I had a smattering of law, and it was upon my affidavits that all warrants were issued.

Our court was respected by all the citizens of Virginia City, Mon. That is, most all of them. For a time all went well, but after awhile, when they found we were not hanging so frequently as before, the lawless element grew bolder and more aggressive. The leader of this tough part of our population was Mr. Slade. One morning, after we had organized our court, news came that Mr. Slade and his chosen friends had spent a night at a disreputable house, and in the morning destroyed it. We sent our marshal with instructions to arrest Slade and bring him to court. In due time they both appeared, Slade peaceable enough and very gentlemanly. After hearing the case the court imposed a fine of twenty-five dollars, which was cheerfully paid by the defendant, and he departed, inviting us all to come and have a drink. Not long after that Slade was again before us charged with the same offense. This time the fine was doubled and paid with the same degree of alacrity which had marked the previous payment.

On one occasion, when the fine had reached the sum of $400, Mr. Slade said he had not that amount with him, but would bring it in the next time he came to town. He acknowledged our power and didn't care for money, as he was a man who made it easily. Well, he came to town several times after that, but did not offer to pay the $400. It was not in his nature to long remain quiet, and soon he was again in trouble for a like offense. Our marshal brought him to the courtroom, which was a portion of the grocery store, with barrels of flour and grain around the floor and bacon and hams suspended from rafters. We used soap boxes instead of chairs, and were not a very imposing assemblage. Mr. Slade came in peaceably enough and stood quietly while the court directed the marshal to read the warrant.

As the marshal pulled out the document Slade, quick as a flash, sprang at him and jerked it out of his hands, at the same time leveling a revolver at the heart of his honor. It was all done in a second, and the six or eight henchmen of the tough had also drawn their pistols at the same time. "Now," said Mr. Slade, "I am about tired of this business. I am not going to be drained any more and I am not going to recognize your authority, nor shall I pay that $400. I shall hold you personally responsible for my personal safety, and if any of your committee attempts to touch me I will blow your heart out."

While he was speaking I was thinking, and before he had concluded quietly turned and walked out, as if thinking of something else. I walked out on the street, and the first man I met was a member of our vigilance committee. I explained the situation to him, and asked him to get on his horse and ride to a camp about two miles away and tell the boys we needed them. He set off in post haste, and I turned back toward the courtroom. Just as I turned around I came face to face with Slade and his followers, who had walked boldly out of court soon after I came away. "Come in and have something, Sanders," called the irrepressible. I said to him, "Slade, get on your horse and go home as fast as you can."

"What do you mean? Why do you tell me that?" demanded Slade.

"Never mind what I mean," I replied; "get on your horse and go home."

He didn't get on his horse and go home, but he got on his horse and rode all through the town, bringing up at last at the courtroom. He was inclined to be very proud of his defiance of the orders of the court, and was insulting to his honor, who was still there. He was swaggering around the store when I happened to look out of the window and saw that the house was surrounded by armed men. The next minute they were in the room and one of them was saying, "We want you, Mr. Slade." He turned pale and weakened at once. A crowd of his captors surrounded him, and I left him safe in their keeping. I went home, and was not there five minutes when one of the vigilantes came up and said, "Mr. Sanders, the boys have about concluded that they won't be bothered with Mr. Slade any longer, and as there is no place to keep him safely they are going to hang him whether the court wills it or not." I hurried to the courtroom and saw the judge and the marshal and several others, and after a conference we agreed that as Slade was bound to hang whether by our wishes or not, it was better to have him executed by order of the court, and thus preserve our hold on the community.

We sentenced him to death for high treason for inciting others to rebellion and for himself seeking to overthrow our form of government. When Slade heard of this he sent a messenger for me to come to him at once and make a speech in his behalf. I knew that it would be worse than useless for me to do so and refused to go on a fool's errand. Then he sent me to our judge with a similar request, but the judge knowing that he was powerless to prevent the execution declined to see him. So Mr. Slade was taken to a hill overlooking a gulch, and a noose from a gallows (used to slaughter sheep) slipped around his neck and a barrel placed under him. Just as he was about to be swung off the noise of a horse's hoofs was heard and a mounted woman appeared in the distance coming at a breakneck speed. It was Slade's wife; but by the time she arrived upon the scene, around which 2,000 people were gathered, the barrel had been kicked from under him, and Mr. Slade was no more.

That is the story of the execution, and a singular one it was.—Senator Sanders' Interview in Cincinnati Commercial Gazette.

How She Received His Proposal.

There is in Washington a young typewriter whose good looks and charming manners justify the sentiments which her employer feels toward her. He is in the habit of dictating his correspondence, while her expert fingers transfix the words as he utters them. The other morning he concluded to end the uncertainty which had come into existence by asking her to marry him. She was engaged on some copying when he approached her and poured out his sentiments, and notwithstanding the warmth of his pleadings kept right ahead with the clickety, click click of the instrument. In fact, she paid so little attention to him that he became discouraged and left the room, intending to speak to her when her mind was free from her duties.

He went to his lunch, and on his return put down to sign a lot of letters that lay on his desk. There was a large pile, and he went through it mechanically until he struck a sheet near the bottom. Jumping to his feet, he simply exclaimed: "Well, I'll be blowed!" The cold, glaring typewritten letter read:

"MISS SUSIE—Maybe you'll think I'm an old jackass, but I ain't. I mean business. I know I don't happen to be very pretty, but I'd be good to a family. I was thinking that maybe you'd learn to like me if you'd go to church with me—and give the minister a few minutes' employment. And this ain't to save any salary either. It's because I want you for your ——. Say, you ain't listening, are you? Well, I'll come in later when you ain't so busy."—Washington Capital.

Economizing.

Miss Biffins (preparing for the surf)—W'at's de use ob goin' to de expense ob stockin's w'en yo' bruder hab such artistic erbility as dat!—Life.

A Wonderful Medicine

Doctor (to patient)—I have exhausted every other resource, my dear sir, and with your permission I will now give you a hypodermic injection of Dr. Brown-Sequard's elixir.

Patient (Kansas City man)—Have you ever tried it on anybody?

"Yes, I have used it with excellent results on several persons. I remember one in particular—a gentleman from St. Louis—upon whom I attended a few days ago, and"——

"Did the elixir help him?"

"Made a new man of him, sir."

"Actually put life into a St. Louis man! Go ahead, doctor, go ahead!"—Chicago Tribune.

A Neat Answer.

Penelope Peachblow—How do you do, Mrs. Plantaganet?

Mrs. Plantaganet—You must excuse me, but I do not think we have ever met.

Penelope Peachblow—Yes; last week at Mrs. Westerley's.

Mrs. Plantaganet (with increasing coolness)—You have the advantage of me.

Penelope Peachblow—I think I have, Mrs. Plantaganet, in eyesight, memory and manners. Good afternoon.—Life.

Social Etiquette.

The following is a conversation between little 5-year-old Willie and his mother after having dined at a friend's the day before:

"Mamma, when Mrs. Baker asked us to take dinner with her papa walked right in."

"Why, yes, my dear, why should he not? What would you do?"

"Oh, I would say: No, thank you, Mrs. Baker, we had our dinner at home,' and then let her suade (persuade) us."—New York World.

Wasted Sentiment.

Mr. Browningbeans (of Boston)—My dear, did you not receive that copy of "Rossetti" which I sent to you by mail with the marked sonnet—

Two separate silences
Which brought together would find loving voice

Miss Porker (of Chicago)—Why, laws, yes; I did get a book, but as it came as third class matter I didn't think it could be much account anyway!—Time.

How They Grow.

Merchant—Can you bring me a few bushels of green peas this morning?

Dakota Gardener—Not this mornin'. My peas war' jest blossomin' when I left home an hour ago. But ef that ar' cloud drops an inch or two so's ter keep offen the sun, I'll be here with a load this arternoon.—Time.

Exchange of Greetings.

They met upon the platform as they passed from car to car
Quoth the one with mask and pistol: "Come, sir, tell me who you are."
"I'm the train boy," said the other. "Now, sir, tell me, who are you?"
And the first one answered, saying: "I'm a railroad robber, too."—Washington Post.

The Average Man.

Wife—You missed the baby greatly while we were away, didn't you?

Husband—Yes; couldn't sleep at all for a while, till I put a sawhorse and wheelbarrow in the bed and hired a man to play an accordion in the room nights.—Omaha World-Herald.

Never Fails.

Rev. Primrose—The tide waits for no man, my young friend.

Merritt—So they say. Still, when one lies down on the sands, it seems to wait till he's asleep.—Life.

A Practical Test.

"Mamma, dear, do you know you've got twenty-nine pins in the back of your dress?"

"Good gracious, child, how do you know?"

"Why, I've just pulled them out."—Pick-Me-Up.

A Real Rouser.

First Omahan—Do you have as many rousing times at your house as you used to?

Second Omahan—Yes, indeed, lots more. We've got a baby now.—Omaha World-Herald.

A Possible Catastrophe.

A little girl who had the scarlet fever was told that the disease would have to peel off. "But if I peel off," she said, "what will hold me together?"—Little People.

A Happy Family.

"Do you always mind your mother, little boy?" asked the kind old lady in the street.

"Yes, ma'am," was the boy's ambiguous reply, "and father, too."—Somerville Journal.

AN ETON CUSTOM.

"Fags" and "Fagging" in the Leading Boys' School of England.

ARDUOUS DUTIES OF A "FAG."

Menial Work Performed by Sons of Lords and Dukes for Their School Mates. Trems of Service.

Most people contemplating a debate in the house of lords from the gallery would be surprised to hear that a goodly proportion of those grave and reverend signiors, engaged in settling affairs of state on the very steps of the throne, were adepts at frizzling the toothsome sausage and cooking the homely bloater. Yet so it is; for close on half of the peers of England are old Etonians, and one of the oldest institutions still cherished under the shadow of the distant spires and antique towers sacred to the memory of Henry's holy shade, is that of "fagging."

The first or second day of every term, when the whole school has returned, a sort of slave market is held in each house, at which the upper boys have the privilege of choosing from among the lower boys their own particular fag for the next three months or so. In some houses, where the lower boys—that is, boys who have not reached the fifth form—are numerous, an upper boy may have two such servitors for his own exclusive use.

The right of selection is exercised according to seniority, the boys known to be the quickest and best "servants" being snapped up first, except in the case of new boys, when looks have to be taken as credentials as often as not, to the ultimate disgust of the fagmaster, for the smartest looking boys are very frequently the greatest duffers at their work.

DUTIES OF A "FAG."

The duties of an Eton fag are many and various. Not a few of them would be declined by their father's servants at home as far too menial to suit the dignity of the modern James de la Pluche. The fag is responsible for getting his master out of bed in time for early morning school—a dangerous and thankless task to perform on a big boy who is a hard sleeper and free with his fists, and quick at tarowing boots when once awakened. School over the fag has to prepare his master's breakfast. He lays the cloth, makes the tea and toast—woe betide him if the latter be burnt or cut too thick—boils the eggs and fries any extra luxuries in the way of rashers or sausages his master may send him to purchase in the town.

The meal prepared, the fag is by no means free to go and get his own breakfast, as he has to wait at table, be ready to fetch hot water from the kitchen, and, if ordered, fly off "up town" to one of the "sock shops" for a pot of jam or marmalade. He is a lucky boy if he can snatch a clear ten minutes for his breakfast before the chapel bell begins to ring.

The same round of duty has to be gone through again at tea time, the only difference being that there is more time to do it in, and fagmasters are generally in a better temper when school for the day is over.

But fagging at meals is by no means the only service which the lower boy has to render. He has to scrape the mud off his master's football boots, to put his change clothes away after cricketing or running with the beagles, and take notes to other boys in other houses.

GREAT MEN AS "FAGS."

It is strange to think that if Lord Salisbury had only gone to Eton a few years earlier than he did he might have had to clean Mr. Gladstone's boots and run errands for his future rival. Mr. Gladstone himself was somewhat lucky in his fagging when at Eton, as he fagged for his elder brother Thomas, and naturally got let down easier than if he had been apportioned to some strange boy. The present Duke of Marlborough—then the Marquis of Blandford—and Lord Randolph Churchill had the reputation of being incorrigibly idle fags, but when they chose to exert themselves they were excellent cooks, and as such were much in request. It is equally difficult to imagine our dignified Lord Chief Justice Coleridge making toast and boiling eggs for his "master," but tradition has it that he was a most exemplary fag.

In addition to their regular daily work for their own master, the lower boys have to fag in a desultory way for any upper boy who may want them during the day. At the cry of "Lower boy!" shouted by any fellow above the lower division of the fifth form, every boy below the fifth has to scamper out in answer to the summons, and the hindermost in the race is generally ordered off for whatever duty has to be performed.

This is rather a hardship when a boy is busy preparing his lessons for school, but he would rather run the risk of getting into trouble in school than of incurring the wrath of a boy very little older than himself by "skulking." The head master's birch does not inflict such wounds as the vigorously applied toasting fork of an incensed fagmaster.

On the whole, Eton boys don't seem to mind fagging much, and the system at any rate has the advantage of being the same for all. Every boy knows that though he has to fag at present, he is certain to be able to fag others in a short time.—London Tit-Bits.

Rest in a Barber's Chair.

"There is only one time during a busy day," said the philosopher, "when a man really enjoys complete rest. The busy merchant, lawyer or editor wastes no time over his lunch, and is thinking all the time he eats of what work he has to attend to when he returns to his office. But let that same man get into the barber's chair, and the turmoil in his brain ceases instantly. It is as if the passing of the brush over his face drew a curtain between him and his toil. His eyelids close slowly, and a delicious feeling of complete indifference to care replaces his former anxious thoughts. Every succeeding moment increases his feeling of ease and rest, and when the bay rum sets the nerves in the skin tingling he feels like a new man. His work during the next hour seems lighter than at any other time, and the refreshing effect passes off slowly. I would rather go without lunch than miss my half hour in the barber's chair."—New York Sun.

Useful Maxims.

Without danger danger cannot be surmounted. With the humble there is perpetual peace. Wit once bought is worth twice taught. Words may pass, but blows fall heavy. Yielding tempers pacify resentments. Youth is the season for improvement. Zeno, of all virtues, made his choice of silence.—New York Ledger.

Ferguson, the astronomer, was a shepherd's son and taught himself astronomy while keeping night guard over the sheep.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, JANUARY 27..... 1893

The Populists in the Legislature cut a sorry figure. Bretz charged Kerns of receiving a bribe to vote for Mr. White for Senator; a scene of tumult ensued and an investigation was ordered. Bretz appears to be an excitable and unreasonable blatherskite, just such a man as will run wild after every new fad in politics. Kerns is a dull, stupid man, well advanced in years, and elected on the Populist ticket because he is an "honest farmer." The stupid honesty of such men in a legislative body is quite as dangerous to the public interest as the want of honesty in a bright knave. But no reasonable man who knows anything about the last election in Los Angeles county, will for an instant think that Kerns was induced to vote for Mr. White from anything but a perfectly honest motive. The fact is that the people of Los Angeles were so intent upon the election of Mr. White to the Senate, that no Populist or Democrat could have been elected to the Legislature unless the voters were certain that he would vote for their favorite. It is not too much to suppose that even the Republicans in the Legislature from Los Angeles would have voted for him rather than see a Populist sent to the Senate, or even any other Democrat. It was White or nobody; Eclipse first, all the rest nowhere. It is generally believed that not in many a year has such a clean and honest Legislative body met at Sacramento. But the Populists have no influence in the Legislature and the people who elected them are virtually without any representation.

James G. Blaine died last night. Occupying a foremost place among the men of his time, his name is not connected with any great things accomplished by him as a lawmaker or statesman, and he will soon become as shadowy a tradition as his once famous rival, Roscoe Conklin. These men had great abilities, but like one who was vastly greater than either, they gave up to party what was meant for mankind and the two politicians will soon be forgotten, while the name of Burke is immortal.

Stooping Shoulders.

Apropos of round shoulders, I decided the other day as I sat in a great public gathering, drawn from all parts of the land, that what we need most is not more currency, or less taxes, or a new banking system, but a law to enforce sitting up straight. Take 100 Americans—men and women, and you could not find enough good shoulders among them to make up a table at whist. This defect of carriage used to be thought peculiar to the rural districts. It is not so. City people show it less, but this is due to the cunning of their tailors, and not to any virtue of their own.

I am opposed to meddlesome legislation, but I should welcome the appointment of officials who would go about and compel the populace to sit and stand erect, as the old worthies of the Puritan meeting house compelled the congregation to keep awake. If such a statute were enacted, in two generations we would not know ourselves—or rather our descendants—so great would be the improvement in health, physique and dignity.—Kate Field's Washington.

Caramels and Constancy.

In one of the large confectionery stores on Chestnut street the girls who have been there a long time know most of the engaged couples in town, and can tell how long the sweet entanglement has been pending. They also are pretty well posted as to what engagements are broken. The reason is that one of the things the engaged young man is supposed to do is to keep his fiancee supplied with candy. Usually when a young man lets up on his supply of candy it is a sign either of a misunderstanding or that the wedding day is near at hand, for, strange to say, with the approach of the nuptial date the bridegroom elect generally gets economical in sweetmeats, possibly because he is saving up for the bridal bouquet.—Philadelphia Times.

The University of Morocco.

Besides being a university of learning, the Kairouin of Morocco is also a caravansary and an inn, in which are welcome to sleep and to rest all those who are so poor as not to be able to pay the small copper coin which the fondak keeper requires before shelter is given, and the fact that its doors are wide open and its hospitality granted without any restriction whatever is widely known throughout the empire.—Fortnightly Review.

Color Blindness Among Indians.

Some years ago an examination by Dr. Fox of 250 Indian boys resulted, he states, in the discovery that two were color blind—a very low percentage when compared with the whites—while none of the Indian girls was thus affected.

Railroads and the Game Laws.

A large doe was struck and killed by the night train coming south on the Adirondack and St. Lawrence railroad in the Adirondacks. The carcass was taken to a slaughter house in town and dressed. A question arises as to the liability of the railroad company for killing deer out of season.—Cor. Utica (N. Y.) Herald.

A FORTUNE FOUND IN SOAP.

How a Brakeman Discovered a Swede's Hoarded Gold.

Mr. Runey, in conversation with a number of travelers, told the following story, which he says actually occurred in his presence while en route on a Great Northern freight train near Morris, Minn.:

I boarded a freight train at Hancock, (he began) en route to Breckenridge. There were about forty hobos on board the box cars. I arranged with three brakemen to make the rounds and see if they couldn't be made to put up for their ride. I acted the part of the conductor, while the trainmen followed out my instructions. We went from one car to another until we had visited all but one. Few failed to comply with our request, but showed hostility, and would doubtless have taken the advantage of our small number had I not provided myself with a gun, which protruded in full view from my coat pocket.

The last car we visited was partially loaded with lime, and between the barrels we found two Swedes who handled the American language in the most humorous manner. We informed them they would necessarily have to pay for their ride or get off at the next station, to which the spokesman replied: "Vwe don't gat no muny. Vwe bane com from Nort Docota, und vork purty hard and gats no muny."

"Where do you want to go?" asked a brakeman.

"Vwe vant tu go to Mainopolis."

"You are headed in the wrong direction," returned the brakeman.

"Val, vwe go tu Brekenridge und vwe den go ast. Vwe no mane dare ho ba gude faller und let us rade."

The brakeman was not satisfied with the Swedes' statements that they were moneyless, so they were searched. While the searching was going on one of the Swedes said again:

"Vwe don't gate nu muny. Sopuse vwe ly 'bout laddle ting like date?"

The brakeman, being satisfied that there was no money on their persons, was about to withdraw from the car when he discovered a small bundle in the corner of the car tied up with a handkerchief. The bundle was examined. A pair of old socks and several rags were tightly wrapped around a piece of soap about three by six inches in size. The brakeman said he guessed he would take the soap anyway, as he could use it himself. Here the Swedes made a robust protest, saying, "No, vwe don't vant you tu take dote sope."

"What good is the soap to you?" asked the brakeman.

"Vwe vant da sope for vash wid bafur vwe gate in Mainopolis."

"What do you expect to do in Minneapolis?" said the brakeman.

"Vwe tank vwe ville gate leddle vork tu du dare, as a ba prutty gude toun."

The brakeman then said he would do the fair thing and only take half the soap, to which the Swedes begged earnestly for him to leave the soap. The brakeman took the cake over his knee and broke it through the center, and lo! to the amazement of all, a twenty dollar gold piece rolled out. By this time the Swedes were nearly wild, and their ejaculations were side splitting in the extreme.

The soap was then cut into bits and $300 in gold coin, consisting of twenties, tens and fives, taken out. The Swedes had adopted this strange method of safely disguising their possessions; but, as misfortune had it, their novel idea failed. It is needless to say that the brakeman appropriated one of the shining pieces for his own use, to the heart-rending dismay of the sons of Sweden, and departed for the caboose.—Fargo Argus.

Dress Goods from Spirit Land.

"A conductor on the International and Great Northern once told me a queer story," remarked Ezra Morgan at the Lindell. "His name was Painter, and his run was from Galveston to Willis, Tex. He said that shortly after his marriage he made a compact with his wife that whichever died first should appear to the other. She only lived about a year, and shortly after her demise, while he was sitting reading one evening, she walked up to him and laid her hand on his shoulder. She talked with him a few minutes as freely as though in the flesh; then, picking up a pair of shears that laid on the table, said: 'After I am gone you may doubt that I appeared to you. You may think it a dream or a hallucination. Keep this as a souvenir, and doubt not.' She cut a piece from her dress, laid it on the table and vanished. The goods resemble white silk, but the textile experts confess that they do not know what it is; that if any such goods were ever woven in an earthly loom they do not know it."—St. Louis Globe-Democrat.

Chinese Officials.

In China there are two officials for each post, in order that one may spy upon the other, the rule being that no official shall report what he has done, but only what the other has done.

From the highest official to the lowest all practice a system of unblushing robbery, called "squeezing." The salary of a viceroy in some cases is £60 a year; he regularly draws not less than £8,000. The salary of a judge is £40 a year; he regularly draws at least £2,000. There are 1,200 police in Canton, not one of whom receives wages, and yet the office is much sought after. The fact is, we are assured, that the police are on excellent terms with the guild or fraternity of thieves, and they work harmoniously together.—Jesse Herbert.

About Two English Poets.

A cottager near Farringford said one day to his clergyman, "They tells me that this 'ere Lord Tennyson's a great poet." "Certainly he is—a very great poet." "And I've been readin a man named Shakespeare—he was a great poet too?" "Indeed he was." "Well," said the rustic critic as he struck his spade deep into the soil, "I don't think nothing o' neither of 'em!"—New York Tribune.

Recovered After Many Years.

The unearthing of a large quantity of stolen silverware, gold lined snuff-boxes, etc., in a cave near Jasper, Tenn., has created a sensation. The story beats fiction a long way. During the winter of 1863-4 the Federal soldiers were encamped for some time on Battle creek. Among them was an Ohio regiment. Not long since a gentleman appeared in the neighborhood and told the following story:

He was a member of the Ohio regiment referred to, and in his mess was a soldier who was a born thief, and who never let an opportunity pass to steal anything he could carry. During the time they were encamped at the mouth of Battle creek he hid his stealings in a cave, and so clever was he in his work that no suspicion ever fell upon him. A short time ago the two old comrades were together talking over their experiences, when the story of the stolen silverware was told and the request made that the gentleman referred to visit the locality, search for the cave, and, if possible, recover the hidden silverware and restore the articles to the rightful owners or their heirs.

The old soldier who had so many years ago gone wrong is getting aged and feeble, and to ease his conscience and make reparation, as far as in his power, he begged his old commander to do this for him. He was successful in finding not only the place, but the plunder. At least 200 pounds of silverware of every kind almost was found in the cave, ranging from napkin rings to solid silver water sets. Many of the articles have the owners' initials on them, and all are in a state of good preservation. The articles have been taken to a store in the village near by, and are being turned over to those entitled to them as rapidly as possible.—Cor. Houston Post.

Aerial Torpedoes.

The Marine Francaise publishes an article by Admiral Reveillere, in which he assures his readers that a revolution in naval affairs is approaching not less important than that caused by the introduction of armored ships. The gun will cease its contest with the armor plate in the sense of seeking to penetrate by its shock, and will henceforth scatter destruction by launching explosive shells of large capacity at comparatively low velocities. A shell containing 100 kilograms of panclastite would, he says, be a veritable torpedo, and would infallibly destroy whatever it fell upon. The gun for this service would be a mortar, such as is used for military purposes, and in the admiral's view a mortar of 22 cm. (8.6 inches) would replace a gun of 14 cm. (5.5 inches), and one of 27 cm. (10.6 inches) a gun of 16 cm. (6.2 inches), wherever these are found.

Guns of high velocity, he says, must be reserved for action against the personnel; they have henceforth no place against the ship itself. This proposal is but an extension of Admiral Reveillere's project of swift mortar vessels, analogous to torpedo boats, but constructed for the launching of aerial torpedoes.

The Care of the Soldier.

"The five years now drawing to a close have been marked beyond any similar period in the history of the military establishment by legislation and modification of regulations calculated to ameliorate the condition and improve the situation and surroundings of the enlisted men." This is taken from the report of the adjutant general of the army. New quarters of the most improved designs have been erected, the vegetable component of the ration has been increased, post exchanges have been established, the clothing has been increased, new barrack furniture and equipments have been supplied, a method of procuring discharges by purchase has been provided and the enlisted men have the option at the end of three years' service of returning to civil life with an honorable discharge, and the existing methods of lighting, heating and ventilation of the quarters leave nothing to be desired. It would seem that the enlisted man has no longer reasonable ground of complaint. His material surroundings are far in advance of those prevailing in any European army.—New York Tribune.

A Political Club.

A good story is told on one of the political managers. He was approached several days before election by a young man who stated that he had organized a club of eighteen men and would name it after any prominent man who would furnish the uniforms. He did not want much—just cape dusters and plug hats. The manager studied the matter over, and finally got the dusters and hats and threw in some nice canes for good measure.

This is the last that has been heard of that club. It has not been named after any prominent citizen so far as any one is aware. It has been learned, however, that the young men have organized a minstrel company, and are prepared to give a nicely dressed street parade when they start on the road.—Indianapolis News.

The Chosen People of Chosen.

The announcement that the Cowley manor estate, Cheltenham, is in the market reminds a correspondent of a quaint story in connection with Chosen, a small village lying at the fringe of the property. A worthy locum tenens thought to please the good people of the village, and gave out as his text, "And make all thy Chosen people joyful."

A horny handed swain, however, who had wandered from a distant parish, interpolated the ejaculation, to the no small consternation of the said locum tenens and the amusement of the Chosen people themselves, "And what about we poor Hucklebu folk?"—Pall Mall Gazette.

An Author Honored.

The colored women of New Orleans have sent Judge Tourgee a silk laprobe, of which the material has been grown, spun and made up and delicately embroidered by the women, as a token of their gratitude for Judge Tourgee's efforts on behalf of their race.

ORDER FIXING TIME AND PLACE FOR HEARING OF PETITION TO LEASE CERTAIN REAL ESTATE AND DIRECTING NOTICE TO BE GIVEN.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the Estate of John William Meyer, deceased.

Upon reading and filing the petition of John W. Lacey, praying that the Administrator of the estate of John William Meyer, deceased, be authorized, empowered, and directed to lease real estate belonging to said estate, which is described as follows, to wit:

The N. E. ¼, the N. ½ of the S. E. ¼, and the N. E. ¼ of the N. W. ¼ of Section No. 23, and the S. W. ¼ of the S. E. ¼ of Section No. 14 all in Township 14 South, Range 35, East, M. D. M., in the County of Inyo, State of California.

It is ordered that all persons interested in said estate appear before the above-entitled Court on the 10th day of December, A. D. 1892, at the hour of 10 o'clock a. m., at the Court-room of said Court, to show cause, if any they can, why the said real estate should not be leased for the annual rental of $200.00, as is more fully set forth in said petition, reference to which is hereby made for further particulars.

It is further ordered that a copy of this order be published at least two successive weeks in the Inyo Independent, a newspaper of general circulation, printed and published in said Inyo County.

Dated November 23rd, 1892.

GEO. M. GILL,
Judge of the Superior Court.

[Endorsed.]
SUPERIOR COURT, COUNTY OF INYO.

In the Matter of the Estate of John William Meyer, deceased.

Order fixing time and place for hearing of petition to lease certain real estate and directing notice to be given.

Filed November 23rd, 1892.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address, E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Super or Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Gash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

BORN.

BEDFORD—In Independence, Jan. 22, 1893, to Mr. and Mrs. F. W. Bedford, a son.

REYNOLDS—Near Georges Creek, Jan. 21, 1893, to Mr. and Mrs. E. J. Reynolds, a son.

DEARBORN—In Lone Pine, Jan. 18, 1893, to Mr. and Mrs. O. Dearboro, a son.

DIED.

BLAIR—In Bishop, Jan. 21, 1893, John Blair, a native of Virginia, aged 51 years.

Mead's big team left town this morning for Mojave. The return cargo will be general merchandise.

Hon. P. Reddy has gone to Washington to argue some cases before the Supreme Court of the United States.

"Caste" your cares behind on the evening of February 22nd and spend a pleasant hour or two with the players.

Teams are delivering stone in the Court House yard for the new building for county records. The building will be completed in May.

The display of Indian bead work sent by Mrs. Eibeshutz to the Fair at San Francisco is reported to be far the best thing of the kind in the whole exhibit.

C. W. Craig left town last Sunday to visit his father who was reported very sick, at his home in San Bernardino. The father is since reported much better.

Yesterday was the first unpleasant day since Christmas; a little rain fell at intervals and during the evening quite a shower came down. This morning was warm and spring-like.

Assemblyman Mack got leave of absence and arrived home last Monday to attend to law business. He will leave here to-morrow morning for Sacramento; his wife will accompany him.

An executor's sale was made lately on the Hammel & Denker ranch, near Los Angeles. Cows sold for an average of nearly $30; common horses from $30 to $50; fair horses from $50 to $75.

Robert McPherson arrived here yesterday from Los Angeles. He came at the request of F. G. Brooks to look into the feasibility of certain ditch projects the latter is trying to get started.

Miners who have money enough to travel on are getting away from the Comstock as fast as they can. The outlook is reported to be very discouraging, and unless a great change comes soon Virginia may be as solitary as Tadmor in the wilderness.

James Herod came over from Bakersfield to Big Pine at the beginning of the week. A few years ago Mr. Herod located and proved up on a tract of land a few miles south of Big Pine, but without making any improvements beyond what the law requires. He now says that he will at once begin cultivation and put in a crop this spring.

A meeting of mine Superintendents and others interested in the Comstock was held a few days ago to discuss the possibility of doing something to revive industry in the mines. It was thought a reduction might be made in freights and fares and railroad charges for transporting ores; also in the price of milling and furnishing water to the mining properties. A committee was appointed to attend to the matter. It is said that unless something definite can be done in this direction active operations in mines on the Comstock must practically cease.

A Ruined Town.

D. L. Sayre came to Independence last Monday to visit his friend, Mr. A. M. Given. Mr. Sayre conducted the *Chloride Belt* at Candelaria till the paper was forced to cease publication; and this was caused by depreciation of the value of silver and stoppage of work in the mines. Mr. Sayre says there are only two hundred people left at Candelaria; before the silver business was ruined four or five hundred men were employed at the mines; and an equal, or greater number would still be employed if the devil had got John Sherman twenty years ago.

DISTRICT ATTORNEY.

OFFICE OF DISTRICT ATTORNEY,
INDEPENDENCE, INYO CO., CAL.
January 22nd, 1893.

EDITOR INDEPENDENT:

Again the *Register* gimlet boreth; wherewith he showeth the marked difference between the "froth" of the District Attorney and the lacteal essence that flows from the *Register* Creamery. The *Register* very charitably styles my communication a "tirade," which it will be admitted differs materially from the slimy insinuations contained in the *Register*, which carefully refrains from making any specific charges, or from pointing out any omission of duty on the part of the District Attorney, which that "eminent critic" has been challenged to do. The District Attorney is not conscious of any explanation required on his part, when no charges have been made, or explanations required, except such as have been made in the secrecy of the *Register's* bosom, or that of the "public" which it represents.

The frequent allusions to the "public" on the part of the *Register* reminds your humble scribe of three tailors in London Smarting under the iron heel of English tyranny they met in all their might. At this august gathering resolutions were drafted and signed, which resolutions were headed "We the people of Great Britain and Ireland."

The *Register* again invokes the spirit of divination and accuses the District Attorney of a slurring innuendo against a party who was in no way responsible. While your scribe is not gifted with all the charity that should lodge in the bosom of the righteous, he will in no wise accuse any person of an offense merely on suspicion that only exists in his own bosom. So far from slurring the party alluded to, your servant stated that the explanations demanded were probably founded on unjust accusations. No, *Register*, you're wrong. It was all meant for you. Take it, and as the father of an elderly maiden that had burdened his resources of support beyond reasonable endurance, on being asked for her hand by a blushing youth, feelingly remarked, "take her, take her, and God bless you."

Now as to the public, we feel that whether we are right or wrong we will at least receive justice. Has the District Attorney violated any law or duty? If so, why not state it? If not, why this tinkling of cymbals? Why this sounding of brass?

The provisions of the Penal Code relative to the subject under consideration are as follows:

SEC. 945. When an indictment is found against a defendant not in custody, the same proceedings must be had as are prescribed in sections nine hundred and seventy-nine to nine hundred and eighty-four, inclusive, against a defendant who fails to appear for arraignment.

SEC. 976. When an indictment or information is filed, the defendant must be arraigned before the Court in which it is filed, unless the cause is transferred to some other County for trial.

SEC. 978. When his personal appearance is necessary, if he is in custody, the Court may direct, and the officer in whose custody he is must bring him before it to be arraigned.

SEC. 979. If the defendant has been discharged on bail, or has deposited money instead thereof, and does not appear to be arraigned (or is not in custody) when his personal attendance is necessary, the Court, in addition to the forfeiture of the undertaking of bail or of money deposited, may direct the Clerk to issue a bench warrant for his arrest.

The words in parenthesis are interpolated from Section 945.

SEC. 780. The Clerk, on the application of the District Attorney, may, at any time after the order, whether the Court is sitting or not, issue a bench warrant to one or more counties.

SEC. 932. The defendant, when arrested under a warrant for an offense not bailable, must be held in custody by the Sheriff of the county in which the indictment is filed, unless admitted to bail after an examination upon a writ of habeas corpus; but if the offense is bailable, there must be added to the body of the bench warrant a direction to the following effect: "Or, if he requires it, that you take him before any magistrate in that county, or in the county in which you arrest him, that he may give bail to answer to the indictment (or information);" and the Court, upon directing it to issue, must fix the amount of bail, and an indorsement must be made thereon by by the Clerk, to the following effect: "The defendant is admitted to bail in the sum of ——— dollars."

It appears from the foregoing that on the filing of the indictment the Court might have directed the Clerk to issue a bench warrant or he might not, according to the discretion thereof. It appears that the Legislature, through some oversight, vested this discretion in the Judge of the Court, and not in the Editor of the *Register*; probably for the reason that Judges are selected by the electors, while critics of the *Register* order are selected by themselves; because such Judges stand high in the esteem of such electors, and such self-styled critics occupy an eminence principally in their own esteem.

It will also be seen that the District Attorney could not procure a warrant until the order above required had been made by the Court, and then the Clerk "may" issue the warrant on his application. It would appear that an ordinary person could perceive this with an ordinary mouth, but in case the person should unfortunately be all mouth it might escape his observation.

I can inform the *Register* that though the warrant was issued as soon as the order was made, and has not yet been filed, nor is it proper that it should be so filed under the circumstances. It is in the hands of the Sheriff, where it should be. It cannot be filed until it shall be served.

The above quotations of law are intended for the real public, not for the three tailors of London, self-styled "The People of Great Britain and Ireland."

P. W. FORBES.

Washington could cast a stone across the Shenandoah river. On the evening of his next birthday go and see another great "Caste" performance by the players.

COST OF WATER FOR IRRIGATION.

Inquiries are often made concerning the cost of getting water upon land in Owens Valley. The following case will answer the question as well as any other that could be given. There is a tract of several thousand acres lying three to six miles south from Big Pine, and on the west side of Owens river. A few years ago three young men located a part of the tract; two are brothers, Elias and Robert Blake; the third is Jacob C. Miller. All were poor, the Blakes married, Miller single. The Blakes have each 320 acres, and Miller 360 acres. In summer all of the men worked for wages at whatever they could get to do and in winter they worked upon a canal to convey water to their land. Last year they completed their canal; though prior to that they had been able to get water enough to start some alfalfa and fruit trees. Their canal has a capacity of fifteen hundred inches and takes water from Owens river; it is seven and one-half miles long and eight feet wide. A regular account was kept and each man credited with every day's labor done by him; the current rate of wages being allowed. The total cost of the canal is six thousand dollars, being at the rate of four dollars per inch for water. Allowing one-half inch of water to irrigate an acre—and this is quite plenty of water—the canal will irrigate three thousand acres; the cost per acre is therefore two dollars. The water right is perpetual, and of course the supply will never fail. The owners of the canal can dispose of the excess of water over their own needs. All three of the men have comfortable dwellings upon their land; they have also stables, corrals and such other conveniences as were most needed. On each location is a young orchard of five or six acres, mostly winter apples. The trees all have made rapid growth and are very thrifty, and next fall the owners may be eating their own fruit. The Blakes each has enough alfalfa growing to supply about ten head of horses and about forty head of cattle. All kinds of roots and vegetables can be grown upon the ground in any quantity wanted. The Carson and Colorado railroad is about two and a half miles distant on the other side of the river. Miller's house is four and a half miles distant from Big Pine postoffice and about one and a half miles from the school house at Fish Spring. If any other part of the State can show where young men can do better than this, having nothing but empty hands to begin with, the information will be welcome.

A Good Work

The people at Lone Pine have got to work making a thorough job of cleaning up the town. The unsightly ruins left by two or three fires; piles of rubbish everywhere; stagnant pools and ditches and a large unbridged stream, made such an unpleasant place of it that strangers never failed to be unfavorably impressed. Lone Pine has every natural advantage needed to make a pretty town, and now the citizens have gone to work in the right spirit to make the place attractive. There is certain to be many people coming into the valley from the south in the near future, and with its pleasant location, plenty of good land and water, Lone Pine being the first town in the valley reached by travelers from the south, ought to retain the best of them. This cleaning up and general improvement is the first thing needed to secure that end.

Bridge Meeting

The people of Georges Creek will meet to-morrow morning at 10 o'clock to provide means for doing their part in building the proposed bridge across Owens river. The bridge will give the settlers easy access to the railroad, saving them from six to ten miles travel they must now make in order to reach the railroad across Independence bridge. The next convenience needed at Georges Creek will be a Post Office, the people should not have to go so far for their mail.

Settle and Save.

None But Royal

BAKING POWDER is absolutely pure. No other equals it, or approaches it in leavening strength, purity, or wholesomeness. (See U. S. Gov't Reports.) No other is made from cream of tartar specially refined for it and chemically pure. No other makes such light, sweet, finely-flavored, and wholesome food. No other will maintain its strength without loss until used, or will make bread or cake that will keep fresh so long, or that can be eaten hot with impunity, even by dyspeptics. No other is so economical.

The Baking Powders now being offered in this vicinity, with the statement that they are "as good as Royal," have been shown by the official analyses to be composed of alum and detrimental to health.

The official chemists of the United States and Canada, State analysts, municipal boards of health, and physicians indorse the great qualities of the Royal Baking Powder.

Talk about your transformations! We have seen a square man turn round.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.....

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

THE HERCULES.

In placing the Hercules Gas or Gasoline Engine in the field in competition with other gas engines, we do so with the utmost confidence that we are "in it." Our system of operating this engine is so far ahead of all others that it needs but an introduction in any community to insure an immense sale. A woman can handle it. It requires no engineer. It can be started in an instant. No electric spark to get out of order. It oils itself. It beats all others. Write Palmer & Rey, 405-407 Sansome St., San Francisco for particulars. The price and capability will surprise you.

For Simplicity it Beats the World. It has Fewer Parts, and is therefore less likely to get out of order than any other Gas Engine now built.

Daily Newspaper and Job Office

We have used your four horse-power "Hercules" Gas Engine for nearly two months now, and have not yet failed to get our edition off on time; on the contrary, we find it the best investment we could have made. For convenience it cannot be beat. Unlike the steam engine it is clean, no coal to shovel into a furnace, no fires to get up, no water to watch to keep the boiler from going through the roof—indeed it is simple and economical in all respects, and we feel that in changing from steam to gas we have secured a donation of $100 per year to the office, independent of all other considerations, and that means that $100 is the difference in the cost of fuel per year between steam-power and gas power. Thanking you for past favors, including the great service done by you in putting an engine like the "Hercules" on the market, we are,

Yours truly, PENNYCOOK & HARRIER,
VALLEJO CAL., Jan. 14, 1892.
Proprs. *Chronicle.*

Printers Pleased With It.

We beg leave to report to you on the success of one of your "Hercules" Gas Engines which is now in operation in our office. It is a one horse-power, and readily runs a large power press, and a jobber at the same time, and is then not working up to its full capacity. We have had no trouble whatever with the engine, and for neatness, convenience and power we consider it the best in the field. We are delighted with it, and with the experience had with it, and can heartily recommend the "Hercules" Engine to anyone. Truly yours,

BOTTLING SODA WATER.

NAPA SODA SPRINGS, Jan. 15, 1892.
Messrs. Palmer & Rey, 405-407 Sansom street, San Francisco, Cal.

GENTLEMEN:—I believe I have now given your Gasoline Engine a fair test, and am ready to say that it answers satisfactorily to all you claim for it. It is easily started, steady in action, sufficiently powerful, and cheap in cost of running. I use gasoline gas in running it. It has increased my output of soda water 1,000 dozen per day.

Yours truly,
JOHN P. JACKSON,
Propr. Napa Soda Springs.

"August Flower"

"What is August Flower for?" As easily answered as asked. It is for Dyspepsia. It is a special remedy for the Stomach and Liver.—Nothing more than this. We believe August Flower cures Dyspepsia. We know it will. We have reasons for knowing it. To-day it has an honored place in every town and country store, possesses one of the largest manufacturing plants in the country, and sells everywhere. The reason is simple. It does one thing, and does it right. It cures dyspepsia.

Old Gold and Silver Bought; send your old Gold and Silver by mail to the old and reliable house of A. Coleman, 41 Third Street, San Francisco; I will send by return mail the cash, according to assay; if the amount is not satisfactory will return gold.

NOTHING is asked for Men's Rubber Shoes, foothold style—they are free with each pair of Gents' Shoes or Boots, if asked for. Best quality sell at 50 to 75 cents. If mail, add 10 cents extra. LIVING ON AIR.

The Remarkable Survival of Three Entombed Miners in Bohemia.

The teaching of experience as illustrated by several instances of prolonged abstinence, though it may afford some idea of human endurance in this particular under special conditions, has yet provided no certain criterion of the vital resistance possessed by the average man when suddenly deprived of every form of sustenance. The measure of this force may nevertheless be gauged with approximate correctness from the history of recurrent instances of prolonged and accidental privation. As an example, the following is remarkable even in this category:

It is the narrative of three Bohemian miners, who, after being entombed by a fall of sand in the pit where they were working, were finally rescued alive, though of course in an utterly prostrate condition, seventeen days later. During the period of their live burial air was pumped down to them by bore holes. On this they may be said to have lived without food and without water. The total want of the latter is what makes their survival so remarkable. But for this essential the longer fasts of professional fasting men would have been quite impossible.

We can have no difficulty in understanding generally why this holds true if we bear in mind the fact that not only does water constitute by far the greater constituent of every tissue, but that without its due proportion the circulation and nutrition of the blood and that needful if costly chemical change upon which all tissue repair depends would be alike impossible.

In endeavoring to trace the rationale of a life persisting, as in the case of the buried miners, in spite of the absence of every natural condition, we must notice one or two significant points. In the first place, their condition was that of rest, their functional metabolism being proportionally less active, their waste of tissue diminished and their output of carbonic acid not so likely to overcharge the surrounding atmosphere. Further, we may take it for granted that a robust physique had no small share in the conservation of vital energy.

Much depends in such cases on the amount of nitrogenous matter stored up, for the most part in the muscular tissue, and available for destructive changes. We may safely assume that the amount of reserve nitrogen in the case of these men was not meager. It is mainly, no doubt, to this circumstance that we must attribute not only the fact of their existence, but the still more remarkable prospect of their convalescence and ultimate recovery.—London Lancet.

An Interesting Question.

A very interesting question is before congress and the American Bar association arising out of the unfortunate massacre of the Italians in New Orleans. The relations between this country and Italy were strained nearly to the point of war. Diplomatic intercourse was not discontinued, but Baron Fava, the Italian minister, was recalled.

The issue in the controversy arose from the conduct of the mob that broke into the New Orleans jail and killed the Italians who had been arrested for the murder of the chief of police. For everything done by the people of the city, and for everything done or left undone by the government and courts of the state of Louisiana, the federal government was responsible to Italy. The men engaged in the outrage were acquitted, and this government recognized its moral responsibility at least by paying a small sum of money to surviving sufferers.

The question before congress and the Bar association's international law committee is clear. What remedy is there for a condition of law, international and domestic, under which the United States is responsible to a foreign government, even to the point of war, for the acts of the people and courts of a single state? It is an interesting and important question and one in which the whole country is concerned.—Harper's Weekly.

Dot's Theory.

It was little Dot's first visit to a farm, and she went with her aunt to see how the pigs were fed. The little one gazed in astonishment at the young porkers for a moment, and then placing her hand on her curly hair she said reflectively:

"Auntie!"

"Yes, dear."

"Does 'oo put all the piggies' tails up in curl papers?"—New York World.

Rather Well Stretched.

Esmonde — You look paws'tively — but what is th' mattah with th'—th'—

Bloomey—Trowsahs! I left them on me stretchah too long, and it's the only beach walking pair I've got with me.—Judge.

Funeral Thieves.

Criminals have as many grades of respectability among themselves as has the moral portion of the community. They, too, have their Four Hundred, their upper ten, their middle grade lawbreakers, and then the very dregs of the thieving class. And way down in the scale, beneath the contempt of even the humble burglar, the lowly pickpocket, and the contemptible hatrack sneak, stands, lone and forsaken by all evildoers, the "funeral thief."

The "funeral thief" is the poltroon of the criminal classes. Little conscience as most thieves possess, he possesses the least. He shrinks from no desecration. No superstition causes him to recoil. He robs the living as they weep over the dead. Few criminals would stoop to so low a crime; consequently there are not many funeral thieves. But what few there are are active.

Their method of work is extremely simple. Usually they go in pairs; sometimes there are three or four together. Early in the morning they scan the death columns of the newspapers. From the announcements of funerals for the day they make up a visiting list. They select those where the victims of the grim reaper were men of about their own age. They visit the home where the partly open cask is resting while friends gaze at the features of the departed. Their right to be present is never questioned; they are taken, as a matter of course, for friends of the dead. They pass the coffin, pausing for a few moments in pretended tearful contemplation of the cold features, and in the slight jam that is sure to follow such a pause—and while many mourners are in tears—the thieves abstract the pocketbooks of all within their reach. Women are their subjects, and if tears are not plentiful the thieves will themselves pretend to weep. This is sure to prove effectual.

Thus do these "funeral thieves" work. It does not take them long to go through the pockets of half a dozen persons, and then they are off to the next house on the list, where the mode of operation is repeated. No wonder other thieves regard them with contempt.—Chicago Tribune.

American Opals.

An opal, found and cut as a gem in this country, was sold by a jeweler in this city the other day for $500. It was obtained from a newly discovered mine in the state of Washington, near the Idaho line. At that place, which has been called Gem City, the volcanic rocks are honeycombed with cavities that contain small nodules of this precious variety of hydrated quartz. Many of them are of great beauty and value.

Speaking of this discovery of American opals, Mr. George F. Kunz, the expert in gems employed by Tiffany & Co., exhibited to the reporter the great Hope opal, one of the most celebrated in the world. It formerly belonged to Henry Philip Hope, the Dutch banker, who owned the finest collection of precious stones ever got together. He liquidated the national debt of Brazil and took his pay in diamonds from that country, which originally inspired him with his hobby. Among the well known gems possessed by him was the Hope diamond, a blue-white stone of forty-four carats, valued at $100,000; likewise the largest existing pearl, drop shaped, which weighed over three ounces, surmounted in the setting by a coronet of diamonds.

The opal referred to, though of Mexican origin, is said to have been among the ornaments of a Persian shrine in the Seventeenth century. It represents the sun with a full face carved on its surface, the rays being supplied by the antique gold setting. As is very common with Mexican opals, it is badly flawed—in fact, so cracked that it would probably fall to pieces if the setting were removed. It is oval in shape and its longest diameter is about an inch.—New York Sun.

The Loquacious Barber.

The loquacity of a barber gives the satirical Persian the opportunity of many witty proverbs, and all at the barber's expense. The Hindoo has as much dread of his tattling propensities as the European, but it is currently believed their gossip saved many a life during the terrible year 1857-8. The chatter of the bazaar the barber has on his tongue tip, and the slightest encouragement to unloosen the bag wherein he stores his tales is gladly seized.

The injustice of the petty native judges, the exacting demands of the cantonment magistrate, the monetary embarrassments of some young sub in one of the regiments, the flirtation of a married belle are duly narrated, and even the contents of the letters which pass between the pair can by astute questioning become the common property of an entire station.—San Francisco Chronicle.

The officers and men of the United States cutter Rush relate marvelous tales of wondrous discoveries made by them during their 1890 cruise. They dredged for deep sea oddities in the almost fathomless "sinks" of the Pacific's bed. They collected marine algæ so delicate in figure that it took the finest microscopes to bring out even the coarsest outlines, leaving the minute fibers as a hazy mist on the vision, and finally outdid themselves by getting a fine photographic view of a creature sporting in the sand of one of the low lying islands which leads their paleologist to the belief that some of the supposed antediluvian monsters are still in existence.

But the feat of which they seem proudest was the discovery of a natural incubator on the sides of the volcano Bogoslov, where millions of awks, gulls and other sea birds deposit their eggs and leave them to be hatched by volcanic heat. Who says that birds are devoid of intelligence?—St. Louis Republic.

Does Lightning Sour the Milk?

It is a well known fact that milk is especially apt to sour during the prevalence of a thunderstorm, and from this it has been surmised that the electric discharge held some mysterious sway over the lacteal fluid. An Italian experimenter, one Professor G. Tolomei, has been making trials of various sorts, the object being to throw some light on electric influence over milk molecules. In his first experience he passed an electric discharge from a Holtz machine between two balls of platinum hanging two inches apart in a bottle containing a quart of fresh milk; secondly, by sending a current between two strips of platinum at the bottom of a V tube filled with the same fluid; thirdly, by subjecting milk in a test tube to the action of a strong battery current through a silk covered copper wire wound spirally around the tube.

In each one of these experiments, which were as thorough as any lover of science could wish, it was proved that acidulation of the milk was delayed instead of hastened, as had been expected. Three equal portions of milk from the same milking thus treated began to grow acid on the seventh, the ninth and the sixth days, respectively, while other portions of it which had not been treated with electricity was rankly acid on the evening of the third day. Having thus disproved the popular theory of lightning being the direct cause of the acidification of milk, Professor Tolomei tried ozone and found therein the mystic agent of milk souring. In his second trial of ozone he brought the surface of a quantity of milk close to the two balls of the machine used, and the fluid almost instantly became acid in consequence.

Here at last a mystery that has puzzled professors and peasants alike has been made plain.—St. Louis Republic.

Shoes for the Dead.

Among Chicago's industries is a factory where the manufacture of shoes for corpses is carried on exclusively.

Out of five neat black boxes a representative of the firm yesterday took as many different sizes. These were adults' and children's shoes. The material corresponds with the purpose of their use. The shoes are certainly nice to look at. The soles are cut out of pasteboard and are covered with grained paper. The uppers are a combination of quilted satin and crochet work. A ribbon, inserted at the top and tied in a neat bow-knot, holds the shoe to the foot.

"Men's shoes are always black," it was said. "Occasionally we turn out a lot of brown ones. We have had special orders for men's white shoes, but only in a few instances. Shoes for women and children are always white. They are not expensive; five to fifteen dollars will purchase a dozen pairs."

The burial shoe is a patented article. It was designed by a Joliet (Ills.) woman milliner, who now enjoys the profits of her idea. The Chicago company has been in existence for nearly a decade, and is catering to an ever increasing demand. The firm employs a traveling man, who covers all the territory between Maine and California. It takes ten girls and several machines to keep up with his orders. The average monthly output is 15,000 pairs during the dull season. It is increased to 25,000 during a busy period.—Chicago Tribune.

The Gold Cure Is Very Old.

The precious metal has been employed both externally and internally, in the metallic state, in solution and by sympathy, for a great variety of the ills that flesh is heir to, for over 2,000 years. The train of thought which led the ancients to employ this highly prized material can be well told in the quaint language of the distinguished Dutch physician and chemist, Hermann Boerhaave; writing about 1725, he says: "The alchemists will have this metal contain I know not what radical balm of life capable of restoring health and continuing it to the longest period.

"What led the early physicians to imagine such wonderful virtue in gold was that they perceived certain qualities therein which they fancied must be conveyed thereby into the body; gold, for instance, is not capable of being destroyed; hence they concluded it must be very proper to preserve animal substances and save them from putrefaction, which is a method of reasoning very much like that of some fanciful physicians who sought for an assuaging remedy in the blood of an ass' ear by reason the ass is a very calm beast!"—Professor H. Carrington Bolton in Popular Science Monthly.

A Laughable Superstition.

"A curious illustration of the value of superstitions," said Mr. Kunz, the diamond expert for Tiffany & Co., "was afforded the other day by a lady who brought a set of opals here for the purpose of selling them. She felt obliged to part with them on account of a series of misfortunes in her family which she feared were attributable to the gems, so notoriously unlucky. On examining them I found that they were merely imitations. A few weeks ago I had in my possession three seashells which had been transformed into opal. Their original limy material had been dissolved out of the rock by which they were inclosed, and the precious substance was deposited by water in place of the lime, retaining the form of the shells. A graduate of Harvard college bought the curiosity and presented it to that institution."—New York Sun.

An Absentminded Journalist.

Jim Faberpusher is one of the most industrious journalists in New York. He thinks of nothing but his professional duties.

One day his wife (to whom he was recently married) said to him:

"You don't speak to me any more. Have you ceased to love me?"

"Oh, no, but I just can't find time. I'm pressed for time."

"Yes, but I don't get pressed at all," responded the neglected wife. This well merited rebuke reminded the journalist of his obligations to his better half.—Texas Siftings.

A Regal Dish.

Of course every one knows how the favorite English dish of beef came to be called "sirloin." It is not, however, equally well known that at Chingford, Essex, is a place called "Friday Hill House," in one of the rooms of which is an oak table, with a brass plate let into it, inscribed with these words, "All lovers of roast beef will like to know that on this table a lion was knighted by King James I on his return from hunting in Epping forest."—Million.

Religious Differences.

In the greater concerns of life there are wonderful illustrations of the conflicts of opinions. There are something over 1,200,000,000 of human beings in the world. Among these are six varieties of religious belief; three of these are said by one class to be false, and by others three are said to be the true religion. And yet every religionist, every sectarian claims that he and she alone are right. What our Chinese neighbors say is "true" we say is "false." We call them "heathens"—they class us as "outside barbarians."

What we English speaking people think is the right and the true religion is in a startling minority in human belief or religious creed—for there are only some 350,000,000 Christians in all the world. There are some 6,000,000 Jews, and they have clung with singular persistency in all ages to their religious belief; it is seldom a Jew renounces his faith; it is more seldom that a Christian embraces Judaism. There are more than 400,000,000 people who are pagans and Mohammedans.—Detroit Free Press.

Scarfs That Demand a Pin.

The scarfpin should always be worn with the flat, madeup scarf. There is a place for its insertion, and by seeming to hold it together it attains a utilitarian phase, in that it is an aid in glossing over the percentage of madeup suggestiveness that is always more or less associated with the imitative article.

The madeup flat or puff scarf, if worn without a scarfpin, discloses its artificiality in all the baldness of its mechanical inferiority. It is a curious paradox in the fashions, therefore, that the scarfing that does not actually need the scarfpin in reality requires it most of all.

In the self tied De Joinville, or its madeup reproduction, the scarfpin must pierce the cross folds at the intersection.—Clothier and Furnisher.

A Clever Woman.

A lady of fine artistic taste has discovered that at church parade her prayer book, by its incongruous color, entirely ruined the effect of a carefully conceived costume. It struck a discord in an otherwise perfectly harmonious dress. This has been remedied by having a cover to her prayer book which shall be perfectly in accord with the leading tone of her garments. The prayer book cover will henceforth receive as attentive consideration as the bonnet, the gloves and the sunshade, and no jarring note of color will be introduced by means of a volume bound in blue velvet or in scarlet morocco.-

The tramp's prayer confines itself to "Give us this day our daily loaf."

TRIBUTES TO THE KEELEY TREATMENT.

T. De Witt Talmage, in addressing the patients at Dwight, Illinois, said:

"In my church in Brooklyn, there are sitting before me Sabbath by Sabbath men who once were under the serfdom of strong drink, but are now clothed and in their right minds, and when I say, 'What has been their history?' they say, 'We were restored through the Keeley Cure.'"

"I am mightily impressed with this whole Keeley Cure."

"There will not be a neighborhood in the United States or in the world that will not be blessed by it."

"What a very unfair thing it is to condemn a whole system because one man fails in it."

"Hundreds and thousands of men who belong to the church have fallen. Is that anything against the church? No. And if fifty per cent. if seventy-five per cent. under this cure went back, and only twenty-five per cent were saved through a discovery and sign a curse, ought to be extolled throughout all the earth and all the heavens."

"This world has so many troubles, so many struggles, it wants all the help it can get, human and Divine. We want the grace of God and we want surgery and we want the Keeley Cure."

"There are certain things that the grace of God doesn't propose to do."

"Never let the time come in my history when I cease to extol the grace of God, but there are men who need something beside that. Dr. Keeley struck the key-note when he said, 'This evil is a disease.'"

"I have now in my mind a young man who had broken his father's heart and his mother's heart. He was bolstered up and he fell—he was put in an inebriate asylum and fell; everything tried with him possible. He became a converted man, joined the church; but this awful disease drew him down and down, and there seemed no cure. He is redeemed to-day. The Keeley cure saved him, *and nothing else under Heaven would.*"

"We cannot read it down, we cannot talk it down, it will become triumphant and be recognized in all the land and all the lands of the earth. It has on it the mark of the approval of the Lord God Almighty."

"Dr. Keeley's finger is on the world, and I shall do all in my power to tell the world so. I am satisfied now, for I have seen Keeley, Dwight, and the Double Chloride of Gold Cure."

John V. Farwell, one of the merchant princes of the world, in addressing the convention of Keeley League Clubs, held at Dwight, Illinois, September 15th to 16th, said:

"I see before me men who 'have been there' and who ought to do the talking here to-night."

"To-night you are not slaves, but free men—free by the grace of God through His providence in giving to you Dr. Keeley and his wonderful Cure."

"I was prejudiced against it, coming as it did to me through the newspapers."

"But I see in your faces to-night a different story. I have found in all the inquiries I have made in London and here and New York that all my first impressions have been wiped out."

"Yes, friends and fellow-citizens, another name has been added to the list of public benefactors, and that name is Dr. Leslie E. Keeley."

Francis Murphy, the world renowned temperance reformer, in reply to questions propounded him by Judge Arnold, at Dwight, Illinois, October 22, 1892, says:

Q. "What do you think of the Keeley treatment?"

A. "I am fully persuaded that the Dr. Keeley Cure for inebriety can be justly called miraculous. I have met multitudes of men from every walk of life, who testify to its saving power: men who were given up as forever lost; and, as an eminent Judge said to me recently, 'I did not think God could save them.' They went to Dwight and took Dr. Keeley's Treatment, and have been sober, industrious and honored men ever since. Such testimony is unimpeachable."

Q. "What relation, in your judgment and from your observation, Does The Keeley Treatment hold to gospel temperance?"

A. "In my experience of twenty-two years as a gospel temperance man, I have always felt that I needed something to aid men who were what was known as hard drinkers; men who were possessed with the devil of alcohol; men who had their dwellings in the tombs, and no man could tame them. I visited the most distinguished doctors and asked them to aid me in giving relief to these men. They did to the best of their ability; but there was no permanent relief for them. I needed medical assistance; without it thousands have been left on the field to perish. Thank God for Dr. Keeley, who has found a sure cure for the alcoholic poison. Now, the cause of gospel temperance can go forth to meet the Goliath of drunkenness without any doubts or fears, because Dr. Keeley has proved to the world by a great multitude of witnesses, that God has revealed to him the Divine secret that has killed the pestilence of drunkenness."

Q. "Do you endorse the Keeley Treatment?"

A. "I do, with my whole heart."

Those who believe that the world owes them a living don't know how many bad debts the world has to shoulder.

CATARRH CAN'T BE CURED

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you have to take internal remedies. Hall's Catarrh cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is no quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

F. J. CHENEY & CO., Props., Toledo, O.
Sold by druggists, price 75c.

A dangerous crossing—the Australian ballot in the hands of an ignoramus.

A HERALD OF THE INFANT YEAR.

Clip the last thirty years or more from the century, and the segment will represent the term of the unbounded popularity of Hostetter's Stomach Bitters. The opening of the year 1893 will be signalized by the appearance of a fresh Almanac of the Bitters, in which the uses, derivation and action of this world-famous medicine will be lucidly set forth. Everybody should read it. The calendar and astronomical calculations to be found in this brochure are always astonishingly accurate, and the statistics, illustrations, humor and other reading matter rich in interest and full of profit. The Hostetter Company, of Pittsburgh, Pa., publish it themselves. They employ more than sixty hands in the mechanical work, and more than eleven months in the year are consumed in its preparation. It can be obtained without cost of all druggists and country dealers, and is printed in English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish.

When a young man tips his hat to a mother and daughter on the street he always keeps his eyes on the girl.

WORTH KNOWING.

That ALLCOCK'S POROUS PLASTERS are the highest result of medical science and skill, and in ingredients and method have never been equaled.

That they are the original and genuine porous plasters, upon whose reputation imitators trade.

That ALLCOCK'S POROUS PLASTERS never fail to perform their remedial work quickly and effectually.

That this fact is attested by thousands of voluntary and unimpeachable testimonials from grateful patients.

That for rheumatism, weak back, sciatica, lung trouble, kidney disease, dyspepsia, malaria, and all local pains, they are invaluable.

That when you buy ALLCOCK'S POROUS PLASTERS you absolutely obtain the best plasters made.

When you need a friend don't pick out the man whose dog never wants to follow you.

The disagreeable operation of forcing liquids into the head, and the use of exciting snuffs are being superceded by Ely's Cream Balm, a cure for Catarrh and colds in the head.

I have been a great sufferer from catarrh for ten years; could hardly breathe. Sore nights I could not sleep. I purchased Ely's Cream Balm and am using it freely; it is working a cure surely. I have advised several friends to use it, and with happy results in every case. It is the medicine above all others for catarrh, and is worth its weight in gold. I thank God I have found a remedy I can use with safety and that does all that is claimed for it.—B. W. Sperry, Hartford, Conn.

Apply Balm into each nostril. It is Quickly Absorbed. *Gives Relief at Once.* Price 50 cents at Druggists or by mail.

ELY BROTHERS, 56 Warren St., New York

When a man's hoping powers are gone he should seek the cemetery—and find it.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs Porterfield & Losey, 838 Market street, San Francisco.

No matter what their colors are,
You'll find it always true,
When the foot-ball game is over
They'll all be black and blue.

Sufferers from Coughs, Sore Throat, etc., should try "*Brown's Bronchial Troches.*"

CHOICE OF AN ACTRESS.

Being at foundation a womanly woman, she always expected to marry. I say expected, instead of hoped, because she had constantly too many admirers to doubt her opportunities—to her mind it was simply a question of meeting the right one.

She felt sure that when the right man came she would be willing to give up everything for him; indeed, she contemplated with a certain serene satisfaction the coming of a time when her triumphs and ambitions and fame and freedom would be exchanged for the proud servitude of wifehood.

Still she wasn't in a hurry to meet the right man. He would come when he did come—and when he did come it couldn't be helped, and she would be glad. Upon various occasions she had thought him come.

Upon these occasions she had experienced a distinct sensation of fretfulness.

She had conscientiously given the admirer a fair chance to prove himself the right man, but had always been downright glad when he had failed to do so. The admirer always made some mistake fatal to his interests.

Perhaps he lost his head, and went down on his knees; that always immediately settled it. She was much too proud and too humble a woman to be willing to marry a man who went down on his knees about it.

Or he lost his head, and threatened to shoot himself, or drink himself to death, or jump in the bay.

Now and then she was moved with regret at the storm which she had raised, and expostulated in a kindly fashion with her victim, but more often she shrugged her white shoulders, saying, if not to the man, at least to herself, that the man who was foolish enough to want to shoot himself because a woman did not love him, had better shoot himself.

Some men were doggedly meek—of these she was a bit afraid—yet so far these meek, dogged wooers had presently developed into bores, which, she felt, lessened the danger. I say danger, because she regarded the possibility of marrying any man but the right man a danger.

Sooner or later, in the course of every admirer's attention she made a stanch effort to dismiss or escape him.

She argued to herself that escape from the right man would be impossible, and that escape from any other was to be regarded as wisdom, and hailed as good fortune.

She never went out of her way to attract men—in the first place she had no need to, and besides she really did not care to increase the chances of coming across this more or less to be dreaded right man.

She kept pretty closely to her work, enjoyed the footlights, spent her money freely, rejoiced in her independence, and thought herself a lucky girl.

Of course she had admirers. She considered that a natural result of her position, profession, sex and attractions.

She permitted men who loved her certain privileges—they might kiss her hand, come to the theatre and see her play, and give her flowers and feel miserable about her.

Any one of them, she realized, might develop into the right man, so she treated them all conscientiously. She never misled them or led them on, and since she was frank with them and never discourteous, she felt she had a right to be exacting about their manners, and she always was.

Upon the three or four occasions when a man's devotion had stirred in her a certain degree of interest she had rigidly demanded time to find out and to make up her mind.

To find out meant to satisfy herself that the man in question and the "right man" were of one "identity." To make up her mind meant to decide whether, right man or not, she would have him!

The candidate having always failed to stand this test, she had, directly she was so assured, dismissed him promptly and gently.

By what subtle sign of authority she would recognize the right man she did not know. He would be big, she was sure of that, and very gentle; he would meet her mentally, "understand" her, satisfy her morally and tenderly, master her physically.

He would be above all her little "arts" and caprices, but he would admire them; he would be too dignified to go down on his knees from not being able to help it, yet quite fond enough of her to do it. For her part, she would never wish it, and she would be very meek and gentle and obedient, and glad to be so; but—but, meanwhile she was free, and of that she was glad, too.

Really, her life was delightful; she lifted her white arms into her pretty lace wrapper and laughed to herself as she settled for her little rest before retiring. Her parlor was warm, and the light softened by colored shades; a bit of sandalwood among the logs sent a spicy fragrance out with the heat, she rubbed her head among the cushions and laughed again to herself.

It was a notion of her own, this half hour rest before retiring. For the sake of it she usually came home at once from the theatre.

Going out to suppers and sitting up and drinking wine was stupid, besides such a course would soon spoil her good looks. A warm, all-by-herself half hour in her own pretty room, with the crackling of her fire for company and her milk punch and biscuit for refreshment, were much nicer.

It was nice to feel that the comfort around her was all of her own making, and to know herself in the midst of it to be very pretty and very sweet, and alone, in spite of the ones she could check off on her pink fingers as at that very moment who were miserable for sight of her.

As a rule, men had sought her out and made themselves as charming as they found possible and permitted; but Crag Demmon attracted her.

He was big, undeniably a gentleman, and by nature apparently a savage. He fell promptly in love with her, and his personality riveted her attention in an insistent way which she made no effort to oppose. For the first time a man's passion for her seemed to invest the man with strength.

To face his savagery and do as she pleased in spite of his fierce jealousy she found an exhilaration; to command a creature so much bigger than herself, and to feel his strength and not his weakness obeyed, was an excitement.

To look into his savage, somber eyes and melt them with the smile in her own was worth doing, and intoxicating.

One day he asked her to be his wife, adding that unless she gave him some definite answer he would see her no more. She was much interested.

"Could you leave me and not see me again?" she asked.

"Yes."

"Would you shoot yourself?"

"No."

She felt aggrieved. After a pause she asked, "Do you love me?"

"Yes." His teeth were set, his face pale, and he looked at her as if he hated her.

Her breath quickened. "Why do you hurry me so?"

"Because I will be made a fool by no woman."

A throb of fear went through her. She flung her head back and made answer, "You may go at once," and then, because his eyes frightened her, she began to cry and—"How do you expect one to decide at once like that, if she loves you? I can't, and I won't—you can go."

"How much time do you want?"

"I don't know."

"I will wait a while."

"Much better go. I won't be put on time. I don't think I shall care for you, anyhow, and even if I did you are so ugly maybe I would not marry. Go away and let me alone." She spoke in a frightened rush.

"Don't be foolish," he answered; I will wait—a while."

During the "while" he saw a great deal of her; he curbed his temper, was always gentle, always devoted, made no effort to kiss her, half strangled a man at the club who suggested that all actresses were alike, and looked at her half the time as if he hated her.

She grew frightened and meek, and made an exhaustive study of his tastes.

One day he spoke harshly to her; she cried out that he must not—that she loved him.

Thereat he took her in his arms, kissed her and said, "Will you be my wife?" A month from that time she married him.

Her manager protested, and a good deal of money was paid over. To the wife the manager said, "You are a fool; if you ever want to come back to the stage let me know."

* * * * * *

Demmon carried her off to Europe. He was strong and gentle and devoted. There was little trace of his savagery, except in a fiercely jealous guardianship over her.

Now and then he ordered her around. Once she protested vehemently; he looked at her and answered, "You forget you belong to me."

He gave her all the money she wanted, bought her anything she fancied, and insisted upon her dressing richly and indulging extravagances, but once, when she received a check for a story she had written, he tore the bit of paper in pieces, saying: "I will give you all the money you want! Don't forget!"

She was happy—oh, yes. Her one thought was to please him, and to please him made her happy. She gave up all her own fancies, and endeavored only to meet his moods. She kept up all of the pretty petulance and caprice that had pleased him originally, because sometimes it amused him to see her childish and exacting—she knew when to be silent, though, and how to efface herself.

She read the papers faithfully, and, by dint of study and close attention to a few political arguments within earshot of which she came, she got a fair grasp of the principles of the party opposite to her husband's, and argued with him very well.

To such men as he presented she made herself charming—he liked to have other men admire her; herself, she took no interest in attracting them, and she was always a bit afraid of being too successful and so annoying her husband. Besides, attention from other men made her heart ache; her husband loved her dearly, but he did not tell her so very often, and sometimes when she made mistakes he called her stupid.

Of course she did make mistakes sometimes. Being very anxious to please him, her instinct was not always true. There were times when he liked to have her creep to the side of his chair and push her soft hair against his face, saying nothing meanwhile, unless the little caressing breath from her lips could be called speech; but then again this annoyed him, and he had to be let alone.

Being very fond of him, it was hard to come near or pass him without reaching out a hand to touch his shoulder or cheek, and this fretted him dreadfully when he was not in the mood. Also there were times when she wanted him to take her in his arms and be good to her, and find out how she felt, or when she wanted to cry and be miserable and be petted and coaxed out of it; all this was childish and foolish, but—oh, dear! how her heart ached sometimes.

He loved her—of course she knew that—so there was no need that he should tell her so all the time; besides, he did tell her what an unfailingly attractive companion he found her, and he praised her tact and sense and the way she kept her pretty looks.

She was happy when she was with him, only happy when she pleased him; and she used to cry her pillow wet very often.

At the coming of the child her husband was distinctly displeased; when it died the mother grew sullen.

They got back to America; a letter from her old manager inclosed a contract for the coming season. She signed, left all her jewels, and with her maid started for New Orleans.—Emma V. Sheridan.

WATCH SPRINGS.

An Important Part of a Timepiece's Mechanism That Often Breaks

AFFECTED BY CHANGES OF WEATHER

How the Delicate Coils of Steel Ribbon are Tested.—Mainsprings in Expensive Watches.

"Mainsprings are very much like people," said a Broadway watchmaker the other day. "They are as susceptible to extreme degrees of heat and cold as human beings. When the thermometer is hovering around the freezing point or dancing away up in the nineties the little mainspring will give up in disgust and uncoil itself and die, just as men succumb to freezing or sunstroke."

This uncertain piece of mechanism is supposed to be adjusted to meet the various degrees of temperature, but when the change is very great and comes with short notice there is nothing that can prevent them from snapping. They are made in Switzerland of the very finest quality of steel, absolutely flawless. Very often the watchmaker can detect a bad spring before putting it in the watch, either by its color or the softness of its spring. These have been too highly tempered in the making, and instead of being subjected to merely a red heat the fire has been brought to white heat, thus weakening the strength of the metal. The finest watches that are handled by reliable dealers are put through a "cooking and freezing" process before they are sold, for the purpose of testing their reliability in all temperatures.

The watch is first placed in a little metal box, which is made airtight. Then a strong gas flame is turned on the under surface of the box and is kept there for two or three hours, so that the watch is so hot at the end of that time that it could not be touched with the bare hand. From this it is immediately taken and put into another metallic box which is buried in ice. There the costly watch is allowed to freeze for an equal length of time, when its torture ceases and the examination is made. If during this excessive test the watch appears to have ticked merrily on without deviating a fractional part of a second it is placed back in the case and marked "guaranteed for two years." The mainspring is the first piece of mechanism that succumbs to the test. If it survives nothing else need be feared.

Mainsprings are, however, about the only part of a watch that the jeweler cannot successfully diagnose. They can guarantee any of the numberless little wheels or pivots or balances that go to make up the anatomy of the watch, but the mainspring has as yet baffled the most skilled makers of watches of all countries. It is not so much the severe extremes of the weather that prove fatal to the spring as it is the process of changing from hot to cold, or vice versa. Like the human frame, if the ribbonlike little coil of steel can withstand the effects of this change it may be considered proof against breaking when the change to normal weather comes.

Many people who have been possessors of new watches but a short time come into the dealer's with blood in their eyes, declaring that they have paid an enormous price for the timepiece and the mainspring has broken after only a week's use.

"That is nothing," remarked the jeweler. "We have them snap in our case before the watch has ever been shown for sale." Others imagine that they might have wound the watch too tight but this does not harm it. It is rather the jerky, hurried winding that will eventually tell on the temper of the metal. Every good stem winder has a stop placed in the stem, which prevents the winding too tight.

Damp weather has an ill effect on mainsprings, and in England they do not as a rule last as long as in this country. A severe thunder and lightning storm also frequently proves disastrous to the durability of the spring. A dealer who took in seventy-nine watches on one day said that one summer on a day immediately following a terrific electrical storm there were twenty-one watches brought into his store within five hours for new mainsprings. The cost of a new mainspring is the small part of making such repair. It is the putting them in, the labor expended, that costs. It costs from twelve to fifteen dollars to put a mainspring in the Jurgensen watch and a little less in a Patek Phillippe, while in a cheaper American make it may cost only fifty cents or a dollar.

A man purchased a $300 Jurgensen from a leading dealer several years ago, and shortly after he left for a tour around the world. He was gone a year, and when he returned he went back to the dealer with his watch and complained: "Here's a watch I paid you $300 for a year ago, and while I was traveling abroad it lost two minutes. You guaranteed it, and I want you to make it good." The watch was placed in the window with this card beside it:

"This watch lost only two minutes in a year in a trip around the world. Price $300." It sold within an hour.

It is said that one bar of iron costing $5 will produce $250,000 worth of mainsprings.

Some springs are made in this country by the manufacturers of cheap watches. These springs are several feet long and take nearly two minutes to wind up.—New York World.

Patient—Great Scott, doctor, that's a frightful bill you've presented.

Doctor (with dignity)—Not so large, sir, when you come to think that it is my first case and I had to study up on half a library full of authorities.—Detroit Free Press.

Fully Answered.

Gentleman—Riding a bicycle up such a steep hill as this is a great deal harder than walking. Why don't you get off and push it?

Boy—I just got it.—Good News.

WHAT MAKES THE SWELL.

Some Interesting Points About Two Apparently Well Dressed Men.

I was standing in the lobby of the Adams House in Boston. A New York club man came in and stood talking with some one in the lobby for several minutes.

After he had gone out the man he had been talking with came over to me—he was a friend of mine—and put this question: "How does Hicks Yardly dress so well? He has only $5,000 a year, and yet he manages to dress himself so as to look much better garbed than any Boston man I know. Strange, isn't it?"

Not at all.

The Boston man dressed on a cash account and an eye to color. The New Yorker's dress was not only an art, but a science—an art because he had an eye to harmony; a science because he had a comprehensive knowledge of means to ends.

Any one knows enough not to wear a red cravat and a bottle green coat; but how many men know how to have their coats cut or their shoes shaped? They leave it to their tailors, and most tailors cut a coat the same for a stripling of twenty as they would for an alderman.

Hicks Yardly would have informed the Boston man that his hat was too broad brimmed, his collar was too high in front and too low in the back; that his cravat was blue and his violets purple—Oh, horror of horrors!—that his cutaway had one too many buttons on it; that his waistcoat hung down like an inverted V, whereas it should bind about him like a belt; that his trousers were tight to the knee and loose from there down, whereas they should have been the reverse; that his shoes turned up at the toes—the sole of the English made shoe touches the ground from tip to heel; that his gloves were russet, whereas they should have been brick color; that his hair was short on top and long behind, whereas it should be long on top and short behind; that his mustache should not be waxed; that his topcoat was loose in front and tight fitting in the back, whereas the reverse should be the case; that his stick was a buckhorn, in the face of the well known fact that no true man of the world would carry nowadays any other than an all wood cane.

Mr. Hicks Yardly would then pause for want of breath and leave the lobby, while the Bostonite drew out his Browning and turned to "Home Thoughts from Over the Sea."—Frederic Edward McKay in Kate Field's Washington.

He Liked Fishing.

In the performance of my pleasant duties as editor I am called upon to greet members of the craft from every part of the world where angling is followed as a pastime. I have yet to meet one who failed to respond to my eager search for facts relative to the fish in their home waters with less eagerness and enthusiasm than evinced by myself. I have talked and queried with the uncouth and unkempt and with the polished and cultivated anglers of the brooks and the—books, and I have found them, each and all, to be possessed of valuable information as to the byways if not the highways of the art recreative.

I have been taught by the clodhopper of the streams; I have gained invaluable points from the bushwhacking boy who snatches 'em out; the cowboy fisher of the gulch holes, the "wum" baiters of the Mississippi sluices, the Canadian half breeds of the Laurentian streams and the malaria saturated dweller "away down on the Suwanne river" have all dropped angling pearls along my pathway, and last, not least, have I gathered consolation and enthusiasm from an ingenuous remark made by an old but illiterate angling rodster friend when he was first told of Sam Johnson's slur.

"Well," said he, "tell old Johnson for me that, rather than not go a-fishing at all, I'm willing to be the worm."

Could self abnegation go further in sacrifice or enthusiasm?—American Angler.

A Miser's Hospitality.

Sir Harvey Elwes, of Stoke, in Suffolk, next to hoarding money, found his principal pleasure in netting partridges. He and his household, consisting of one man and two maids, lived upon these. In cold or wet weather Sir Harvey would walk up and down his hall to save fire. His clothes cost him nothing, for he ransacked old chests and wardrobes and wore those of his ancestors. When he died the only tear shed was by his servant, to whom he left the farm—value, fifty pounds per annum.

The whole of his property was left to his nephew, John Maggott, who thus inherited real and personal estate worth £250,000, on condition that he should assume the name and arms of Elwes. Of this man, who is better known as John Elwes, the miser, the following story is told: His nephew, Colonel Timms, visited him at Marcham, and after retiring to rest found himself wet through. Finding that the rain was dripping through the ceiling, he moved the bed. He had not lain long before the same inconvenience again occurred. Again he rose and again the rain came down. After pushing the bed quite around the room, he found a corner where the ceiling was better secured and slept until morning.

When he met his uncle at breakfast he told him what had happened. "Aye, aye," said Mr. Elwes; "I don't mind it myself, but to those who do, that's a nice corner in the rain."—Cassell's Journal.

Warren's Idea of Dying.

Warren, aged four years, had formed his ideas of angels and their forms from the study of certain steel engravings, and told his mother if she scolded him again he would "die and go right to heaven." Being told that that was easier said than done, and asked how he would get there, he answered without hesitation: "Oh, I would pile up all the chairs and tables and boxes and ladders as far as they would go, and then I 'spect an angel would come down and get me. And anyway I'd a good deal rather go that way than have things screwed into me!"—New York Tribune.

BOOK THIEVES.

Historical Personages Who Stole Rare and Unique Volumes.

PEOPLE WHOM LIBRARIANS FEAR.

A Bishop, an Inspector General, a Pope and a Priest Who Made a Practice of Purloining Books.

Book stealing is an art upon which much ingenuity has been expended. One never knows in what form it will next break out. It is an incident by no means uncommon in Booksellers' row for a bibliopole to be offered a book which had been stolen from his next door neighbor. There is something more than a tradition to the effect that a bookseller has on occasion purchased a book taken a minute or two previously from the shelves outside his shop!

A favorite mode of stealing books from public libraries is to procure a book, sit down to read it and then wrap it up in an overcoat, and after this to take up a paper or magazine. The rest is easily guessed. The public libraries suffer in all sorts of ways, for here the accumulated wisdom of the thief finds plenty of scope. Some of the tribe have a mania for old directories. Librarians complain frequently of the clerical thief of sermons and theological literature.

Novels and "books of the bibliophile" (as the French call them) one can understand being stolen; but sermons and theology! Women, more or less—generally more—respectably dressed, are often objects of suspicion with librarians, for the "receptivity" of cloaks is infinite, and the "feelings" of the culprit must also be considered. As a general rule, the thief is well dressed and educated, and frequently well to do.

HISTORICAL THEFTS.

Whatever may be the causes which prompt a person to steal books there is always this consolation—he is in good company. This balm may not be a very healing one to the soul of the person whose books are stolen, but it must be consolatory to the thief, when repenting in prison, to know that some great and good men have been touched with the same species of insanity. Hearne, in his "Johannes Glastoniensis," more than hints that Sir Thomas Bodley had a weakness in this direction. "If you hold," he warns Sir Henry Saville, "any books so deare as that you would bee loath to have him out of your sight, set him aside," etc. Moore, Bishop of Ely, has likewise come under such a stigma.

The anecdote runs to this effect: A gentleman calling on a friend who had a very choice library found him unusually busy in putting his best books out of sight. Upon asking his view in this he was answered, "Don't you know the Bishop of —— dines with me today?"

The very king of book stealers was Libri, who, as inspector general of French libraries under Louis Philippe, had special facilities for helping himself and whose known thefts have been valued at £20,000. The most interesting illustration of this man's depredations was exposed in 1868, when Lord Ashburnham issued a translation of the Pentateuch from a Latin MS. which had been purchased by the late Lord Ashburnham from Libri, who had sold it under the condition that it was not to be published for twenty years. It had been stolen in 1847 from the Lyons library and the last clause of the agreement, therefore, could be easily understood. Libri evidently was not one of those whom Jules Janin describes as "people who don't think it thieving to steal a book unless you sell it afterward."

POPE AND PRIEST.

Innocent X, when still Mgr. Pamphilo, stole a book from Du Moustier, who was himself a book thief, and ought to have been en courant with the devices and designs of his own weaknesses. It is refreshing to come across an example when the tables are so completely turned, and if anything would induce an honest man to turn book thief it should be the exhilarating fun of stealing from another thief. It is reported, however, that Du Moustier recovered the book, and kicked the Cardinal out of the house. Catherine de Medici went in for stealing books by wholesale and barefaced; she seized the fine library of Marshal Strozzi and promised to pay his son for it in installments, but never a farthing did he get.

Of another and equally extreme type was the Spanish priest Don Vincento, who sold books and then murdered the purchasers to regain possession of his coveted treasures. Like most of the bibliokleptomaniacs he came to grief at last. The original edition (1482) of the "Fueros e ordinacions fetes per los gloriosos Reys de Arago als regnicois del Regne de Valencia," was offered for sale by auction, and after a long and obstinate competition was knocked down to a bookseller named Paxtot.

A week afterward Paxtot's shop was burned down, and he was suffocated at the same time. Suspicion was directed toward Don Vincento, whose residence was searched, and there at length was discovered the incunabule above named. The priest was arrested, and at the hearing he confessed—not from contrition or the fear of torments in the next world, but because it appeared that the volume was not unique, as had been supposed. He sobbed violently when he was condemned to be strangled, and the only defense he vouchsafed was, "Ah! your worship, my copy was not unique."—St. James Gazette.

A Matter of Doubt.

A minister in the east said: "My brethren, the collection will now be taken for my expenses for a trip, for I am going away for my health. The more I receive the longer I can stay." The largest collection ever made in that church was taken. And now the question under discussion is whether the size of the collection was a compliment to the preacher or much the reverse.—Louisville Western Recorder.

Suicides in European Armies.

The Austrian army takes the lead in the matter of suicides. From 1875 to 1887 a yearly average of 122 suicides is recorded for every 100,000 effective troops. In 1889 the number was 149. Death by suicide represents a fifth part of the whole mortality of the Austrian army. No disease is more deadly. The Germans report about half the number; the Italian army about one-third; the French army about one-fourth; the English army in the home service about one-sixth; the rate in the Russian army is nearly the same, while in the Spanish army it is least of all.

There are some curious facts about these suicides. In the European armies, especially in Austria, it is the young soldiers who kill themselves during the first month of their service. Suicides are the most frequent among the cavalry and infantry, and in the latter among the soldiers who are accused and awaiting trial.

The most frequent method is shooting, though hanging and drowning are frequent methods. The infantry use firearms and usually aim at their heads. The mounted soldiers hang themselves by their horse bridles. The Algerian soldiers almost always shoot themselves through the body, perhaps because the Arabs think it is infamous to mutilate the head. In Austria a third of the suicides are attributed to a distaste for military duty; in France, love trouble is a frequent cause; the fear of punishment is everywhere a great incentive. The maximum of suicides is reached in the hottest weather, and the minimum is reached in the coldest weather.—Boston Herald.

A Statue of Jupiter Olympus.

There is a difference of opinion as to which of the seven wonders of the world deserves the title of the "most magnificent," and as the majority of these wonders have disappeared it is somewhat difficult to arrive at a true decision. The evidence appears, however, to be pretty fairly balanced between the gold and ivory statue of Jupiter Olympus and the Temple of Diana, at Ephesus. The statue of Jupiter was the work of Phidias, a celebrated Athenian sculptor; it stood sixty feet high and it is said to have exhibited a marvelous representation of the grandeur, state and dignity which are naturally associated with human ideas of the awful majesty of the "king of gods and men;" indeed, according to an ancient Greek epigram, it seemed that either Phidias had ascended to heaven to sketch Jupiter, or Jupiter had descended to earth to sit to Phidias.

The god was clad in a robe of solid gold, garnished with lilies and other flowers, and four golden lions supported his footstool. The throne was of cedar, inlaid with ebony, gold, ivory and precious stones, with sculptured representations of the destruction of Niobe's children, the contests of Hercules and other exploits of the heroic age; at the back of the throne were the Hours and the Graces; at each corner a figure of Victory danced upon a Sphinx, who was tearing a Theban youth. The almost superhuman magnificence of this great work dazzled all succeeding artists, threw them into despair and absolutely set at defiance all competition.—Brooklyn Eagle.

Astronomy of the Ancient Egyptians.

We find in the table at the Ramesseum distinct references to the bull, the lion and the scorpion, and it is also clearly indicated that at that time the star Sirius rose heliacally at the beginning of the rise of the Nile.

The word heliacally requires a little explanation. The ancients, who had no telescopes and had to use their horizon as the only scientific instrument which they possessed, were very careful in determining the various conditions in which a star could rise. For instance, if a star were rising at the same time as the sun was rising, it was said to rise cosmically, but unless certain very obvious precautions were taken the rising star would not be seen in consequence of the presence of daylight. It is quite clear that if we observe a star rising in the dawn it will get more and more difficult to observe the nearer the time of sunrise is approached.

Therefore, what the ancients did was to determine a time before sunrise in the early dawn at which the star could be very obviously and clearly seen to rise. The term "heliacal rising" was coined to represent a star rising visibly in the dawn, therefore, before the sun. Generally throughout Egypt the sun was supposed to be something like ten degrees below the horizon when a star was stated to rise heliacally.—Nineteenth Century.

A Quarter's Worth.

Not long ago I was in a New York store buying cloth for a new cloak when a tall and elegantly dressed lady entered and asked to see some cloakings. She told the clerk she wished to match a cloak and had no sample, but she thought she'd know the stuff when she saw it. That poor clerk pulled down roll upon roll of goods for her inspection, and at length she found what she wished.

"How much a yard is that?" she inquired.

"Five dollars, madam," he replied.

"Very well; I don't wish much—just enough to finish a cuff on my cloak. Let me see—five dollars—I think a quarter's worth will be plenty."

The clerk fumbled in his pocket a moment, produced a quarter, put it on the cloth and cut out exactly the size of the quarter, and before the astonished woman could say a word he put her quarter with the piece of cloth and sent it to the desk. She waited for the basket to return and then quickly left the store.

The clerk spoiled the cloth, but he still has his place.—New York Recorder.

Didn't Like the Shop.

Akenside's father was a butcher, but the poet himself in boyhood could rarely be persuaded to enter the slaughter house. During his whole life he was lame from a wound in the foot occasioned in boyhood by the fall of a cleaver.—St. Louis Globe-Democrat.

OSTRICH FARMING

An African Industry That has Been Transplanted to California.

PROFITABLE BIRDS TO RAISE.

Something About the Business.—Hatched by Means of Incubators.—Ungainly Chicks.

There are at least half a dozen ostrich farms in southern California. They have ceased to be a curiosity there, and each now represents a commercial enterprise. Americans buy one-half the millions of ostrich feathers produced annually. It is estimated that this country expends $3,000,000 a year for these ornaments. Each ostrich when full grown yields a feather income of from $200 to $300 per annum. The elegant, long black and white plumes sell for $5 each at the farms, and readily bring $10 each at retail in New York or Chicago.

Every feather has a value. If it is sufficiently large for use it is worth at least 10 cents. The very small ones, otherwise useless, make up into cheap souvenirs and are eagerly purchased by visiting tourists at prices varying from 10 cents to $1. The plumes produced in southern California are fully as valuable as those from the far away Cape Colony.

The eggs, if fertile, sell for $25 each, and generally from 75 to 80 per cent. of all eggs produced will hatch. If not fertile the shells are in demand at from $2 to $5 each as curios and ornaments. A young ostrich just out of the shell is considered equivalent to $50, and his value increases until he is full grown, when $500 is a low market price.

The expense of maintaining an ostrich farm is comparatively slight. The birds in this country are usually healthy. Their appetites are appalling, but they are satisfied with alfalfa, cabbage and crushed bones for a regular diet. On occasions they expect large and small pebbles, bits of iron, old shoes, tin cans and such delicacies. A hungry ostrich is not particular about his food. It is merely a question of deglutition with him. If what he eats will go down—or rather up—his somewhat elastic throat (for he eats and drinks head downward), he feels safe to trust his digestive organs to do the rest.

The ostrich has long been maligned. In our schoolboy days natural history taught us to despise the ostrich, first, because of its lack of sense, and second, for its want of parental instincts. We were told that this great, ungainly bird, when chased by a native South African upon the back of a fleet horse or a tame ostrich, would hide his weary head in the sand, under the impression that if he could not see his pursuer the pursuer could not see him. This fable is no more true, at least of the domesticated bird, than the other, which actually says that the mother ostrich lays her eggs in the hot sand and leaves them to the tender care of the sun and the Hottentot.

The ostrich egg shell is sometimes one-sixteenth of an inch thick. It is fully twenty-four times the size of an ordinary hen's egg. Incubation requires forty days, during which period the male and female alternate in the domestic duty of keeping the eggs warm. Most of the hatching is now done by incubators. A 300 egg incubator has a capacity for but 27 ostrich eggs.

At the farm near Santa Monica I saw the birds on the nest, however, and the young ostriches after they were removed from the nest. The eggs at this sitting nearly all hatched, and as I visited the farm frequently I grew very much interested in both parents and children. The nest consisted of a pile of sand in the center of the field assigned to the two breeders. The male bird manifested the utmost interest in the business in hand, and devoted more than fifteen hours a day to the maternal duty of sitting on the eggs.

When his mate was on the nest he would shield her from the excessive heat of that semi-tropical sun by extending his ample wings over her. The two ostriches were models of parental affection. The exemplary conduct of the male specially won my admiration, for he was ever on the alert to render assistance to his patient spouse, and when the little fellows pecked their way through the hard shell he kept vigilant watch over them. The old story of neglect of its offspring is clearly disproved. There are no feathered animals more dutiful.

The old birds are not awkward, but the young ones have no sense whatever, and so it is necessary to remove the latter as soon as possible after they escape from the shell to prevent them from wandering into danger. It requires skillful coaxing and no little maneuvering to entice the fond parents from the nest, but this accomplished the young ostriches are transferred to a sand box in the sun, where they must have close attention all day long to keep them from mishaps which their utter lack of discretion and extreme awkwardness would certainly bring upon them.

At night they are placed in an incubator. Until they are several months old the absurdly heedless and tender things require very great care. After they pass from infancy, however, they generally thrive. The losses usually occur within the first month.

When the birds are seven months old the first plucking occurs, and from that time forward they give up their feathers twice a year. The females begin laying eggs at three years of age, and produce from thirty to ninety eggs each annually.

Town and Country.

The case of a little visitor to the country, who rather missed the conveniences of the city, is cited as showing that the season's outing is not always considered an unmixed blessing by those enjoying the same. This little one had taken her first walk on the country road with her mother, and on her return to the hotel, being asked how she liked the place, said very decidedly: "Don't like it, cause there's no hoss cars. I like ridin' in hoss cars better'n walkin'."—Boston Budget.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, FEBRUARY 3 ..... 1893.

The revolution in Haiwaii was a thing of necessity; the monarchy was a mere show, a farce at which the world laughed. Sensible men may be amused for a while with the plaything of a child, but they quickly tire of it. Great statesmen may find a use for sham royalty and offer mock homage to phantom kings, but when the royal puppet is no longer needed, or gets in the way, the fooling ends and the puppet is cast aside. Such was the way Warren Hastings used the Rajahs and Nabobs of India. The sensible men of the Sandwich Islands know what their country needs; the United States should not permit any foreign power to interfere with them in settling their own affairs; when that is done if the people want annexation to the United States a fair and just way of accomplishing that end will be found.

Commissioner Raum estimates that for the next fiscal year the pension roll will require $172,000,000. Now there is not the slightest disposition anywhere to refuse reasonable provision for every man who served his country in the day of trial; but it is only too notorious that there are great numbers of men drawing pensions who never saw a battle, nor even a skirmish, nor ever stood in front of an armed enemy. For such men to receive pensions is simply swindling. It would be only strict justice to every body, deserving pensioners included, to have the pension roll carefully scrutinized and the pensions now paid to unworthy persons stopped. And as some of the knaves have property enough they ought to be sued and made to refund the money they have got under false pretense.

The Assembly promptly passed the bill for making the railroads pay their delinquent taxes. It is not improbable that it may be defeated in the Senate, however In that body are men who make no secret of their devotion to railroad interests; the chairman of the Committee on Corporations, Carpenter of Los Angeles, stated in his place in the Senate that he is a railroad attorney. The amount due is about three millions of dollars, and in order to beat the people out of such a sum the railroads could afford to pay a few Senators enough to defy public indignation, vote against justice and leave the State with their ill-gotten gains at the end of the session. The Senate will be closely watched when dealing with this matter.

Women with No Children.

The fact that the total population of the United States has fallen below the popular estimate of 64,000,000 is likely to call attention to the fecundity of American women. Not long ago a newspaper took a census of the children in certain fashionable quarters in New York city and brought to light the fact that comparatively few children gladden the spacious homes of Murray hill, and that the birth rate there was alarmingly low. The last state census of Massachusetts brings out some interesting facts in relation to the percentage of married women having no children. Here is a table compiled from the Massachusetts census showing the percentage of native and of foreign born women having no children:

	Native born.	Foreign born.
The state	20.18	13.27
Barnstable	16.95	14.77
Berkshire	17.93	9.94
Bristol	19.61	18.08
Dukes	20.00	14.29
Essex	19.43	13.78
Franklin	19.33	11.20
Hampden	20.86	11.98
Hampshire	20.23	12.61
Middlesex	19.92	13.52
Nantucket	17.26	27.03
Norfolk	17.63	11.67
Plymouth	18.58	19.28
Suffolk	23.89	14.04
Worcester	20.03	10.99

Here we find that one-fifth of the married women of Massachusetts are childless. It is said that in no country save France can a similar condition of affairs be found. On the other hand, instead of over 20 per cent., only 13.27 per cent. of the foreign born women of Massachusetts are childless. What is true of this state is undoubtedly in a greater or less degree true throughout the country. The time has come when we must face the fact that the increase of population by birth is decreasing—that the tendency of the times among well to do Americans is to small families, and that one-fifth of our native married women are childless.—Chicago Tribune.

Odd Custom in Brazil.

A woman lately returned from Brazil tells of the curious nomenclature of the streets of Para. They are Biblical or commemorative of some event in the Brazilian history. It seemed to her quite irreverent to be told that a desirable location was "at the corner of St. John the Baptist and St. John the Evangelist streets." She went with her uncle, who was on business, to dine at the house of a wealthy merchant.

Everything was very gorgeous and lavish in South American style, but on leaving she was amazed to have her hospitable host say to her, "If you have any washing send it here." It is a custom there, it seems, for wealthy households to take in laundry work as an employment for their large retinues of servants.—Cor. Utica Herald.

ON A TANDEM.

The hillside blazed in red and gold;
The fields had burned to timber;
The air was crisp, nor yet too cold,
As down a winding way I bowled
With Jennie on a Humber.

Sweet Jennie, with her chestnut hair,
Her roguish eyes and laughter;
How proud was I that she was fair;
How glad was I to see her there,
And know that none came after!

Oh, dream of happy days gone by!
We spoke of autumn sadly;
And when I seemed to hear her sigh
I lisped her name, I know not why—
Somehow she pedaled badly.

I lisped her name, and growing bold—
No wonder she grew sober,
Or that the wheels so slowly rolled
Along the sunlit, leaf strewn mold
This rare day in October.

I lisped her name and bending low—
While pedals turned at random—
Till cheek touched cheek—I—but you know—
Of course 'twas wrong to treat her so,
Sweet Jennie on a tandem.

—Wheel.

From an Old Book.

In one of the older manuals of the common council of New York there appears an interesting directory of this city for the year 1665. Then there were exactly twenty streets and a population of 251. Broadway at that time was De Heere straat (the principal street). The Battery was Aen de Strandt van de N. Reveir. Wall street was De Waal, Pearl street was De Perel straat, Whitehall street was De Winckel straat, William street was In de Smits valley (In the smith's valley), and Broadway above Wall street was Buyten de Laat Poort (outside the land gate). All of the residents were of Dutch extraction, with the exception of one whose name appears in the list as Jacob, the Frenchman.

There were Roosevelts, Beekmans, De Peysters, De Puys, Van Cortlandts and Verplancks in those days. Clams, oysters and fish formed the principal food of the settlers at that period. Occasionally in the spring New York was visited by "such amazing flights of wild pigeons that the sun was hid by their flocks from shining on the earth for a considerable time; then it was that the natives laid in a great store of them against a day of need."—New York Times.

The Love of Domestic Animals.

The man who has not music in his soul is justly exposed to the disparagement of the poet, but what shall be said of him who cannot find one dumb animal at least on which to bestow care and kindness? Sailors and soldiers have their pets; the feathered, the feline, and the canine creation are universal favorites.

Carriers and draymen are rarely indifferent to the companionship of the four footed friends, and the navvy's dog, while his master is at work in the cutting or on the embankment, sits on his peajacket and guards the bundle containing that midday meal of which, when the toiler returns, the good and faithful servant will have his share. It would be a very dreary and perhaps a wickeder world than it is if we had not animal pets, domestic as well as regimental.—London Telegraph.

True Marriage.

A happy wedlock is a long falling in love. I know young persons think love belongs only to the brown hair and plump, round, crimson cheek. So it does for its beginning, just as Mount Washington begins at Boston bay. But the golden marriage is a part of love which the bridal day knows nothing of. Youth is the tassel and silken flower of love; age is the full corn, ripe and solid in the ear. Beautiful is the morning of love, with its prophetic crimson, violet, saffron, purple and gold, with its hopes of days that are to come. Beautiful also is the evening of love, with its glad remembrance and its rainbow side turned toward heaven as well as earth.—Theodore Parker.

In the Czar's Country.

On the way back from Izora the czar wanted a cup of tea, but owing to a sudden jerk of the railway carriage the tea was upset. The next morning (as goes the story) the whole line between St. Petersburg and Izora was carefully searched by numbers of men ordered to find out what had jerked the czar's teacup! Every time the czar goes up and down to Peterhof the steamers have to be decorated, traffic is suspended on the river, and occasionally even the loading of steamers is stopped.—London News.

English Youth and the Army.

Walter Besant, in his very entertaining and valuable book on "London," notes an important change in the early part of this century in the feelings of the English gentry about trade. Mercantile life ceased to attract the younger sons of the gentry, who found employment in the army or navy, and the city was thus severed from the counties.

A Remarkable Watch.

There is a man in this city who is exhibiting a watch to his friends which he claims has a "crowmalaker balance, is congested to heat and cold, and has a criminal confinement."—Newburyport Herald.

Cape Colony is the natural habitat of the largest known species of earthworm. It is a soft, scaleless thing between six and seven feet long, and much resembles our common angle worm.

Some people say that it is very bad luck indeed for a baby to see itself in a mirror before it is a year old, though why this should be so considered it would be difficult to tell.

Good mucilage may be made of dextrin two parts, acetic acid one part and water five parts. Dissolve all by heating and then add one part of alcohol.

A remedy of great value for cats and dogs is sweet oil. Put two tablespoonfuls in their milk and they will rarely refuse to take it.

Some people prefer to line their stoves with potters' clay instead of brick, and it is said to answer the purpose very well.

Finding Lost Baggage.

It was on the Stormy division of the C. B. and Q. it happened, when Superintendent Dugan's jurisdiction embraced that division. The east bound passenger train, then called the Cannon Ball, had on board five corpses, through from Denver, in charge of the train baggage man. It was in June, and the weather was hot. The baggage man finding the atmosphere in the baggage car becoming undesirable moved three boxes containing a corpse each to the platform of his car outside, one on top of the other.

As the train was nearing Ottumwa, the baggage man upon looking out was horrified to discover one of the boxes missing. Surmising that one of the boxes had slid off in rounding a curve, owing to the high rate of speed the train had been running, he wired Superintendent Dugan immediately upon arrival of the train at Ottumwa, apprising him of the loss. Dugan wired the section foreman at Ottumwa as follows:

"Patrick McGann—Look for corpse lost off Cannon Ball three miles west of Ottumwa and report condition of same when found."

Patrick immediately started out with the section gang, and found the box intact and brought the same to Ottumwa. It was seldom that Patrick received orders direct from the superintendent, the roadmaster being his immediate superior. Consequently Patrick concluded the time to win promotion had arrived, and after reading Dugan's telegram over for the twentieth time wired his superintendent as follows:

"Mishter Doogun—I hev found the koropse, and the koropse was ded."

The operator's expostulations were in vain, and Patrick would permit no change in the message, saying:

"I musht obbey the arders of Doogan."—Astoria Examiner.

America's Natives Described.

This description of the natives as they appeared to the English colonists in Maryland was written in 1663:

They are very proper tall men of person; swarthy by nature, but much more by art; painting themselves with colours in oyle, like a darke red, which they doe to keep the gnatts off. As for their faces they have other colours at times, as blew from the nose upward and red downward; somewhat contrariwise, in great varietie and in very gastly manner. They have no beards till they come to be very old, and therefore draw from each side of their mouthes lines to their eares to represent a beard. Their apparell generally is deere skyns and some furre, which they wear like loose mantels; and yet under this, about their middle, all women and men, at man's estayte, were rounde aprons of skyns, which keeps them decently covered, so that, without any offense to chast eyes, we may converse with them.

All the rest of their bodies are naked, and at times some of the youngest sort of both men and women have just nothing to cover them. The natural wit of this nation is very quick and will conceive a thing very readily. They excell in smell and taste and have far sharper sight than we. If these people were once Christians (as by some signs we have reason to think nothing hinders it but want of language), it would be a right virtuous and renowned nation.

How They Robbed the Marquis.

In the old range cattle boom days, when money from foreign lands was pouring into the west like water, there were a good many sharp tricks practiced in delivering cattle. It is recalled that the Marquis de Mores, who tried to cut such a conspicuous figure as a revolutionizer of the American meat trade, and who later became notorious as a duelist, was badly sold. While in Dakota he bought 10,000 head of cattle from two Englishmen. They were first class cattle and cost forty dollars a head. When these two Britons delivered the cows they worked one of the neatest "skin" games that was ever heard of. Medora, you know, sits in a valley, with table lands on each side.

Well, the Englishmen ran 5,000 head of cattle in on the marquis and collected for 10,000. The way they did it was by running the same 5,000 twice around the hill. De Mores never "tumbled" until he had paid his $400,000 and the merry cockneys were bound for South America. It was a clear steal of $200,000, but the marquis didn't make much bones about it. He had plenty of money and didn't care.—Chicago Drovers' Journal.

The Sensations of Battle.

A gentleman who was distinguished in the war of the rebellion for his personal bravery, and who fought in some of the most bloody battles, was recently asked just how it felt to be under fire.

"Shall I tell you just how a battle affects me?" he asked, smiling. "It is not elegant, but it is at least true."

"Yes," was the reply, "tell us exactly what it is like."

"I can only speak of my own feelings," the old soldier said, "but as far as the effect on me personally goes, a battle is like a champagne drunk."

"You mean that it is so exciting?" the questioner asked.

"I mean," was the reply, "that there is first an intense and glorious excitement, and that after that comes a most undignified, but inevitable nausea. I was never in battle in my life without being seasick afterward."—Boston Courier.

Great Men and Their Policies.

Suppose the Marquis of Salisbury or Mr. Gladstone were this night to become conscientiously convinced that the party of which he is the mouthpiece is the party of false doctrines, and had the courage to say so. What howls there would be from a hundred platforms! Does any one doubt that the men who deify today would crucify tomorrow? Each particular section of the British public likes to have its own particular piper, and it insists on calling the tune. Let the piper play a tune of his own, and there is a sudden change of pipers. —All the Year Round.

Bicycle Mail Delivery.

In an interview Postmaster General Wanamaker, in the Indianapolis Journal, says:

Free postal delivery in the rural districts is coming some time. The government does not give the farmer his share of the benefits of the mails. In another year, I think, the postoffice department will be self sustaining, and I think the time will then be ripe for the inauguration of the free delivery of mails in the rural districts. The plan, however, is feasible only where there are good roads, because it involves the use of bicycles. I am glad to know your state is beginning to show an interest in good roads.

It is quite possible, with roads passable at all seasons of the year, to operate the rural delivery system, and also collect the mails from the boxes placed along the road. There are some parts of rural districts near Philadelphia which might have the delivery now if there were money to equip such service. We are using bicycles in Washington with good success in deliveries as well as collections. It is entirely feasible and also proper to extend every advantage of our mail service to the farmers.

Breaking Up a Square.

A discussion seems to be going on as to whether an infantry square can be broken by a charge of men on foot or on horseback. To the nonmilitary mind this would seem impossible, provided that the square is properly formed. But I read the other day that the French in Dahomey cast melinite bombs into an intrenchment of the enemy, with the result that the assailants themselves had to fall back in order not to be destroyed by the suffocating fumes.

Is this a fact or an effort of the journalistic imagination? If the former, what is to prevent melinite being fired into any dense mass of men on a battlefield, whether in square or in any other formation, and emitting such fumes that the square would cease to exist? Admitting the truth of the statement, it seems to me likely to render war so exceedingly dangerous a pastime that few sane human beings will be willing to engage in it.—London Truth.

"Old Physics" Crawford.

General S. W. Crawford was called "Old Physics" because in the beginning of his military career he was a surgeon. He was with Major Anderson during the bombardment of Fort Sumter, and saved the life of Roger A. Pryor, of Virginia, who, while under a flag of truce inside the fort, unceremoniously picked up a glass of liquid from a table and drank it for a "whisky straight." It proved to be iodide of potassium, but "Old Physics" pumped him out and saved his life.—Washington Star.

Commercial Union Assurance Co. of London.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing for receiving pupils unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address, E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY, the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hallhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North-west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence Northwesterly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the Northwest quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

Sunday Schools, Fort and Lone Pine 10 a. m.; Independence, 2 p. m.

BORN.

WAY—At Bishop, Jan. 18, 1893, to Mr. and Mrs. R. Way, a son.

A trunk containing valuable jewelry and other things of value belonging to Mrs. Parker was burned up in the fire yesterday.

Mrs. L. Irwin got home on Wednesday evening from a visit to her friend Mrs. Gunn at Minnietta.

C. M. Persons and Charlie Collins left here this morning for Los Angeles. Mr. Persons had been at Warm Spring about two weeks. Both men expect to return here about ten days hence.

Opposition to building smelting works at Los Angeles was overcome and work is now progressing on the buildings. The success of this enterprise will bring nearer an opening from Inyo to Los Angeles by rail.

The body of ore lately struck by J. J. Gunn at Minnietta is turning out very well. Much of it is gray carbonate that goes away up in value per ton. May it continue till Jack becomes the biggest mining gun in the State.

The Assembly, by unanimous vote, passed the bill introduced by Assemblyman Mack making it a felony to sell liquor to Indians and common drunkards. There is no reason to doubt that the bill will pass the Senate, be signed by the Governor and become a law.

J. J. Gunn recently struck a good body of ore in his mine at Minnietta. Teams are now hauling the ore to Keeler. At last reports the mine was looking well. Selby & Co., at San Francisco, formerly got all the ore from Minnietta and other camps in the south end of the county, but now it is shipped to Oregon and the miners get better returns.

Last Monday rain fell all day and far into the night. Since then the weather has been like all the rest of the winter, that is to say, just perfect. The people of Inyo would not suffer much if they should wear nothing but fig leaves for garments this winter; their perfectly guileless character would not require even the leaves, except by way of ornament.

Assemblyman Owen has introduced a bill providing that no person engaged in agricultural, viticultural or pastoral pursuits shall be required to take out a license. This is an indirect attempt to abolish sheep license, no license is now required for engaging in agricultural or viticultural pursuits, therefore the bill could only apply to pastoral pursuits, that is, raising, grazing or pasturing sheep or cattle.

Just twenty years ago the editor of the Los Angeles *Herald* went by stage from that city to San Bernardino. That was then the only public conveyance between the two places, and the editor and one other passenger were the only travelers on the trip. A few days ago the same editor made inquiry and found that seventy trains a day now enter and leave Los Angeles, and all of them crowded with passengers. The growth of Southern California is wonderful.

Social Dance.

On the evening of Washington's Birthday a party will be given at the Pavilion. The play of "Caste" that was to be presented at that time will be postponed, owing to the sad accident by which Miss Lena Thompsen was disabled from appearing therein.

A Battle Opened.

P. H. Mack, as attorney for John Baxter and others, filed a complaint in the Superior Court last Friday against A. D. Gilbert and others in a water suit. The Court granted an injunction against the defendants prohibiting them from taking water claimed by the plaintiffs. This is the beginning of what promises to be a long and expensive law suit.

'Twas Ever So.

At the last meeting of the Board of Supervisors a petition was presented from settlers at Georges Creek, asking for a bridge across Owens river. It was signed by nearly every settler. The petition asks that the bridge be located "at or near the point where the road intersects the river on section line between sections 1 and 12, Township 14 S, R 35 E." Now certain of the signers of the petition repudiate their former action and ask that the bridge be located at a point three miles further down the river. Without entering into any argument on the subject the following considerations are offered:—The only reason for building the bridge at all is to give easy access to the railroad. The location for the new station is already determined, and this should determine the location of the bridge. The station will be at the Eclipse crossing, this is fixed and will not be altered. The place named in the petition for the bridge is the nearest and most direct route to the point on the railroad named. If the bridge should be put at the point asked for by the dissenters, it would not shorten their distance from the station. On the east side of the river they would have to travel three miles through deep sand to reach the station; on the west side of the river the distance is no greater, but the ground is hard and a good road is certain at all seasons. Supervisor Wilson earnestly desires to do all he can for the good of his constituents, and would gladly begin work on the bridge without further delay; but he will do nothing in the matter so long as the settlers are wrangling among themselves about a location.

A Bad Runaway.

Last Tuesday evening about 7 o'clock Miss Lena Thomsen was coming into town accompanied by C. Turner, a school teacher. The couple were riding in a cart, Miss Thomsen driving. When near the Baxter place, about a half mile north of town, they met Alex. McKendrick, who was going out on horseback. A white dog was running a little ahead of McKendrick, and when the horse Miss Thomsen was driving saw the dog he shied suddenly and turned short around. The cart tilted over and threw both the occupants out. Turner fell clear of the cart, but Miss Thomsen was caught in the wheel and was dragged some distance before getting loose. As quickly as he could get up Turner hastened after the runaway and found Miss Thomsen lying in the road moaning. He then hastened after help and a conveyance was sent and brought Miss Thomsen to Mairs' hotel in town. Dr. I. J. Woodin was called and found the left leg broken just below the calf. It was a bad break, the bone protruding nearly through the skin. The left ear was badly torn and several stitches were necessary. The Doctor promptly cared for the broken limb in the usual way; his patient was very restless all night but got easier toward morning. Miss Thomsen was studying a part in the play of "Caste" and was coming to rehearsal when this accident occurred; the presentation of the play will be postponed in consequence.

Fire!!

At noon yesterday the cry of "fire!" was heard and everybody rushed to the dwelling of James E. Parker on Market Street. A crowd of men worked hard to save the house, but in spite of all their efforts the fire got into the roof and the whole building was soon wrapped in flames. In the meantime everything movable had been taken out of the house and saved. In a short time the frame fell and only a heap of glowing coals remained. It was a good L shaped one story building. The loss is total, no insurance. It is not known how the fire started; Miss May Parker, the oldest daughter of Mr. Parker, says she was in the kitchen cooking dinner; a younger sister was in another part of the house; between the kitchen and another room was a closet, and there is where Miss Parker first noticed the fire. She gave instant alarm, but it was too late to save the building. Fortunately no wind was blowing, otherwise the damage would have been far greater. Sheriff Gorman, Frank Lawrence and many others did good service in preventing the fire from catching a barn on the same lot with the house; had the barn been burned the fire must have spread much farther.

A San Francisco Curio.

It is a strange fact that the silver-lead ores of Inyo county are sent to Oregon for reduction. The ore passes through San Francisco, being conveyed from there by water to its destination. And this, too, although the oldest and most extensive reduction works on the coast are at San Francisco. It cannot fail to strike anyone as curious that this ore should be carried so much farther, and be handled several times, and yet the miners get better returns than at San Francisco, but such is the fact. Perhaps there are other facts in connection with business at San Francisco just as curious as this; and another thought occurs here, namely, that if the business men of that city would give more time to study of business conditions and principles, and deal in a more liberal spirit, perhaps they would have less occasion to bewail their loss of business and less time to devote to that very unprofitable indulgence.

Bosh.

The story is still going the rounds about Jay Gould leaving a legacy of $25,000 and an annuity of $2,000 to his sister, Mrs. A. M. Hough at Los Angeles. The tale is made pathetic by telling about the poor old Methodist Preacher and his wife, and their humble home, so poor and yet so neat. Now the plain facts are that Mr. Hough was a Methodist Preacher, that he is a shrewd business man, and when the Los Angeles boom set in he was sharp enough to make a good deal of money, and for years past has been reckoned one of the solid men of the City. He was not spoiled by prosperity, however, nor cursed with hardness of heart, but has always been a liberal friend to poor churches and all worthy objects. But neither himself nor wife had the least need of any legacy.

Way's Say.

INYO INDEPENDENT:—In the last issue of the *Index* an article was published in reference to the stone now being delivered at the Court House for the building for county records. The stone is described as "tufa, volcanic ash or semi-bicarbonate of lime—in other words 'Bishop Creek rock.'" Now it is evident that the writer of the article is not an expert on rocks. This stone is ash in the same sense that granite was once mud, or that the hardest marble was once soft lime. It is not a semi-bicarbonate of lime; not more than a trace of lime can be found in it. Five years ago I put some of the stone into foundations at Bishop, in wet alkaline ground. The stone does not show any sign of softening yet. About the same time I put blocks of the stone into a ditch and ever since they have been covered with water. These blocks I have watched carefully and find that they get harder. But maybe the real reason why the *Index* casts a slur upon the "Bishop Creek rock" and says that "its duration in the ground is very doubtful" is that it was unable to force the Supervisors to select rock from another part of the County than Bishop. The Supervisors took time enough to consider carefully what was the best material to use in the building before deciding upon this rock. But the *Index* never missed an opportunity to give "a black eye" to anything from Bishop. But the surest way for the *Index* to hurt any cause is to be in favor of it.

Novel Colonization Concession.

A somewhat novel colonization scheme is in the hands of Gen. Herman Sturm. The concession provides that Mr. Sturm shall establish four colonies in different parts of the country, the government obliging itself to sell him for the purpose 250,600 hectares of surveyed public land in the states of Durango, Coahuila, Chihuahua, Oaxaca and Michoacan. The first colony, consisting of 200 persons of either sex, must be established within three years from the date of the promulgation of the concession. The colonists are to be selected preferably from among the residents of Mexican descent in the American states of California and Colorado, and the territories of New Mexico and Arizona.

The colonists will engage in stock raising (to which end the free importation of a limited number of head of stock for breeding purposes will be allowed), in the manufacture of barrels and coopers' goods generally, of beer, spirits and perfumery. But the most important feature of the scheme is the erection of a paper mill in the federal district and the agreement of the concessionaire to sell the paper manufactured there at a maximum price of $3.50 for common triple printing paper, $8.50 for superior printing paper suitable for books, and $10 for glazed paper. Another feature is the project for putting up a vegetable, fruit and fish canning establishment.—Mexican Financier.

Minister Daggett and Kalakaua.

Mr. Daggett bore himself in his official residence at Hawaii as if it had been his editorial room in Virginia City. I saw Mr. Daggett the other day. He had come down from his ranch at Vacaville to visit his former royal chum. Agricultural life agrees with the ex-journalist and diplomate. He used to be fat, but now he looks like a pugilist in training.

"Everybody," he said, "seems to be shocked at my leanness, just as you are. Judge Mesick was quite scared this morning. 'Daggett,' says he, 'it isn't natural for you to be without jowls and a paunch. It ain't exercise, but disease that's the matter with you. See a doctor. You're dying.'

"'Dying,' says I, 'I'm as strong as an ox. Let me show you. Give me something to raise—an anvil or anything,' and I bared my arm. 'Just let me raise something for you.'

"'All right,' says Mesick, 'go out and see if you can raise me $5,000.'"

I am told that when Mr. Daggett sent in his card to King Kalakaua at the Palace hotel, his majesty turned to Lord Chamberlain McFarlane, and said with a gesture of high command:

"Let him be admitted, and the drawbridge raised. Drop also the portcullis. We are at home to none else today."—Virginia (Nev.) Cor. San Francisco Chronicle.

Signs of Health.

You don't have to look twice to detect them—bright eyes, bright color, bright smiles, bright in every action.

Disease is overcome only when weak tissue is replaced by the healthy kind. Scott's Emulsion of cod liver oil effects cure by building up sound flesh. It is agreeable to taste and easy of assimilation.

An Aeronaut's Experience.

"I saw a balloon ascension and parachute drop down in Texas not so long ago," said Ed Reeder, a well known ball player now with one of the Southwestern league clubs, "that was very interesting. The balloonist Leroy made an aerial trip from a small town near Austin one day and was to make a parachute leap. When at an altitude of about 2,000 feet he suddenly recollected that his parachute was a brand new one and had never been tested. Not caring to risk the thing he attached a fifty pound sack of sand (ballast) to the parachute and cut it loose. As he feared, the thing failed to work right and did not open at all.

"The sand and parachute dropped like a streak to the earth, gaining momentum with every foot of their descent until they struck the wooden roof of a house below, crashing through it like through so much paper. The balloon soared aloft, and in due time, as the hot air gradually escaped, sank slowly to earth in the midst of a farm several miles from the town. The farm hands had observed its coming, and when it alighted seized upon the airship, which was a valuable oiled silk affair, and claimed it as the property of the owner of the land because it had landed there. The rights of Professor Leroy, who happened to have landed right with his property, were entirely ignored. But the captors were obdurate and finally the professor departed.

"He obtained a writ of replevin for his balloon from the nearest squire, and a constable shortly after restored the captured airship to its rightful owner. The hole in the roof of the building caused by the professor's sandbag and the damage consequent thereto had to be repaired and settled for at his expense. Had he taken the place of his sandbag at the parachute's handle the funeral expenses would have far exceeded the damage to the roof."—Cincinnati Times-Star.

Sulphurous Vapor in London.

No less an authority than the president of the Institute of Civil Engineers has declared that the sulphurous vapor produced during the combustion of coal is most beneficial to the inhabitants of London, disagreeable as it undoubtedly is.

As many as 350 tons of sulphur are thrown into the air in one winter's day, and the enormous amount of sulphurous acid generated from it deodorizes and disinfects the air, destroying disagreeable smells emanating from refuse heaps and sewers and killing the disease germs which find their way into the atmosphere.

There may be a good deal of truth in this view, but there is undoubtedly another side to the question. It is an old comparison that a doctor and his drugs bear a relationship to the patient and the disease like that of a policeman toward a householder attacked by a garroter. The policeman lays about with his truncheon; sometimes he hits the householder, sometimes the garroter, and the good or ill which results from his interference will depend upon which party happens to get the most and the heaviest blows.

This simile is admirably suited to sulphurous acid in London fogs, for although it may be beneficial to the London householders by destroying microbes it certainly frequently does them harm by attacking their lungs and bringing on bronchitis and asthma, which sometimes prove rapidly fatal, to say nothing of the minor discomforts of a disagreeable taste, filthy smell, stuffed nose, husky throat, smarting eyes and headache.—London Lancet.

A Difference of Opinion.

The "old man" was in his shirt sleeves, smoking a short pipe and trying to read a paper. The "old woman" was looking at herself in a broken mirror and giving every evidence of self satisfaction.

"Mike," she asked at last, "d'ye think I look like a leddy?"

"Not a bit," he replied shortly.

"Well, there's others thinks different," she replied. "I got a letter today from one o' them habit makers."

"You don't need any. You've got enough now."

"Well, I'm thankin heaven they're not as bad as yours, and there's none o' them swell people would look the likes of you up an send you a nice printed letter with pictures of yachting dresses an all like that. How'd ye think I'd look, Mike, in one o' them tailor made skirts?"

"No worse than ye do now. How'd ye get the letter?"

"In the mail."

"With your name in writin on the outside?"

"That's how it was. How'd ye s'pose they got the name?"

"I don't s'pose," he said, taking the pipe out of his mouth and straightening up. "I don't s'pose at all. I've been figurin what you did with the two dollars I gave you 'way back, an now, Mary Ann, I know you gave it to that fellie that was 'round here to put your name in the Blue Book, so's you could be in swell company an get circ'lars tellin you how you can get a middlin fair dress to wash windies in for $100. The next time I give you two dollars it'll be fifty cents."

THEY'RE GETTING ACQUAINTED.

Friendly Relations Between the United States and the Nations to the South.

Some years ago the boys of Dulwich college, a not widely known institution near London, sent a challenge for a cricket match to the Rugby students. They got this for an answer, "Eton we know, and Harrow we know, but who are ye?"

Until of late South and Central America have stood in a similar position to the United States. The big republic knew England and knew Europe, but had small knowledge of its nearer neighbors. Happily all that is being remedied now, and there is a widespread interest in the progress of these countries. Through a regularly established bureau the state department at Washington sends out bulletins of commercial and industrial happenings to the south, and among other things it is rather important to learn that efforts are now being made in Mexico and Nicaragua for the encouragement of the production of india rubber, or caucho as it is known in those countries.

In Nicaragua the government offers a premium of ten cents for each tree that has reached a stage of growth insuring its permanence, while in the state of Sinaloa, Mexico, a premium of $1,000 is awarded to any one setting out a plantation of 500 or more trees, and additional $500 and $300 for establishing a second and third plantation at a distance from each other of at least twenty leagues. Besides this Sinaloa provides that in assessing the taxes on lands no account shall be taken of the increased value arising from these improvements.

Advices from Chili are to the effect that the senate and house of deputies of that republic have been compelled to adjourn indefinitely because of the number of members who are ill from the grip. The epidemic is increasing all over the country.

The republic of Guatemala has established in its national school of fine arts a section devoted to the photogravure in which it is intended to introduce the modern appliances for the production of illustrations of a high grade. The government has also determined to undertake the publication of an illustrated periodical to be the means of extending a knowledge of the agricultural, mineral and other features of the country and to furnish views of its scenery, as well as to portray current events.

The Costa Rican minister of promotion has entered into a contract with Charles Berggren for the introduction of 100 colonists of a high order from Sweden, each colonist being required to bring with him a capital of at least $600 to engage in agricultural pursuits. The contractor is required to publish in Sweden a number of pamphlets describing the mineral and agricultural advantages of Costa Rica, and furthermore agrees to settle 500 hectares of the public unoccupied lands. The colonists will be allowed to introduce all their personal effects, and when the land is under cultivation the legal title will be duly conferred.

Another Costa Rican contract is with Richard Schutt for the construction of a railroad between Port Limon and the mouth of the Banana river, with the right to extend the line to the Estrella river, or connect the river by means of a canal. The road is to be built in a first class manner, with strong bridges, heavy rails, with at least one siding between the Banana river and Limon, and also one for every five miles of the extension of the road. If the connection of the Banana and Estrella rivers is made by means of a canal it is to be thirty-six feet wide and about five feet deep. The concession is for ninety-nine years, and several important privileges are granted, among them the right to take from along the line the necessary wood, stone, fuel and other material for the construction and maintenance of the road, the right to import free of duties the instruments, tools, etc., required for the construction, maintenance and repair of the road, and also exemption from export duties for articles carried on the road, should there be any imposed, and the right of working the natural products of the country on the borders of the Banana and Estrella rivers.

The Pitcairn Islanders.

The Slieve Roe, an English ship, which recently arrived in London from San Francisco, called on her passage home at Pitcairn island, which she sighted on Feb. 12. The captain gives an interesting report of a conversation he had with the chief, Mr. Adams, who pulled off to his ship in a boat manned by six men. The "chief man" of this handful of English speaking people, as is known, is elected for a year.

Captain McMullan states that they were eager to obtain ammunition, as they are all fond of sport. They also asked for matter to read and were particularly grateful for the religious publications he gave them. An American organette which the master of the Slieve Roe had on board was listened to by his visitors with appreciative astonishment, and the islanders hinted as openly as they could how acceptable such an instrument would be to them.

More than a hundred years have elapsed since, in 1789, the mutineers of the Bounty landed at Pitcairn and founded what is now a prosperous settlement. The land is fertile and furnishes abundance for the wants of the descendants of Captain Bligh's crew, and they live in happy ignorance of the struggle for wealth or existence which goes on in other parts of the world. Pitcairn island is indeed a bright spot in the Pacific ocean.

The Yosemite Valley.

For every hundred persons living west of the Mississippi river who have seen St. Peter's at Rome hardly ten, I think it may be safely said, have visited the Yosemite. Two small hotels in the valley are ample for all who may at any one time seek accommodations, and on an average two coaches a day during the season will carry all who seek conveyance to that place of grandeur. One thing is certain, the foreigner "doing" the United States seldom omits the Yosemite; yet many an American tourist traveling in California leaves the coast in ignorance of the wonders and beauties of the famous region. On a beautiful Sunday in May, out of sixty-five guests at the Stoneman house over forty-five were foreigners, most of them on a trip around the world; and that proportion is not unusual during the season. To the foreign tourist the Yosemite ranks with Niagara, and from those who have seen the wonders of nature on every continent the verdict seems to be that the Yosemite stands pre-eminent—the greatest of all.—New England Magazine.

Ostriches in California.

The successful importations of ostriches from southern Africa in 1882 and 1883 caused a great deal of alarm to the Cape Colony growers, and the provincial parliament imposed an export duty of $500 a head upon them. Notwithstanding this well nigh prohibitory tax, enterprising Americans have since brought over something like 100 birds, and those already here have done so well that it is only a question of time when semi-tropical California will supply this continent with its ostrich plumes.

Serpents together constitute one order of the class of reptiles, the other still existing members of that class constituting three other plainly distinct orders, namely, crocodiles, lizards, tortoises.

HER POSES WERE UNBECOMING.

Distinction Between a Contortion and an Attitude of Adoration.

The natural ruggedness of her face had been materially softened by the hand of art when she seated herself carefully in the photographer's chair and turned her eyes in the direction of the camera. Yet the most careful observer could not be deceived into thinking her beautiful.

"Madam, if you please, look"——

The artist was interrupted by a deprecatory wave of the hand.

"No directions, please. I know just how I want to sit. I have studied myself in many different poses, and I know what I am talking about."

She leaned forward in a careless way, rested her elbow on the table by her side, pressed one finger against her cheek, rolled her eyes until her glance rested upon the ceiling and sighed.

"There," she murmured in a soft ecstacy, "like that. An attitude of adoration, don't you know."

"But, madam"——

"Not a word. I know what I want."

The photographer merely wished to call attention to the distinction between a contortion and an attitude of adoration. He concluded, however, to remain silent.

"There is only one thing," the sitter explained, "upon which I wish to have your opinion."

The artist bowed.

"I can't really make up my mind whether a smile or a pensive look is the more becoming to me."

The artist would not willingly undertake to decide so delicate and intricate a problem without ample study. He essayed to look respectfully interested, but said nothing.

"Do I look better thus?"

She assumed an expression approximating in severity that of the Gorgon Medusa.

"Or thus?"

She stretched her face with a smile that would have caused the stoutest heart to quail.

"Which do you say?"

The artist thought of the delicate mechanism of his camera and groaned in spirit.

"My dear madam"——

She was listening eagerly.

"If you could manage"——

"Oh, yes; certainly."

"Er—between the two expressions it is difficult to decide"——

"Quite right."

"They are equally becoming."

She simpered a weak simulation of dissent.

"And if you could take little of each—a very little"——

She started in horror.

"And try something else"——

She was gone. She had scrambled into her wraps in a twinkling, made a few disjointed observations about being insulted and flitted away.

"A very little of each, to be sure," were the words which rang in the ears of the artist, and it seemed to him they came as in a dream.—Boston Gazette.

John Webster's Genius.

There is something in Webster that reminds me of Victor Hugo. There is the same confusion at times of what is big with what is great, the same fondness for the merely spectacular, the same insensibility to repulsive details, the same indifference to the probable or even to the natural, the same leaning toward the grotesque, the same love of effect at whatever cost, and there is also the same impressiveness of result. Whatever other effect Webster may produce upon us, he never leaves us indifferent. We may blame, we may criticise, as much as we will; we may say that all this ghastliness is only a trick of theatrical blue light; we shudder and admire nevertheless.

We may say he is melodramatic, that his figures are magic lantern pictures that waver and change shape with the curtain on which they are thrown; it matters not, he stirs us with an emotion deeper than any mere artifice could stir.—James Russell Lowell in Harper's.

Ancient Sports Among the Hebrews.

Pigeons as letter carriers tradition tells us were employed at the time when Joshua invaded Palestine as mediums of communication between headquarters and camps in lands far off on the other side of the Jordan. At the time of the Talmud they were used in amusing games. The Talmud tells us that betting was indulged in at the pigeon play. The owner of the pigeon which reached first the point designated was the winner.

Another play connected with betting was the "kubya." Kuby means a small pot (Arabic kubeia, small glass). The kubya was a little pot wherein dice were shaken and thrown upon the table. The dice were numbered as our modern ones are. Against these two games the Talmud was in arms, and their players were not allowed to appear as witnesses before the bar.—Boston Transcript.

Oranges in San Bernardino.

There are upward of 5,000,000 orange trees in seed bed in this county. This is over three times the number set out in orchard form in the county. But each year the demand for trees increases. At the present ratio of increase two years from now 1,000,000 will be planted annually in this county alone. As many trees are shipped into San Diego and other counties, and if all the trees now in seed bed should mature to a condition for planting, there will be but little danger of an overstock. But many of these trees will be killed by frost and from neglect and other causes.—San Bernardino (Cal.) Times.

A Curious Accident.

Mrs. Eliza Foster, 59 years, of this city, fractured a rib Wednesday afternoon while trying on a pair of boots at a shoe store. As Mrs. Foster was pulling one of the boots on her foot a crack was heard, and she complained of great pain. She was taken to the Episcopal hospital, and her condition is somewhat serious. Hers is the forty-fifth case of the kind known to the medical profession.—Philadelphia Press.

The Young King of Servia.

King Alexander is now 14 years of age, and is rapidly developing both physically and intellectually. He is only allowed to receive such visitors as are agreeable to the regents, as the following instance will show: The Metropolitan Michael attempted lately to intrude on the royal presence without having announced his intention to the regents. The consequence was that he was not received, and since that time he has not appeared at the konak. King Alexander will come of age on Aug. 2, 1894. He is now going through a course of military studies, and his present tutor is Col. Miskovic. The king is generally present at the ordinary military drills, when he is placed in command of a company. He is also in the habit of driving out to the park of Castle Toptshider, and on these drives he not infrequently passes his mother's carriage returning to town.

The queen drives herself. Her son, in the dress of a colonel, salutes her in military fashion, and the queen in recognition waves her hand. A little while ago, when King Milan was driving with his son, the two monarchs chanced to pass the queen, but on perceiving his ex-majesty she turned away her head, and the salute was not returned. King Alexander is in constant correspondence with his father, and writes either in Servian or French. These letters are not altogether without political significance. Queen Nathalie receives a large number of visitors, and her salons are the resort of politicians of all shades and parties. Occasionally she is present at the theatre, where she occupies the court box; but this only happens when it is known that King Alexander will not attend the play.—Galignani's Messenger.

Canada and Newfoundland.

When was the Dominion of Canada constituted? is not Newfoundland in it?

The Dominion was formed in 1867, and is composed of the provinces of Quebec, Ontario, Nova Scotia, Prince Edward's Island, New Brunswick, Manitoba, British Columbia, with certain territories and arctic islands. Newfoundland was invited to come in by the act of confederation, but she holds aloof, and remains an independent crown colony.—St. Louis Globe-Democrat.

Early to bed and early to rise; hustle all day and advertise.

THE HERCULES.

In placing the Hercules Gas or Gasoline Engine in the field in competition with other gas engines, we do so with the utmost confidence that we are "in it." Our system of operating this engine is so far ahead of all others that it needs but an introduction in any community to insure an immense sale. A woman can handle it. It requires no engineer. It can be started in an instant. No electric spark to get out of order. It oils itself. It beats all others. Write Palmer & Rey, 405-407 Sansome St., San Francisco for particulars. The price and capability will surprise you.

For Simplicity it Beats the World. It has Fewer Parts, and is therefore less likely to get out of order than any other Gas Engine now built.

Daily Newspaper and Job Office.

We have used your four horse-power "Hercules" Gas Engine for nearly two months now, and have not yet failed to get our edition off on time; on the contrary, we find it the best investment we could have made. For convenience it cannot be beat. Unlike the steam engine it is clean, no coal to shovel into a furnace, no fires to get up, no water to watch to keep the boiler from going through the roof—indeed it is simple and economical in all respects, and we feel that in changing from steam to gas we have secured a donation of $100 per year to the office, independent of all other considerations, and that means that $100 is the difference in the cost of fuel per year between steam-power and gas power. Thanking you for past favors, including the great service done by you in putting an engine like the "Hercules" on the market, we are,

Yours truly, PENNYCOOK & HARRIER,
VALLEJO CAL., Jan. 14, 1892,
Proprs. *Chronicle.*

BOTTLING SODA WATER.

NAPA SODA SPRINGS, Jan. 15, 1892.

Messrs. Palmer & Rey, 405-407 Sansom street, San Francisco, Cal.

GENTLEMEN:—I believe I have now given your Gasoline Engine a fair test, and am ready to say that it answers satisfactorily to all you claim for it. It is easily started, steady in action, sufficiently powerful, and cheap in cost of running. I use gasoline gas in running it. It has increased my output of soda water 1,000 dozen per day.

Yours truly,
JOHN P. JACKSON,
Propr. Napa Soda Springs.

Printers Pleased With It.

We beg leave to report to you on the success of one of your "Hercules" Gas Engines which is now in operation in our office. It is a one horse-power, and readily runs a large power press, and a jobber at the same time, and is then not working up to its full capacity. We have had no trouble whatever with the engine, and for neatnes, convenience and power we consider it the best in the field. We are delighted with it, and with the experience had with it, and can heartily recommend the "Hercules" Engine to anyone. Truly yours,

SUTTER PUBLISHING CO.
Per L. H. Woodworth.
YABA CITY, CAL., June 24, 1892.

It is generally hoped that the World's Fair will not be in any way eclipsed by the railway fare.

ONLY RIGHT TO TELL.

The Rev. Mark Guy Pearse, the eminent English Divine, writes:

"BEDFORD PLACE, RUSSELL SQUARE,
LONDON, December 10, 1888.

"I think it only right that I should tell you of how much use I find ALLCOCK'S POROUS PLASTERS in my family and among those to whom I have recommended them. I find them a very breastplate against colds and coughs."

An Irishman in this city has become so familiar with the English language he writes it without a brogue.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

What is that which you can find once in a minute, twice in a moment, but not once in a thousand years?—The letter M.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

A MAMMOTH COMPETITION.

$6,500 in prizes for the best seven stories was what *The Youth's Companion* offered: $5,000 for the best Serials, and $1,500 for the best Folk-lore tales. No less than 2,963 stories competed for these prizes. The successful stories are just announced to appear in *The Companion* during 1893.

By sending $1.75 at once you will obtain the paper FREE to January and for a full year, to January '94. Address THE YOUTH'S COMPANION, Boston, Mass.

"Did your wife say yes the first time you proposed to her, Mr. Henpeckt?" "Yes; she snapped at me at once, and she has been snapping at me ever since."

A HERALD OF THE INFANT YEAR.

Clip the last thirty years or more from the century, and the segment will represent the term of the unbounded popularity of Hostetter's Stomach Bitters. The opening of the year 1893 will be signalized by the appearance of a fresh Almanac of the Bitters, in which the uses, derivation and action of this world-famous medicine will be lucidly set forth. Everybody should read it. The calendar and astronomical calculations to be found in this brochure are always astonishingly accurate, and the statistics, illustrations, humor and other reading matter rich in interest and full of profit. The Hostetter Company, of Pittsburgh, Pa., publish it themselves. They employ more than sixty hands in the mechanical work, and more than eleven months in the year are consumed in its preparation. It can be obtained without cost of all druggists and country dealers, and is printed in English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish.

Maid Servant—Professor, oh, Professor! just think, I have swallowed a pin! Absent-minded Professor—Never mind; here is another one.

HOW'S THIS!

SOMEWHERE.

How can I cease to pray for thee? Somewhere
In God's great universe thou art to-day.
Can he not reach thee with his tender care?
Can he not hear me when for thee I pray?

What matters it to him who holds within
The hollow of his hand all worlds, all space,
That thou art done with earthly pain and sin?
Somewhere within his ken thou hast a place.

Somewhere thou livest and hast need of him;
Somewhere thy soul sees higher heights to climb;
And somewhere still, there may be valleys dim
That thou must pace to reach the hills sublime.

Then all the more, because thou canst not hear
Poor human words of blessing, will I pray,
O true, brave heart, God bless thee, wherese'er
In his great universe thou art today!

—Julia C. R. Dorr in Philadelphia Ledger.

How the Spider Builds.

Watch a common house spider spin its web. It seems to take pains, before beginning, to select a spot where there are chances of obtaining plunder and where it will be secure. It then discharges a little drop of glutinous fluid, and creeps up the wall, joining the thread from one wall to the other. The first thread thus formed is drawn tight and fixed at each end with other threads. It is upon this outer thread that the durability of the whole fabric depends. The web's foundation completed, the spider next makes a number of threads parallel to the first, and then crosses them with other threads, the sticky substance of which they are formed serving to bind them, when newly made, to each other.

It now commences to double and treble the threads that border its web, securing the edges as it does so. Lastly, it forms a kind of tunnel with webbing. This is to serve as a retreat where it can conceal itself from its enemies, and also from its prey, and is generally placed in the angle of the walls. When the spider's work is done it often happens that the approach of some large animal or the passage of the housemaid's broom will destroy in a minute the labor of days. In this case as soon as the danger is passed away the spider patiently begins to repair the web.

For this purpose the spider is provided with a store of the glutinous matter of which the web is made. When possible the spider prefers the mending business, as it is only provided with a limited quantity of glutinous matter, and when this is exhausted it probably cannot be renewed. —London Standard.

The Dissatisfied Salesman.

It is customary for the commercial travelers to visit the home office of the institutions they represent about the first of the year, and renew their old contract with their firm or make a new one. If they have done a successful year's business they are likely to call their employers' attention to the fact, and hint that an advance in salary would be the proper thing. If they are good salesmen, and their requests are moderate, their wishes are usually granted. A representative of a Chicago hardware house got a raise in salary the past week. When he suggested the propriety of such a step to his employer the latter remarked:

"Why, we gave you a big raise a year ago." "I know that," replied the young man, "and I want another now. I think I am worth to you all I am asking." "Do you, indeed?" responded his employer, and further remarked, "I'll tell you honestly what I think; that is that some men are never satisfied, and that you are one of that number." "True," said the traveler, "and I never intend to be. You will, sir, pardon me for saying if you had been satisfied with the $1,200 per year you originally received for doing the class of work I am performing you would not now be getting your $20,000 per year as partner in this concern." He got his raise. One of these days he will be a partner himself.—Chicago Herald.

A Word for the Scissors Man.

The exchange editors of the American press are the most vigilant in the world. They are keen and indefatigable in their hunt for bright and readable matter. No matter where good work is done—whether in New York city or in the fastnesses of Missouri—the exchange editor is bound to ferret it out and exploit it. These gentlemen are the promoters of intellectual merit; they are the best friends that our young newspaper writers have. They are intelligent, discriminating, appreciative, far searching and generous. Other departments in our system of journalism may have their equals elsewhere; but we repeat our exchange editors are unquestionably the best in the world. Long may they wave!—Chicago News.

Cutting Veneers by Electricity.

The cutting of veneers is now done by electricity. The veneering machine, instead of cutting or shaving around the entire circumference of the log, as usual, takes a thin slice from the flat side of it. The logs are of any diameter, and are cut into lengths of ten feet. The veneering cutting knife is fixed between two parallel shafts, and the log is carried up and down in front of it with a circular motion by revolving cranks, and is fed against the knife by a ratchet and pawl, in the ordinary manner.—New York Telegram.

When paper making machines were introduced, and the use of molds was abandoned, sheets came to be made of all dimensions. As a result quartos and octavos had all sorts of dimensions, and the terms, when used strictly to indicate how the sheet was folded, became worthless as designations of size. The use of the old terms was nevertheless not abandoned; but instead they were first used to indicate a rather wide range of sizes, and finally were attached to certain more definite sizes, without reference to the method of folding.

In these days of inventions and new ideas which multiply as rapidly as thoughts it isn't safe to ask without investigation why some one hasn't invented this or that, or at least tried to invent it. Just so sure as you do some one will pop up unexpectedly and prove that the thing has been done or is being done. It's pretty hard work to keep even with the times in these days.

In Japan the ordinary signs of a coming tremor are the screaming pheasants, the prancing of horses in their stalls, the retreat of the moles into their burrows, and the attempts of cats, dogs, guinea pigs, swine and other domestic animals to escape into the open country.

Attention is being given to lengthening the life of incandescent lamps. Discolored lamps can now be opened and cleaned without interfering with filaments or mountings. When the lamp is re-exhausted and sealed it is as durable as when new.

A bottle message from the ship Dunmore, dispatched when she was in 27 degs. north latitude, 25 degs. west longitude, on the northeast verge of the Sargasso sea, reached Cuba, a distance of 3,200 miles, in 497 days.

Topsy, the Cat Mother.

One of the blackest cats I ever saw was Topsy; and she was cute as she was black. When mice and rats were scarce around the house and in the barn in which she lived she had a novel way of letting people know that she was hungry.

First, she would find a piece of wood and carry it in her mouth to her mistress. After dropping it at her feet she usually made a pretense of eating it, and then mewed so piteously that food was soon forthcoming.

One day Topsy became the happy mother of five black kittens. They were born in a big empty feed box in the barn. Under her tender care they grew strong and thrived. Topsy's life was wrapped up in them. When they became large enough to partake of solid food she brought succulent wee mice for them to eat, and each kitten got one daily.

For ten days she pursued this practice, until people wondered where Topsy found so many tidbits for her darlings. Her fidelity to those little, black, animated bundles of fur was touching, and it was with a pang of regret that I learned one day that she had been robbed of her young. Singly and in pairs they were given away to admiring neighbors until none was left to receive the ministrations of the young mother. Still, with pathetic regularity she continued to catch mice and bring them to the big box. There she dropped them in, one at a time, until each of the absent kittens had been provided for.

Topsy never seemed to doubt that they would return. Finally somebody nailed the box cover down and Topsy could not get inside, but for some days she visited the spot and mewed most dismally. Then she seemed to become resigned to her loss, and once more became like her former self. —New York Herald.

Gold as a Tonic.

Dr. White, of the medical board of the Charity hospital, of New York, says that gold is an important element in Dr. Koch's lymph. Dr. White has for some time been using an injection containing this powerful inorganic agent, and he says he has been obtaining results similar to those claimed by the great Berlin professor. The statement will be readily credited. The mere possession of gold is a powerful tonic, acting directly on the nerves, the stomach, the heart, and the personal appearance.

Take any dilapidated specimen of humanity, diffident, cowardly, insignificant; let him come into possession of a considerable sum of gold, and note the change. The hangdog look disappears, the weak voice becomes stronger and clearer, the eye brighter, the carriage more erect and manly. 'Tis a wonderful tonic. Moreover, the possession of gold seems to make people more careful of their health to begin with.

Those plentifully supplied with it are quite apt not to overwork themselves; they recreate, travel and take exercise. People having gold also consult physicians more frequently than those who have it not. On the whole, if this inorganic element is as powerful a tonic when injected into the veins as when introduced into the pocket much good may be expected from any lymph containing it.—Chicago Herald.

The Reporter.

The weekly pay for reporting for city newspapers runs all the way from $10 to $60. And there is always a splendid chance for good reporters. To be a good reporter these qualifications are necessary: Health, the news instinct, a sense of humor, the ability to write a simple style in a legible hand, eternal vigilance, temperance, amiability, patience, determination and ambition. Then, furthermore, it behooves the reporter to be a constant student and reader, informing himself fully upon every variety of subject that interests mankind. For the profession of newspaper reporting we have the highest regard, and we find pleasure in this opportunity of saying that from the companionship of newspaper reporters we have derived incalculable profit, for of all classes and conditions of men (excepting perhaps the printer) the newspaper reporter seems to abound most liberally in wit, humor, invention, generosity, good nature, patience, pluck, fortitude and those other qualities and accomplishments which do so much toward brightening and bettering human life.—Chicago News.

A Stranger Present.

George Cary Eggleston, the well known journalist and author of this city, enjoys official eminence in the Authors' club, one of the best of all clubs to belong to. At a meeting of this club, when the buzz of talk was loudest, and the smell of tobacco smoked in long stemmed pipes was strongest, Mr. Eggleston suddenly rapped for order. "A singular thing has been found on the floor of this room," said he. "Nobody in the club seems to know what it is, but a stranger who is with us this evening says it is a ten dollar bill. If anybody in the room has at any time owned such a thing he may come forward and declare himself." It is not announced whether the object had a claimant or whether it blew in through the window.—Brooklyn Eagle.

Baby Eskimos.

The bed of the baby Eskimo is not always one of eiderdown. There are times of famine, now and then, when the condition of the ice makes hunting impossible, and old and young starve to death. Cases have been known on both shores of Baffin's Bay where babies have been eaten by starving adults, but infanticide in Greenland is unknown, because of a belief that the spirit of a murdered infant turns into an evil spirit called Angiak, that forever haunts the entire village and brings endless misery and distress.—John D. Spears in New York Evening Sun.

Lady Macdonald.

Lady Macdonald, wife of Sir John, is a brilliant woman, an experienced politician, and a fascinating hostess. She was a Miss Bernard, of Jamaica, but was educated in England. Sir John was made a baronet the same year in which he was married, and Lady Macdonald went from her quiet home to assume her difficult position in society, with great success. She is tall and majestic in appearance, brilliant in conversation, and greatly admired in Canadian social circles.—New York Ledger.

A Barber's Opinion on the Mustache.

Frequent shaving of a sickly mustache in order to coax it is, in my opinion, a waste of time. Just let it grow and trim it occasionally. Give the smaller and finer hairs a chance to attain some length, and the mustache will present a heavier appearance than can ever be attained by frequent shaving off.—Interview in St. Louis Globe-Democrat.

Why They Fought.

When the two famous historians, Thiers and Ranke, met in Vienna in October, 1870, the former asked, "With whom are the Germans now fighting, since the fall of the emperor?" "Against Louis XIV," answered the German scholar.—Studies in European History.

SILK CULTURE.

In America it Began With the Earliest Colonization.

LAWS TO PROMOTE THE INDUSTRY.

Cocoon Nurture, Conducted Upon a Small Scale as an Adjunct to Farm Work Should Prove Profitable.

If W. W. Cleaver, of Unadilla, who is reported as having 25,000 silkworms at work, can demonstrate the possibility of making $100 a month by silk culture on a small scale, he may bring on another craze like that of 1838. After nearly 300 years of experiment it is pretty well established that the silkworm may be made to thrive in this country and over quite three-fourths of its area; but in spite of this the silk manufacturing industry has grown to great proportions in the United States without material aid from growers of native silk, and the native product cuts no figure in the consumption of the mills.

The experiment of growing raw silk has gone on persistently almost since the day that the first permanent colonist set foot upon the continent. Cortez brought silkworms to Mexico in 1522, and James I tried to send eggs to Virginia in 1609, only two years after the settlement of Jamestown, but failed because of a shipwreck. Ten years later Virginians were urged to raise silk, and penal statutes were passed enjoining the industry upon the colonists.

Nearly every state in the Union has sought to encourage silk culture, and all sorts of societies have been formed to promote the industry. The victims of John Law's West India scheme were allured with the hope of successful silk culture in America. When Georgia was settled in 1732 grants of land were made, with the stipulation that for every ten acres 100 white mulberry trees should be planted. Georgia developed the industry to a greater degree than any other colony. The first shipment of Georgia silk to England was made in 1735. It weighed eight pounds.

A filature for reeling raw silk was established at Savannah in 1750, and in 1759 Georgia exported 10,000 pounds of silk to England. After that cotton came in, and being more profitable than silk drove the latter out, just as tobacco had driven it out in Virginia more than 100 years before. Some silk was raised in Georgia even during the Revolutionary war, and there was a small export trade as late as 1796.

For nearly 100 years there was a determined effort to grow silk in Connecticut. In 1819 five tons of raw silk were grown at Mansfield, and for several years the value of Connecticut's raw silk product exceeded $100,000 per year. President Stiles, of Yale college, grew silkworms and wrote a book on silk culture. During the last twenty-five years of the colonial period experiments in silk culture were made in Pennsylvania, New York, New Jersey and Maryland. The Revolutionary war, however, interrupted the experiments, and a plan of Benjamin Franklin's to build a filature for reeling silk in Philadelphia was given up.

The industry had so much decreased in 1786 that a newspaper of the day mentions as a remarkable fact that a family in Maryland had 2,000 silkworms at work. Now, an ounce of fertile eggs will produce nearly 40,000 worms. In 1790 there were fifty families in New Haven raising silkworms, and a local paper hoped it would soon be disreputable for a lady or gentleman to be found wearing thick silk not of native growth. A company in Rhode Island had 30,000 mulberry trees growing in 1835, and the legislature offered a bounty of fifty cents a pound on raw silk grown within the state. A newspaper declared that Rhode Island was likely to take the lead in the manufacture of silk as of cotton.

In 1840 so greatly had the industry grown that the United States exported 61,552 pounds of raw silk, and in 1844 nearly 400,000 pounds, but in 1850 the export was only 14,763 pounds. It was in the period between 1825 and 1850 that the great craze for silk raising seized the middle states. A company with the president of a learned society at its head was formed for the furtherance of the industry in Pennsylvania. A Frenchman came out from Lyons to teach the art of managing silk worms, and elaborate instructions were printed. The craze spread into Delaware and Maryland. It was urged that this industry could be carried on at home, and that it furnished easy and profitable work for women and children. In those days American women were more easily impressed with the glamour of royalty, and it was represented that royal ladies in all times had been deeply interested in silk culture. Hundreds of homes became the scene of the industry and dainty girls sedulously gathered mulberry leaves to feed those ravenous worms. Everybody was in a flutter of excitement at the prospect. Thousands of mulberry trees were planted, and some of them or their descendants still linger.

An almost fatal disaster, attended with curious manifestations, overtook the silk growers of Pennsylvania in 1838-9. It was represented that the Chinese or South Sea mulberry was in every way as suitable as the white mulberry to feed silkworms. Thereupon there began to be a great speculation in the Chinese mulberry. One nurseryman ordered 5,000,000 of the plants from France, and sent over $80,000 in gold to bind the bargain. Tiny twigs brought one and two dollars apiece, and were sold two or three times in rapid succession, each time at an advance. The speculation was like that which raged in the days of the tulip craze. Late in 1839 the collapse came, and in the spring of 1840 the Chinese mulberry sold at two and three cents each. While the speculation was at its height $300,000 changed hands for plants during one week in Philadelphia alone.

In 1844 many of the Chinese mulberry plants were killed by a severe frost, and even Connecticut was discouraged. It was then that the New England capitalists set about building mills and importing raw silk.

The hope of growing raw silk has persistently maintained a foothold in Philadelphia, and that city is the home of the Woman's Silk Culture association. Lorin Blodgett told the Franklin institute about ten years ago that there could be no doubt that it was possible to grow raw silk in this country at a moderate profit. He thought it must be done on a small scale as incident to other departments of farm work, and it must be left in large part to women and children.—New York Sun.

Blankets are loaned to the poor during the winter months, free of cost, by a kind hearted citizen of Brunswick, Germany. They are stamped, to prevent them from being sold or pawned, and they are returned at the close of the cold weather.

Feats of the Amazon Women.

The late king of Dahomey, Gelele, invited a missionary to witness a display given by the Amazons on the military parade ground to show their bravery.

About a hundred people were already assembled round the king, under a fine tent, when I arrived. The prince rose at once and came to meet me, and made me sit for a short time at his side. Then, taking my hand, he led me in person to examine the military preparations. In a place set apart for the maneuvers a rampart had been erected, not of earth, but of bundles of prickly thorns, 400 yards long by 18 feet broad and 6 feet high.

Forty paces beyond the rampart and parallel to it rose the framework of a building also 400 feet long, but 15 feet wide and 15 feet high. Its two sloping roofs were also covered with a dense layer of prickly shrubs. Fifteen feet beyond this strange building came a row of huts. The whole was in imitation of a fortified town, the storming of which would cost many lives.

The Amazons, with their bare feet, were to scale the rampart three times, descend into the empty space which stood for the fosse, climb up the building which represented a bristling citadel, and take the town counterfeited by the huts. Twice driven back by the enemy, they were at the third assault to be victorious, and as a proof of their success, to drag their prisoners with them and throw them at their monarch's feet. The first one to surmount all the obstacles was to receive the reward of her bravery from the king's own hands; "for," he said to me, "military prowess is, with us, the chief of virtues."

The missionary then proceeds to relate how these lion hearted women hurled themselves with incredible fury against the cactus rampart, surmounted it, leaped onto the thorn covered building, jumped down again as if thrust back by an opposing force, and returned three times to the charge, all with such precipitation that the eye could scarcely follow their movements. —Cor. Boston Transcript.

What Poets Earn.

It is popularly supposed that poetry does not pay. As a matter of fact the supply of verse is greatly in excess of the demand, and in very many cases poetry is not paid for at all. There are, of course, a few successful poets who make tolerably large incomes by their pen, but the number of minor poets whose books are brought out at a loss is considerable.

Even Tennyson had to wait for ten years before the public demanded a second edition of his first volume, and it was many years before the public took to Robert Browning's books, the author having, in the meantime, to bring them out at his own expense. Wordsworth declared that for nearly twenty years his poems had not paid for his shoestrings, and Mrs. Browning, after long experience, wrote, "In England no one lives by verse that lives."

Far and away the most successful poet, in a pecuniary sense, is Lord Tennyson, who is said to derive between £5,000 and £7,000 a year from his works. From Messrs. Moxon & Co., his first publishers, he received, on an average, £1,500 a year in royalties. Later, Messrs. Strahan & Co. paid him £5,000 for his works already in print, which were to be published on commission; and during the five years of the contract they paid him over £31,000. His next publishers were Messrs. King & Co., whose engagement was to pay £4,000 a year, with a separate account for new works. Now the laureate is in the hands of Messrs. Macmillan & Co., who are reported to have paid him £700 for his "Jubilee Ode."—London Tit-Bits.

New York Frenchmen.

The French quarter of this city shows one surprising peculiarity. It is this: At least three out of every five Frenchmen wear side whiskers. The general idea of a Frenchman, with most people who have not crossed the water is that he is a slim built, pale faced man, with a black waxed mustache and goatee or a pointed beard. A census of the French quarter will not produce half a dozen of the type. A large majority of the men are full faced, ruddy fellows, with the prevailing style, as I said above, of clean, close shaven faces excepting a little patch of bushy whiskers in front of each ear.

I asked the proprietor of a Bleecker street restaurant, who himself looks more like the comic paper pictures of beef eating John Bull than the accepted Jean Crapaud about this fact. To most people outside of France, he said, Paris stood for France, and the customs and characteristics of Paris were taken as representative of all France, which is far from being the truth. Most of the Frenchmen in New York come from the rural districts, with a sprinkling from the cities of southern France, and to one who knows can be readily distinguished from the dapper gentlemen who hail from gay Paris.—New York Star.

Virtues of Hoarhound.

The virtues of white hoarhound are set forth at leisure. "Boiled with iris root till the third part of the water is wasted, it is good for old coughs and raises phlegm, taken a spoonful when the cough comes on. Stamp—i. e., pound—the leaves with honey, and apply for agnails and swellings about the nails or joints. The juice cleareth the eyes and killeth worms in the ears," which was one of the minor plagues of Queen Elizabeth's time and before. "All kinds of hoarhound are good for women to bathe in that have weak back or pains in the legs. The distilled water is good against all scabs and wheales. For madness, stamp houseleek and roses, equal parts, with milk, and bind on the forehead and temples. Face swollen or scorched, rub it twice or thrice a day with the juice of houseleek. Juniper or the berries burned driveth away all venomous beasts," like mosquitoes, "and all infection and corruption of the air."—Shirley Dare's Letter.

Italian Occupations.

Wax matches, quite as good as the imported ones, are now made in large quantities by Italian immigrants in New York and Brooklyn. In New York the Italians also prepare macaroni, vermicelli, bologna and other sausages, and cream cheese. The trifling sum which they earn in boot blacking and by the sale of fruits and candies or by organ grinding seems very large in their eyes, and their poor friends at home are fascinated by what they hear of the riches to be had in America, and so emigrate in large numbers. One of the most prosperous restaurants on Union square is owned by an Italian who gained a small fortune with his hand organ and invested it profitably in this way.—New York Ledger.

What He Brought Home.

Mrs. Remsen—Can you leave me a little change this morning, James?

Mr. Remsen—No; I have adopted a motto you ladies taught me at the fair last night.

Mrs. Remsen—And what is that?

Mr. Remsen—Oh, you all said, "We don't give change;" and I think I can work that dodge too.—Munsey's Weekly.

LIFE IS CHEAP.

Occupations That Have a Tendency to Shorten the Lives of Toilers.

LEAD HAS SLAIN ITS THOUSANDS.

Dangers to Which Painters and Potters are Exposed.—Effect of Too Much Silver on a Person.

My lady delicately tracing embroidery upon fine linen knows nothing and cares less about the men who fashioned the needle she holds in her tapering fingers. But those men shortened their lives in the making of it. Perhaps by the infinitesimal fraction of a second for that particular needle, but when they they ground it and polished it they inhaled into their lungs the invisible particles of steel that flew from the whirring stone. Consumption is a very common disease among needle makers.

Human life is the cheapest thing on earth. "How many lives will it cost?" is a question that never enters into the calculation of architect, bridge builder, manufacturer—of any one who supplies the necessities of the world, forwards its progress or adds to its comforts. Human life is the one raw material of which the crop never fails, in producing which there are no strikes. And while there are a vast number of trades and manufactures in their very nature dangerous to life, you cannot induce the men who work at them to take up other occupations. Not even the offer of higher wages will tempt them, which goes to show that a man has as little regard for his own life as any one else has for it.

No need to mold lead into bullets to make it deadly. Workers of lead, house painters, artists, gilders, calico printers, typefounders and typesetters, shot founders, potters and braziers will tell you that. So will the workmen who handle vulcanized rubber, those who wrap goods in tinfoil, even the fishmongers who handle lead counters covered with brine. Lead poisoning, next to alcoholic poisoning, is perhaps the commonest toxic condition. "Lead colic" is almost as prevalent as that other colic that rouses the happy father and sets him to pacing the floor with his squalling son and heir.

When a man suffers with chronic lead poisoning his digestion is disturbed. He has no appetite, and his skin usually takes on a peculiar yellow hue. His gums show a characteristic blue line, which is sulphide of lead deposited there. He has pains in his joints and ofttimes paralysis. His paralysis usually affects the extensor muscles of the hands and fingers, and so produces what is popularly called "drop wrist." Once in a while lead poisoning affects the brain. A case is recorded where a painter suffering from it thought he saw "windbags blown up to look like men," and other apparitions which made remarks to him and caused him a great deal of anxiety. With all due deference to the medical faculty, it would seem doubtful whether talk about "wind bags blown up to look like men" should be taken as an evidence of insanity. There surely are such things in real life.

Workmen employed at extracting gold from its ores, those who silver mirrors, makers of barometers and thermometers have of course to live in an atmosphere more or less impregnated with mercury. So do those who etch, who color the finer sorts of wool and who take part in the manufacture of felt hats. In these latter occupations the mercury is in the form of its nitrate. Mercury is the delight of every dentist whose heart is really in his work. Too much of it salivates a man and makes his teeth drop out, so that a mirror silverer is extremely apt to go mumbling, toothless, through life like a "lean and slippered pantaloon."

Photographers, makers of hair dyes and of marking ink handle a great deal of silver. That lot might seem to be very enviable, but in those cases the silver is the nitrate or one of its various other compounds. It is extremely liable to change the color of the man who handles it, particularly that much of him as is exposed to the light. First his nails and fingers, then his hands and face turn from white to grayish blue and then to black.

Copper is another metal that is mighty dangerous to handle habitually. It breaks down the health of those who work in it. Copper enters into the composition of any number of alloys, into the common bronzing processes, into the lilac and purple fibers of the pyrotechnist and into many pigments. A green line appears on the gums of the unfortunate poisoned by copper. So that if one has a desire to ornament his gums he has at least the choice of his colors—blue with lead, green with copper. Antimony is another health destroyer, at least so far as men are concerned. "Kermes mineral" contains antimonious acid. It is used in vulcanizing rubber. Typefounders are also exposed to the deleterious effects of antimony.

But however unhealthfully antimony acts on men there has long prevailed an idea, the truth of which is doubtful, that antimony given to animals improves their condition. Says an old author: "A horse that is lean and scrubby, and not to be fatted by any means, will become fat on taking a dose of antimony for two months together. A boar fed for bacon, and having an ounce of antimony given him every morning, will become fat a fortnight sooner than others put into the sty at the same time and fed in the same manner, but without the antimony."

It is an undoubted fact that in Brunswick the breeders of fat geese add a small quantity of antimony to the geese's food as a traditional custom.—New York World.

Formerly the greater part of Irish butter was packed into firkins, but the farmers are now turning their attention to making butter suitable for preserving in tins.

HUNTERS OF HUMAN HEADS.

Cannibalism Still Prevails Among Natives of the Solomon Islands.

Among the passengers that arrived by the steamer Mariposa Saturday was a gentleman named Watson. Mr. Watson has been for many years engaged in trading among the South Sea islands for copra, pearl shells and other commodities. He told some strange stories to a reporter about head hunting and cannibalism that still prevail in the Solomon islands:

"I first went to the Solomon group as a trader for a Sydney firm, and having filled the positions of storekeeper and land owner for seven years, know these natives well. My first visit was to the island of Lango. Soon after we anchored some natives came off and warned us that the people on shore wanted to kill the first white man they could. Upon being questioned they stated that some years ago a trader had been killed by them, and a man-of-war had appeared, exacting a heavy fine of pigs and other things. The war vessel had been piloted by a white man, and the natives had resolved to kill the pilot, and failing to kill him they intended to take the life of the first white man on whom they could lay their hands. I found out that the natives were well armed and left the place.

"At the island of Rubiana similar conditions prevail. While we were at Bambattan we had a narrow escape. Among the natives who came on board were two chiefs. They finished trading, and I noticed that they kept close to the rudder trunk of the vessel. I discovered a canoe under the stern with natives passing up axes, and as there were over seventy natives on board the ship they fully intended to capture us.

"Our crew soon got out their arms, and the scoundrels seeing that we were determined left the vessel. Treachery is rife, and no white man's life is safe among them, their utmost desire being to secure heads. On Bagga island they killed, roasted and ate a man named Childe, who lived there. I think he was a runaway from some American whaler, and had lived on the island for over twenty years."

At Bametta Mr. Watson was present when the captain of the war ship Diamond visited the islands. Six persons landed, and there were over fifty natives in ambush, all armed with guns, ready to massacre the white men if the opportunity offered.

Relative to the practice of head hunting he stated that the natives go from island to island in search for the prizes, watching their chances. The heads are used at the death of a chief or at a canoe launching. As many as five heads planted around the grave of a chief is supposed to appease the evil spirit that caused the death, while at a canoe launching the measure of luck that is in store for the craft is according to the number of heads that adorn the vessel as it enters the water.

Mr. Watson is of the opinion that no one ought to land on these islands without being armed. The custom of the British warships to destroy villages, blow up canoes and fire shells over the houses is of no use, as it only embitters the natives against the whites.—San Francisco Chronicle.

Disagreeable for Hawk and Mouse.

A sportsman was returning from quail shooting, when he perceived a sparrow hawk poise in the air a short distance from him and then dart fiercely down into the grass. In a moment the bird flew upward with something in its talons and uttering cries in which acute pain and the fierce joy of victory seemed somewhat queerly blended. It kept screaming and pecking at a small object in its claws.

The sportsman brought his gun to his shoulder and killed the bird. The bird had driven its claws into the back of a mouse, perforating the skin, passing beneath two ribs of the little animal and piercing the skin again in such a manner that it could not turn its catch loose. The tortured mouse on his part had seized one leg of the bird in his mouth and buried his teeth into it just above the joint in the leg, cutting the bone entirely in two. Both mouse and bird had been killed outright by the human animal of prey, the mouse having received a shot in the side and the bird one in the head.—Waco Day.

Esquimau Children are Not Whipped.

When one notes the vigor and enthusiasm of the Esquimau little folks at their play the statement that they are never punished by their parents seems almost incredible. Such a superabundance of animal spirits as they display would straightway get a white boy across his mother's knee, while an avenging shingle or slipper fanned the air and the boy. But Esquimau small boys are never sent out after a willow switch to torture them; neither are they scolded or reviled by their parents until of almost mature years. On the other hand, the Esquimau baby, from the moment it understands its mother's voice, yields unquestioning obedience to all its parents' commands.—John D. Spears in New York Evening Sun.

The Small Eel.

When the water becomes warm in the spring, myriads of embryo eels appear. The water swarms with them. They are not much larger than darning needles, contain almost no solid matter, only a faint thread in a filament of jelly, but are tremendously active. Before the discovery of the utility of the clam worm as smelt bait, eel was thought to be the only article that smelts would eat in the winter. It has the merit of being tough. A small fragment of eel fastened upon a hook and soaked in water swells like a dried apple and becomes a tough, white lump.—G. W. Singer in Lewiston Journal.

A Dog's Teeth Filled with Gold.

A traveling dentist that now and then visits Birmingham has a pet dog whose decayed front teeth are filled with gold. The dog had the toothache some time ago, and his master, after examining the decayed teeth, filed out the cavities very neatly and put several dollars' worth of gold into them. The dog kicked vigorously against the operation and howled too, but some one held him in the chair, and the dentist performed the job successfully. When the dog grins the gold filling gleams beautifully.—Cor. New York Sun.

Source of the Mississippi.

A correspondent asks, Has the disputed question as to the exact source of the Mississippi river ever been settled?

The source has been "officially" placed by the Minnesota Historical society, we believe, at two small lakes west of Itaska lake, and on higher ground than that sheet of water.—St. Louis Globe-Democrat.

Why They Lost Caste.

"Upon what do you base your assertion that the Heslingburys are not people of refinement?"

"Why, we have just engaged a waitress highly recommended by them, and she actually sets the table with teaspoons for the peas."—Harper's Bazar.

AN AWFUL STORM.

The Vain Efforts of a Shipwrecked Crew to Reach Land.

BATTLING FOR LIFE IN THE WAVES.

Three Men Drowned on the Rocky Rhode Island Shore When Within Ten Feet of Terra Firma.

William H. Burns, an eye witness of the wrecking of the three masted schooner A. H. Hurlburt, of Gloucester, tells a thrilling story of the battle of the vessel's crew for life. She was trying to make Newport for a harbor, but, being unable to accomplish this, dropped anchor at noon about a quarter of a mile off shore. She dragged her anchors and struck Black Point about 4 o'clock, and in twenty minutes was kindling wood. The crew consisted of six men. Three were drowned, including the captain, and three were saved. Every man of them was on the rocks at one time, and the captain and steward were swept away when but five feet from shore. It was an awful struggle for life between these six men and the merciless waters. Burns tells the story thus:

Black Point, where the vessel struck, is three miles south of the Casino. It is a mass of rock which juts boldly from the shore, but descends into a sharp pointed reef with jagged protruding edges at its farther point. It is not one solid body, for the action of the waves has worn wide and deep crevices in it, where the water forms in pools. On the north side it forms a sort of cove, where the sea in a gale has full sweep.

I have charge of the cottage of S. S. Rogers, of Buffalo, where I live with my family, and which is about a quarter of a mile from Black Point on the bluff. I was informed about twenty minutes to 4 by Sam Kissouth, who lives near by, that a schooner was going on the point. He immediately rushed out, and was on the bluff about fifty yards from the rocks when the schooner, drifting broadside on, struck. The wind was blowing sixty miles an hour and the sleet and hail cut into the face like needles.

I was quickly on the shore. The vessel was scarcely 100 feet away, and was right on top of the sharp rocks, which were exposed by each receding wave. The men were plainly visible, huddled together, hanging on to the house at the stern of the schooner. At five minutes to 4 fifteen minutes after she struck, the mizzenmast toppled over with a crash that was heard above the other noises, and the mainmast and the foremast quickly followed. As the foremast went over the side the vessel split in the middle, and the cakes of ice with which she was loaded came pouring out.

As the vessel parted the men jumped for the rocks. They all landed. Young Lawrence, a mere boy, only 18 years old, was the last to jump. He never reached the shore. The mate, John Rooney, as quickly as he could, threw off his boots and overcoat. His forethought saved his life. The captain, the mate and the steward, Frank Hammond, kept together. While Bernard Webers and another seaman named Kuna tried to work their way over toward the south end of the reef, the others went straight ahead and more toward the north side, where the sea had full sweep.

I had run down to the shore while Kissouth had gone after another man named Rowley. When they got to the scene the vessel was in pieces and the men struggling for their lives. I stationed myself toward the south side, and beckoned and gesticulated for the men to come that way. I yelled also, but I could hardly hear my own voice. The group of three and the young sailor, however, kept right on. The sea was dashing over the rocks with terrific force, every wave completely submerging them. The holes and crevices were filled with water, and through these the men waded or swam, clinging to the rockweed or the slippery rocks as each wave struck them.

Young Lawrence had scarcely covered twenty-five feet of the distance when a wave struck him and he disappeared. He was the last to leave the vessel and the first to drown. Kissouth and Rowley had now arrived, and Webers and Lund, who had crawled and swam in, were hauled ashore, while I ran over to the other side, toward which the captain, mate and steward were struggling. The mate had caught hold of a cake of ice and was endeavoring to keep afloat on it, but soon let go.

It was only five minutes since they had left the ship, but it seemed an age to the men on shore who were watching the brave struggles of the unfortunate sailors. Inch by inch they fought their way along the treacherous, slippery rocks, holding on for their lives in the crevices and by the weeds when the big breakers dashed over them. As the waves receded I would rush down the slippery rock on which I stood in the vain hope that they would get near enough for me to seize them. The minutes seemed like hours, but still the men held on.

Now they are within ten feet, but another wave breaks over them. If I had had a ten foot rope I would have saved them all. The suspense was awful as the men, with their drawn faces and shut teeth, held on and looked toward the refuge so near them. Now the wave goes back. A strong effort and they are safe. They press forward; are almost there, only five feet more, when a monster roller bigger than the others strikes them. It tears their weak grasp from the rocks and buries them out of sight. All but Rooney. He, divested of his coat and boots, has a better chance than the others, and as the waves go back he lies struggling almost at my feet. It is but the work of a moment to seize him and drag him safely on the rock.

The others were washed up on the shingle amid the driftwood of the vessel the next day. The steward's body was entirely stripped of clothing, his skull smashed in and his scalp torn off.—

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, FEBRUARY 10..... 1893.

Los Angeles has the bad distinction of sending to the State Senate a man who is aiding to the utmost of his ability the railroads to retain the millions of dollars of taxes they owe the State. Carpenter was a noted carpet bag politician in South Carolina, when carpet bag politicians were about on a par with Black Bart and other noted stage robbers in our own State. When honorable men again got control of public affairs in the south Carpenter's occupation was gone. But wherever great corruption thrives there is always use for such men as the Senator from Los Angeles; he came to California, and his character being known he was at once taken up by the railroad people and sent to the Legislature.

It is a little irritating, though very amusing, the way that talk goes in Europe about the Sandwich Islands. If the people of the Islands want an annexation to the United States that is their own business; and if we decide to accept them we'll do it regardless of all the bluster in Europe When a treacherous proposal was made by England to "mediate" between the North and South in our own "unpleasantness," Secretary Seward asked the opinion of Zach Chandler about what answer should be made to the proposal. Stout old Zach replied, "Seward, tell them to go to hell; of course you need not use those exact words; but just let them understand that is what we mean." We mean precisely the same thing now.

The best—in fact the only—bill ever offered in Congress that would protect the farmers in the Sacramento valley from injury by hydraulic mining in the mountains, and yet would allow the mines to be worked, is the one introduced by Mr. Caminetti. The bill was passed in the House and would certainly have passed the Senate; but just as this became certain the farmers succeeded in having an unreasonable amendment tacked on to the bill and now the whole thing may fail. The miners gave the farmers the best market they ever had; to many of them the stoppage of mining brought ruin, and now when there was a good prospect of restored prosperity, by their own unreasonableness they are likely to prevent it.

The Cruelty of War.

An incident related in the biography of Sir Provo Wallis, admiral of the British fleet, brings home to the reader the cruel nature of war. It occurred during the war of 1812. An American captain had taken a fine ship to Lisbon, where she had sold her cargo for the use of the British army under Wellington, and received several thousands of dollars in return, which were on board.

Meantime war had been declared, and on her homeward voyage she fell a victim to the British squadron. One of the principal objects of her captors was to obtain information. The American captain was sent on board the Shannon—which afterward captured the famous Chesapeake—but was kept in ignorance of the war and of the fact that he was a prisoner.

He answered unreservedly all the questions put to him, and Captain Broke, who greatly disliked the deception he had been obliged to practice, now felt it difficult to make the prisoner acquainted with the next step which must be taken. At length he forced himself to say:

"Captain, I must burn your ship."

The American, overcome by surprise, faltered, "Burn her?"

"Indeed I must."

"Burn her for what? Will not money save her? She is all my own—and all the property I have in the world. Is it war, then?"

"Yes," said Broke.

Both parties were painfully moved, and the scene did not end without a tear from each, but duty was duty, and the prize was destroyed.—Youth's Companion.

A Feat in Writing.

John J. Taylor, of Streator, Ills., once wrote 4,100 words on the blank side of a postal card. This was sent to a Chicago paper, which heralded the story to the world as being the most wonderful piece of penwork ever executed. As a matter of fact Mr. Taylor's effort has been discounted on several occasions. Beedle, the penman of Ottery St. Mary, Liverpool, once wrote the following pieces entire, without the slightest abbreviation, all upon a piece of cardboard 3½ by 3½ inches in size: Goldsmith's "Traveler," "The Deserted Village," "Essay on Education," "Distress of a Disabled Soldier," "The Tale of Azim," "Justice," "Generosity," "Irresolution of Youth," "Frailty of Man," "Friendship" and the "Genius of Love."

In the center of the card there was a perfect picture of Ottery church, all of the shades and lines being formed of parts of the writing. As a kind of talepiece he added the anthem of "God Save the Queen," embellished it with seventy-two stars, fifty-one crescents and nineteen crosses, finishing the whole by drawing a picture of a serpent which inclosed the whole of the miraculous production. If you wish to ascertain exactly how much Beedle's effort exceeded that of Mr. Taylor, count the words in the Goldsmith pieces catalogued above.—St. Louis Republic.

DEATH'S SENSATIONS.

A MAN WHO PRACTICALLY DIED THREE TIMES IN ONE YEAR.

Personal Experiences with Death Go to Show That the Moment of Final Dissolution Is Absolutely Painless and Without Fear of Future Life.

Although neither a physician nor a clergyman I wish to corroborate the views of the physicians contradicting Rev. Dr. Epworth under the heading, "What Is Death?" in your Sunday issue.

As a Federal soldier, May 31, 1862, I was one of those who fought against the surprise of General Johnston, at the time commander of the Confederate army, at Fair Oaks. The surprise was made at noontime, while our boys were eating lunch. I remember one soldier being struck in a vital part and killed while leaning upright against a tree in the act of carrying a flapjack to his mouth, remaining after death in precisely the same position. When I saw him standing there I mistook him for a live man, especially as he seemed to me intent only on eating his flapjack, but the illusion was dispelled when touching him, because as an officer I wanted him to join his comrades.

My own personal experience in the matter confirms the physicians' also. The 30th of April, 1886, a fire was raging in my factory in San Francisco. By some means I was about 150 feet from the main entrance in the burning building when, to my dismay, I beheld the five story wall topple over me through a skylight. Passively I lowered my head, thinking only of my coming death and wishing it would be swift. In less than a second thousands of bricks fell on me, sounding like a big drumstick beating on a big bass drum. I remember a crash, then nothing, but when I came to my senses I was wedged in between heavy timbers, the upper part of my body only being free.

About a dozen steps back of me was a stranger to me who had not received a scratch, but ascertaining that my leg was broken, and also my utter inability to save myself, he crawled over to me and attempted to pull me out of my terrible situation. But all his efforts only increased my suffering, and as I saw the flames come up I entreated him to leave me to my fate and try to save himself. Finally he crawled away, promising, however, to return with help and axes. I must have been bewildered, for no act of my past life came to my memory, but suddenly thinking of my small, motherless children I shouted for help, whistling at intervals through my fingers.

Some firemen must have heard, for presently there were several streams of water poured on me. I then realized my danger, yet I, who had never gone into a battle without a pang, felt none whatever while in that deathtrap. The water and smoke combined must have asphyxiated me, for when my stranger returned leading a brave party of firemen and policemen I laid as one dead. Believing me dead, and being in a very dangerous position, they cut away part of the timbers and rudely but safely passed me over the debris in the street. A deafening shout from an immense throng which had witnessed the gallant rescue, streams of cold water and fresh air revived me, and I begged of them to be careful with my limbs, which were dangling from my body.

After many weeks of suffering the physicians decided to break my leg again, but being unable to do it well while I had my senses they decided to chloroform me. Being subject to heart disease I objected, but the matter being urgent I finally consented to take the anaesthetic. Fully convinced, however, that I should die under its influence, but knowing that either way I would have to die, I agreed to take the only chance of life I had and laid myself resignedly on my back; yet, although convinced that my last hour had come, I had not the slightest recollection of my former deeds. As I heard the physicians' whispers gradually lost in the distance I was only wondering what would come next.

I recovered, however; but, breaking my leg a third time on account of some adhesions in my knee, it was decided that I should undergo another operation, which necessitated the use of anaesthetics again. This time the physicians thought I was a goner sure, for it took them nearly two hours to revive me; yet, although certain of my last hour, I could not recall my past life, and in neither case did I fear death when I had squarely to face it.

In each instance the passing away was painless, while in the fire suffocation came almost unconsciously, while almost the same sensation came in the other cases. In the case of the soldier at Fair Oaks (Seven Pines) a certain time must have elapsed between his decease and my notice of him, yet heaven or hades did not seem to bother him; his flapjack seemed to be what he wanted—his eyes were on it and his mouth was open ready to receive it. In my own case I could claim to have died three times within a year, yet I do not think I had any other but a sensation of rest.

Dr. Epworth, in his assertion also that either a look of horror or beatitude overspreads a deceased person's face, seems to forget that the Scriptures teach us that the soul leaves our terrestrial envelope at once on dissolution; hence the body cannot show what reception the soul had on the other side of the Styx.—An Interested Reader in New York Press.

Louis Philippe and the Queen.

Louis Philippe and Queen Victoria were once walking in the garden at Eu, when he offered her a peach. The queen seemed rather embarrassed how to skin it, when Louis Philippe took a large claspknife from his pocket. "When a man has been a poor devil like myself," he said, "obliged to live on forty sous a day, he always carries a knife. I might have dispensed with it for the last few years. Still I do not wish to lose the habit; one does not know what may happen."—San Francisco Argonaut.

TITLES OF ENGLISH WOMEN.

Distinctions That May Seem Rather Complicated to an American.

It is little wonder that foreigners bungle over our titles as they do, when in our own public speeches and newspapers it is often made plain that many do not understand how to use English titles.

For instance, a marquis' daughter who married a man without a title keeps the title of "lady" and her own Christian name and adds to these the husband's surname.

Thus, when Lady Evelyn Fitzmaurice, the daughter of the Marquis of Lansdowne, married Mr. Victor Cavendish she became Lady Evelyn Cavendish but the London dailies spoke of "Lady Victor Cavendish's going away dress."

The only case in which a lady of title is called by her husband's Christian name as well as his surname is in the case of the wives of the younger sons of dukes and marquises.

These men bear courtesy titles of "lord" before their Christian names and surnames, as Lord George Hamilton, Lord Charles Beresford, and so on, and the only correct way of addressing or speaking of their wives is the same way, putting "lady" in the place of "lord."

To call the wives of younger sons Lady Hamilton, Lady Beresford, or whatever is the surname, without the male Christian name, is as incorrect as to call Lady Evelyn Cavendish by her husband's full name.

On the other hand, the wife of a baronet or of a knight is "lady," with his surname alone after it.

Confusion grows in many minds from the fact that any peeress (under the rank of a duchess) is also spoken of, and to, by her equals as merely "Lady So-and-so"—the name added, however, not being the family name, but the title of the husband.

Thus no equal would say, "I saw the Marchioness of Salisbury" or "There is the Countess of Lathom," it would be Lady Salisbury and Lady Lathom.

A duchess, the highest rank in the peerage, is the only peeress who escapes this equality of title in the everyday language of her equals in society. She is never called "lady" only, but is spoken of as "the Duchess of So-and-so" in full always, and is addressed in conversation by her friends as "duchess," the name of the peerage not added.

Moreover, every other lady of title, from a knight's wife (which is not a real title), right away up to a marchioness, is equally "my lady" to her social inferiors.

Sir John Smith's wife is Lady Smith. The wife of Lord John Smith, who is a peer's younger son, is Lady John Smith, and if you know her on terms of equality you may call her Lady John, but never Lady Smith. Lady Mary, daughter of either the earl or the marquis, or the duke of somewhere, and the wife of Mr. John Smith, is Lady Mary Smith; call her Lady Mary if she seems friendly, but not Lady Smith or Lady John Smith.

The wife of Lord Smith, or the earl or the marquis of Smithville, you may call Lady Smith or Lady Smithville, as the case may be, but if Smithville is a duke on no account call his wife Lady Smithville.

If you think that she will not snub you as too familiar, you may call her simply "duchess." You may say, "Duchess, may I get you some tea?" for example. But till you know her well, or feel on quite friendly terms, it had better be, "Will your grace take a cup of tea?"

Finally, the oddest thing of all, if fate should make you acquainted with a prince or princess of the blood royal, you will seem very second rate if you keep saying, "your royal highness."

You must say "sir" and "ma'am." Not, if you please, "madam," but "ma'am," as your housemaid says to your own meek better half, Mrs. Smith. Even a duchess calls a princess "ma'am."—London Letter.

Intermarriage in Eurasia.

There is no remote chance of Eurasia ever being reabsorbed by either of its original elements; the prejudices of both Europeans and natives are far too vigorous to permit of much intermarriage with a people who are neither one nor the other. Occasionally an up country planter, predestined to a remote and "jungly" existence, comes down to Calcutta and draws his bride from the upper circles of Eurasia—this not so often now as formerly. Occasionally, too, a young shopman with the red of Scotland fresh in his cheeks is carried off by his landlady's daughter, while Tommy Atkins falls a comparatively easy prey.

The sight of a native with a half caste wife is much rarer, for there Eurasian as well as native antipathy comes into operation. The whole conscious inclination of Eurasian life, in habits, taste, religion and most of all in ambition, is toward the European and away from the native standards.—Sara J. Duncan in Popular Science Monthly.

Virus and Venom.

The difference between venom and a virus is very marked. Both are poisons, and both of organic origin, but a venom is produced in secreting organs, commonly called poison glands, and is introduced into the system by means especially adapted for the purpose, such as stings or fangs. On the other hand, a virus is the result of disease or putrefaction, and generally possesses the property of exciting in the system into which it is introduced the disease which produced the virus. A virus commonly produces little, if any, local disturbance; a venom generally causes great pain, often severe inflammation and swelling. Venom has a marked local effect; virus causes a general disturbance of the system.—St. Louis Globe-Democrat.

A DREADED PIRATE.

BLACKBEARD LOOKED ENOUGH LIKE SATAN TO BE A BROTHER.

The Ferocious Robber of the Seas Had a Fashion of Getting Himself Up in a Hideous and Repulsive Manner—Story of His Successful Voyages.

Pamlico sound, now the haven of the storm tossed mariner and the home of peaceful industry, was once the theater of far different scenes. In the beginning of the last century its placent waters reflected a flag which struck terror to thousands of hearts and paralyzed the commerce of the New World; the thickly clustering vines and luxuriant growths fringing its shores concealed, like the original Eden, a hiding devil, the foe of God and man—Blackbeard, the pirate. From a strange tendency of human nature the life of the pirate possesses a fascinating interest, not only for the small boy who devours the pages of his half dime yellow back novel, but also for the reader of stronger judgment and better taste. Indeed some of the greatest writers have been unable to resist the fascinations of this wide and tempting field.

Sir Walter Scott, Marryatt and Cooper thought it not unworthy their mighty pens, and the genius of Byron attained one of its highest flights in the description of the prisoner Conrad in the lonely turret, baring his bosom to the midnight storm and defying the lightning of offended heaven to transfix him. Of all this unholy brood Blackbeard was facile princeps, as Milton says of satan, "By merit raised to that bad eminence." It was an Arabic tradition, relative to the great unknown Atlantic that the gnarled and bony hand of the devil rose from out the waves of the sea of darkness to seize the presumptuous mariner, and in his diabolic career Blackbeard seemed to be the impersonation of this mystic monster. Perhaps a greater demon never prowled the seas or walked the earth in human form.

Even in personal appearance he was hideous and repulsive, nature having stamped him both as a physical and moral monster. The name by which he was known throughout the world was derived from a singular circumstance, which illustrates his savage ferocity. His naturally dark and forbidding face was covered almost to his fierce, sensuous eyes with a shaggy black beard, reaching below the waist. This hirsute adornment, of which he was very proud, and which he cultivated with sedulous care, he was accustomed to braid with ribbons and to twist about his ears until it stood forth like projecting horns.

Into the ends of these he stuck small, slowly burning fuses, whose sulphurous fumes enveloped him in a lurid hue and rendered him a not unfitting representation of the satanic ideal, whose character he so successfully emulated. In time of action he slung around his neck a scarf, into which were thrust three braces of pistols. Our readers, even those who are not endowed with Dantesque powers of imagination, and especially our feminine friends, can readily fancy the impression such an aspect would create when met upon the lonely ocean, with the black flag fluttering above his head and his merciless face lighting up with a gleam of demoniacal joy as his helpless victims walked the fatal plank.

The real name of this man was Edward Teach, and he was a native of Bristol, England. Of his early career nothing definite is known. He first emerged from obscurity as a common sailor on board a privateer commanded by Captain Benjamin Hornigold, sailing from Jamaica and preying upon French commerce. In that humble capacity he distinguished himself by his skill and courage, which attracted the attention of his not over scrupulous commander, who soon intrusted him with a prize he had captured. In 1717 these two choice spirits spread their sails from Providence (auspicious name!) for America, capturing en voyage three vessels laden with wine, flour and miscellaneous cargoes, which they appropriated to their own use and turned the crews adrift.

The speed of their vessels being crippled by foul bottoms, they cleaned them upon the coast of Virginia and went in quest of fresh booty. On this cruise they secured the most valuable prize yet captured, a large French Guineaman, richly freighted, bound for Martinique. At this juncture Hornigold's avarice seems to have been satisfied, or more likely his heart failed him, for, taking the two vessels with which they originally sailed, he returned to Providence and availed himself of a pardon offered by the king to all pirates who should surrender in a specified time.

Teach, however, only emboldened by success, now assumed an independent character and began that career of crime which rendered his name so infamous.—Richmond Times.

A Berlin chemist claims to have discovered the art of reproducing colors true to nature with the camera. If true, the discovery is one of the most important that has been made in the line of photography.

A Lawrence (Kan.) man recently received a letter which was mailed in Chicago about twelve years ago. It was "accidentally discovered" in a ventilator shaft with a package of other mail.

MISCELLANEOUS.

Have you written me yet? If you haven't, wisdom and intelligent ambition suggest write to-day. I promise you my special, personal attention. I undertake to briefly teach any fairly intelligent person of either sex, who can read and write, and who, after instruction, will work industriously, how to earn Three Thousand Dollars a year in their own localities, wherever they live. I will also furnish the situation or employment, at which you can earn that amount. I charge nothing and receive nothing unless successful, as above. Nothing difficult to learn, or that requires much time. I desire but one person from each district or county. I have already taught and provided with employment a large number who are making over Three Thousand Dollars a Year, each. All is new, solid, sure. Full particulars free. After you know all, if you conclude to go no further, why, no harm is done. Address,
E. C. ALLEN, Box 420, Augusta, Maine.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain Lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North-east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hannah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North-west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

COURT NOTES.

Geo. M. Gill, Superior Judge.

THURSDAY, Feb. 2, 1893.

Baxter et al. vs. Gilbert et al.—Filed exception to sureties.

MONDAY, Feb. 6, 1893.

Anger vs. Thiebaut—Case tried.

TUESDAY, Feb. 7, 1893.

Baxter et al. vs. Gilbert et al.—Filed demurrer of W. L. Hunter, executor, etc.; filed demurrer of O. I. Mairs; filed demurrer of A. D Gilbert and A. F. Mairs.

BORN.

McLEAN—At Lone Pine, Feb. 3, 1893, to Mr. and Mrs. Neil McLean, a daughter.

The following telegram has just been received from Sacramento; "Won my fight on the sheep license tax."

P. H. MACK.

Robert O'Neal was at Independence yesterday.

C. H. Parsons was down from Round Valley yesterday.

O. I. Mairs bought one hundred head of beef cattle up at Bishop last week. The price is not given.

Mrs. W F. Matlack arrived home on Wednesday evening after an absence of several weeks visiting in the lower country.

All indications point to a rise in the price of beef between now and April first. Already there is an advance in prices in the San Francisco market.

Beef on the hoof in Owens Valley is now worth five cents a pound. Two years old steers weigh about five hundred pounds and are worth twenty-five dollars per head.

The down train was about four hours late on Wednesday. Snow on the White Mountains caused the delay. Two engines driving a snow-plow preceded the train from Belleville over the summit.

Yesterday gave the steadiest and most copious down-pour of rain Owens Valley has had in a long time. There was no wind; the rain was warm and fell in a continuous stream as if it would never quit. The whole country is thoroughly soaked, and when the sun again shines out warm the young grass will make rapid growth. Already there is a good deal of green picking for stock running at large.

Weather Summary for Eight Years.

KEELER, CAL., Feb. 3, 1893.

The Chief of the Weather Bureau directs the publication of the following data, compiled from the record of observations taken at this station during a period of eight years, for the month of March.

TEMPERATURE.

Mean or normal temperature, 52.2°.
The warmest March was that of 1887 with an average of 56.5°.
The coldest March was that of 1886, with an average of 47.5°.
The highest temperature during any Mar. was 77° on the 15th and 28th, 1887.
The lowest temperature during any Mar. was 27° on the 1st, 1886.

PRECIPITATION.

Average for the month 0.54 inches.
Average number of days with .01 of an inch or more, 3.
The greatest monthly precipitation was 0.60 inches in 1886.
The least precipitation was 0.00 inches in 1885 and 1887.
The greatest precipitation recorded in any 24 consecutive hours was 0.60 inches on March —, 1886.

CLOUDS AND WEATHER.

Average number of cloudless days, 17.
Average number of partly cloudy days, 11.
Average number of cloudy days, 3.

WIND.

The prevailing winds have been from the South.
The highest velocity of wind during any March. was 54 miles N W on the 18, 1891.

District Attorney.

February 8th, 1893.

ED. INDEPENDENT:—The allusions to the District Attorney, contained in the last issue of the *Inyo Register*, reminds your humble servant of the story of a certain fish, which when pursued emits an inky fluid to darken the waters, and thus fecilitate its escape.

Your correspondent never insinuated that the observations of the *Register* should be placed on the elevated plane of criticism. Your scribe placed them in a less dignified and more unenviable category, and any ironical observation, quotation, or assertion that might have so misled the *Register* is cheerfully withdrawn.

No one will doubt the undaunted attitude of the editor of the *Register*. The bold and fearless manner in which any person has fawned on favorites in the past will be sufficient guarantee of contrasting conduct toward those in a dissimilar situation.

Now, Mr. Editor of the *Register*, if you don't understand the law why don't you say so? Don't in the greatness of your misunderstanding pretend to direct the conduct of officers, when such conduct has been carefully marked out by the lawmaker. Show, if you can, where power is vested in the District Attorney to order the arrest of any person. Such power belongs to a judicial officer, not to one exercising ministerial functions.

No, you don't criticise, merely insinuate. Cry peace, peace, when your language indicates "a tempest within a teapot," and childlike attempt to skulk behind a parting slur.

Your servant would prefer receiving the opinions referred to direct from the good citizens, while the *Register* prefers giving the same broadcast from the reflecting surface of his pellucid and unbiased judgment.

Ta-ta, pickininny.

Yours truly,
P. W. FORBES.

Water, Water Everywhere.

The bottom lands of the Valley were all swamped by the heavy rains yesterday. The lower road across the plain south of Black Rock toward Camp Independence is impassable, and will be far some days yet; the upper road was damaged some, but is in passable condition. It was the heaviest rain seen here in a long time; but will be of great benefit to the county. This morning the sun came out in unclouded splendor, not a cloud to be seen. The mountains are covered with show far down their sides, and evidently the canyons are filled to a great depth. Yesterday the streams were all much swollen and muddy; this morning they are about at their average flow and the water is clear. This proves that the rain did not go above the foothills and that all the time it was raining in the valley, snow was falling on the mountains. An abundance of water is sure for the summer. The rainfall for the storm has been 2.91 inches.

Meteorological Summary.

Following is the report of the Weather Bureau Station at Keeler for the month of January, 1893.

Mean barometer.....30.151
Highest barometer 30.411
Lowest barometer.....29.667
Mean temperature 43.1
Highest temperature, 26th..... 56.
Lowest temperature, 7th..... 29.
Greatest daily range temp'ture, 25, 7th.
Least daily range temprature, 11, 27th.
Prevailing direction of wind, S. W.
Total movement of wind, 4203 miles.
Extreme velocity of wind, direction and date, 45 miles S. W. on 27th.
Total precipitation, 0.71 inches.
Number of days on which .01 inch or more of precipitation fell, 5.
Number of cloudless days..... 16
Partly cloudy days..... 7
Cloudy days 8

Weather Bureau.

Argus Mines.

The old mining camp in the Argus range is again being prospected, The *Mining and Scientific Press* says that J. B. Skewes, formerly a mine superintendent at Bodie, has been in the city during the week purchasing machinery to take down to the new Argus camp. He obtained a Kendall one-stamp mill, gasoline engine, assay outfit, etc. The mines are 80 miles from Mojave and about 60 miles from the line of the Carson and Colorado railroad. The nearest mining settlement is Darwin, in Inyo Co. In the new camp water is scarce, or larger machinery would have been purchased. That which has been procured will be in operation in about three weeks. Argus is a gold camp in the Argus mountains, with good grade ore running from $20 to $50 per ton.

A Masquerade Ball.

A Masquerade Ball will be given at Big Pine on the birthday of the boy that could not tell a lie. There never was but one such boy, and of course everybody knows he was born on February 22nd. His little hatchet made him so famous that even the hens were inspired by his example, and everyone of them that has since laid an egg wants to hatch it. But for the above occasion Mrs. Williams is studying for a supper and she will hatch it up in a style that will fill a long felt want, and all the boys will be charged for the privilege of helping their best girls to eat it will be the merely nominal sum of two 'n a half. Of course this includes the privilege of everybody dressing like lunatics and acting the same way, and all for $2.50.

Settle and Save.

All persons indebted to the undersigned are hereby requested to come forward and settle their accounts with money or notes. By so doing debtors will save money and oblige

THOMAS & HILL,
Big Pine.

NOTICE.

ALL PERSONS HAVING CLAIMS gainst the undersigned will presen the same by the first of each month and payment will be made on the 5th.

Pay the Price of the Royal for Royal only.

Royal Baking Powder is shown by actual chemical tests absolutely pure and 27 per cent. greater in strength than any other brand.

Many grocery stores have recently been stocked with second-class brands of baking powder, which are urged upon consumers at the price of the high-cost, first-class Royal.

These powders cost from 8 to 30 cents a pound less than the Royal, besides being of 27 per cent. less strength. If they are forced upon you, see that you are charged a correspondingly lower price for them.

THE TREE PEONY.

A Noble Flower That Is Being Cultivated in England to Some Extent.

The noblest flower of the summer season is the tree peony, and those who have not got it in their gardens should try and find room for it. For considerable more than a thousand years it has been cultivated by the Chinese, and they have raised hundreds of magnificent varieties and kept them carefully, so that they did not pass out of the country.

In Japan also it is a great flower, and like the chrysanthemum and the iris is abundant in that country in many fine forms, some of which are now at last being brought to us. But fortunately we are not entirely dependent upon such uncertain sources for our plants, as for some years past English and continental raisers have been at work upon the tree peony, and they have been rewarded with some sterling productions.

The first tree peony was brought into this country rather more than 100 years ago through the instrumentality of Sir Joseph Banks, who had heard of its existence and popularity in Chinese gardens. A few others were obtained later on, but down to 1850 there were not a dozen distinct kinds in cultivation. In recent years, however, the flower has been greatly improved. Doubtless there are a great many kinds much alike, but there are also magnificent varieties that we ought to possess and grow as we do good roses.

Among the early varieties that came to this country was one with single flowers, which were white, with a dark crimson stain at the base of the petals. This was and still is supposed to be the type and parent of the now numerous and lovely progeny in existence. Occasionally, and often when least expected, one meets with a grand plant of this and a similarly colored double flowered variety.

A short time back, when passing along the road in a remote country district, we saw two magnificent plants of this kind, one on each side of the walk leading up to a farmhouse. They were each more than four feet in height, almost as much in diameter and bearing scores of blooms. Many years must elapse before a specimen of such dimensions is obtained, for although tree peonies grow vigorously enough three parts of the growth die back each season to where a prominent bud is formed.

One great point in their favor, however, is that they commence to bloom in quite a young state, and plants that are little more than one foot high will bear four or five great flowers, and these, with the ample foliage that clothes the shoots, make even small plants appear of considerable size in their summer dress. Above all plants they need good culture, and as when once planted they are very impatient of disturbance at the root a thorough preparation of the site should be made.

Some care must also be exercised in choosing the position, for, though the plants are in every respect hardy they start into growth so soon that frost sometimes injures the young shoots. The risk of this is obviated by choosing a site where the early morning sun does not shine upon the plants, several degrees of frost not having the slightest effect upon the shoots if they thaw gradually. It is an easy matter to arrange some temporary framework, over which canvas or some other light protecting material could be thrown should frost come during the critical time of young growth. In winter protection must not on any account be given. The aim should rather be to retard growth, and even then it will start quite soon enough.—London Graphic.

Married Women in the West.

The western married man has no standing in society except by his wife's side. The men who "run" the towns are seldom seen at the parties, which are managed by their unmarried clerks. In the old courtly days a man and wife had a social individuality; but when a man attends a social gathering in the west he is expected to seat himself beside his wife and behave as well as he can, to the end that people may understand that he is not only fond of the worthy woman at home, but in company as well.

If a married man should attend a western social affair without his wife he would be very apt to be approached by a married woman who would ask him in an audible whisper, "Where is your wife?" and there would be a certain something in the woman's tone indicating that he ought to be ashamed of himself for being there under such circumstances. I once knew a gay young husband to exhibit a paper, signed by his wife, to the effect that he was at the party alone with her knowledge and consent.—E. W. Howe in Forum.

The Sultan's Poisoner.

Among the Turks the usual method, both of trying and punishing a poisoner, is to make him drink his own concoction, if any can be found. Otherwise the accused is half strangled or beaten into a confession. A poisoner who survives the preliminary ordeals, but is convicted nevertheless, is tortured to death by being spread eagled in the heat of the sun. It is said that up to a recent period the sultan's list of palace employees included a Turkish doctor, expert in poisons, whose duties were not confined to attending the sick and tasting the sultan's food. It has been known in Constantinople that the skill of the sultan's poison expert was called into service whenever his master wished to get rid of some one who had offended but who had been guilty of no open violation of the sultan's wishes or decrees. The present sultan, Abdul Hamid, among other reforms, has dispensed with the court poisoner.—Pittsburg Leader.

Rudyard Kipling is coming to this country in the spring to enjoy a hunting tour in the west before he goes to India, where he expects to spend much of his time during the next few years. Mr. Kipling's father is a clever artist, and has prepared a series of elaborate illustrations for his son's book.

THE VALUE OF DUST.

Its Particles Form Free Surfaces for the Collection of Vapor.

How can invisible particles be brought within the range of our vision? That was one of the first of the many marvelous discoveries of Mr. John Aitken, F. R. S., Falkirk, a distinguished physicist, whose remarkable work has revolutionized a branch of meteorology. He showed that without dust in the air there could be no fogs, no mist, no cloud and probably no rain. The particles of dust are the free surfaces, which, under certain conditions, attract the water vapor of the atmosphere to form fog. Invisible before, they become visible when clothed all over with the moisture; unseen as dust, they become distinct as fog particles.

This can be easily verified. If ordinary air be forced through a filter of cotton wool into a glass receiver, it is deprived of all its dust particles. Let steam be introduced into this receiver from a boiler, no change will be observed; the vessel is quite transparent. But if a jet of steam be introduced into a similar vessel containing ordinary air, it will be seen rising in a dense cloud; then a beautiful fog will be formed, so dense that it cannot be seen through. In the former case, when there was no dust in suspension, the air remained clear; in the latter case, when the ordinary atmospheric dust was in the vessel, fog at once appeared. The invisible dust then is detected by the introduction of water vapor.

Until very lately it was thought that particles of water vapor combined with each other to form a cloud particle, but it is now found that some solid body, however small, is required for this formation. In fact, when there are no dust particles on which the water vapor at a proper temperature and pressure can condense, there is at present no knowledge as to the point at which the change will take place. But the fine particles of dust in the air act as free surfaces on which the water vapor condenses into fog. When there is abundance of dust in the air and little water vapor present there is an overproportion of dust particles, and the fog particles are in consequence closely packed, but light in form and small in size, and take the lighter appearance of fog. Accordingly, if the dust is increased in the air, there is a proportionate increase of fog.

But on the other hand if the dust particles are fewer in proportion to the number of molecules of water vapor, each particle soon gets weighted, springs into visible existence as if by a creative hand, and falls in mist or rain. If the water vapor had no dust at all on which to settle, it would use the objects on the surface of the ground for the same end, as the grass, leaves, tree branches or house projections. Moisture would then be ever dripping. The occasional genial rain, though at times lashed up to a biting storm of sleet, would require to give place to a constant wetness on the roads and grass.

Umbrellas would not be needed, but india rubber protectors for the feet and legs would be in constant requisition. Even the irritable housekeeper, ever annoyed at the unaccountable appearance of dust in rooms which she left for clean, would prefer the old necessary evil in this dry dust form than see the walls dripping and the floor wet.—Good Words.

A Singular Method of Treatment.

A peculiar case of poisoning by a physician was that of Dr. Stephen Eotvos, in Hungary, about twenty-five years ago. Eotvos undertook to hasten the death of patients whose cases he considered hopeless by putting them out of their misery, as he termed it, with fatal drugs. He encountered no opposition to his peculiar methods of benevolence while he practiced them on people of no particular standing. But when the doctor hastened the death of a well known land proprietor named Szlavy, who was slowly dying of cancer, the relatives of the dead man presented a violent protest and demanded the prosecution of Eotvos.

The physician declared on trial he was actuated by humane motives and had merely eased the journey of his victims to the inevitable goal. This defense was not accepted by the court. Eotvos was acquitted of malice, but found guilty of homicide without malice, and sentenced to a long term of imprisonment.—Pittsburg Leader.

Choosing His Own Name.

There are no better stories than those of the clergy, even if the young person does not have to be sent away from the table. It is significant that marriage is rarely mirth provoking, while the rite of baptism and the text furnish no end of good stories.

One of the stock baptismal anecdotes is that of the lisping woman who presented her child at the font.

"What is its name?" whispered the preacher.

"Lucy, thir," whispered back the woman.

"Lucifer! My good woman, that is no name for a Christian child," exclaime the horrified minister, then roared, "James Robinson, I baptize thee, etc."—New York Evening Sun.

Woman's Rights in Roumania.

The woman's rights movement in Roumania has received a new impetus from the recent election of a woman to the mayoralty of Branesci. Meetings of women are being held all over the country with a view to organizing a woman's league for the purpose of booming women for city offices. The aims of the league will be followed in observance of the fact that, while women are legally eligible to all local offices in Roumania, public opinion and the constitution are against admitting them to parliament and granting them the ballot.

The league will, therefore, be an association of women who will merely plan and execute the best means of influencing their husbands and brothers to support other women for municipal elective offices. The headquarters of the league will be in Bucharest, where the women have been inspired to strong efforts for "emancipation" by the achievements and fame of their queen, Carmen Sylva.

The female mayor, whose political success has stirred this agitation, is Mrs. Anna Jonescu, 45 years old, and the mother of three children. She has been a woman's rights agitator for some time, and, unfortunately, has gathered about her a great crowd of strong minded Roumanian women, who are now tormenting her with loud and numerous demands for all the offices at her disposal. In fact, their cries for spoils have been so persistent that they have reached the ears of the minister of the interior and have imperilled the whole cause of woman's rights in Roumania, for the minister has said that unless this office seeking and the attendant evils cease he will not only refuse to confirm Mrs. Jonescu's election, but will discourage by all lawful means similar candidacies in the future.—London Letter.

Common Sense About Thermometers.

There is something exasperating to a sensible person in seeing a useful scientific instrument like a thermometer dressed up in frivolous fashion, and mounted in such a variety of preposterous ways on plush easels, tin or bronze plates, in every conceivable manner that will make an ostentatious show. The simpler manner in which such an instrument can be mounted the better. The ugly black tin case that surrounds the ordinary thermometer is no addition to it. The best way to buy thermometers is by the dozen or half dozen unmounted. Each instrument consists merely of the plate containing the degrees and the mounted tubes. By keeping a half dozen together and noticing the uniformity or want of uniformity of their register defective ones may be rejected.

Purchased in this way trustworthy instruments do not cost over ten cents apiece. Once in a while in testing them a defective one will be found, but it is rare. It is an excellent plan to keep one of these thermometers in every room, hanging it on the edge of the door frame, where it is not exposed to a special current of cold or hot air, is not likely to be hit and injured, and does not obtrude itself upon your gaze, but keeps in its place like an obedient servant. It would be an excellent plan to have a place for a thermometer sunk in the wood of the door frame at this place.—New York Tribune.

Disease in Carpets.

A war on ordinary sweeping should be inaugurated; for, of all dangerous habits, none is worse than that of flinging that combination of everything which we call dust into the air to be breathed. Brooms should be abolished. Hard floors, with rugs to be lifted and shaken out of doors, with a complement of work with the scrubbing brush, will drive out our present system of carpets and brooms. No one can tell what is or is not in the dust on his floor. A carpet in the course of six months is permeated with organic waste brought in from the streets or breathed off or sloughed off from our bodies. These dangers are even worse in city houses, and the soil of a large city cannot become otherwise than permeated with danger. A city well cannot possibly be assuredly safe.—St. Louis Globe-Democrat.

How Women Expose Themselves.

Rose Terry Cooke says: "If you want to be happy keep warm." Women are often troubled with neuralgia, say the doctors. No wonder. They sit all the morning by a hot register and then tie the five or six inch strip of bonnet over their back hair, a bit of lace flim over their bangs, put on kid boots, with silk or thread stockings underneath, and dawdle along the pavement with bitter winds of winter smiting their temples, their delicate ears, their throats, and the bases of what should be their brain. Their outward nerves shrink and quiver under this barbarous exposure. But no matter; their chests are well covered with fur cloaks and sacques, but cold feet, the numb ears, the reddened temples, the exposed neck will have their own story to tell.—Washington Star.

Indoor Ball.

Our children are getting lots of amusement these cold winter days from the game of "wool ball," and perhaps other children may find it good fun. The children are seated around a perfectly smooth topped table. A little raw wool is formed into a light ball and placed in the center of the table. The children then commence to blow toward it, each one trying to drive it from him and off the table, if possible, and the child who allows it to pass his right side and fall on the floor is excused from the table, and stands in a line by the wall. Each one who allows the ball to pass by and fall on the floor retires in line. The longer the ball is kept on the table, everyone blowing as hard as possible, the more amusing the game becomes.—Lewiston Journal.

The paralytic condition of the widow of John B. Gough is pathetic. In the pride of her vigorous womanhood she stood bravely at her husband's side when but for such support he would have fallen to rise no more. As the Gough estate is to be sold soon Mrs. Gough will be obliged to quit her pretty home, Hillside, near Worcester.

He Died Happy.

There is a characteristic story told of a man who lay dying. Suddenly he sprang out of bed, and seizing a tidy jerked it off the chair, threw it on the floor and stamped on it. Then falling back on the bed with a peaceful smile he gave up the ghost.—New York Sun.

The Weimar Society for the Circulation of Good Literature has distributed since last March 300,000 copies of wholesome tales and novels. At the same time it has increased its membership to 5,000 and has laid by $10,000.

AUCTIONEERING DODGES.

Schemes of the Sharp and Shrewd to Beat the Man on the Block.

Very few people are aware, when going to an auction, that there exists among the furniture dealers, and other gentlemen of their "kidney" who patronize these places what is known to those in the swim as a "ring."

On arriving at a furniture sale these worthies agree not to bid against each other.

Suppose a rather valuable antique sofa (which, if we may trust to the voluble eloquence of the auctioneer, was made by Noah at about the same time he built the ark) was put up. One of the ring, we will call him A, wants just such an article. The sofa is worth perhaps a couple of sovereigns.

A bids for it, and all the other dealers are silent. After a few bids from the venerable old dames who frequent these auctions, it is knocked down to him for five and twenty shillings. When a few more lots are disposed of a fine old armchair is brought out, which is purchased under the same conditions by B, also of the ring. Each of these worthies knows perfectly well what each article is worth, but under the principle that there is honor among thieves, none of the dealers ever bid against one another.

When the sale is over all the ring repair to some out of the way place. A then puts up the sofa which was knocked down to him at five and twenty shillings. B raises the price to twenty-six shillings, placing the shilling into the "pool." C follows suit and adds his shilling. The others keep on bidding until a fair sum is reached, when the article is knocked down to the highest bidder, who pays A the original sum he paid for the sofa at the auction. The other money is left in the pool. All the purchases are dealt with in a similar manner. When all are disposed of, the money in the pool, which by this time amounts of course to a considerable sum, is equally divided among the members of the ring.

It may be asked: "Why is such a great deal of trouble taken? Why could not the goods at once become the property of the buyer?" It must, however, be remembered that the policy of such men is "diamond cut diamond" with a vengeance, and a division of profits among themselves, instead of the auctioneer getting the benefit, is naturally more likely to conduce to the advantage of them all.

Should one broker by mistake at the auction bid more for an article than it is afterward found to be worth, the ring share the loss in the same manner as they share the profits. This, however, very seldom occurs.

It may be thought the auctioneer does not eagerly seek the bids of these gentry. This is often the case, and when their bids are really too absurdly few he runs up the price by the aid of imaginary bidders. But the brokers will not go any further than they think will answer their purpose, and the lot is bought in by the auctioneer himself.

To make private purchasers transact their business through them these dealers will frequently bid against him or her, and run the article up to about treble its real value. Had the purchaser "tipped the wink" to one of their number he would most probably, for reasons I have stated above, have been able to obtain it at a much lower figure. The article would be put up again in the same way by the broker, and would make, say, thirty shillings. The broker would most likely charge his client two guineas and pocket the difference, besides taking his share of the pool.—London Tit-Bits.

In a Big Store.

A short time ago while visiting in the city of Syracuse I concluded to go shopping. As my friend had some household duties which needed her personal attention I started out alone.

Among other things I wanted to purchase was a hat for my little boy. As I had always lived in a small town I was somewhat confused by the size of the store at which my friend directed me to make my purchase. I knew enough to find the floorwalker, however, and have him show me to the hat department.

As is usually the case where there is a large assortment to choose from, I could not decide which to take, so walked away, saying, "I did not see any to suit me." After awhile I managed to find the door I had entered and passed out.

With a great deal of confidence in my ability to find a hat store without aid I turned the corner and started down the street. At the very next corner I saw a very large number of hats in the window and concluded to enter. To my utter chagrin I found myself at the identical counter in the same store, and the same clerk smiling at my embarrassment.

In my confusion and hurry to get out I rushed toward a lady coming from the opposite side, when to my horror I came forcibly against a large mirror, which I had mistaken for an archway, and found that the woman I saw coming was myself. Imagine my feelings when, upon turning around, I found a dozen pair of eyes and as many people watching me, trying to restrain their laughter. I think you will agree with me that one experience of the kind is enough.—Cor. New York Recorder.

The Invention of the Piano.

The honor of inventing the piano is claimed by the English, the French and the Germans. Father Wood, an English monk at Rome, is said to have been the real inventor in 1711, and to have manufactured one, which he sold to Samuel Crispi, the author of "Virginia," from whom it was purchased by Fatke Greville, though Count Carli claims the credit for Bartholemmeo Christiforic, of Padua, during his stay in Florence, some three years later (1714). The French attribute the invention to a Parisian named Marius, who they alleged produced in 1716 a harpsichord in which hammers had been substituted for the old plectrums or quills. The Germans are the last in the field with J. C. Schroder, of Dresden, who claimed (1717), when eighteen years of age, to have "constructed after much consideration the model of a new clavier with hammers, upon which he could play loudly or softly."—Brooklyn Eagle.

An Experience While in a Trance.

Dr. Binns mentions the case of a girl who lay in a trance for a considerable time and then revived. She actually heard every word that was said around her, but was unable to give the slightest evidence of her continued vitality. She afterward said that her horror was simply indescribable. She had endeavored to shout and to move, but in vain. At length her state of mind when she was being prepared for burial was such as to cause her to break out in a profuse perspiration, and she recovered. She described the sensation very much in the same way as the somnambulists say they feel. Her soul, she said, seemed to have no power to act upon her body. It seemed to be in the body and out of it at the same time.—Yankee Blade.

Harriet Hosmer, who is about to go abroad again for three or four months, is as bright and energetic as though forty years' constant work at her art did not lie behind her. She has a deep interest in woman's intellectual work, and is an honorary member of Sorosis.

Many of the watches are smaller and more elaborately decorated than ever. There are watches the cases of which are entirely covered with good sized diamonds, with a ball incrusted with diamonds hanging at the end of a gold chain.

The Woman Knitters of Shetland.

The hosiery and other knit woolens which come from the hands of Shetland women are famous. They are as ceaseless knitters as those of Connemara and Donegal in Ireland, and produce fabrics of wondrous delicacy of texture. The preparation of the yarn has much to do with the lightness and softness of their work. Fleeces are never shorn. The cruel practice of "rueing," or removing the wool from sheep by pulling it out by the roots in handfuls, is still prevalent. The finest wool is thus procured, and the average weight of the most prized fleeces is but two pounds.

The knit work of these nimble fingered women formerly consisted only of coarse woolen stuffs, and fine Shetland shawls did not become common until about 1840. The finest collection of knit goods ever produced in the islands was presented to the Princess of Wales on her marriage in 1863. In 1890 a large shawl was sold at Lerwick for $75. It only weighed 2⅝ ounces, and another which sold for $45 weighed but 2½ ounces. Some of the designs are marvelously beautiful.—Cor. Boston Transcript.

The Feather Game.

A big sheet and a small feather are all that are needed for this game, provided you have the children, and if you haven't them in the house call in the neighbor's children, and in giving pleasure to them and joining in their mirth you will almost grow young again yourself. To play this game the players all sit upon the floor in a ring, holding on to the edges of the sheet, which they try to keep as taut as possible. One person is "it," and he or she tries to grasp and capture the feather, while the others strive to prevent this by blowing the feather across the sheet out of reach of the pursuer.

Meanwhile the latter runs this way and that around the circle of players, grabbing here and there and doing his best to get hold of the elusive object. To accomplish this is quite difficult, because a single well directed puff of the breath will send the feather clear across the sheet. When the person who is "it" succeeds in capturing the feather, the player to whom the feather was nearest when it was grasped becomes "it" in turn, his or her place being taken by the capturer.—Lewiston Journal.

Shooting Stars.

The shooting stars are small bodies, weighing at most a few pounds, and consisting mainly of iron and carbon. They traverse space in swarms and also revolve around the sun in long, elliptical courses, like the comets. When these little bodies enter the earth's orbit they are deflected toward the earth, and great numbers are seen in a single night.—Public Opinion.

VALUABLE COLLEGE PRIZES OFFERED BY EX-GOVERNOR PERKINS.

Ex-Governor George C. Perkins has offered two valuable prizes to the students of Atkinson's Sacramento Business College. An elegant gold watch to the young man of correct habits who makes the best record in the business course, and a gold watch and chain to the young lady who completes the same course and is deemed most meritorious. The time is limited to the year 1893. Either prize will be to its possessor a life long honor, and a diploma from this well known business training school will be a good introduction to the best business houses of the State. Who will win these honors?

"Truth is stranger than fiction," I wrote,
In very simple diction
The careful printer made me say:
"Truth is stronger than fiction."

PREVENTION BETTER THAN CURE.

Many persons are afflicted with skin eruptions, boils or ulcers. BRANDRETH'S PILLS taken freely will in a short time effect a complete cure of all such troubles. Ulcers of long standing have been cured by them. Carbuncles have been checked in their incipiency by them. The worst fever sores, bed sores, and the like have been driven from the skin by them. Only begin in time and a few of BRANDRETH'S PILLS will prevent many a sickness.

BRANDRETH'S PILLS are purely vegetable, absolutely harmless, and safe to take at any time.

Brown—Why do they call this cake "angel food?" Angels don't eat it. Jones—No; it is used, I believe, to increase their number.

BAD TASTE in the mouth or an unpleasan breath, when resulting from Catarrh, aret overcome, and the nasal passages which have been closed for years are made free by the use of Ely's Cream Balm. I suffered from Catarrh for twelve years, experiencing the nauseating dropping in the throat peculiar to that disease, and nose bleed almost daily. I tried various remedies without benefit until last April, when I saw Ely's Cream Balm advertised. I procured a bottle, and since the first day's use have had no more bleeding—the soreness is entirely gone.—D. G. Davidson, with the Boston *Budget*, formerly with Boston *Journal*.

Apply Balm into each nostril. It is Quickly Absorbed. *Gives Relief at Once.* Price 50 cents at Druggists or by mail.

ELY BROTHERS, 56 Warren St., New York.

It is very hard for a man to teach his wife how to play cards and be polite at the same time.

"*Brown's Bronchial Troches*" are widely known as an admirable remedy for Bronchitis, Hoarseness, Coughs and Throat troubles. *Sold only in boxes.*

One-half the world doesn't let his better half know how he lives.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Use Enameline Stove Polish; no dust, no smell.

A Ruddy Glow

on cheek and brow is evidence that the body is getting proper nourishment. When this glow of health is absent assimilation is wrong, and health is letting down.

Scott's Emulsion

taken immediately arrests waste, regardless of the cause. Consumption must yield to treatment that stops waste and builds flesh anew. *Almost as palatable as milk.*

Prepared by Scott & Bowne, N. Y. All druggists

Old Gold and Silver Bought; send your old Gold and Silver by mail to the old and reliable house of A. Coleman, 41 Third Street, San Francisco; I will send by return mail the cash, according to assay if the amount is not satisfactory will return gold.

25 CTS. PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS.

"HOW I WROTE BEN HUR,"

told by Gen. Lew Wallace, is one scrap from the voluminous and superb programme of eminent writers and interesting articles which *The Youth's Companion* announces. It retains its place in 500,000 families by the versatility and the instructiveness of its general articles, the high character of all its stories, the brightness of its illustrations. Then it comes every week, and one gets a great deal for $1.75 a year. The price sent at once will entitle you to the paper to Jan. 1894. Address THE YOUTH'S COMPANION, Boston, Mass.

Buckton—He is very learned, you say. Is he proud of all he knows? Nendick—Oh, no. He is an agnostic and proud of all he doesn't know.

AN ENEMY BAFFLED.

There is an enemy with whom thousands are familiar all their lives, because they are born with a tendency of biliousness. With this enemy they are constantly battling with ineffectual weapons. Hostetter's Stomach Bitters will baffle it. Mere purgatives will not reform a disordered condition of the liver indicated, not by constipation alone, but also by sick headaches, yellowness of the skin and eye balls, nausea, furred tongue and uneasiness, more particularly upon pressure on the right side, upon and below the short ribs. Avoid drastic purgatives which gripe and weaken the intestines, and substitute this world-famous anti-bilious cordial, which likewise removes malarial, stomachic and kidney complaints, rheumatism and nervousness. As a laxative of the bowels, painless but effectual, it improves appetite, sleep and the ability to digest, and possesses the additional advantage of a standard tonic.

To make homes dearer,
And dark skies clearer,
And bring Heaven nearer
Is woman's work.

HOW'S THIS!

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O.

We the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

West & Truax, Wholesale Druggists, Toledo, O.
Walding, Kinnan & Marvin, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free.

A Providential Arrangement—"Man Proposes" "Yes, but he needs encouragement."

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

The trouble is that when a man needs his nerve most he can't find it.

Try Germea for Breakfast.

ST. JACOBS OIL

The Great Remedy for Pain. Cures all the Aches and Pains of Man & Beast.

"August Flower"

Eight doctors treated me for Heart Disease and one for Rheumatism, but did me no good. I could not speak aloud. Everything that I took into the Stomrch distressed me. I could not sleep. I had taken all kinds of medicines. Through a neighbor I got one of your books. I procured a bottle of Green's August Flower and took it. I am to-day stout, hearty and strong and enjoy the best of health. August Flower saved my life and gave me my health. Mrs. Sarah J Cox, Defiance, O.

TOWER'S FISH BRAND. The Best Waterproof Coat in the WORLD!

SLICKER

The FISH BRAND SLICKER is warranted waterproof, and will keep you dry in the hardest storm. The new POMMEL SLICKER is a perfect riding coat, and covers the entire saddle. Beware of imitations. Don't buy a coat if the "Fish Brand" is not on it. Illustrated Catalogue free. A. J. TOWER, Boston, Mass.

OPIUM Morphine Habit Cured in 10 to 20 days. No pay till cured. DR. J. STEPHENS, Lebanon, Ohio

After the Grip

"I was very weak and run down and did not gain strength, like so many after that prostrating disease. Seeing Hood's Sarsaparilla highly recommended, I began to take it, and was more than pleased with the way it built me up. I think it has made me better than before I was sick. I have also been delighted with HOOD'S PILLS, and always prefer them to any other kind now. They do not gripe or weaken. I am glad to recommend two such Hood's Sarsaparilla Cures as preparations as Hood's Sarsaparilla and Hood's Pills." MRS. ISAIAH EMERSON, Manchester, N. H. Get Hood's.

Mrs. Emerson.

HOOD'S PILLS are purely vegetable, carefully prepared from the best ingredients.

25 DOSES 25¢ THE GREAT COUGH CURE 25¢ 50¢ & $1.00. SHILOH'S CURE.

Cures Consumption, Coughs, Croup, Sore Throat. Sold by all Druggists on a Guarantee. For a Lame Side, Back or Chest Shiloh's Porous Plaster will give great satisfaction.—25 cents.

SHILOH'S VITALIZER.

Mrs. T. S. Hawkins, Chattanooga, Tenn., says: "*Shiloh's Vitalizer SAVED MY LIFE. I consider it the best remedy for a debilitated system I ever used.*" For Dyspepsia, Liver or Kidney trouble it excels. Price 75 cts.

SHILOH'S INJECTOR CATARRH REMEDY. Have you Catarrh? Try this Remedy. It will relieve and Cure you. Price 50 cts. This Injector for its successful treatment is furnished free. Shiloh's Remedies are sold by us on a guarantee to give satisfaction.

If You Think any kind of a crop will do, then any kind of seeds will do; but for the best results you should plant

FERRY'S SEEDS.

Always the best, they are recognized as the standard everywhere. Ferry's Seed Annual is the most important book of the kind published. It is invaluable to the planter. We send it free. D. M. FERRY & CO. DETROIT, Mich.

BEATING THE CUSTOMS.

Something That a Fairly Good Citizen Will Do When He Has the Chance.

"Buenos dios, senor."

You raise your eyes from your work. A little, lean, chocolate colored man, who looks as though he had a life engagement with an indolent liver stands before you, hat in hand.

It passes through your mind vaguely that the salutation is Spanish for "Good day, sir," or something of the kind.

"Does the senor spik Spanish?"

No, the senor does not speak Spanish; he has only walked that way occasionally.

"Parlez vous Francais, monsieur?" asks the partner of the torpid liver.

No, mounseer does not parlez anything but English.

"Pardon, but I spik the Inglees ver' bad. I hof some fine Spanish cigar to show the senor, and he ees ver' chip."

It's the same racket, the very same that took you in two years ago. You don't want any.

"Pardon, senor, but he ees ver' fine and ver' chip. Ah, senor, oblige me; try him."

Then the mauve, suave Cuban looks all around very cautiously, very suspiciously, and suddenly takes you into his confidence. He intimates in invertebrate English that the cigars, of which he has but 200 or 300, have in some way dodged the revenue, and so he, humble benefactor that he is, can sell them at about half what they would cost if the customs had not been defrauded.

"Ah, senor, he ees a beeg, what you call, eh? bar-gain? But"—and here he lifts his shoulders to a level with his ears. "I must ra-turn to my dear Cuba. Come, senor, it ees bargain."

The tempter holds a bunch of fifty before you—long, slender, shapely. There is a delightful fragrance in the room. The Cuban pushes a cigar through from the center of the bunch. You take it. You seem to be making the selection yourself, for you are under a strange hypnotic spell.

Delicious! The smoke wreaths curl about you as you puff away, filling the air with a ravishing aroma. The Cuban continues to talk—a low, soothing monotone that dulls your conscience and puts suspicion asleep.

Yes, you will assist him to rob the government. There are some things about the tariff you don't like very well anyway. Besides you will do a worthy act in assisting a Cuban exile to return to his family and native land.

So you buy a bunch of fifty, and with profound thanks the poor foreigner leaves.

By this time the first cigar has burned out. In a delightful state of exhilaration you take a second. Hello, what's this? Not at all like the first. A villainous weed; there's a piece of rope in it. You try a third, a fourth, a fifth; not one of them but would suffer in comparison with a Wheeling stogy.—Indianapolis Journal.

Heating, Cooling and Ventilating.

For more than twenty years the inventor of a new system for cooling, heating and ventilating has been developing the methods which have been embodied in his invention. His system consists of circulating fresh air through interior zigzag partitioned heating drums and coils arranged in a return zigzag flue extending for a suitable distance up the chimney, around which the escaping gases and smoke are made to pass. The heat that usually passes to waste outside the chimney is thus absorbed.

This heat is then turned into a stream of fresh, clean air, driven through heating apparatus and conveyed with great velocity through a circulating pipe into as many different buildings and apartments as may be desired. In this way a saving of from 70 to 90 per cent. in the cost of fuel is effected, and pure, wholesome air, which can be cooled if desired, can be obtained all over the house. —Pittsburg Dispatch.

Condensed Milk Lacks Water.

Steam emanating from boiling milk if condensed would become water. This may be seen in the manufacture of condensed milk, which is only ordinary milk boiled down until the water is out of it. If a liquid which contains solid bodies in solution be evaporated, the solids are left behind. That this is so may be shown by adding to water that is to be distilled a trace of magenta and a little salt. The distilled water has no taste and is colorless. The magenta is generally deposited upon the sides of the boiling vessel. — Brooklyn Eagle.

The Right Sort.

"I've a waiter at my house that has been with me ten years. Never gave me a word of impudence, hasn't asked for a day off and never growls."

"Dear me! What nationality?"

"American. It's a dumb waiter." —Harper's Bazar.

The Advantage of His Company.

Featherstone—I wish you would come and help me select some trousers, old man.

Ringway—I don't believe my taste is any better than yours.

Featherstone (hopefully)—No, but your credit is.—Exchange.

OTTER HUNTING.

Aleuts Conduct the Chase in Water Tight Canoes on the Open Sea.

SKILLFUL USE OF BOW AND SPEAR.

Exciting Sport off Vancouver Island.—How the Natives' Frail Boats Outside a Storm.

Saunakh island, the largest of a group of the same name, with its surrounding ree's, rocky ledges, and islets, is nevertheless the richest hunting ground in Alaskan waters. Parties of hunters from the main land to the north and east, and the innumerable islands to the east and west, may be found here at all seasons of the year, living in tents of skin or canvas or hastily constructed barabaras (rude huts of earth and dried grass), diligently watching for the rare intervals of weather when the sea is sufficiently smooth to warrant their putting out with some prospect of a successful hunt for the sea otter and seal.

It is only at a time when the sea is smoothest that the hunters may set forth with any promise or hope of success, and in the inhospitable and boisterous weather of this section of Alaska such days are of the rarest occurrence, weeks and even months often passing ere the hunters have an opportunity of trying their skill with bow and spear. The long looked for quiet day having at length arrived, the party, after a brief invocation of the mightier spirits, embarks, fully equipped, two and two, in their bidarkas.

A bidarka is a sort of canoe made of the skin of the sea lion or hair seal stretched over a light wooden frame, and, though seldom exceeding 25 feet in length by 30 inches in breadth, and weighing less than 100 pounds, yet so strong are they that, exclusive of a crew of 300 pounds, goods aggregating as much as 800 pounds are often carried in them. With the exception of two circular holes equidistant from either end and from each other, in which the occupants of the frail craft squat, the bidarka is completely decked over.

Clad in their kamlekas, waterproof shirts of whale, seal or bear intestines, the bottoms of which they fasten around the combings of the hatches, their sleeves secured tightly to the wrist, and the opening for the head drawn up closely about the neck, whole seas might wash entirely over both boat and occupants without a drop of water getting inside. This is a necessary precaution, as, though smooth and calm at the start, it is quite possible, and even likely, owing to the long distance which they have to go, that the party may meet with heavy weather ere they reach the land.

As an additional security, when the sea is too heavy to make headway against, they collect in groups of three or four canoes and, lashing them together, ride out the storm in safety. When any water finds its way inside, which it sometimes does through the seams of the skin, it is pumped out by means of a small wooden tube which the native sucks full, then by removing his finger, which he has placed over the lower end of the tube, to retain its contents until clear of the bidarka, the water runs out into the sea. The operation is continued until the boat is dry.

Once started on a voyage the peredovchik or leader assumes entire command and silence falls on the little flotilla. When in his opinion they are nearing the vicinity of their quarry he makes a sign, and immediately, without a word being uttered, the canoes separate, forming a huge semicircle, each bidarka from fifty to a hundred yards distant from the next, and the occupants keeping always a vigilant lookout both on the surface of the water and the other boats.

As soon as a hunter signs head of an otter he raises his paddle and points in the direction in which the animal was seen. The scattered bidarkas then close up so as to form an extended circle about the spot indicated, and still in silence await the reappearance of the otter. This is sure to be in about ten minutes, as at the end of that interval he must come to the surface to breathe, going down again after remaining there a few seconds.

Should he come up within the circle of boats they gradually close in, beating the water with their paddles to bewilder the animal and keep it within the ever narrowing ring. Occasionally, however, the otter, after diving, alters his course, and appearing at a distance without the line, the canoes are thus compelled to change their base before finally securing the prize.

As soon as the pursued animal shows himself within spear's throw the earnest hunter, rising to his knees, hurls a shaft at it. Lodging in its skin near the head, we will say, the otter immediately tries to dive. In view of this trait the spear is constructed in just such a manner as to retard its progress as much as possible. To that end the head is set so loosely in its socket that the recoil of striking causes the shaft to detach itself, leaving the head securely imbedded in the flesh.

Wound round and round the shaft is a fine cord or line of braided sinew some three or four feet in length. One end of this is attached near the base of the barbed ivory head, while the other culminates in a bridle, each end of which is secured to either extremity of the shaft.

DIVIDING THE SPOILS.

This causes it to drag broadside to, in which position it offers the greatest resistance to the water. On some spears there is attached near the foot an inflated bladder used as a buoy, though it also acts as an additional drag.

Naturally, with all this to prevent his rapid escape, the otter shortly comes to the surface, pretty well exhausted with his exertions, and at no great distance from where he was first struck. As he makes his appearance spears, arrows and darts are now indifferently launched at his devoted body. The poor animal dives rapidly and frantically endeavors to escape, but worn out from his tiresome efforts and bleeding wounds, his motions have less energy and vigor, and he soon floats up to receive his death stroke. The carcass is then skinned in the water, care being taken not to dislodge any spear or arrow heads from the skin, which is taken into one of the bidarkas, when, if the weather still continues propitious, the hunt continues.

On the return of the party to land each otter skin is inspected by the chief in the presence of all hands, and the ownership of the different skins ascertained by means of the points imbedded therein, each of which is marked with the owner's sign or brand. Curiously enough, the weapon nearest the tail carries off the prize, whereas he who first succeeded in placing a barb, which virtually was the means of the animal's destruction, receives but from $8 to $10 from the owner, according to the value of the skin.—San Francisco Chronicle.

The speed of the fastest railway train is only a little more than one-half the velocity of the golden eagle's flight, that bird often attaining a speed of 140 miles per hour.

Electricity and Explosives.

No stronger evidence of the safety of electric lighting installations can be afforded than the fact that a great many explosives factories are now being lit by electricity. It is obvious that in a building where the preparation of inflammable or highly explosive substances is carried on very special care should be taken in order to avoid even the smallest risk, and powder manufacturers now find that the electric light adds a considerable percentage over gas to the chances of safe operation. While electricity increases the safety of this branch of industry in one way it lessens it in another. There is a great deal of free electricity thrown off in various stages of manufacture, and the disposition of this, so far as it can be removed out of harm's way, is a serious question.

The charge of a powder cake press with ebonite plates may practically be considered as an electric pile, and a large amount of friction or electric influence from outside may cause a sufficient electric charge to give off sparks. Several undisputed cases of this kind have been known. Another source of danger from friction occurs during the glazing, rounding and sieving of gunpowder. The powder is subjected to a constant rubbing of its particles against each other and during the glazing especially there is danger of electricity accumulating.

Therefore precautions should be taken in order to convey away any charge that may accumulate in the glazing barrels. —New York Telegram.

The Meaning of Blunders.

Examining into the matter of blunders, particularly in tracing the course of the "mistakes, well meant," in our own lives, when we look back upon them with the cooler understanding of later years we are constrained to confess that the "mistake" must have been intended to be there, as well as the correct action, because the plan of our development has included both. Continuing to study clearly and deeply we must acknowledge that the mistakes and errors—nay, the very sins—when forsaken and forgiven, have helped the soul upward; that all have worked together to accomplish the result sought; that they must have been put there and meant so to be, and so that our "blunders" were not blunders at all, but although we sowed and watered often amiss there was always some increase given which achieved the good we aimed at, but failed to reach.

And deepest of all we see that the divine love, which saw the end from the beginning, bore with a tender compassion to look upon our struggles, our weeping, our disheartened sighs. Ah, infinitely greater it is, but like to the love we bear our own children, which is so deep and true that we endure to treat them harshly, and with seeming cruelty behold their tears, knowing surely that one day they will comprehend all the kindness.—Harper's Bazar.

The Localities of the Birds.

All our permanent residents among the birds, both large and small, are comparatively limited in their ranges. The crow is nearly as local as the woodchuck. He goes farther from home in quest of food, but his territory is well defined, both winter and summer. His place of roosting remains the same year after year. Once, while spending a few days at a mountain lake nearly surrounded by deep woods, my attention was attracted each night, just at sundown, by an osprey that always came from the same direction, dipped into the lake as he passed over it for a sip of its pure water and disappeared in the woods beyond.

The routine of his life was probably as marked as that of any of ours. He fished the waters of the Delaware all day, probably never going beyond a certain limit, and returned each night at sundown, as punctual as a day laborer, to his retreat in the forest. The sip of water, too, from the lake he never failed to take.

All the facts we possess in regard to the habits of the song birds in this respect point to the conclusion that the same individuals return to the same localities year after year to nest and to rear their young.—John Burroughs in Century.

A Live Snake in a Woman's Arm.

There lives, or did quite recently, near Columbia, S. C., a woman afflicted in a manner that makes one's flesh creep to think of it. For more than the third of a century she has carried a live snake under the skin of one of her arms. How the reptile first found lodgment in its queer situation is as much of a puzzle to the old lady as it is to the hundreds who have visited her for the purpose of viewing the long welt where the unwelcome creature lies encysted.

When the lady first noticed the bow shaped ridge on her arm it was of about the diameter of a pin, and less than two inches in length. During the many years that it has safely nestled in her flesh it has grown from a mere thread to a snake a foot long and as large as a lead pencil. The eyes of the creature are plainly visible through the skin, and the scales can be felt by rubbing the finger along the welt formed by its body.

Physicians pronounce it a most remarkable freak, and have endeavored, without success, to prevail upon the old lady to have it removed.—Philadelphia Press.

Personal Barometers.

A good many old housewives still remain their own weather prophets, and as a consequence one of the most popular of familiar weather sayings is, "When rheumatic people complain of more than ordinary pains in their joints, it will rain." Another homemade barometer is the tender corn or sensitive tooth.—Philadelphia Times.

A Frank Statement.

"Can I—dare I ask that little hand for my own?" pleaded the smitten young man.

"It is only—ah—second hand," replied the young widow deprecatingly.—Exchange.

SUPERSENSITIVE.

People Who Think They are Caricatured by Author and Actor.

HOW SOTHERN ANGERED A COUNT.

A Duel With Cannon Proposed to Satisfy Wounded Feelings.—Offended by Wilkie Collins.

One of the most popular entertainers the world has seen suffered greatly, owing to the persistence with which people would see likenesses to themselves in the creations of his fancy. If he chose the name of Brown, Jones or Robinson for one of his characters, some real cognomen wrote to him, complaining bitterly against his "satirizing a class," and then pointed out certain of their distinctive peculiarities which were, they alleged, burlesqued.

On the other hand, if he invented, as he thought, an uncommon name, somebody wanted to know how it was he selected him for ridicule. Why, asked the indignant writer, did not the entertainer choose some common name, such as Brown, Jones or Robinson, and not that borne by him? It was useless to point out to such people that the entertainer had never heard of their existence even. Each of them firmly believed that he was the original of a certain character.

SOTHERN AND JOANNES.

Sothern again; what a curious experience was his! The actor, when playing in America as Fitzaltamont in "The Crushed Tragedian," one morning was called upon by an "interviewer," who told him that a Count Joannes, once an actor of the old school of which Sothern made fun, had brought a suit to stop the performance of the piece on the ground that the comedian's makeup maligned him and burlesqued his identity. Sothern thought the affair was a joke, but when the reporter assured him it was serious he said:

"If I have to go down to that court to show cause, by George! I pity the man that brings me. I won't let him rest while his worried life clings to him. He shall get telegrams and postcards from this time on forever. Do about it? Why, I shall appear, of course."

Presently another reporter was announced. Sothern again professed never to have heard of the suit brought against him.

"How would you fight it if the count should challenge you?" asked the press man.

"I should prefer the date to be the 1st of April, and although I haven't very fully considered the question, I think the weapons should be cannon. Yes, on reflection, I am sure I should insist on those cannon that discharge 170 shots a minute. He should sit upon one of those engines and I upon another, and we should continue to discharge them until there should be no remnant of either count or Sothern."

All this and much more was published under startling headlines on the following morning. Count Joannes, however, was terribly in earnest, though, of course, nothing came of his suit except a capital advertisement, of which full advantage was taken.

ANGERED BY WILKIE COLLINS.

Of modern authors Wilkie Collins decidedly had the most remarkable series of encounters with the class of people who identify themselves with purely imaginary personages. "A bourgeoise of Paris," he himself has told us, "reading 'The Woman in White' in a French translation, wrote to say that he had flung the book to the other end of the room on discovering that Fosco was an absolutely perfect likeness of himself. He naturally insisted on receiving satisfaction for this insult, leaving the choice of swords or pistols to me, as the challenged person. Information on which he could rely had assured him that I meditated a journey to Paris early in the ensuing week. A hostile meeting might, in such circumstances, be easily arranged." Arrived in Paris, Wilkie Collins looked for his honorable opponent in vain.

Again Mr. Collins invested a character who was so careful about the quantity of his food that he weighed it in little scales at table. Shortly after the publication of the novel a gentleman called upon the author.

"You have no right, sir, to caricature me!" exclaimed the caller to the astonished novelist; "I weigh my food in little scales, sir. Here they are, sir. I always carry them about with me by the advice of my physician; but is that any reason why I should be held up to ridicule, sir?"

And the gentleman refused to be pacified, though Mr. Collins protested that he had never before heard of such a habit. On another occasion a reader of "Armadale" called upon him and upbraided him for putting his house into print. The description, it is said, was exact, although the popular writer had never seen the place.—Cassell's Saturday Journal.

The Tale of Bluebeard.

The tale of Bluebeard is familiar to every child, but many have speculated on the original of this bogey, merciless tyrant. Some say it was a satire on Henry VIII, of wife killing notoriety. Dr. C. Taylor thinks it is a type of the castle lords in the days of knight errantry. According, however, to a popular belief, Charles Perrault, the French author of this fascinating story, founded it on the history of a certain Giles de Retz, lord of Laral, who during his lifetime was known by the name of "Barbe Bleu," or "Bluebeard," on account of the peculiar bluish black hue of his beard. This lord had a mania for sorcery and magic, and was accused of murdering six wives. He was ultimately strangled and burned in 1440.—New York Ledger.

Sunday School Superintendent—Tommy, can you tell me why the lions didn't eat Daniel when he was in their den?

Tommy—I guess it must er b'en, mister, 'cause he was like you an hadn't any meat on him.—Boston Courier.

A GREAT HELP TO TRAVELERS.

The Reception Rooms for Visitors to the World's Fair.

The terminal depot for all excursion trains to the Chicago centennial exposition is destined to be a thing of beauty and a joy as long as it stands. It will be the largest central station in the world, and fifteen great railroad companies will run their passenger trains into it. Twenty-five trains can, if necessary, unload their passengers at the same time. There will be ample accommodations for 20,000 people, and in the main hall twenty-four great clocks will simultaneously tell the time in every great city in the world.

THE TERMINAL DEPOT.

When the visitor leaves his car and passes through the hall to the quadrangle at the east entrance it is there that the finest view of the magnificence of the fair is presented. Directly facing is the Administration building, to the left the Transportation and Mines, and in the distance the Electricity and Manufactures building, while on the right will be seen Machinery hall in all its ornate glory. Should it be necessary to wait in the station, elevators and stairways will conduct visitors to the second floor, on which will also be rooms for the comfort of passengers. A restaurant will be on the second floor, and a space provided for those who desire to bring their own provender in lunch baskets. There will also be smoking rooms, reading and writing rooms and a union ticket office. The third floor will be reserved for railroad offices.

The plan is that of Architect C. B. Atkinson, of the construction department of the fair, and in general style the building is Corinthian, with touchings of Romanesque. To those who have a map or general idea of the exposition ground it is sufficient to say that the station is to stand just back of the Administration building and to face east and west. The main part is to be 150 by 300 feet and the annexed passenger shed in the rear will be 672 feet long and 150 feet wide. In the station proper Mr. Atkinson thinks he has realized what has long been a dream with him—a railroad building combining all the conveniences with the beauty of a Greek temple or mediæval cathedral.

The entrance will be from the facade formed by the Mines, Administration and Machinery buildings, and consequently at the east side. There will be three of those entrances, which will lead through the grand vestibule into the main corridor, and thence to the main hall, which will be 60 by 200 feet. The height of the ceiling will be eighty feet, and the form of the hall a grained arch of the pure classical type. It is on the four walls of this hall that the twenty-four clocks will be placed, with the name of the city emblazoned over its clock. Thus a New York, London or Hong Kong visitor can tell at a glance just what the time is at his home. In the center of the hall will be the bureau of information, designed to furnish the wayfarer with almost anything necessary to his comfort. In it will be employees conversant with nearly all languages, so that no matter in what tongue the inquiries come they will be intelligently answered. Add the various rooms for convenience and the towers and external finish, and it will be seen that this is to be the finest central passenger station in the world.

SOME VALUABLE STATISTICS.

Although They Have to Do with Crime They Are of Interest to All.

Every reader knows what absurd conclusions as to the social and moral condition of a country are often drawn from imperfect statistics, but Dr. William Duffield Robinson, physician for ten years to the Eastern penitentiary of Pennsylvania, has figured some facts down to a fine point. He declares that the sentences to the penitentiary may be taken as fairly representative of the total amount of crime prevailing in the entire district from which it receives prisoners, and that the extent of territory and period of time covered by the calculation make the deductions a fair index of the criminal phenomena of the whole country.

He argues that reformation is practicable from the fact that one-third of the criminals are between twenty and twenty-five years of age. He finds that men of sixty are about eight times as trustworthy as men of twenty-five, or, to put it in another way, of eight men who are criminals at twenty-five seven will be law abiding citizens at sixty. A terror of the law has brought about the reformation in most cases, he thinks.

It is true that an overwhelming majority of criminals are young, but does it follow that most of them reform as they grow older? Is it not likely that they die twice as fast as other men? His division of crimes as to the age when they are most common is very interesting. He concludes that personal assaults, including assault and battery in all forms, mayhem, poisoning and sensual crimes, are steadily on the increase and forgery and counterfeiting on the decline.

Wide Ranges of Temperature.

There is a locality in Montana which has the greatest range of temperature of perhaps any spot on earth. That place is Havre, which is situated near the Canadian line. The town is 12,000 or 15,000 feet above sea level, but despite that the thermometer registers as high as 90 degs. in the shade, and the temperature the next day would perhaps drop to 32 degs. The sudden changes are accounted for by the fact of the town's peculiar location. It is on the western slope of the Rocky mountains, and so situated as to catch the full force of a hot wave peculiar to that region. What creates this hot blast or where it comes from the scientists of the government weather bureau have for years been patiently endeavoring to determine. They know it is a scorcher, and that is all they know about it. It is very similar in its queer antics to the simoom of Sahara, and is dreaded almost as much as that monster of the burning desert.

He Earned the Money.

A Captain Blondell, of Oxford, Ala., offered twenty-five dollars to any one who would get into a boat and allow it to be blown up by dynamite, so that Blondell might show his life saving methods. A young man named Neely accepted the offer, and was blown about forty feet into the air unhurt, but on his return to the water's surface he alighted on the fragments of the wreck and received a fractured leg and other injuries.

ASSAYING GOLD.

The Complicated Method of Detecting Impurities in Gold Bricks.

SCENES IN A CHEMIST'S LABORATORY

Extracting Silver From the Precious Metal—Following Ingot Gold Through Several Stages.

About 9 o'clock in the morning two men entered the Mitchell building, and getting into the elevator mounted to the sixth floor and went straight to the rooms of the United States assay office. One of them carried in his hand a bundle the size of a thin brick, wrapped in paper. He laid it down on the counter in the office and slowly unwrapped the bundle. It was a gold brick. The clerk took the bullion, and stepping across the floor placed it in one of the pans of a large pair of scales. Then he closed the office windows and placed some weights in the other. When it balanced nicely he went to his desk, took out a blank form and wrote to the effect that 400 ounces of gold bullion had been received from the St. Louis Smelting and Refining works at the United States assay office, to be assayed. This was signed by E. C. Jewett, the assayer in charge, and the men went away. This is the first step the government takes toward obtaining precious metal for coining purposes.

It is extremely interesting to follow this process of assaying through all the steps until the value of the gold is determined and the government's check given for it.

While Clerk Rex was filling out the receipt Mr. Jewett explained the marvelous delicacy of the scales. Their weighing capacity is 5,000 ounces, and it is possible to indicate by them a difference in weight of one gram. To illustrate so that this may be easily grasped, two heavy men could be placed in one of the pans, and by removing a pin from the coat of one of them the balance would be changed. Still it would be difficult to obtain the exact weight of the men, owing to the constant change in the men's bodies by perspiration and other causes.

After the bullion's weight was determined on these scales it was taken to the furnace room and placed in a blacklead crucible. This was set on a firebrick resting on a grate and a fire built around it. The fuel used is a mixture of anthracite coal and charcoal. After an hour's melting, during which time it was frequently stirred with a plumbago poker, to which gold does not cling, a sample of the metal was dipped out with an ordinary clay pipe and poured into a small mold. The assay is made from this, as it takes so much longer for the larger quantity to cool. A piece of the sample was cut off, pounded and then rolled through a roller of tool steel, looking something like a clothes wringer, to make it thin. When this was done, Herman, the German who aids the assayer in his work, handed the thin golden strip to him and then went back to the furnace room to pour out the molten thousands into the big mold.

Mr. Jewett cut the strip into small pieces, and then, forming little lead cornucopias of uniform weight, dropped into two of them 500 milligrams (one sixteenth of an ounce) of accurately weighed gold to be assayed. Into two others he put the same quantity of absolutely pure gold. Enough silver was then added to make the proportion of silver to gold two to one, as this proportion is necessary in order that the gold should separate from the silver when boiled in nitric acid.

There is in all gold a certain amount of silver, and it is owing to its presence and certain other foreign substances that the color of gold varies. The idea that gold found in California or Australia is of such a color because found there is a mistaken one.

After the silver had been added the leaden cornucopias were squeezed up and each one placed in what is called a cupel. A cupel is a little cup made of sheep bones burned to ashes, ground fine, moistened and molded into a mold an inch long, an inch in diameter, with a cup shaped depression at one end. The cupels were placed in a small furnace with a temperature of about 1,100 degs. centigrade, and when heated to a white heat the little metal chunks were laid by the aid of tongs one in each cupel. They melted, sputtered and bubbled, and then began to grow smaller. In about ten minutes they were taken out and all the lead and foreign substances had been absorbed by the cupel, leaving only the noble metals in little round balls. When these were boiled in nitric acid the silver passed into nitrate of silver and the gold was left in its pure state. By this was found the ratio of pure gold in the bullion.

The weighings of pure gold are used as a check to any particular conditions of heat, etc. The assayer knows the constitution, weight and specific gravity of the pure gold used. When it is weighed after the heating process, if it has changed its weight, it is fair to suppose that it is owing to the conditions of heat or strength of acid, and that the same influences have been at work on the assay gold. By allowing for this in the assay gold a true result is reached.

The next step was to find the weight of the gold and silver together. The lead cornucopias were again filled with certain weights of the pure and assay gold, but no silver added. When melted in the cupels the baser metals disappeared as before, and the gold and silver were left together. By subtracting from the weight of gold and silver the weight of the gold, the exact weight of the silver was obtained. Of course the proportion is usually very small. If the amount is not sufficient to pay for extracting, the government does not pay for it, and charges nothing for extraction.

The entire amount of gold in the bullion is found by multiplying its weight by the proportion of the gold. This is reduced to standard or coin gold by multiplying this amount by ten and dividing by nine, as standard gold is only 90 per cent. fine, and the depositor is paid by the government $8.60 per ounce of standard metal, equal to $20.67 for fine gold. The assay fee is one-eighth of 1 per cent. of the total value of fine gold, the melting fee is one dollar, and the alloy charge about one cent on $100, and after this is deducted the assayer hands a check to the owner of the gold. The entire time occupied by this complicated operation was from 9 a. m. until 1 p. m., only four hours.—St. Louis Republic.

Some of the machines for making matches which we use in these days make 200 revolutions a minute each and turn out about 2,500,000 matches daily.

Henry IV of England died of "fits," not without suspicion of poison. His last few years were spent in constant fear of assassination.

THE CHAMPION STEPMOTHER.

She Has Made a Life Work of Marrying Widowers and Rearing Their Children.

By her sixth marriage the Widow Gaddes, as she has been known for five years past, becomes the stepmother of forty-seven children, the step-grandmother of fifty-two, the step-great-grandmother of eleven and the step-great-great-grandmother of four.

The Widow Gaddes was born Barnes. Her first husband was George Walker, a widower with five children, all of whom she continued to care for after her husband died, and she in time became the wife of George Ottender, who was also a widower. He had six children, to whom she became a second mother. When she became the Widow Ottender, which she did in less than a year, the five Walker children and the six young Ottenders continued living with her in peace and harmony, which was not disturbed when the Widow Ottender became the wife of Charles Gregg and a mother to his nine motherless children.

A good many of the children of these different families had grown to be men and women by this time, and, when four years after she became the wife of Charles Gregg she became his widow, several of them had married and started families of their own—some of the Walkers marrying Ottenders and some of the Greggs marrying both Walkers and Ottenders—so that when the Widow Gregg became Mrs. Jehiel Fitch her husband's seven children found only one of the Walker offspring, three Ottenders and five Greggs claiming a share of the attention of their new mother.

In course of time the Fitch contingent of stepchildren was reduced by marriage until there were only three of them left as a charge in the family, and by these marriages the number of unclaimed Greggs was reduced to two, the Ottenders to one, and the Walker stock was entirely wiped out. Thus were Mrs. Jehiel Fitch's family cares made so light that she felt unbearably lonesome when she at last became the Widow Fitch—so lonesome, indeed, that in less than a year she ceased being the Widow Fitch and became Mrs. Solomon Gaddes and the willing stepmother of Solomon Gaddes' seven children. The oldest of these children was fifteen, the youngest two, and as Mrs. Gaddes was now fifty and her latest husband ten years her junior she had virtually started in to raise another entire family. This became a literal fact, for in less than a year she was the Widow Gaddes, with the whole seven of the new stepchildren, the oldest not old enough to support herself, on her hands.

She kept them together, but two of them having married and gone away recently—nearly six years having passed since there became a Widow Gaddes—and the last one of the Greggs, the Ottenders and Fitches having also set up homes of their own, the Widow Gaddes felt so lonesome again that she took it as an providential intervention when John C. Callan asked her to take charge of him and become stepmother to his thirteen children, although she regretted that only three of these were to come under her maternal protection, and each one was older than herself.

Her new husband is twenty-five years her senior. Although he brings her no young children, as all of her other husbands did, she consoles herself with the reflection that he has thirty grandchildren, many of them small, eleven great-grandchildren and four great-great-grandchildren, some of whom circumstances may throw upon her personal care.

Mrs. Callan, with all her husbands, has never had a child of her own, but thirty of her stepchildren grew up under her care. Only one child died among all the five families she reared. The first time she married she lived on a farm she owned, but moved from it to her husband's. The next marriage took her from that farm to her second husband's, and so on, each marriage removing her to a new farm, the whole five of which she now owns.—Norwich (Pa.) Cor. New York Sun.

What Fire Has Done.

Hundreds of arts would be impracticable and almost unthinkable without the aid of fire, but the fact remains that the total result of fire using civilization has left vast areas of our earth worse than it found them. In southern Europe, northern Africa and southwestern Asia an aggregate of 10,000,000 square miles were 6,000 years ago a more inviting abode for beings of our species and more capable of sustaining animal life in all its forms than they are at present. Bridges, tunnels, roads, viaducts and cities were scarce, but where there are hopeless deserts now there were rivers, forests and abundance of game.

The idea of the dies irae that shall engulf the world in a sea of flames was perhaps after all not wholly absurd. One-third of the habitable earth has actually been ruined by the action of fire. M. Camille Flammarion computes that the bodies of human beings slain in battle, if erected in the form of a column, would reach up to the moon. The timber of the trees destroyed by forest fires in the course of the last sixty centuries would form a massive tower of the same height.

The work of human labor destroyed during the same period in the conflagration of cities and villages would form a pile as high as Mount Hamilton. The treasures of art thus annihilated in Rome alone would stock a thousand museums.—San Francisco Chronicle.

Why Mountain Tops Are Cold.

The decrease of temperature experienced on ascending to the tops of the highest peaks of mountains results from various causes. To say that it is "because of the lofty altitude" is not sufficient. To begin with, the greater rarification of the air, which is always encountered in upward travel, necessarily diminishes the absorbing power of the air. The temperature of the atmosphere is greater near natural sea level because such air transmits the rays of the sun without decomposing them, and cannot therefore be heated by them before reaching the surface of the earth, where decomposition sets in and frees the heat contained in the sunbeam.

It is a well known philosophic fact that the air receives the principal portion of its heat by what is known as "radiation" from the earth, and the greater the distance from average sea level the less must be the power of such heat as a warmth giving quality. Another, and perhaps the chief reason, is that the vapor screen which so effectually tempers the climate of this country and prevents the rapid dispersion of the heat from the warm earth diminishes as we ascend a mountain and allows the heat to be freely radiated, leaving only its opposite behind.—St. Louis Republic.

Slow to See the Joke.

Speaking at a St. Andrew's society dinner Chauncey M. Depew remarked that if his jokes were not always appreciated immediately by the Scotsmen, by the time the next yearly dinner came around they had always seen the point. "I don't think that's a very funny thing to say," growled a hard some old Scot who was sitting beside me. "Oh," said Mr. Depew, "that's all right. You'll see the fun in it a year from now."—New York World.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, FEBRUARY 17 ..... 1893.

The Senate Committee appointed to investigate the troubles at Homestead, in their report condemn the employment of armed men by Frick, manager of the works. A very few such lessons as the working men at Homestead taught the hired cut throats would put an end to their employment. For any great corporation or any individual to hire bands of armed mercenaries and employ them against the people is treason, and ought to be punished as such. If this act of the Carnegie Company should be tolerated they and others might combine their forces and defy the United States government. The Pinkerton bands are mostly foreigners, knowing little and caring less about American institutions; it will be a patriotic duty to kill them every time they raise their hands against Americans.

No more glaring and shameful example could be given of the stupefying effect of party politics than is seen in the action of prominent men in reference to the appointment of Judge Jackson to the Supreme Court of the United States. If any man is worthy to be taken as a representative Republican, surely that man would be President Harrison. Judge Jackson is conceded by Republicans to be an able and upright Judge, every way qualified for the high office. And yet leading Republicans make an outcry against the President for making the appointment. Party zeal has so blinded these able men that they would make partizan fealty superior to legal ability and integrity as a qualification for the high office of a Judge of the Supreme Court. To these men party is greater than country, party politics more than patriotism.

There is plenty of room for pruning on the claims now before the Legislature for appropriations. Not only is there room for reductions, but such must be made, or an increase of taxation would be necessary. The total of the amount asked for is a good deal more than fifteen millions of dollars, while the estimated revenue for the next two years is but a little over twelve millions. One direction in which great saving can and should be made is to abolish a lot of expensive and useless Boards and Commissions. Most of these were only created to make places for political tools who never earned an honest dollar, and the sooner these leeches are compelled to let go and turned adrift to work for a living, go to the poor house or to jail, or starve, the better for the people

One of the fool bills introduced at the present session of the Legislature—there are many such at every session—is one requiring every hunter to pay a license of twenty five dollars before he can hunt in any county but that in which he lives. This may be intended to confine the hunters of San Francisco to practice their skill only in China town. Such a bill if it should become a law would be a dead letter; there is not a Justice of Peace in the State who would punish a boy from another county for crossing the line to shoot jack rabbits or quail.

Another bad bill in the Legislature is in reference to wire fences. If this bill should become a law we would be forced to take down all our roadside fences in Inyo County. We are too poor to replace all these wire fences with board fences, as the bill requires, and the result would be we could not have any road side fences. The representative from Inyo in the Legislature will doubtless protect the interests of his constituents when these measures are under consideration.

Royalty's Reception Room.

The grand reception room at Windsor castle is at present in the hands of the workmen, who are executing a process of redecorating and regilding. This magnificent chamber is one of the state apartments, but last year it was used as a greenroom for both opera comique and grand opera, when various companies by royal command gave entertainments in the Waterloo chamber.

There are six superb pieces of old Gobelin tapestry on the walls, illustrating the story of Jason and the golden fleece, and in the fine gothic window which overlooks the home park and Eton college stands a huge vase made entirely of Russian malachite, which was presented to the queen by the Czar Nicholas of Russia. The ceiling and the cornices are richly carved and gilded, and the room is lighted by four enormous candelabra of ormolu and cut glass.—Paris American Register.

Archdeacon Denison, who is two years older than Mr. Gladstone, has sent to the press a sequel to his "Notes of My Life," published in 1879, in which he will give a summary of the later period of his eventful career.

A FAIR ATTORNEY.

Alas! the world has gone awry
Since Cousin Lillian entered college,
For she has grown so learned I
Oft tremble at her wondrous knowledge.
Whene'er I dare to woo her now
She frowns that I should so annoy her,
And then proclaims, with lofty brow,
Her mission is to be a lawyer.

Life glides no more on golden wings,
A sunny waif from El Dorado;
I've learned how true the poet sings,
That coming sorrow casts its shadow.
When tutti frutti lost its spell
I felt some hidden grief impended;
When she declined a caramel
I knew my rosy dream had ended.

She paints no more on china plaques,
With tints that would have crazed Murillo,
Strange birds that never plumed their backs
When Father Noah braved the billow.
Her fancy limns, with brighter blush,
The splendid triumphs that await her,
When in the court a breathless hush
Gives homage to the queen debater.

'Tis sad to meet such crushing noes
From eyes as blue as Scottish heather;
'Tis sad a maid with cheeks of rose
Should have her heart bound up in leather;
'Tis sad to keep one's passion pent,
Though Pallas' arms the fair environ;
But worse to have her quoting Kent
When one is fondly breathing Byron.

When Lillian is licensed at the law
Her fame, be sure, will live forever;
No barrister will pick a flaw
In logic so extremely clever;
The sheriff will forget his nap
To feast upon the lovely vision,
And e'en the judge will set his cap
At her and dream of love Elysian.
—Samuel M. Peck in San Francisco Argonaut.

Scott Enjoyed Being Lionized.

Sir Walter Scott is an example of a great man, who, so far as we can judge, enjoyed paying the penalties of his greatness, even in his hour of death. He was great enough, but then he was that kind of a man, and the circumstances among which he lived were favorable. That was before the day of the penny post, of the electric telegraph, of railways and of the interviewer, and in his prime he lived at Abbotsford, which is equivalent nowadays to saying that he lived at Joppa. He seems to have been singularly free from the penalties of greatness, which have enormously increased since the Wizard of the North went home, and such of them as came in his way he seems to have heartily enjoyed.

He appears now and then to have relished being turned into a rare show, and to being pointed at wherever he went as Walter Scott. Indeed this being pointed at seems to have been relished by many men whose greatness was undoubted. Thackeray seems sometimes almost to have resented not being pointed at.—All the Year Round.

The Story of "Maud."

Few people knew Tennyson and his peculiarities better than did his neighbor Mrs. Cameron, the well known photographic artist, who made a fine series of character portraits by photography to illustrate Tennyson's poems. The history of her search for and selection of models for these characters is interesting. Maud was a starving Irish girl, who served her both as model and waiting maid.

The sequel to the story of Mrs. Cameron's Maud is too pretty not to be given.

When Mrs. Cameron held her exhibition in London, Maud was sent up with a chaperon to explain the pictures to the public. A gentleman came in one day, and after having asked several questions left. A year or two afterward he passed into the Indian civil service, but before starting for the east he went down to Freshwater and knocked at Mrs. Cameron's door, begging for Maud's hand. The beautiful Maud was willing, and they were married.—New York Tribune.

Travel in the East.

How wonderful and ever present is the contrast in eastern travel to all life and movement at home. No heavy carts and lumbering wagons jolt to and fro between the farmyard and the fields. No light vehicles and swift equipages dash past on macadamized roads. Alas! there are no roads—and if no roads, how much less any vehicles or wagons. Thatched roofs and tiled cottages, lanes and hedgerows and trim fields, rivers coursing between full banks, beyond all the roar and sudden smoky rush of the train—these might not exist in the world at all, and do not exist in the world of the Persian, straitened and stunted, but inexpressibly tranquil in his existence. Here all is movement and bustle, flux and speed; there everything is imperturbable, immemorial, immutable, slow. —"Persia and the Persian Question."

A Boy Prima Donna.

First Boy—You ought to come to the concert our music teacher is goin to give.

Second Boy—You goin to be in?

"Yep. I'm one of the primmer donnas. We're goin to give a cantata."

"Wot's that?"

"Oh, it's all about sunshine and storms and picnics and harvesters and all sorts of country things. It's great."

"Do you sing all that?"

"N-o. I'm only in the first scene, 'Early Mornin on th' Farm.'"

"Wot do you do?"

"I crow."—Good News.

The glowworm lays eggs which, it is said, are themselves luminous. However, the young hatched from them are not possessed of those peculiar properties until after the first transformation.

Elk hunters in western Washington are so unsatiate in their greed for antlers and skins that the extermination of the elk in the forests of that section of the state is greatly feared.

Six brothers of the Frost family at Kansas City own the following odd lot of names: Jack Frost, Winter Frost, White Frost, Cold Frost, Early Frost and Snow Frost.

At Dundenong, Australia, there is a blue gum tree which has an estimated height of 450 feet. It is believed to be the tallest tree in the world.

General Philip Kearny left an arm in Mexico, and was known among his men as "One Armed Phil."

The Wearing of Rings.

"It is a constant surprise to me," said a man the other day, "that a woman with a palpably ugly hand will call everybody's attention to it by hanging her fingers with sparkling rings. A certain intuitive vanity that is common to men and women alike ought to teach her better. Freckles, big knuckles and ugly or ill kept nails are all accentuated by showy rings. I've seen a woman whose rough, red hand must be her ever present thorn in the flesh load it with big diamonds, the white sparkle and dull gold setting of which intensified the redness and coarseness of the fingers they encircled. I long to tell such a one to put her jewels at her throat, on her arms, in her hair—anywhere but on her hands.

"In contradiction to this I recall a woman of my acquaintance who has a small brown hand like a gypsy's. She has evidently studied its limitations, for she wears never more than one ring, and that always of odd design. I've seen her wear a black pearl sunk in dull silver, a hoop of carbuncles or an old English ring of hammered gold, but she oftenest wears a superb alexandrite that shows black in some lights and deep seagreen in others. I always applaud her wisdom in banishing pearls, emeralds and diamonds or any conventional styles from her ring box."—Her Point of View in New York Times.

Weed Maps in Germany.

The Germans have some educational ideas which we in this country have borrowed with profit, and there are still others which we might be wise to adopt. Among them no doubt are the wall maps of different species of pestiferous weeds, which hang in schoolrooms where the children can see them as long as they go to school.

A practical idea underlies the displaying of these maps. It is well known that farmers are prone to treat all weeds alike, and hardly to observe any difference between them, whereas the natures of weeds differ as much as the natures of other plants do, and the sort of treatment which will exterminate one will sometimes increase and multiply another.

It is important therefore that the farmer and gardener should understand the weeds which they are trying to exterminate.

It is here that these German wall maps come in. They show colored pictures of the most pestiferous weeds, in all stages of growth, and also the ways in which they scatter their seeds and propagate themselves. By learning them thoroughly, through seeing them day by day on the walls, the child grows up with a knowledge of the best way to exterminate them.—Youth's Companion.

Liszt's Gypsy Protege.

The great pianist, who was passionately fond of the gypsies, once endeavored to educate and civilize a gypsy lad, but failed ignominiously. The wild spirit of the nature of countless generations could not be tamed, and though as a child liking the novelty of the new life the young gypsy submitted, but with a bad grace, to the instruction of the teacher Liszt provided, he soon broke loose, and became arrogant and inordinately conceited. However, his untutored playing was excellent, and he became the pet of those foolish women in society who are ever on the lookout for some new craze to feed their flighty craving after variety. Soon the child of nature pined for the freedom of the fields and savagery, and so he went. He ran away three times and was brought back, and then Liszt let him go for good.

In after years he turned up again in one of the numerous wandering gypsy orchestras, but he was only then a mediocre player—instruction had actually killed the real ability that as a child he had possessed. So was shattered one of the dreams of Liszt's life; he learned that a savage man could not be tamed quite so easily as a savage beast, as many had discovered before him.—Belgravia.

A Delicate and Dangerous Treatment.

A certain cure for freckles is carbolic acid, and its effects are not only certain, but quick. The skin must first be washed thoroughly in warm water, and then dried with a soft towel. Each freckle, or bunch of them, must be dealt with separately. Stretch the skin with the fingers, and touch the freckle with a drop of pure carbolic acid. Allow this to dry on the skin, and in a few minutes it will burn and grow white. The skin thus burned will fall off in a week or so, and leave a new rosy white skin in place of the freckle. To prevent burns from being very painful and from leaving a bad scar on the skin, the blisters formed should be pierced with a silk thread soaked in sublimate solution.

Leave the thread in position while the outside of the blister is covered with a 10 per cent. solution of iodoform vaseline. Fresh salve should be applied daily, and no pain will be experienced, and severe contraction and wrinkling of the skin after the wound is healed will be prevented.—Yankee Blade.

The Effort of New York Organ Builders.

What the New York organ builders tell me most emphatically is that organs are now made in this country from an art standpoint rather than a trade standpoint. They have given up trying to make little Gothic cathedrals of the organ cases. "Spend you money on the works," they tell their customers, "the plain case is the handsomest case." Most modern American organs have little or no woodwork above the feet of the front pipes.—Cor. New York Times.

Tennyson and America.

Tennyson was extremely eager to go to America, and touching this point a story is related to the effect that Barnum offered him an enormous sum to go there, though probably not as one of the attractions of the "greatest show on earth." "All you have to do," said Barnum, "is to stand on a platform and have your hands well shaken." The poet, however, declined the tempting offer.—Cor. Boston Herald.

The Sultan of Morocco.

It is generally stated and believed that the sultan of Morocco, like the czar, is at once the temporal and the spiritual head of his people, but this is not quite true. Though one of his many titles is that of "guardian and commander of the true believers," this authority is very shadowy—at least as far as the Kairouin is concerned—and the sultan had an opportunity of judging some three years ago of the danger that might result from his interference in purely church government. For some reason or other he commanded that the mokaddum, or chief trustee of the university—an office which has been hereditary in one family since the death of the Tunisian Fatma—be dismissed.

This was done, but within three days there arose such an outcry and hubbub at the sultan's attempt to exercise unwonted authority in church matters that he very wisely bethought him to announce that in a dream the apparition of his sainted father had appeared to him and requested him to reinstate the mokaddum. The mokaddum was reinstated, and the sultan has never interfered again in the affairs of the university.—Fortnightly Review.

Injuries from Carbolic Acid.

Warnings are given in a German medical journal against the injury to skin, and even bone, which may result from the long continued use of weak—say 3, 2½, or even 2 per cent.—carbolized applications, especially upon peripheral portions of the body, such as the fingers. This effect, it is asserted, is due in a small measure to the action of carbolic acid upon the vasomotor system, but in the main to its destructive effect upon the red and white blood corpuscles.

This induces, partly in a mechanical and partly in a chemical way, stasis, first in the capillaries, and, if the action of the drug be continued, then in the larger veins and arteries, with the result that the nutrition of the part is interfered with, and the removal of harmful substances hindered, the maceration of the epidermis caused by the acid favors evaporation, so that the gangrene is a dry one, a mummification, as it were.

An Anecdote of Renan.

Renan while traveling alighted at Naples. One morning a servant of the hotel came to him and said that as she had heard the preacher at the cathedral make use of his name many times, she would be thankful if he would choose for her a number in the lottery about to be drawn. "If you are a saint," said she, "the number is sure to be a good one; if you are a devil, it will be still better." Renan smiled and chose a number, but he never knew if the servant was lucky. —London Globe.

A Misleading Expression.

In a street car the other day two women were talking of a sick friend when a little girl sitting at the side of one of them interrupted with: "Mamma, what is the point of death? Will it hurt Mrs. Locke?" So many such expressions are widely misleading to the groping, literal child mind.—New York Times.

The Dog Didn't Like His Snore.

In hunting for evidence of a dog fight Sunday the officers learned that one Herbert Sprague, a stevedore, had been bitten by a canine. Investigation shows that Sprague went to bed Saturday night with a bull pup. Sprague snored, and this disturbed the dog, so he scratched his owner's face to wake him. Sprague retaliated by cuffing the canine, whereupon the bull fastened his teeth in the man's nose and then shook him, sadly lacerating the member. Sprague finally broke the hold, disabled the dog with a chair and then got a neighbor to shoot him. The nose will recover, but looks bad.—Bangor Cor. Lewiston Journal.

The Congressional Funeral.

On the recent congressional trip to Chicago from Washington, a young man accustomed to hilarity began to weary of the staid decorum of the excursionists and to long for something wild and woolly.

"Great Scott," he finally exclaimed to a veteran member, "this is like a funeral train."

"Is it?" said the congressman, with a significant smile; "well, I guess you don't know much about one of our funeral trains."—Detroit Free Press.

How Banks Treat "Sweated" Coins.

In a recent deposit in the United States subtreasury in this city by a New York bank of more than $100,000 in gold received from California seven "sweated" coins were found. They were placed on a block and the letter L punched on their face to show that they were light weight and then returned to the bank.—New York Herald.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North-west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

Baxter et al. vs. Gilbert et al—Filed original notice.

DIED.

WILLIAMS.—Near Bishop, Feb. 8, 1893, Schuyler Williams, a native of Delaware county, Ohio, aged 71 years, 1 month and 11 days.

The attention of hunters is invited to the notice given by land owners at Georges Creek. This notice was not given till there was good reason for it.

Nothing has been heard of Crapo since he disappeared from Cerro Gordo. He is as completely lost as if he had gone into a tunnel and pulled the hole in after him.

The annual sale of California trotting stock in New York amounts to a half million dollars. The total annual sales of improved bred stock raised in the State is about one million of dollars.

Had not Assemblyman Mack succeeded in knocking out the "pastoral" joker in the bill introduced in the Assembly by Owen, our County Treasury would have been short nearly five thousand dollars a year. In that event an increase of taxation would be unavoidable.

Walter Harris, of Dayton, Nevada, is the expert employed by the Grand Jury to examine the county books. He began work last Monday. Mr. Harris served as Clerk of Lyon county, Nevada, and is familiar with county book keeping; this experience will be of use in the work he is now doing.

R. Way is hard at work in the Court House yard hewing stones for the Hall of records. He is turning out good work, such work as inspectors would be authorized to accept, even if it was intended for a temple. A master workman need not be ashamed of seeing his mark upon any of these stones, and there is no danger that any of them will be rejected.

The annual battle of the Chinese with the devil began Wednesday evening and they just gave him——well, but he has long been used to that kind of thing and don't seem to mind it much. But the racket of fire crackers and bombs is worse to the neighbors than the temptations offered by Satan, and which so many people pray to be delivered from but secretly hope they wont.

On Wednesday evening the story of the little boy, the hatchet and the cherry tree, will be told at the Pavilion. There will be no tree chopped on that occasion, but a man will work hard all night to cut a log of wood in two with a cat-gut saw. If he can't cut it he'll tickle its neck and scratch its belly and make it sing very sweetly. Come out and enjoy the fun.

For the year 1892 there was shipped into the State from east of the Rocky Mountains 21,900 tons of hams, bacon, lard and canned meats. At an average cost of ten cents a pound this would take out of the State each year $4,350,000 in hard cash. And yet there is no State in the Union where the same kind of goods could be more cheaply produced than California, and no part of the State better than Inyo.

An Inyo Monopoly.

The very large profit made in growing oranges at Riverside and a few other places in Southern California has greatly increased the planting of orange orchards over a large part of the State. It is now demonstrated that oranges of excellent quality can be grown in Butte county and all along the foot-hills of the Sierra Nevada for several hundred miles. In Los Angeles county last year 8,223 acres of fruit trees were planted; in San Bernardino 8,076 acres; in Orange 2,558 acres. North of Tehachipi, in the counties all the way to Butte, many thousands of acres were planted with fruit trees, and in all these cases a large proportion of the trees were oranges. When all of these thousands of acres of orange orchards are sending train loads of oranges to market the price must decline, and the profit of the growers in like proportion. Now let any person staying at the best hotels in the State, where fine fruit is placed upon the table, observe the action of the guests, and it will be seen that in nearly every case where good apples are offered along with oranges, the apples are taken in preference. About the only exception to this is among people just from the east, and after their curiosity is satisfied even they will prefer apples. In all the counties of Southern California there is not one where first class apples can be grown except Inyo. In the other counties the fruit is dry and insipid, and is not even pleasing to look at; here we grow in perfection all the most showy varieties af apples and the fruit is solid, juicy and delicious. For the whole southern market we would have a monopoly in apples, there is no other of the southern counties con compete with us, none of them can produce fruit that will at all approach ours in excellence. No matter what the quantity produced in Owens Valley may be there would be demand for the whole of it in Los Angeles as soon as the fruit can be sent by rail. Don't despair of a railroad; the source of this article knows the meaning of his words, and again he says "don't despair." Seven years of ceaseless effort for a railroad has not brought discouragement. The man who now plants good varieties of apples in Owens Valley is making an investment as profitable as it is safe.

Unsafe Bridge.

A notice has been put up on the river bridge between Independence and the railroad, warning teamsters that it is not safe and that the county will not be responsible for any damage that may result by driving over it. It is doubtful if such a notice would free the county in a suit for damage. This bridge affords the only way of reaching the railroad from the town; it is our most important highway and the county is bound to keep it in a safe and passable condition. Enough money has been spent upon the old pile of trash the past few years to have paid for a good bridge that would last many years.

Try Them Boys.

The plow boys had better each get a sulky, and when they unhitch their horses from the plow in the evening yoke them one at a time to the sulky and try their speed. This was done recently at Lodi, in San Joaquin county, and the horse that had been taken from the plow trotted a mile in 2:16. He was promptly bought by another party for $2,500. Without trial nobody can tell how many plow horses we may have in Owens Valley that could do as well as this.

Notice.

All parties are hereby cautioned against Hunting, Shooting, or otherwise trespassing on the premises of the undersigned.

THOMAS & HILL,
Big Pine.

Nearly 1,000 tons of condensed milk are imported into the State each year. Inyo county is well suited to the production of this material, and if well managed the business would be profitable. The new creamery at Bishop produces the very finest quality of butter; the good judgment and skill that have made a success with butter might be able to secure success with condonsed milk.

Andy Fife was in town a few days early in the week. He is still intent upon working mines at Pine Mountain, but is convinced that an ordinary stamp mill will not do for working the ores; he proposes to try rock breakers and concentrating by jigging process and shipping the concentrated ore to a smelter.

There is talk of putting up a fine building at Bishop for a bank. If it goes the same kind of stone will be used as in the building now going up at Independence for the county records.

ORDER FIXING TIME AND PLACE FOR HEARING OF PETITION TO LEASE CERTAIN REAL ESTATE AND DIRECTING NOTICE TO BE GIVEN.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the Estate of John Allen Hannah deceased.

Upon reading and filing the petition of William L. Hunter, Executor of the last will and testament of John Allen Hannah, deceased, praying that he be authorized, empowered and directed to lease certain of the real estate belonging to said estate, which is described as follows, to-wit:

The S ½ of the S E ¼ and S ½ of the S W ¼ of Sec. 10; the E ½ of the S E ¼ of Sec. 9, and the N E ¼ of Sec. 15, all in Township No. 10 S, R No. 34 E., M. D. M., situate in Inyo County, California.

Also lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12 in Block No. 29, in the town of Independence, California, as the same appears of record by the official plat of said town now on file in the office of the Recorder of the said County of Inyo.

Wherefore it is hereby ordered that all persons interested in said estate appear before the Judge of said Court on Monday, the 6th day of March, 1893, at the Judge's Chambers, in the Court House in the town of Independence, County of Inyo, State of California, at the hour of 10 o'clock a. m., of that day, to show cause if any they can, why the first mentioned real estate should not be leased from the date thereof until the first day of November, 1893, for the rental of Three Hundred Dollars, as is more fully set out in the petition on file herein, reference to which is hereby made for further particulars, and also to show cause, if any they can, why the last mentioned real estate should not be leased from the date thereof until the first day of November, 1893, for a rental of $10.00 per month, as is also more fully set forth in said petition, and to which for further particulars reference is here made.

It is further ordered that a copy of this order be published in the Inyo Independent, a newspaper published and printed within the said County of Inyo, for at least two weeks, said publication to be completed before the said 6th day of March, 1893.

GEO. M. GILL.
Judge of said Superior Court.

Dated this 14th day of February, 1893.

[Endorsed.]

SUPERIOR COURT, COUNTY OF INYO, STATE OF CALIFORNIA.

In the Matter of the Estate of John Allen Hannah, Deceased.

Order to Show Cause why Lease of Real Estate should not be made.

Filed Feb'y 14th, 1893.

Royal Baking Powder

Absolutely Pure

"I regard the Royal Baking Powder as the best manufactured and in the market."

Marion Harland

Author of "Common Sense in the Household."

A Nook for the Mother.

One of the fads of the day is the making of especial corners in the drawing room. A capony over a couch, a table and a chair or two will give the effect of a tiny room by itself. A screen will convert a corner into a little nook which may partake of the originator's individuality. Who of us does not remember "mother's particular corner" in the old fashioned sitting room? Many of the modern mothers are taking a corner for themselves, and with a chair or two, cushions, plants and work table make a cozy, "homey" nook, just the sort of spot for the mother. The screen may be converted into a sort of catch all.

Made with a substantial frame to prevent its being tipped over, it may hold a side work basket, a shelf for books or even a lamp. In front of the screen madame's desk is placed, and at this little shrine the family and favored friends bow. Tiny curious shaped tables, completely covered with quaint bric-a-brac, are set here and there through a large room. Each has its special collection. Thus one holds Egyptian curios—scarabei, sphinxes, mummy beads and casts of various mummies, or bronzes of Isis, Osirus and Horus. Another is given over to old silver, another to a collection of eggshell teacups, another to Mexican and Aztec pottery.—Mrs. Tupper in Chicago Herald.

The Lorgnette.

"I understand," said the Growler, "that the lorgnette is going out of fashion, and I am delighted if the rumor is true. There is nothing in this world that can turn a sweet little woman into a supercilious snob so easily as the lorgnette. They make me feel uncomfortable wherever I see them. When I see a woman looking at me through the lorgnette I feel as if my clothes were nine or ten sizes too large for me; I experience the sensation which I imagine the victim of a hypnotist feels when the eye of the master is fixed upon him. The lorgnette is a success only as a discourager of mashers, and is, so far, to be commended; but when it tackles self respecting manhood and makes him dwindle, it becomes little short of criminal, and should be suppressed by fashion if not by law."—New York Sun.

Puzzled Over the Check.

The knowledge that some women possess of business and finance is astonishing. And then again the knowledge that some women do not possess on the self same topic is still more astonishing. There is one peculiar thing about a woman's business tact and talent. It doesn't seem to matter how bright she may be, as soon as a check gets into the transaction she is in deep water. I had occasion the other morning to pay a bill of $7.50, and with the air of a man proud of the fact that a thinly clad collector did not have to wear out four pairs of shoes chasing him, I walked into the store and handed out a check for the amount of the bill. The young woman looked at both sides of the check and studied it carefully, reading it as if it were a continued love story. She finally glanced up and remarked:

"I don't know about this."

Thinking that she meant to cast some reflection on the value of the check, I was just getting myself into shape to retaliate, when a smile came over the young woman's face as if she had at last reached the land, and she said:

"I haven't handled many checks, but I guess I know how."

Then she indorsed the check, recipted the bill, handed them both back to me, and said in a very sweet way:

"Thank you very much."

This left me with my bill receipted and a check for $7.50. In other words, I was $7.50 ahead in the transaction. I explained the situation to the young woman, but from the vacant look on her face it was easy to see that she couldn't grasp the mistake. The check was too much for her.

I told the story in part a few minutes later to a cynical newspaper man, and he remarked:

"That shows what a woman knows about business. Did you give the check back?" he asked.

"Yes."

"Well, it seems to me that that shows what you know about business," was his next remark, made in a disgusted tone.—Kansas City Times.

Inspecting the Public Servants' Quarters.

An incident occurred at the reception of one of the members of the cabinet which afforded a good deal of amusement to the hostess and the ladies who were receiving with her. While the reception was in progress a gentleman and lady, accompanied by a boy about 16 years of age, came into the parlor. They were entire strangers to every one there, but the lady, with complete self possession and an easy manner, introduced herself and her husband and her son to each one in the party. In speaking she betrayed a slight foreign accent.

Her husband was evidently an American, and the trio were genteelly dressed and had a well to do appearance. After making a circuit of the line of the receiving party the woman remarked, in a tone that was audible to every one in the room, "We will now look through the house."

This they proceeded to do with great deliberation, examining the paintings and statuary with critical eyes and making remarks that every one heard.

"This is a fine painting," the woman remarked to her husband as they came to a halt before one of the pictures.

"I suppose that this piece was imported," she said as they looked at some statuary.

With a running fire of comment of this character the party made a tour of the parlors, and then they turned to the staircase and were about to ascend when they were stopped and informed that the upper part of the house was not open to visitors. They then quietly left the house with the air of people who had performed a duty in visiting one of the public places of interest in the city.

The hostess, who was amused by the incident, expressed regret, when she found that they had departed, that she had not ascertained who they were and what kind of a place they took her house to be.—Washington Star.

Too Much for a Gourmet.

Once on a time a woodcock was sent as a tribute of respectful admiration to a French cure. Done to a golden brown and reposing on an equally brown slice of toast, the repast awaited the knife and fork of the good priest, when he was called away for a moment. His absence was short, but alas! it was long enough for a cat—a miserable cat—to make off with the expected treat. At least that was what Catherine the cook told the cure when he returned. Easter came, and the good woman was obliged to kneel before the confessional and confess her misdeeds. When her venial sins had been disposed of she stopped short.

"Well, Catherine, go on," said the confessor; "others are waiting." "I dare not, father." "Is it so very bad?" "Yes, yes, father. You remember that woodcock?" "The woodcock stolen by the cat—do I not?" exclaimed the priest in a dolorous voice. "I was the cat," gasped Catherine. "You ate it?" asked the priest. "Yes, father, next day." "And how?" "Cold." "Cold! and you a cook, who might have made it into a salmi! Wretched woman, you shall not have absolution!"—Exchange.

A Locomotive Steamboat.

A locomotive steamboat is being built at Kristanstad, Sweden, for the navigation of a chain of small lakes separated by falls. The boat is to be fitted with wheels fitting a track, and power can be applied to either the propeller or the driving wheels of the locomotive part of the craft. The track is 3 feet 6 inches gauge, with grades of one in 35, and curves of a radius of 100 meters.—Boston Transcript.

HER STORY.

Long years ago a little maid,
Deep hidden in the forest glade,
Lay with her starry eyes uplifted
To where the yellow sunshine sifted
Down through the beach leaves' flickering shade.

Like some white fallen blossom seen
Against the grass's emerald green,
She, fit to pose as Summer's daughter
Or nymph arisen from the water,
Unconscious of her graceful mien—

Dreamed deep some day, dream dim and sweet,
The water rippled at her feet;
A butterfly, all golden tinted,
Above her in the sunshine glinted,
With flight all objectless and fleet.

Slow winging through the summer air
Their unseen flight, two angels fair
Saw where the little maid was lying,
And paused a moment in their flying
To look upon her resting there.

"Ah me!" said one, "what sad estate
Is written in the book of fate
For her! Upon a page just turning,
I saw the fiery letters burning,
'So shall thy life be desolate.

"'Dull toil shall gnarl thy fingers fair,
And sorrow silver all thy hair;
The winter winds shall smite thee coldly,
The summer sun with fire enfold thee,
Poverty's raiment thou shalt wear!'"

The listening angel breathed a sigh
Ere once again the two did fly;
A shudder set the branches going.
"Ah!" smiled the maid, "how sweet the blowing
Of summer breezes wandering by!"

Years afterward upon a night
Of starlit mist and dim moonlight
Two angels bore a spirit lying
Between them in their locked arms, flying
Aloft with swift and steady flight.

Hers was a face of beauty rare,
Framed deep in threads of yellow hair.
Long lashes on her cheeks lay sleeping;
A smile upon her lips was keeping—
The smile that angel faces wear.

Within a meager lonely room,
Silent and sightless as a tomb,
In one of earth's most barren places,
Bereft of all earth's kindly graces,
And canopied around with gloom,

Upon a wretched, lowly bed,
Without a pillow for her head,
The angels, with the spirit flying,
Left but a silent figure lying—
A poor old woman lying dead.

—Juliet V. Strauss in Indianapolis Journal.

A MATTER OF PIN MONEY.

Every Wife Should Have an Allowance to Be Used at Discretion.

The secret unhappiness which is caused by the fact that wives are obliged to go to their lords for whatever money they need, instead of having a fixed allowance paid them at stated times, is one of those things which arise from the thoughtlessness of men, and yet it is one of the most fruitful causes of disagreement which exists. The lack of some such arrangement as this has brought many a couple to the divorce court; and it is to be questioned whether it would not be well for moralists to make a point of the establishment of a fixed proportion of a husband's income as one of the essentials of marriage.

There is in this country a feeling—not as rational as some popular ideas—that to have marriage settlements is cold blooded and argues a lack of sentiment. Americans are at once the most hard headed and most sentimental people in the world, and despite the prosaic tendencies of the age we have in this country contrived to keep a certain naive sentiment in regard to marriage. There is something of the simplicity and sentiment of the peasant folk in the way we look upon marriage. To have any forethought in the matter is popularly held to argue a cold and calculating attitude toward one who should be all or can be nothing. The idea of the marriage settlement is regarded with distrust and with sentimental horror.

It would perhaps be cynical to inquire whether the masculine desire to hold the purse strings has not consciously or unconsciously increased this feeling. It is sufficient that it exists and that it is thoroughly unfair. If women are to be slaves, after the fashion general among some oriental nations, it is of course fitting that they should not be intrusted with the funds of their lord, except under the strictest restraints. The position would not in this age and time be looked upon as an especially enlightened one, but it would at least be consistent. If on the other hand it is fitting that the wife be looked upon as a partner with her husband, it is certainly but reasonable to give her a certain independence in the matter of disposing of the funds of the firm.

Either a wife should be in the domestic establishment a recognized partner, with the rights of a partner, or she should be a salaried officer, with the right which that implies. In no case should she be a mendicant. There is, perhaps, no way of preventing her being a mendicant if the husband, who is generally the wage earner, does not give her at least a fixed portion of his income. With people of fortune there should be a regular settlement, in the European fashion. Sentiment is good, but if sentiment can live through the social ceremonies and observances with which engagement and marriage are already surrounded, there is little danger that it will be crushed out by a reasonable business arrangement for the future.

If there is little money in the family, there should be a regular sum fixed which should be regularly paid to the wife, to be used at her own discretion, and for which she is accountable to nobody. If it is not more than five cents a week, at least let there be some fixed and unfailing sum upon which she can always count. There are some men who honestly believe themselves to be generous to their wives, who yet are unconsciously cruel in this matter. Let them begin today, if they are in earnest, to stop this cruelty, and give to their wives whatever weekly amount they are able to afford, to be used by the feminine portion of the household at pleasure. The result will be an astonishment, even to the most sanguine; so much are we prepared to risk in the way of prediction.—Boston Courier.

Wealthy Ladies of New York.

Ever since the Duke of Marlborough espoused the wealthy American widow, Mrs. Lillian Hamersley, titled foreigners have been looking toward the United States with longing eyes. Some of these gentlemen might be dazzled if they were informed that there are ten New York ladies who are reputed to own two hundred millions in their own right, and some of these women are still eligible for the bonds of matrimony. Some of the figures given by a well known club man are as follows: Mrs. Marshall O. Roberts, $10,000,000; Mrs. Frederick Neilson, $5,000,000; Mrs. Hicks-Lord, $5,000,000; Mrs. William Astor, $60,000,000; Mrs. W. H. Vanderbilt, $3[illegible],000,000; Mrs. Mary G. Pinckney, $10,000,000; Mrs. William Lynch, $10,000,000; Mrs. Paran Stevens, $10,000,000; Mrs. August Belmont, $15,000,000, and Mrs. Hetty Green, $40,000,000.—New York Telegram.

Gastronomic Item.

"We are going to have pie for dinner," said Bobby to the minister.

"Indeed!" laughed the clergyman, amused at the little boy's artlessness; "and what kind of pie, Bobby?"

"It's a new kind. Ma was talking this morning about pa bringing you to dinner so often, and pa said he didn't care what she thought, and ma said she'd make him eat humble pie before the day was over, an I suppose we're goin to have it for dinner."—Texas Siftings.

Rehearsing It With His Wife.

"During the heat of the political campaign they called on me for a speech at West Oakland," said Justice Charles E. Snook "I don't take very kindly to political speech making, and I was especially timorous about making an address in the First ward, where everybody knows me, and where in consequence I would be sure of the severest criticism.

"But I was in for it and set about preparing myself for the ordeal. After I had thought out an address which I imagined had enough hurra in it to make the boys hit the floor I thought I'd try it on my wife.

"So I placed her in a good seat in the front row of our parlor furniture, struck my most statesmanlike attitude, and unlimbered my mouthpiece. Finally I reached one of my most impressive periods, and came to a full stop a good deal out of breath.

"'Well, what are you waiting for?' calmly inquired the side partner of my joys.

"'That's where I pause to permit the tumultuous applause to get in its work,' I replied.

"'Oh, I thought you were afraid you had awakened the baby,' was her unsympathetic and disheartening response. Still, I noticed that when I poured that speech into the listening ear of West Oakland my wife was the first and only listener to appreciate and applaud when I paused at that critical period."—San Francisco Examiner.

Returned, with Thanks.

It is a great mistake for the literary aspirant to imagine that his returned manuscript has committed any offense, or that his muse, if he has strided Pegasus, cannot soar. What he must do is to sail forth with it again and again until it reaches a favored port, which it will surely do if it has the requisite merit, somewhere and at some date. President Lincoln used to say, when he was trying faithfully and with great diligence to place the various able men who were presented to him for the civil service and for the army, that it was a very difficult matter to get the square pegs in the round holes and the round pegs in the square ones. And it is just this difficulty which confronts the writer for periodicals and magazines. No matter how experienced he may be he will often fail before he brings his commodity to the market which waits for it.

But editors do not wish to be cruel or hardhearted, however much they may seem so to the unspurred and unfledged writer. The very best and most famous of them have often told me that one of the saddest and most thankless duties they have to perform is to return a contribution that for some good reason does not prove to be available. When I once wrote some verses treating this necessity humorously, I had to apply to three editors in succession before I could get them printed, the first two assuring me sorrowfully that the matter was quite too serious to be treated with levity.—Joel Benton in Ladies' Home Journal.

Doctors and Politics.

It is not generally known that Marat, the Revolutionist, dispatched by Charlotte Corday, was a physician, and that he had a certain success in treating consumption. It is recorded of him that he cured a titled lady of this disease in its advanced stages, and that her gratitude to him knew no bounds. Unfortunately he was enticed into politics and prevented from pursuing his studies further in a direction that might have made his memory revered instead of detested.

For some reason doctors seem to drift naturally toward politics and radicalism, perhaps because their profession tends to render them skeptical. In Brazil and the Argentine Republic they have shown themselves decidedly ambitious. The celebrated Dr. Charcot is a radical whose principles verge on the revolutionary. Clemenceau gave up his medical practice years ago to devote himself to politics, and though he is a man of great talent and a brilliant orator, his political efforts have not contributed to his personal advancement or been of great benefit to his country. Besides Clemenceau there are from forty to fifty physicians in the French chamber of deputies.—San Francisco Chronicle.

The Colors of Eels.

The eel is very unpopular with many people, but like many unpopular things he improves with acquaintance. In form he is long, slender and graceful. In color, dark green above and yellowish white below. Many believe that there are two distinct varieties, the salt and the fresh water eel, but I am inclined to think that like all other fishes the eel partakes much of the nature of his surroundings. A long summer vacation in a pond or brook renders him darker in color, and daily feasting on landlocked delicacies renders him more corpulent.

Just so codfish take on the color of their habitat—gray when on muddy bottom, bright red when living among kelps and gay colored marine plants. I believe, too, that the eel often forgets to return to salt water, but never breeds elsewhere, for I have never seen baby eels in brooks or ponds. I have known them to be taken every month in the year in the same localities. Some say that half the eels spend the winter in fresh water, coming down in spring, and that the other half go up for the summer.—G. W. Singer in Lewiston Journal.

A Glorious River.

The St. Lawrence is a phenomenon among rivers. No other river is fed by such gigantic lakes. No other river is so independent of the elements. It despises alike rain, snow and sunshine. Ice and wind may be said to be the only things that affect its mighty flow. Something almost as phenomenal as the St. Lawrence itself is the fact that there is so little generally known about it. It might be safely affirmed that not 1 per cent. of the American public are aware of the fact that among all the great rivers of the world the St. Lawrence is the only absolutely floodless one. Such, however, is the case.

The St. Lawrence despises rain and sunshine. Its greatest variation caused by drought or rain hardly ever exceeds a foot or fourteen inches. The cause of this almost everlasting sameness of volume is easily understood. The St. Lawrence is fed by the mightiest bodies of fresh water on earth. Immense as is the volume of water it pours into the ocean, any one who has traversed all the immense lakes that feed it, and for the surplus waters of which it is the only channel to the sea, wonders that it is not even more gigantic than it is. Not one drop of the waters of the five great lakes finds its way to the ocean save through this gigantic, extraordinary and wondrously beautiful river. No wonder, then, that it should despise the rain and defy the sunshine.—Nature's Realm.

Russia Is Producing Oil.

A perusal of the sources from which our supplies are obtained shows that the increase obtained from the Russian oil wells in the neighborhood of the Caspian is enormous. In 1883 the Muscovites supplied us with 500 barrels. In 1889 the imports from the same quarter amounted to 771,000 barrels. During the same six years the supply from the United States had but increased from 1,329,000 to 1,355,000 barrels. That in the short space of six years Russian shipments should increase from practically nothing to more than half of those from America is most remarkable. Such phenomenal developments as these naturally call into existence the provision of means for adequate transit and storing of such enormous quantities.—Chambers' Journal.

DESERTED.

When you have sounded all the depths of wrong,
And when its fruit is bitter to your taste,
When fairest flowers have faded in your grasp,
And when the lamp of life has burned to waste,
I think you may behold your better self
Along the lines of thought that once I traced.

No mortal mind can e'er conceive or dream
Of all the beauty that I worshiped there;
No vision can surpass the love I saw,
A sight that none could ever with me share,
And none can see the wreck on which I stand,
Or lift the burden that my life must wear.

And you more cruel than the heartless world
Have never seen the heart I gave to you,
But other voices were as sweet as mine,
And other friends "had thoughts more just and true."
Have they filled all the measure of your life?
Have they yet seen the hope I sought in you?

Divided now we stand, the gulf between
Is filled with bitter words and burning tears;
Who shall remove the deepened scars that tell
Of buried hopes and devastating fears?
Above the grave of a departed love,
Life will not bloom again in coming years.

—Annie Russell in New York Ledger.

HINTS FOR FEEDING THE BABY.

Young Mothers Need Not Be Afraid of Good Cow's Milk for Their Infants.

To the delicate young mothers who are physically unadapted to nursing children, and who are unable, if they so desired, to obtain a wet nurse, I send the following directions for feeding a child with cow's milk through the medium of the much abused patent nursing bottle.

For their encouragement allow me to say that I believe a careful, intelligent mother may bring up her children in perfect health by so called artificial feeding, sanitary and other conditions being good. I have cared for two children, and I am familiar with the catalogue of evils attendant upon the use of the nursing bottle only through the columns of various periodicals.

And so, dear little mothers, if there are good reasons why you should not nurse your baby with mother's milk, do not become discouraged if your mother-in-law or nurse speaks disparagingly of every other way of bringing up a family; but direct the nurse to give the little one warmed cow's milk diluted one-half with boiled water. If the weather is warm she should also add a small quantity of lime water, not enough to affect the taste of the milk unpleasantly.

When possible, fresh milk should be procured night and morning. It should be diluted at once with the boiled water, and set away in a cool place ready for use. After the child is a few months old the proportion of milk may be increased until it is able to digest undiluted milk.

A child should not be given solid food until it is two years old. Any wise physician will advise liquid food during the period of dentition.

About caring for the bottle—for upon its cleanliness depends its successful use—it and its patent attachment may be kept as clean as a cup. In order to save the trouble of cleaning a bottle at an inconvenient hour, and that a fresh bottle may be ready for use during the night and another for the morning, one should always be supplied with three well fitted bottles. These may all be cleaned in the morning at one's leisure, with hot water and soda. After that one bottle will usually serve during the day by carefully rinsing the tube and bottle after each period of nursing. A bottle should not remain in the cradle after the child's hunger is satisfied, as the milk will become stale, and perhaps turn sour.

In cleaning the bottle and tube one need not fear to use the brushes sold by the druggist for the purpose. If one of its bristles should chance to get loose the thorough rinsing under a faucet, which should always be given each part, will surely remove any obstruction.

The tube brush should be used by drawing the wire handle through the tube. I have seen some people stupidly try to work the brush end through the tube, thereby bending and injuring the bristles. When gas is not available a small oil stove is a necessity for speedily warming the milk. The mother should bear in mind that a baby is a creature of habit, and that one cannot begin too early to bathe, feed and otherwise care for it at regular periods.

If the milk should cause constipation, catharics should not be given a child, but instead a small glycerine repository. This should be given at a certain hour every morning, if necessary. It will tend to regulate the bowels without deranging the system.—Elizabeth Robinson Scovil in Ladies' Home Journal.

The late Gen. Spinner was a hunter, fisherman, trapper, botanist and naturalist, and could always give a good reason except in the case of a frog. He firmly believed that the creature's fore legs ought to have been made the longer, and could show wherein such a thing would have been a great advantage.—Detroit Free Press.

Particular.

"You're in a hurry," said the impertinent conductor.

"No; you're quite wrong," retorted the sarcastic passenger. "Quite the reverse. I'm in a horse car."—Harper's Bazar.

HAVE NO EQUAL.

ALLCOCK'S POROUS PLASTERS have attained a world-wide reputation solely upon their superlative merits. They have many would-be rivals, but have never been equalled or even approached in curative properties and rapidity and safety of action. Their value has been attested by the highest medical authorities, as well as by unimpeachable testimonials from those who have used them, and they are recommended as the best external remedy for weak back, rheumatism, sciatica, colds, coughs, sore throat, chest and stomach affections, kidney difficulties, weak muscles, strains, stiches, and aches and pains of every description.

Beware of imitations, and do not be deceived by misrepresentation. Ask for ALLCOCK'S, and let no solicitation or explanation induce you to accept a substitute.

In dealing with some men, if everything runs smoothly, you may know that there is something wrong.

HOW'S THIS!

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O.

We the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.
West & Truax, Wholesale Druggists, Toledo, O.
Walding, Kinnan & Marvin, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free.

Unfortunately for the universities, all the "fellers" with "rocks" are not Rockefellers.

Throat Diseases commence with a Cold, Cough, or over-fatiguing the voice. These symptoms (which, if neglected, often result in a chronic trouble of the Throat) are allayed by the use of "*Brown's Bronchial Troches.*"

The money that is the root of all evil is the money that is in another's pocket.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.....
Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Use Enameline Stove Polish: no dust, no smell.

Try Germea for Breakfast.

"George Francis Train says that the word "damn" is Asiatic and synonymous with banana. This may explain the use of the word sometimes when a man slips on a banana peel.

AN ENEMY BAFFLED.

There is an enemy with whom thousands are familiar all their lives, because they are born with a tendency of biliousness. With this enemy they are constantly battling with ineffectual weapons. Hostetter's Stomach Bitters will baffle it. Mere purgatives will not reform a disordered condition of the liver indicated, not by constipation alone, but also by sick headaches, yellowness of the skin and eye balls, nausea, furred tongue and uneasiness, more particularly upon pressure on the right side, upon and below the short ribs. Avoid drastic purgatives which gripe and weaken the intestines, and substitute this world-famous anti-bilious cordial, which likewise removes malarial, stomachic and kidney complaints, rheumatism and nervousness. As a laxative of the bowels, painless but effectual, it improves appetite, sleep and the ability to digest, and possesses the additional advantage of a standard tonic.

The world which worships pugilists
May soon have one to mourn:
For Sullivan is fighting hard
With Johnnie Barleycorn.

BAD TASTE in the mouth or an unpleasant breath, when resulting from Catarrh, are overcome, and the nasal passages which have been closed for years are made free by the use of Ely's Cream Balm. I suffered from Catarrh for twelve years, experiencing the nauseating dropping in the throat peculiar to that disease, and nose bleed almost daily. I tried various remedies without benefit until last April, when I saw Ely's Cream Balm advertised. I procured a bottle, and since the first day's use have had no more bleeding—the soreness is entirely gone.—D. G. Davidson, with the Boston *Budget*, formerly with Boston *Journal*.

Apply Balm into each nostril. It is Quickly Absorbed. *Gives Relief at Once.* Price 50 cents at Druggists or by mail.
ELY BROTHERS, 56 Warren St., New York.

Man is a great deal like a fish. You know the fish would never get in very serious trouble if it kept its mouth shut.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

Unyielding self-possession prevents many a man from giving himself away.

St. Jacobs Oil Cures PROMPTLY AND PERMANENTLY RHEUMATISM

The Best Waterproof Coat in the WORLD!
The FISH BRAND SLICKER is warranted waterproof, and will keep you dry in the hardest storm. The new POMMEL SLICKER is a perfect riding coat, and covers the entire saddle. Beware of imitations. Don't buy a coat if the "Fish Brand" is not on it. Illustrated Catalogue free. A. J. TOWER, Boston, Mass.

Food Made Me Sick

"First I had pains in my back and chest, then faint feeling at the stomach, and when I would eat, the first taste would make me deathly sick. Of course I ran down rapidly, and lost 25 pounds. My wife and family were much alarmed and I expected my stay on earth would be short. But a friend advised me to take Hood's Sarsaparilla and soon my appetite came back, I ate heartily without distress, gained two pounds a week. I took 8 bottles of Hood's Sarsaparilla and never felt better in my life. To-day I am cured and I give to Hood's Sarsaparilla the whole praise of it." C. C. ABER, grocer, Canisteo, N. Y.

C. C. Aber.

A Guy in Newport.

I took a run down to Newport last summer to get a mouthful of freshly harvested sea air and enjoy the society of the millionaires. One day I was strolling about, feeling lonesome like, when I met the prettiest girl I ever saw outside of a picture for a soap ad. She couldn't have been more than seventeen, and she flirted with me dreadfully. I felt that I ought to get acquainted with that girl and give her a good fatherly talk on the sin of flirting, but she had an old duena with her that looked like Medusa enjoying an attack of cramp colic. I hesitated and was lost of course. I struck up an acquaintance with the girl, but she appeared scared half out of her wits and kept glancing back at old Medusa, who camped on our trail, muttering as though she intended turning me into a Newport tower. I asked the girl if there was any possibility of getting rid of her, and she replied that it might be done by bribery. On this gentle hint I acted, and we enjoyed a pleasant tete-a-tete undisturbed.

Every day I would meet the charming young lady and subsidize old Medusa to go and see what the wild waves were saying. I was charmed, delighted. After a week or ten days of that sort of thing I chanced upon another giddy benedict walking by the seashore with my inamorata, while old Medusa lingered out of sight. That made me suspicious, and I watched the girl. I found out that she was no millionaire's daughter, as I had supposed, but a dashing young adventuress, who apportioned her time among a dozen fool admirers, all of whom subsidized her partner in the play—the old duena. I figured up that I had paid out near $100 for the privilege of talking for half an hour a day to a girl who played the sweet society bud summers and kicked hats off in the burlesque opera winters. Yes, I was a great guy. One's never too old to learn.—St. Louis Globe-Democrat.

A Japanese Hero.

The story of Sogoro, a peasant of Japan, is one of the most pathetic in the annals of heroism. In 1644 the country folk of Sakoora were so oppressed by land agents that their condition appeared to them simply unbearable. They had no newspapers to set forth their wrongs, and remonstrance of any sort was dangerous. Driven to desperation, some of them met together and prepared a petition to the daimio, who was spending in dissipation at Tokio the money wrung from them by taxation.

They wrote and sent the petition, but no notice whatever was taken of it. Possibly no one had even taken the trouble to read it, and their wrongs seemed to be without remedy.

Moved by the general suffering, Sogoro, a man of middle age, determined as a last and desperate resort to present the petition in person to his august greatness, the tycoon.

Taking leave of his friends, he went to Tokio, secreted himself under a bridge which the great man was to pass, and at the right moment pushed the petition at the end of a long bamboo directly into the royal hands.

The act was without parallel in all the history of Japan. A mere peasant had disturbed the royal seclusion and at the same moment broken the etiquette of the realm into a thousand pieces. The enormity of the act led to immediate inquiries into the circumstances of the case, and the justice of complaint was fully proved.

The peasants' wrongs were at once redressed, but since decorum must be preserved in Japan at any cost the one man who had thus served his people was delivered over for punishment to the very daimio of whom he had complained.

By his order Sogoro, his wife and their three children were put to death. Today a monument marks the spot where they died, and their names are held in grateful remembrance.—Youth's Companion.

The Cocoanut Crab.

The cocoanut crab inhabits the islands of the Indian ocean and seems to be in his element when sitting astride a limb high up in a cocoanut tree. An average sized specimen of the species fills a 4-gallon jar to overflowing, the "overflow" being the alcohol necessary to the preservation of such things. He is a powerful looking crustacean and seems well adapted to his trade, which chiefly consists of plucking cocoanuts, husking them with his enormous claws and digging the meat out through the "eyes," which you have often noticed situated near the small end of the nut. Cocoanuts are originally inclosed in a three cornered covering or husk, which consists of a woody fiber of coarse texture and a brownish yellow color. This fiber surrounds each nut in a layer from 1 inch to 2½ inches in thickness.

The cocoanut crab collects large quantities of this fiber and constructs a large, dome shaped "house" or nest, in which he can always be found when not out in quest of more fiber or juicy nuts. The natives of most of the islands which this crab inhabits call it by a name which signifies "the bird of God," and they will not eat its flesh, even though suffering the pangs of extreme hunger. On certain days of each year they kill cocoanut crabs for the fat which accumulates in the region of the tail. This fat is used in sacrificial and other ceremonial rites.—St. Louis Republic.

Heavy Magazines.

Reading the Christmas magazines is a muscular rather than a mental exertion. The weight of advertisements is increased by a number of ounces. To support this extra weight the wrists need to have gone in training. In the British museum and in the great foreign libraries the advertisements are cut out before the magazines are put into circulation. This is a good plan. It can be done neatly, and the magazine presents a much trimmer appearance. There are so many demands on the fingers, hands and arms at this season that it is not prudent to devote so much additional strength to holding up the advertising pages of the magazines in order to read a short story, a poem or a pastel in prose.—New York Evening Sun.

A Parrot to Be Had for the Asking.

A certain doctor on Willoughby street is the owner of a parrot which he is willing to give away. The pet was kept in a cage that hung in the office and afforded a good deal of amusement to patients who went to the doctor for treatment by his antics. The doctor after prescribing for the patients was asked what his fee was and replied one dollar. The parrot soon picked this up, and as soon as people entered he would cry out, "One dollar, please." Mr. Poll was soon pulled down from his perch and now occupies a room on the top floor pending a change of owners.—Brooklyn Eagle.

Gaining Experience Early.

Mrs. Dumpsey—Thomas, you must tell Willie not to spend all the time looking at the circus posters. It takes him all day to do an errand.

Mr. Dumpsey—Let him study 'em, Maria, and after he has seen the circus he will know more about the deceits of life than he could learn in ten years any other way.—Texas Siftings.

VENTRILOQUISM.

An Expert in the Art of "Throwing the Voice" Says it is Not a Gift

PRACTICAL HINTS TO BEGINNERS.

With Perseverance Any One Can Learn the Trick.—The Three Subdivisions of Ventriloquism.

Ventriloquism is without doubt an ancient art, one which was and is at the present time surrounded by a halo of mystery. It is remarkable that in this advanced age so much doubt and misconception prevail respecting ventriloquism. This is due in a great measure to the fact that the happy possessors of the gift are inclined to retain the secrets for their own profit, and so prevent a host of competitors from taking the field.

Ventriloquism is not a gift; it depends in a great measure on the histrionic ability of the student as to whether he will succeed in making a mark or not, but it is nevertheless true that any one possessing a certain amount of perseverance and zeal can become to a certain extent an exponent of the fascinating art, causing their friends to wonder at the number of voices within them. Those so endowed are able, if they seize the opportunity, to cause considerable amusement or annoyance to their fellows, but not to the extent that a great many people believe.

Now as to the meaning of the word ventriloquism. It is derived from the Latin roots venter, the belly, and loquor, to speak; but belly speaking is certainly a misnomer, and leads many people to imagine that the voices are produced from that portion of the body. That is not so, the ventriloquial voice being formed purely and simply in the throat, the muscles of the stomach only being requisite to give sufficient strength or power to the voice. Ventriloquism may be classed under three heads: Ventriloquism proper, colloquism and polyphonism. Under the first of these heads comes the distant voice; that is, imitation of sounds as they appear when heard from a distance and in various places and directions. The "man-up-the-chimney, on-the-roof and down-the-cellar" illusions, which nearly every one has had an opportunity of hearing, are the outcomes of this voice. Again, there are the 'street cries," in which the performer has a miniature drawing room window, and gives imitations of varied and humorous well known street cries, heard first a long way off; then gradually the man is heard coming nearer and nearer, passing the window, and going slowly away again in the distance. The window being made to open and close makes the illusion perfect.

Colloquism consists of the imitations of various human voices; for instance, it is usual for most ventriloquists to introduce comical, life size, talking automata, the heads of which are made of papier mache, the interiors being fitted with springs and cords, by the aid of which the performer controls the mouth, eyes, hair, etc., of his talking family—the mouths of which being made to move at the same time as the words are uttered by the performer, and, owing to the uncertainty of the direction from which sounds emanate, and which, by the way, is the true secret of all ventriloquial illusions, the voice really appears to proceed from the figures.

Polyphonism or mimicry is the imitation of cattle, sheep, sawing, planing, etc. This branch of ventriloquism is rather difficult to acquire, although there are numerous sounds that can be copied without any particular gift. A great many persons are excellent mimics without being ventriloquists, for in nearly every school can doubtless be found a youth who amuses his fellows in the playground corner with his crowing and cackling.

A few practical hints as to the modes of procedure to be followed by would be learners may not be out of place here, although half a dozen lessons from a good professional would do infinitely more for them than all the books that have ever been written upon the subject, and which, by the way, are usually a mass of theoretical phraseology. Before any attempt is made with the voice the student must be prepared to devote the same time and attention to the breath, which he must get entirely under control, so as to be able to hold it for a considerable time without straining. This, of course, must be a gradual process. Before commencing to practice a strong inspiration should be taken, as the lungs require to be furnished with a plentiful supply of fresh air, which has to be well controlled and allowed to escape gradually. He must endeavor to breathe through his nose and keep his mouth shut. This is a hint which it would be as well for every one to remember, and so save a great deal of cold catching and illness. The learner must study at all times to imitate sounds, not as they are heard at their source, but as they fall upon the ear after traveling from a distance. That is the golden rule of ventriloquism, and if it is continually kept in mind success is certain. As conjurers endeayor to deceive the eye, so ventriloquists try to deceive the ear.

The "distant voice" originates at that spot in the throat where the "cluck" takes place when drinking, so without any facial contortions or movement of the lips the words must be forced against the back part of the palate one by one, with a series of short, quick breaths, at the same time strengthening the sounds by using the muscles of the stomach, which will give them increased power, so that they will reach the audience clear and distinct. The farther off the sound is supposed to be the smaller the quantity of breath must be expired. The great fault with beginners is straining after effect. No sooner do they make a little headway and begin to feel their feet than they want to run, a proceeding which will bring their endeavors to a dismal failure.—Chambers' Journal.

Communication by land and sea was established between London and Constantinople in 1858.

QUESTIONINGS.

If at the last, after long, weary years
Of lonely wanderings o'er desert ways,
We could clasp hands and say, thro' happy tears,
"Toge her we will spend life's autumn days,"
How gladly would we bid the world pass by,
And live a life alone, just you and I!

We could afford, for such brief happiness,
To toil, unrecompensed, thro' youth's bright spring,
To miss the summer flowers and skies of bliss,
And wait the fruitage that life's fall will bring.
But oh, when winter comes, with darkening sky,
How can we live asunder, you and I?

Fate lays her hand on the rebellious heart,
And whispers "Patience!" to the ardent soul;
Bids us accept our lot to dwell apart,
And trust his goodness as the slow years roll.
Oh, dear one, shall we know, before we die,
That life of love together, you and I?

—E. A. Matthews in Once a Week.

Two Remarkable Women.

Within the past week two old women whose infancy was spent upon the banks of the Yough, while the country round about was a vast wilderness, have died. The first, "Grandmother" Grim, who was born in Saltlick township, in 1803, when that township embraced one-fourth of the total area of Fayette county, died at the home of her daughter in Vanderbilt. Her remains were interred from the Mount Olive Brethren church, at Detwiler's Mill. The old lady was the mother of eleven children. At the time of her death she had fifty-six grandchildren, one hundred great-grandchildren and thirty-two great-great-grandchildren, making a family living at the time of her death of 196 persons. The Buttermore, Ridenour and Grim families are the descendants comprising this large family. Mrs. Grim was the widow of John Grim, who died ten years ago. Her sole surviving sister is Mrs. Mary Buttermore, widow of John Buttermore.

The second woman whose death is noted was Mrs. Sarah Rush, of Brownsville. She was the daughter of James Frey, the first regularly installed pastor of the Connellsville Baptist church, and was born in Connellsville in 1803. She was the mother of four children—two sons and two daughters. The daughters are Mrs. Dr. Brashear, of New Haven, and Mrs. Shedrick Holt, lately of Sharpsville, but now of New Haven. She had been a member of the Baptist church for sixty-seven years.

The combined ages of these two reached 174 years, and their death removes the oldest representatives of the pioneers of Connellsville. Both funeral sermons were preached by Rev. R. C. Morgan, of Connellsville.—Connellsville Courier.

She Supports the Family.

Score one for the "advanced woman." Score one against the theory that marriage results in disaster because daughters have no dowries or wives are expensive luxuries. One particular advanced woman whom I know lives in Brooklyn, and is correspondent for one of the city journals. She has a cosey little house, which she keeps tidy and homelike with the aid of a single servant. She has two children, whose sewing she does herself, to whom she is a loving and devoted mother. But at the same time she keeps up the interest and advances money on the mortgage which yet rests on the little home, settles the bills of the "butcher, the baker and the candlestick maker," pays for her own bonnets and for the winter's coal—in short, runs the entire establishment herself.

And why? Simply because she insists upon her husband's putting the entire amount of his salary into the bank to educate the children or in case of future need. The husband's salary is fixed, and she is thus sure of saving a certain amount each month. Her own varies, and she makes the expenses of the family vary accordingly. The children have cheaper shoes or they go without new carpets if her stuff is cut or "returned with thanks."—New York Sun.

A Woman's Bold Undertaking.

Miss Taylor, of the China Inland mission, is about to attempt a journey through Thibet. This singular and interesting country, always jealously closed against the outer barbarian, has again and again thwarted the well laid plans of some of the greatest men travelers of our time. As the members of the inland mission wear the Chinese dress, and observe the Chinese customs in their daily walk and conversation, it is thought not improbable that Miss Taylor may succeed in adding her name to those of intrepid women travelers.—Harper's Bazar.

In the Agricultural Department.

Mrs. E. H. Stevens has been librarian of the agricultural department at Washington since 1877. She is most efficient, and has a remarkable knowledge of the numerous technical works included in the eleven divisions of her department. Previous to her appointment in the agricultural department Mrs. Stevens was employed on French and Spanish translations in the patent office, and she may be said to have founded the important desk of "Scientific Translations." Her salary is $1,800, and that of her assistant, Mrs. M. D. Newell, $1,400.—Woman's Journal.

Lectures on Law.

The Woman's Legal Education society of New York furnishes an example which might be profitably imitated in every town of our country. Its object is to give women information of special interest to them in legal matters. The initial lecture of the winter course was lately delivered in the parlors of Mrs. Abram S. Hewitt, with the subject "Why Women Ought to Know the Laws of Their Country." The lectures are under the patronage of some of the best known women of culture and fashion in the city.—New York Ledger.

Western Women Writers.

Mrs. Parkhurst, ex-president of the Pacific Coast Woman's Press association, in a recent address on "The Work of Some Pacific Coast Writers" stated that there had been over 12,000 books published by Pacific coast writers within the last twenty years, and that eighty-five books had been published by members of the association during the last three years.—Current Literature.

ROYALTY'S POWER

Victoria, the Queen of England, is Merely a Figurehead.

THE HOUSE OF COMMONS IS SUPREME

Whatever Action the Sovereign or the House of Lords May Take is But a Matter of Form.

Just at this time is an opportune occasion for giving a brief outline of the functions of the English government. This is admirably done by N. O. Winter, English correspondent for The National Tribune, and the following facts are quoted from him:

The queen is sovereign in name only. Her individual will weighs almost as naught. Her official acts are those of the party in power.

The "queen's speech," so called, read at the opening of every parliament, is prepared by the leaders of the prevailing party and contains a setting forth of the measures which it is proposed to pass. Although at heart a Tory, yet should the Liberals be successful she would be obliged to appoint the cabinet proposed by that party. She has veto power on all bills, I believe, yet she would not dare exercise it.

Her "gracious approval" is a matter of course after the bill has passed the two houses.

Since the Seventeenth century, when parliament repudiated the claims of the Stuart family and established a rival claimant on the throne, the choice of sovereign rests with the house of commons. Of course, unless for special reasons, the direct line would be chosen; but should one sovereign become obnoxious he or she would be signing the death warrant of their respective house. The monarch serves as a figurehead—as an official representative of the government.

None of the royal family, although occupying seats in the house of lords, dare take any part in politics. In return for their magnificent salaries they lay cornerstones, attend public gatherings and furnish matter for public gossip.

The tendency of late years is toward the abolishment of the hereditary house of lords. Although such an event may not occur very soon, yet it will no doubt be the final result. The necessary turning point toward such an outcome would be obstinacy on the part of the lords toward any favorite measure of the commons. The lords appreciate the situation, and as a rule are obedient, and their approbation is generally only a matter of form. If they oppose a measure a second return of it by the commons generally has the desired effect, and some unimportant amendment will probably be tacked on merely to preserve their own dignity. In this respect their proceedings are generally very tame in comparison with the occasional stormy sessions of the lower house.

There is also another way by which the obstinacy on the part of the lords may be overcome. That is by additions to their own ranks. Peers can be created at any time and without any limit of number. Political leaders are often given peerages for eminent services.

Should some important measure be obstructed in the house of lords a sufficient number of new peers of the right faith might be created to overcome the opposing faction. This extreme is one, however, that has not been resorted to for many, many years.

The house of commons is a favorite training place for the heirs of hereditary peerages. It gives them a training in the usages and tactics of debate and legislation which grants a certain prestige when compelled by cruel fate to transfer their sphere of action to the upper house.

A wide difference in the political systems of the two countries is found in the elective system. The duration of a parliament is indefinite, the time of election equally so, and other things differ from the clockwork regularity of the American elective system.

The extreme life of a parliament is seven years, or it may be dissolved at any intermediate time by command of the sovereign; also, in the case of some new policy, the members may be obliged to submit themselves for re-election on that issue. Such was the case with the Gladstone party on the Homerule question.

When parliament has been dissolved writs are issued to all the constituencies for a new election. A day for nomination is appointed, not simply for party nomination, but each intending candidate's name must be presented. If there is only one then he is declared elected, otherwise a poll is ordered for a certain day, when ballots are deposited by the qualified electors as in the states.

To the person of careful observation it will be apparent that the British voter resembles in more ways than one the American voter. While it is true that the Britisher is a freer agent than his American cousin, yet he is quite as easily influenced and has an equal faith in the party leaders.

Elections may occur on any day within a certain limit, and not simultaneously all over the country. Likewise a man may vote in as many districts as he possesses the necessary property qualifications. There is not a manhood suffrage here, but one of property, so that one person may possibly vote for several candidates. The qualifications are of three different kinds—a man must possess freehold property which brings in a clear income of a small amount, or he must occupy rented premises of the value of fifty dollars yearly, or, third, a man must occupy lodgings worth $1.25 per week. The two latter require the occupation of the same premises for one year previous to election.—S. W. Foss in Yankee Blade.

There is no virtue in doing what we have to do, for even the devil will behave himself when he is chained.

Cuban barbers lather their patrons with their hands from a bowl made to fit under the chin. No brush is used.

She Wore Plumpers.

"Never hear of plumpers?" asked a lady friend of mine the other day.

"No," said I. "What new feminine device is this, for goodness' sake?"

"Well," she replied (we were calling at the time at the house of a mutual friend), "just you notice Miss —— when she comes down stairs, and tell me if you notice anything strange or remarkable in her appearance."

The Miss —— referred to, be it said, is a tall and somewhat angular young woman of uncertain age, but who is possessed of a considerable degree of personal vanity and a more than ordinary desire to appear at her best upon any and all occasions.

In a few moments she appeared, and after greeting us cordially we entered into a general conversation. Nothing very remarkable about her, thought I.

"Well," said I to my lady friend, after our departure, "I have scanned Miss —— pretty closely, but failed to notice anything worth commenting upon in her appearance. She talked as if she had something in her mouth"——

I was interrupted at this point by a peal of laughter.

"Why, what on earth are you laughing at?" said I. "And, by the way," I asked, "did it not strike you that Miss —— is growing somewhat stouter? Her face seems to be somewhat plumper"——

"There," interrupted my friend, "now you have it. Miss —— had 'plumpers' in her mouth." To my look of inquiry and astonishment she responded:

"Plumpers, you see, are small round shaped affairs like a doll's saucer. They are made of rubber, and when held in place in the mouth they cause a woman's cheek to become plump and round. When ladies have lost some of their teeth plumpers come into play; prevents their jaws from appearing lantern shaped or their features from being angular."

"Heavens and earth!" said I. "What will the feminine mind conceive of next?"—New York Herald.

Woman and Her Hairpin.

The natural instrument which nature furnishes to all women for aggressive and defensive purposes must be of steel, and as pliable as the caprice of its sweet and fickle owner. These conditions fulfilled, more Protean qualities belong to it than to an ideal umbrella of which I once dreamed, which could upon emergency be transformed to a pair of stockings!

Where is the woman who, dressing in a desperate hurry, has not been saved by its friendly use from the ignominy of unbuttoned boots, while the lordly male creature can only stand still and swear or call wildly for Lucy or Susan to find his shoe buttoner. The beautiful empress of Austria has been known to button her gloves with a hairpin—a privilege of which even royalty does not deprive her.

A Welsh rarebit or a marsh mallow toasted on a hairpin in a boarding school dormitory with fear and trembling has a gusto which would tempt the jaded appetite of a Roman emperor. Then there are diabolical uses for this same small marvel—to pick locks of other people's writing desks, or to jab into offenders in a crowd. There was an Italian marchesa who, kneeling behind her hated rival, murdered her by sticking her sharp, silver hairpin into her.—Once A Week.

Almost Forgotten.

I often see going through the streets of New York a diminutive little woman to whom not one in a thousand passers by would give a passing glance. I do not suppose she weighs 100 pounds. Her face is wrinkled and looks sorrowful. She is old, alone, almost homeless, and often too ill to continue the struggle necessary to keep soul and body together. Often has she come into my office soliciting copying work and addressing envelopes at a dollar a thousand. Yet twenty-five years ago this little woman's name was in every literary paper throughout the country.

In 1863 she published what was the pioneer work written in the interests of women as breadwinners. The book was called "The Employments of Women." She sold the copyright for a trifle, and of the immense success which the book enjoyed for ten years she received not a penny. Twice was the work successfully republished under the titles of "Five Hundred Occupations for Women" and "How Women Can Make Money." Thousands, yes, tens of thousands of copies of the book were sold, and into countless homes has gone the work which cost her years of labor; yet is the author today a beggar on the streets of New York!—Edward W. Bok's Letter.

A Queen's Costume.

At the recent opening of the Italian parliament the queen of Italy wore a costume of extraordinary magnificence, which was also very becoming to her style of beauty. The dress was of violet satin, exquisitely embroidered, over which was thrown a short violet velvet mantle of slightly darker shade. The bonnet was of forget-me-not blue velvet, covered with gold lace and adorned with a plume of pale blue feathers, fastened with an immense pearl diamond clasp. The queen also wore earrings of pearls, diamonds and such ropes of pearls in three rows as would have enchanted Lothair.—London Letter.

Plays the Piano at Ninety-six.

It is not impossible to find ladies of not more than 50 years old who let their pianos stay unopened because, they say, they are too old and their fingers are too stiff to play any more. But people who pass by a Winthrop street house, it is reported, often hear music from a piano fingered by Mrs. Matilda Sewall, who, though 96 years old, plays with the skill and energy of a girl.—Kennebec Journal.

She Comes of Good Family.

Mrs. Danske Dandridge, whose second volume of poems has just been published, is a delicate little woman about thirty-five years of age, and the daughter of Henry Bedinga, at one time United States minister to Denmark.—Current Literature.

BILL NYE IN JAIL.

A Pen Picture of Life in the Famous Ludlow Street Prison.

IRON BARS TO KEEP OUT MOSQUITOES

Incandescent Lights of One Candle Power—Inmates do Their Own Chamber-work.—Dinner Table d'hote.

As you enter Ludlow Street jail the door is carefully closed after you and locked by means of an iron lock about the size of a pictorial family Bible. You then remain on the inside for quite a spell. You do not hear the prattle of soiled children any more. All the glad sunlight and stench condensing pavements and dank haired children of Rivington street are heard no more, and the heavy iron storm door shuts out the wail of the combat from the alley near by. Ludlow Street jail may be surrounded by a very miserable and dirty quarter of the city, but when you get inside all is changed.

You register first. There is a good pen there that you can write with, and the clerk does not chew tolu and read a sporting paper while you wait for a room. He is there to attend to business, and he attends to it. He does not seem to care whether you have any baggage or not. You can stay here for days, even if you don't have any baggage. All you need is a kind word and a mittimus from the court.

One enters this sanitarium either as a boarder or a felon. If he decides to come in as a boarder he pays the warden $15 a week for the privilege of sitting at his table and eating the luxuries of the market. You also get a better room than at many hotels, and you have a good strong door with a padlock on it which enables you to prevent the sudden and unlooked for entrance of the chambermaid. After a few weeks at the seaside at $19 per day, I think the room in which I am writing is not unreasonable at $2.

Still, of course, we miss the sea breeze here.

You can pay $50 to $100 per week here if you wish, and get your money's worth, too. For the latter sum one may live in the bridal chamber, so to speak, and eat the very best victuals all the time.

A boarder gets a good sized room, with a wonderful amount of seclusion, a plain bed, table, chairs, carpet and so forth. From his window one can see as far as the eye can reach.

Heavy iron bars keep the musquitoes out, and at night the rooms are brilliantly lighted by incandescent lights of one candle power each. Neat snuffers, consisting of the thumb and forefinger polished on the hair, are to be found in each occupied room.

Bread is served to the freshmen and juniors in rectangular wads. It is such bread as convicts' tears have moistened many thousand years. In that way it gets quite moist.

The most painful feature about life in Ludlow street jail is the confinement. One cannot avoid a feeling of being constantly hampered and hemmed in.

One more disagreeable thing is the great social distinction here. The poor man who sleeps in a stone niche near the roof, and is constantly elbowed and hustled out of his bed by earnest and restless vermin with a tendency towards insomnia, is harassed by meeting in the courtyard and corridors the paving boarders who wear good clothes, live well, have their cigars, brandy and Kentucky Sec all the time.

The McAllister crowd here is just as exclusive as it is on the outside.

But, great Scott, what a comfort it is to a man like me who has been nearly killed by a cyclone to feel the firm, secure walls and solid lime lock when he goes to bed at night! Even if I cannot belong to the 400 here, I am almost happy.

We retire at 7:30 o'clock at night and arise at 6:30 in the morning, so as to get an early start. A man who has five or ten years to serve in a place like this naturally likes to get at it as soon as possible each day, and so he gets up at 6:30.

We dress by the gaudy light of the candle, and while we do so we remember far away at home our wife and the little boy asleep in her arms. They do not get up at 6:30. It is at this hour we remember the fragrant drawer in the dresser at home where our clean shirts and collars and cuffs and socks and handkerchiefs are put every week by our wife. We also recall as we go about our stone den, with its odor of farmer corned beef and the ghost of some bloody handed predecessor's snore still moaning in the walls, the picture of green grass by our own doorway and the apples that were just ripening when the bench warrant came.

The time from 6:30 to breakfast is taken up by the average of non-paying inmate by doing the chamberwork and tidying up his stateroom. I do not know how others feel about it, but I dislike chamberwork most heartily, especially when I am in jail. Nothing has done more to keep me out of jail, I guess, than the fact that while there I have to make up my bed and dust the piano.

We go down to the sink to wash our faces and hands. It is a pleasant sight, and reminds me of a herd of red legged geese in a mud hole.

Breakfast is generally table d'hote, and consists of bread. A tin cup of coffee takes the taste of the bread out of your mouth, and then if you have some Limburger cheese in your pocket you can with that remove the taste of the coffee.

Dinner is served at 12 o'clock, and consists of more bread, with soup. This soup has everything in it except nourishment. The bead on this soup is noticeable for quite a distance. It is disagreeable. There is everything in this soup, from shop worn rice up to neat's foot oil. Once I thought I detected cuisine in it.

The dinner menu is changed on Fridays, Sundays and Thursdays, on which days you get the soup first and the bread afterwards. In this way the bread is saved.

Three days in the week at dinner each man gets a potato with a thousand legged worm in it. At 6 o'clock comes supper with toast and responses. Bread is served at supper time, together with a cup of tea. To those who dislike bread and never eat soup, or do not drink tea or coffee, life at Ludlow Street jail is indeed irksome.—Bill Nye in New York World.

Why He Was Uneasy.

Smith—Jones, did you ever sit down to a table with thirteen?

Jones—Yes.

Smith—Didn't you feel uneasy?

Jones—Very; there were only twelve squabs.—Burlington Free Press.

Dashing General George Custer, because of his long yellow curls, was known as "Ringlets" among his soldiers.

A famous Roman glutton always wore gloves at a feast so he could handle the hot meat sooner than the other guests.

Zinc miners at Webb City, Wis., have noticed lately that a shaft they were digging has been growing hotter. At a depth of 163 feet, the other day, they had to stop work, as flames burst through into the shaft.

BEAUTIFY THE STREETS.

The Advantage of Employing the Landscape Engineer.

While it is generally admitted that within the next few years certain radical changes will need to be made in the streets of Boston in the way of new constructions and enlargements those who have advanced plans of this kind do not seem to have taken into account the way that such things are considered in Europe, the desirability of increasing the beauty of our city as well as the convenience of our people. At the present time two or three propositions are before the London county council, having for their object a relief of the congestion of travel upon the Strand, a thoroughfare which holds much the same relation to London that Washington street does to Boston.

There have been propositions made to widen the street, which, however, have received little support in consequence of the tremendous expense involved, and there are other propositions to build relief or connecting streets, which will have the effect of deflecting a part at least of the travel which now passes through the main thoroughfare.

But in considering these propositions the artistic effect of the proposed changes has been kept carefully in mind. A plan has been proposed of building a highway a hundred feet in width, into which a great part of the tide of travel may be turned, but it is suggested that this street should be laid out in such a manner as to abolish existing street frontages, so as to procure the erection of new buildings, and that these new edifices should be built under restrictions both as to height and materials used.

More than this, care seems to have been taken in the plans, not only to preserve certain landmarks of London, such as one or two of its churches, but to add to the architectural effectiveness of these by providing that they shall form the central objects at the ends of broad, open stairways. In a word, the services of the landscape engineer, as well as of the civil engineer, have been brought into requisition, so that the money when spent—for large expenditures are required—shall result in the largest and most satisfactory returns.

We call attention to this phrase of the street improvement question because it is one which, it seems to us, should be borne in mind. In spite of the inconvenience of our thoroughfares there is a picturesqueness in our Boston streets which does not obtain in most American cities. If we are to obtain needed conveniences, and these can only be secured by large outlays, there is no reason why we should rush rashly into expedients which have only convenience to recommend them, and which have, as an offset, a great deal of ugliness, when by greater care and by judicious arrangement both beauty and convenience can be made to go hand in hand.

The general plan of construction adopted in Chicago for the World's fair demonstrates conclusively that we have in this country landscape engineers whose ability is not surpassed by any members of their profession in any other part of the world. The park systems of Boston are also a proof of this same genius in the way of artistic design, and there is no reason why the same talent might not be wisely employed in the way of suggestion—at least on the subject of new street construction.—Boston Herald.

Some Famous Phrases.

A Mme. Cornuel was the original author of the phrase, "No man is a hero to his valet!" One Harel said, "Speech was given to man to disguise his thoughts." An obscure journalist invented a phrase that was immensely quoted in France as having been said by the Bourbon prince who was restored to the French throne in 1814 as Charles X. He was credited with assuring the nation that he would not restore old abuses in the following phrase: "Nothing is altered; there is only one Frenchman the more in France."

"A nation of shopkeepers," generally attributed to Napoleon I, really occurs in Adam Smith's "Wealth of Nations." "The pen is mightier than the sword" is the saying of Bulwer Lytton. "A thing of beauty is a joy forever" is from Keats. "The heart that has truly loved never forgets" belongs to Tom Moore; so does "The luxury of woe" and "The trail of the serpent is over them all." "To live in hearts we leave behind is not to die" was the pretty saying of Campbell, and his also is "Coming events cast their shadow before." "Plain living and high thinking" was Wordsworth's ideal. "Rose like a rocket and fell like its stick" was said, incorrectly as smartly, by Thomas Paine, of Burke.

"Variety's the very spice of life that gives it all its flavor" is not quite the sentiment that we expect from the excellent Cowper, but he said it. It was he also who wanted "A lodge in some vast wilderness," and who declared that "God made the country, man the town."—London Tit-Bits.

A Ludicrous Error.

A certain French family of this city, who are very familiar with the English language, with the exception of one young man, employ as a cook an Irish girl. The young man is making good progress with his English, but is apt to grasp at a word somewhat too quickly and to put it into use before he has mastered it. Then, too, he occasionally learns something that has to be unlearned. The other day he happened to go into the kitchen, and seeing the cook putting skewers into a piece of beef asked what they were.

"Them's skivers, sor," answered the domestic.

"Skivers, skivers," murmured the young man as he strolled away. Shortly after this he happened to be dining out with some American friends. When the meat was brought on and the hostess started to carve something seemed to bar the passage of the blade. The quick eye of the young Frenchman took in the situation at a glance, and leaning forward he said:

"Ze skiver, ze skiver."

"What?" said the hostess, stopping short in her work.

"Ze skiver. Here it is." And the young man stretched out his hand and pulled a long wooden skewer out of the beef. A roar of laughter from the family and explanations followed.—Brooklyn Eagle.

Raphael's "St. Cecilia."

St. Cecilia has long been a favorite subject for painters. The accepted patroness of music, her personality appeals in a special manner to the artist, and to reproduce her features has been the dream of many an ambitious artist. The painter or sculptor in portraying his subject simply gives tangible form to the creature of his imagination. This is true of Raphael's "St. Cecilia."—Jewelers' Weekly.

She Calls Him Lycurgus.

A New York lady recently employed a colored boy as a man of all work whose name was Lycurgus Jones. "Lycurgus is a rather long name," she said to him; "suppose I call you Gus for short." "I'ze don't likes nicknames," he replied; "'f you don't likes Lycurgus you kin call me Jonesy." She calls him Lycurgus.—Exchange.

INYO INDEPENDENT.

PUBLISHED EVERY FRIDAY

INDEPENDENCE, CAL.

FRIDAY, FEBRUARY 24 1893

Rot, political rant. Next week the g. o. p. goes and the Dems take the helm; but the grand Old Ship sails on in triumph. Her crew is worth more than any set of officers.

An excellent bill has passed the Legislature and become a law. It is intended to prevent the fleecing of candidates for political offices. The law fixes a limit of expenses that may be paid, and provides that candidates and committees shall make public and sworn statements of election expenses. The penalty for bribery, direct or indirect, is forfeiture of office. This will go far toward putting an end to the class of vile bummers called "political workers."

The Governor did well and wisely last week in sending a message to the Legislature urging economy. One item mentioned in the message recommended that not more than one hundred thousand dollars be appropriated for a State building in San Francisco, instead of three times that amount, as was demanded. The Governor showed that by spending the sum he named in making an addition to another public building already provided for, all the accommodation necessary for State officers could be provided. Any increase of burdens, already too heavy, whether for buildings or increased pay of county officers, would be bitterly resented by the people. There is no mistake about this, and all interested had better make a note of it.

Ranking with Gladstone and Bismarck, Pope Leo is one of the three greatest living statesmen. The fiftieth anniversary of his consecration as a Bishop was celebrated with joy all over the world. By his wise liberality of mind, his tolerance and loving, charitable spirit, the strong jealously and distrust of the Catholic church that not many years ago prevailed in all protestant countries has been in great degree removed. The Pope is encouraging the efforts now making by the great mass of the people in all civilized countries for liberty and justice, and is doing all in his power—and that all is a very great deal—for the greater good of those who are least able to protect themselves against injustice and tyranny. Such action as this is the most effectual way to extend the influence of any Church.

The Caminetti mining bill is now regarded as certain to become a law. The obstructions put in the way, however, make it impossible at present to secure an appropriation to put it in operation, and for this reason the law will not be of much benefit to the State till the next session of Congress. The Examiner justly says: "The people of the State of California, whether resident of mountain or valley, owe Mr. Caminetti a lasting debt of gratitude for his ceaseless efforts to secure the passage of this Act. Day and night for two sessions he has jealously watched every step of its progress through both branches of Congress, and, although receiving many setbacks, he never lost hope, even though at times obstacles were thrown in his way by members of his own delegation. Mr. Caminetti's work will not soon be forgotten by California."

Another good bill before the Legislature proposes that all persons having claims against the State shall enter suit in a Court of competent jurisdiction, the same as for claims in ordinary civil suits. As the law now stands all claims against the State must be made in the form of a bill presented to the Legislature. The result is that in any claim to recover money from the State only one side is heard, and that is the claimant. At every session of the Legislature bills are presented for thousands of dollars, where not one cent is justly due. In nearly every such instance members are to receive a large part of the plunder if the bill goes through. By the proposed law a claimant against the State must go into Court and prove the justice of the claim by competent evidence, and in all such suits the State would be defended by the Attorney General. In all cases suit must be bugun within two years or the claim would be barred by limitation. At present there is no limitation of time for bringing a bill to recover a claim, and villianous old steals, bolstered up by lies and perjury, are presented to the Legislature, in some cases years after the original claimant is dead and damned. It will be well for the State if this bill becomes a law.

BEING DECAPITATED.

AN INTERESTING QUESTION THAT MAY NEVER BE ANSWERED.

Are the Movements of the Head and Face After Decapitation Involuntary or Are They Attended with Some Slight Action of the Will—Some Experiments.

The question of the duration of consciousness in the brain of criminals after execution by hanging or by the guillotine is being discussed with greater interest than ever since Anastay, the murderer of Baroness Dellard, paid his debt to society. It is said that this remarkable criminal sent to his brother a letter on the subject as follows:

The separation of my body and that which constitutes my thinking being cannot so soon be accomplished. I believe there is a survival of about an hour. Come, then, Leon, be present at my execution and insist that my head be given to you. Call me with your voice and my eyes will reply to you.

This is but the repetition of a popular belief that has prevailed for centuries. There is a legend of a state execution in England at an epoch when the ax and block were in use, which sets forth that after the instrument had fallen the person whose head was on the block exclaimed, "You have missed me!" to which the executioner replied with a slight kick that sent the head rolling to a distance. The story never gained much credence, but is still worthy of discussion. Its truth or falsity would depend on the possibility of the instrument being so thin and sharp that the walls of the veins would not be displaced, in which case the circulation of the blood might continue for a few seconds, and whether consciousness might continue for a moment after the vertebra of the neck was severed. This last difficulty would be the greatest, since utter unconsciousness is supposed to be simultaneous with the severing of the spinal cord or the breaking of the neck. In any event, scientists who have taken the trouble to study the faces of the guillotined for a few seconds after the fatal stroke, or who have made experiments with decapitated animals, do not favor the theory.

Several French physicians, and among them Dr. Paul Loye, now deceased, but once a professor at the Sorbonne, have experimented with dogs, using for their hanging or decapitation machinery like that employed in public executions. The dog was chosen for the experiments as having the most mobile face and being able to reproduce the movements which in rare cases have been observed in human subjects. Persons whom this treatment of dumb animals might revolt are begged to remember that the suffering is much less than in vivisection, since these methods of execution are generally recognized as producing the least pain. The guillotine employed by Dr. Loye was similar to that used for the execution of ordinary criminals in France. It consisted of a triangular knife or ax, surmounted by a mass of lead weighing over twenty pounds and falling over six feet upon the neck of the animal, which was severed at the third vertebra. The phenomena observed were similar to those remarked by other French and by foreign savants whose experiments have been less elaborate.

At the moment the head was detached from the body the mouth opened wide, as if the animal was making an extraordinary effort at inhalation. The tongue was applied to the lower part of the mouth and underwent a brief period of agitation. The eyelids were closed with light contractions. Then the eyes were opened and rolled from side to side and top to bottom, the pupils in the meantime gradually contracting. At the same time the jaws were opened and violently closed, and the face was rapidly convulsed. This was followed by changes at the corners of the mouth, vibration of the nostrils, trembling of the lips and erection of the ears. The ensemble of these movements constituted a series of horrible grimaces like those seen on the face of the guillotined, and seemed to express the most intense agony. If the cornea of the eye was touched the eyelids closed, but if an object, no matter of what kind, was placed before the eye there was no movement. Neither did crying nor whistling into the ears of the dog appear to cause the slightest sensation. The pinching of the tongue caused a slight shrinking of that organ. Although the pupil of the eye was contracted, the approach of a light rendered the orifice still smaller.

These phenomena occupy about ten seconds, and are followed by a period of repose continuing to the fifteenth or twentieth second, during which the mouth rests closed and the eyes open and without movement. At the end of this time the mouth opens and closes quickly, the nostrils dilate and contract. During this time, although the irritation of the cornea has caused a slight winking, neither whistling in the ear nor touching the tongue or nostrils with ammonia or cologne has been able to produce any effect. The opening and closing of the mouth resemble yawning, and are reproduced a dozen times, after which the motions gradually cease. Then the cornea loses its sensibility to the touch, though, half a minute having elapsed, the yawning is still active. The pupil of the eye dilates at the approach of light, but does not contract, and the cornea loses its glistening appearance. At the end of two minutes the yawning and other phenomena have ceased, ending in mere contraction of the fibers, and the head takes a corpselike look.—San Francisco Chronicle.

Coffee Good for the Voice.

When making a speech Lord Salisbury never drinks anything, neither does the present leader of the house, and the same may be said of John Morley and Mr. Chamberlain. Sir Charles Russell, the leader of the English bar, on the occasion of his two days' speech before the Parell commission, drank nothing but hot coffee, which he declared was not only good for the voice but an excellent stimulant.—Exchange.

A CLUB FOR WORKERS

A NEW YORK CLUB THAT IS LIKE LONDON'S TOYNBEE HALL.

An Enthusiastic and Willing Lawyer Has Started a Work That Is Already Producing Good Results—Workingmen Have Advantages of Real Club Life.

The nearest approach to a Toynbee Hall in America is the East Side club. The movement originated in the Church club, an organization consisting of about 400 representative Episcopalians.

Instead of an Oxford tutor, a New York lawyer, Everett P. Wheeler, conceived the idea of a hospitable home, with liberal minded men in residence, where the workingmen of the east side might meet. Mr. Wheeler had just returned from London when he read his paper to the Church club, showing the magnitude and magnificence of the work accomplished in Whitechapel by university extension.

The laymen were so very favorably impressed by the strength of the appeal and the earnestness of their associate that as individuals they agreed to give any project he might formulate their support. That was in March, 1891. In June Mr. Wheeler had rented an old frame dwelling house at the foot of East Seventy-sixth street, once the country residence of a prominent New York physician, to which he gave the name of the East Side club. His family had gone abroad, and when it was learned that Mr. Wheeler had closed his house at the corner of Seventy-first street and Park avenue, and taken up his residence in the club for the summer, his friends in the Lawyers' club, the Church club and society generally were amazed. From chance acquaintances he made friends, and the few who were welcomed to the freedom of the turf and the cool shade about the house welcomed others on their own responsibility. In this simple and cordial way the men were drawn to the East Side club every evening, and on Sundays they brought their children and their lunches and newspapers and picnicked on the grass.

Mr. Wheeler talked to the people. He had every newcomer introduced to him, and he sat on the grass with them; he smoked and read with them, and he not only got their ideas on political, social and industrial questions, but frankly gave his own. Some of these friendly discussions lasted a week, and news of them drew new visitors. When one evening "the club gentleman," as he was called, invited two men to dine with him, his sincerity of purpose was established, and since then the work has prospered.

Associated with Mr. Wheeler were the Rev. Mr. Theodore F. Bacon and Mr. L. D. Hughes, graduate and student of divinity. Notwithstanding the religious tendency of these gentlemen and the support of the Church club, the work was conducted on purely nonsectarian lines. Not a Scripture quotation was seen on the walls, and neither hymnal nor book of common prayer was visible.

The old fashioned dining room was converted into a billiard hall, and here the men smoke and chat, play billiards, chess and checkers whenever they like. At a small expense the conservatory was converted into a gymnasium. On the same floor is the lavatory and bath.

Every day in the week from 9 a. m. until 10 p. m. the clubhouse is open and the attendance in the billiard room and gymnasium is greater Sunday than at any other time. When exception was taken to this unusual plan of operation Mr. Wheeler took the ground that a gentleman might play a game of billiards in his private club Sunday afternoon if the notion pleased him without exciting any comment among the members. Granting this privilege to a merchant, banker or professional man, why should it be denied his truckman and clerks? It also occurred to him that a game of cards in a private club was not only less baneful, but less expensive than in a saloon or beer garden.

Another innovation is a monthly dance to which all the members are invited to bring their wives, sisters and friends. Good music is provided, simply printed dancing cards are distributed and in the middle of the programme hot chocolate and cake or coffee and sandwiches are served. The young clergyman is always present, and no group, however small, is unattended in the club, and in consequence noisy harangues, profanity and discord are unknown.

Now there are five club residents—Mr. W. S. Brush, also a lawyer; Mr. Paul Reynolds, editor of a religious paper; Mr. Willis B. Holcom, Mrs. Virginia Gookin, the kindergartner, and her little son.

The janitor and his wife take care of the house and John Codet, aged sixteen, is custodian of the playgrounds. During the day Mrs. Gookin teaches all the children who come to the kindergarten. Last October an epidemic broke out and the school had to be closed. Several deaths resulted from measles and fever. The work was resumed recently with a membership of fifty. At the start these toddlers had to be washed and scrubbed; now they present themselves clean and tidy.

Any self respecting man may become a member of the club by paying fifty cents a month. This fee entitles the member to all the privileges and advantages of a social and friendly organization. It gives his children the freedom of the playgrounds seven days in the week and provides kindergarten training for them. It welcomes his wife to the mothers' meetings and the general entertainments, and it gives him the use of a gymnasium, library and reading room, and a cozy and beautiful place to spend his holidays. It brings him in contact with at least three sympathetic and influential men on whom he can depend for many courtesies calulated to relieve the monotony and reduce the struggles for existence.—New York World.

WINNING A WIDOW.

EVERYBODY WAS AT THE WEDDING EXCEPT MISS BECKETT.

A Story of a Village Courtship from Indiana—The Wedding Excited a Deal of Interest Because the Groom Was an Undertaker, Who Had Buried Many.

Undertaker Samuel Pavey and Mrs. Sarah Milliken, who has been known in Aristotle, Ind., for twenty-five years as Achilles or Kill Milliken's widow, were married recently in the presence of everybody in this village except old Miss Beckett. Miss Beckett would have been present if she had not left her sickbed last week to call on Mrs. Milliken and inquire into the particulars of the engagement. After this imprudence she had a relapse and has been unable to leave her bed. She was propped up at the window all the afternoon, however, and saw everybody that went in or out of church.

Undertaker Pavey has buried all of the dead here for the past sixty years. He is now a tall, thin man, with close cropped white hair and smooth shaven face, and always dresses in black, as becomes an undertaker. Only the oldest citizens can remember when he looked any different from the way he looks now. His wife died forty years ago, and he has kept shy of all maidens and widows ever since. Years ago he was abandoned by the most persistent match makers as a hopeless case.

The widow of Kill Milliken is an estimable lady, a great maker of cakes for the church festivals and clever at crocheting worsted tidies, with a large number of which the chairs and the sofa in her front parlor are adorned. As there has been a good deal of curiosity about her engagement and marriage, she has consented to a public statement. She is a short, fat woman, with hair of a peculiar shade of yellow, which she got by using the hair dye which was advertised extensively in connection with her picture and letter of recommendation. She says that Mr. Pavey had never shown any signs of preference for her whatever, nor had she thought of him as the successor of Kill until ten days before the marriage.

About that time he knocked at her front door at half past 11 in the morning. It was a Wednesday and the Widow Milliken was deep in the dough, as that is baking day through this whole town. She looked out through the blinds of the window next the front door and saw who it was. As she had known Mr. Pavey so many years she just wiped the flour off her hands upon her apron and opened the door.

Mr. Pavey went into the parlor and sat down in the canescat rocker with the green worsted tidy with blue ribbons through it. He set his tall hat carefully on the floor beside him and then said:

"Good morning, Sarah Milliken."

"Good morning, Mr. Pavey," said Mrs. Milliken. She said that she accented the Mr. so that Mr. Pavey might understand that she had noticed his not calling her Mrs. Milliken, as he was accustomed to do. Mrs. Milliken also says that she had a sort of premonition that something was coming.

"It can't be that the Gompers girl is dead?" she said anxiously.

"No," said Mr. Pavey. "But life is uncertain, Sarah Milliken."

"No one should know that better than you, Samuel Pavey," said the widow with one of her sly laughs.

But Mr. Pavey did not laugh as he went on:

"Sarah, you are getting along in years. You will soon be in need of my services."

"I haven't even sent for the doctor yet, and I won't need you till he's done with me," said the widow, bridling and pouting.

"Do you remember the first Mrs. Pavey?" said the undertaker, paying no attention to her and pursuing his own gloomy reflections.

"I was a little girl when she died," said Mrs. Milliken.

"Yes," said Mr. Pavey, "you had just married the late Mr. Milliken five years before. You remember that she had the best funeral this town ever saw, not excepting old Captain Lander's funeral, which cost five dollars, as I should know, if anybody. As I said, Sarah, you are getting old. If you marry me I will do as well by the second Mrs. Pavey as I did by the first."

"You always would have your joke, Sam," said the widow. "What will everybody say?"

"We are both getting old," said Mr. Pavey, still paying no attention to what the widow was saying. "Life is uncertain. There is no time to lose."

So Mrs. Milliken said, "All right, Samuel; whenever you say."

"Ten days is long enough. I'll see the pastor this afternoon."

Then they shook hands, and Mr. Pavey put on his hat and went away, looking quite gay and chipper as soon as the door closed on him, for he did not know that Mrs. Milliken was watching him through the blinds. Two minutes afterward she had called Mrs. Meek, her next door neighbor, to the back fence and had told her all about it. Ten minutes afterward by the clock on the court house Mrs. Meek, having left her bakery in charge of her daughter Lizzie, had on her bonnet and shawl and was bearing down the street, telling everybody she met.—Cor. New York Sun.

A Rare Collection of Fabrics.

The collection of fabrics in the Drexel institute, Philadelphia, promises to become one of the finest in the country and of the highest importance to students. The series of Indian prints is remarkable and the Chinese embroideries comprise several notable specimens.

The Easier Way.

A boy of three and a half years, on hearing about a man who strained his back by lifting a barrel, said: "I should have thought he would have rolled it."—Cor. Babyhood.

Railroads and the Game Laws.

A large doe was struck and killed by the night train coming south on the Adirondack and St. Lawrence railroad in the Adirondacks. The carcass was taken to a slaughter house in town and dressed. A question arises as to the liability of the railroad company for killing deer out of season.—Cor. Utica (N. Y.) Herald.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892 and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 38-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hallhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the north west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres; Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

COURT NOTES.

Geo. M. Gill, Superior Judge.

WEDNESDAY, Feb. 15, 1893.

Estate of John Blair, deceased—Filed proof of publication. Order admitting will to probate. Issued letters testamentary to Mrs. Anna Dugan, administratrix.

Estate of Schuyler Williams—Filed will for probate.

SATURDAY, Feb. 18, 1893.

Estate of Birna Peeler, deceased—Filed final account. Petition for distribution of estate.

MONDAY, Feb. 20, 1893.

Estate of John Morton—Filed inventory and appraisement.

MARRIED.

JONES—THOMPSON—At the residence of the bride's parents at Camp Independence, on Feb. 23, 1893, C. Mulholland, J. P., John E. Jones Jr., of Round Valley to Miss Annie A. Thompson, daughter of Mr. and Mrs. C. A. Walter.

The printers were yesterday treated to several bottles of wine and a large box of assorted cake, the occasion being the wedding of Miss Annie Thompson and Mr. John E. Jones. May their lives be as full of happiness as their marriage day was of sunshine; and when the close of life's day shall come for them, may they, like the sun, carry with them nothing but brightness to another sphere of existence.

DIED.

LUBKEN—At Lone Pine, Feb. 21, 1893, John Frederick Lubken, a native of Hanover, Germany, aged 57 years and 7 months.

Funeral will take place at 1 o'clock p. m. to-morrow (Saturday), from his late residence at Lone Pine. Friends and acquaintances are respectfully invited to attend.

Many apricot trees are now in bloom about Independence, and peach, almond, cherry, plum and other fruit trees will all be in bloom in a few days.

A special train left Hawthorne at 9 a. m. to-day for Keeler. On Board the train are H. M. Yerington, D. A. Bender and some others whose names are not given.

On Sunday afternoon Fred Holbert left Independence with about 350 head of beef cattle for Los Angeles. The cattle will be driven to Mojave and taken by rail the rest of the way.

Frederick Stock, of London, and O. A. Vickery of Los Angeles are at Independence. They came here a few days ago and are looking around to see what kind of a country we have got here.

The mine managers at Coeur d' Alene declare that they must stop working the mines because there is no profit in the business. The low price of silver and high rates of freight leave nothing for the mine owners. It is probable that 1200 to 1500 men will be thrown idle.

On the Barrows ranch north of town a new orchard has been set out on ground lately enclosed and cleared of sage brush. Since the place came into possession of Mr. O. I. Mairs he has made many good improvements, among the best being many shade and fruit trees planted.

There is an immense quantity of snow on the Sierra Mountains. In the canyons west from Independence the pine trees are covered out of sight, and it is known here that many of these trees are very large. It is a strange contrast to see flowers and blooming fruit trees and snow so near each other. It is not much of exaggeration to say that one person could stand in a garden at Independence and call to a friend on the mountain side "throw me down a snow ball and I'll throw you up a bouquet."

Next Wednesday will be the last day for which members of the Legislature can receive pay during the present session. They may continue longer in session if they like, but it is very certain they won't stay long after pay ceases. In fact they should not continue a day in session after the sixty days are up. At the last election the people by a very great majority refused to extend the term of the Legislature, and this should be warning enough that when time is up the public want them to stop and go about their own business.

In The Loop.

Not long ago a man got on the train at Mojave bound for Tehachepi. He had taken a little Kentucky soothing syrup before boarding the train, or maybe more than a little. Anyway when the train stopped at Tehachepi he was asleep and didn't get off. In due time the train conductor came around and waked the man with the call of "ticket please". The man said he wanted to stop at Tebachepi and was surprised to learn that the train had already left that place a few miles behind. The conductor agreed to stop and let the man off as was requested. The train stopped just after passing through the tunnel, and the man started back. It was a dark night, but like the darky on the way to his neighbor's "tater" patch "that he didn't mind, he knowed the way to dat ar patch, it wasn't hard to find." After passing the tunnel some distance, the man came to a bend in the road, but saw another track just below him and determined to make a short cut by climbing down the bank rather than follow around the curve. The descent was quickly made and the traveler sped over the ties at a lively rate. Soon he was in complete darkness but the track was a good guide and he pushed on as rapidly as ever. Again there was a little light and once more he saw a chance to make a short cut and took it. This experience was repeated several times. In a word, when daylight came he discovered that he had been all night traveling around the famous "loop" of Tehachepi.

All Wish Them Happiness.

Yesterday forenoon at the residence of Mr. and Mrs. C. A. Walter at Camp Independence their daughter Annie was married to John E. Jones Jr. of Round Valley. The ceremony was performed by the bedside of Miss Lena Thompson, sister to the bride, who had a leg broken some weeks ago by a runaway horse. Miss Thompon and Miss Annie Bell were the bridesmaids. Charles E. Turner and H. P. Cartier stood up with the bridegroom, and it is to be hoped they will both profit by the noble example he set the men in the tying occasion. The bride was dressed in a very elegant traveling suit. After the ceremony the company were invited to partake of a luncheon where delicacies of many kinds were served in abundance. The feast was made doubly enjoyable by the very kindly and cheerful attentions bestowed upon the guests by the entertainers. After heartfelt congratulations and tender farewells the young couple set out for their home in Round Valley. They traveled to Big Pine yesterday intending to complete their journey to-day. The marriage of Miss Thompson takes from Independence one who is highly esteemed, and who would be parted from with far keener regret were it not that she left us as the wife of one of the most respected and worthy young men in the County.

Willing To Risk Capital.

Last Friday a meeting was held at San Francisco to consider the proposition for pumping out the lower levels of the Comstock mines and resume mining there. John W. Mackay, James L. Flood and more of the principal stockholders in the mines were present. It was determined to go ahead with the work if the expense should not be so great as to bankrupt the companies. A committee was appointed to secure the services of a competent engineer to make estimates of the cost of the work, and Mr. Eckert of Virginia City has been chosen to do this. John W. Mackay said he was anxious to have good times for the miners and is willing to risk something for improvement. It would appear, however, that the real solution of the problem will be if the miners will consent to a reduction of wages. The expense will be very great, and the men who must risk their capital think the miners should help them by consenting to a temporary reduction of pay till the lower levels can be cleared and ore reached. This appears to be reasonable; in fact the choice with the miners is a temporary reduction of pay, or no pay atall.

Honor To An Invoite.

A recent issue of the *Reporter* and of the *Call* published at the city of Woonsocket, Rhode Island, each contains a three column article descriptive of a banquet given on the 10th of this month to a former citizen of Independence. The Mayor of the City presided at the banquet and most of the prominent citizens were present, including merchants, lawyers, physicians, clergymen, manufacturers and bankers. Several of these had known their guest when he was a child and were now very happy to welcome him back to his native town a distinguished man. From these accounts it is evident that in the City of Woonsocket no name is held in higher honor than that of Hon. P. Reddy of California,

By proclamation of the President 4,480,000 acres of forest land in the Sierra Nevada, is reserved from entry. This reservation covers the head waters of Kern, King's and San Joaquin rivers, and includes most of the territory recommended to be reserved by the Committee appointed by Mr. Caminetti. Every citizen of Inyo will be pleased to know that the grand forest about the head waters of Kings and Kern rivers will be saved from destruction. The reservation does not interfere with mining claims or with lands already entered for settlement, where the law in all cases has been faithfully observed.

Gratitude.

To the many friends who were unceasing in acts of kindness during the time our daughter was kept at Independence by a dangerous accident, we hereby tender our heartfelt thanks. It is with great pleasure we are able to say to our friends that our daughter is rapidly recovering.

C. A. WALTER,
MRS. WALTER.

Mead's team came in on Tuesday from Mojave. The cargo was eight tons of hardware and general merchandise. The road at the divide between Olancha and Heiwei is reported to be washed into deep ruts by the rains.

In the Assembly the Committee of Ways and Means made a heavy cut in the general appropriation for Agricultural Districts. Some of the Districts are likely to fall short of the amount usually allowed them.

MISCELLANEOUS.

ORDER FIXING TIME AND PLACE FOR HEARING OF PETITION TO LEASE CERTAIN REAL ESTATE AND DIRECTING NOTICE TO BE GIVEN.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the Estate of John Allen Hannah deceased.

Upon reading and filing the petition of William L. Hunter, Executor of the last will and testament of John Allen Hannah, deceased, praying that he be authorized, empowered and directed to lease certain of the real estate belonging to said estate, which is described as follows, to-wit:

The S ½ of the S E ¼ and S ½ of the S W ¼ of Sec. 10; the E ½ of the S E ¼ of Sec. 9, and the N E ¼ of Sec. 15, all in Township No. 10 S, R No 34 E., M. D. M., situate in Inyo County, California.

Also lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12 in Block No. 29, in the town of Independence, California, as the same appears of record by the official plat of said town now on file in the office of the Recorder of the said County of Inyo.

Wherefore it is hereby ordered that all persons interested in said estate appear before the Judge of said Court on Monday, the 6th day of March, 1893, at the Judge's Chambers, in the Court House in the town of Independence, County of Inyo, State of California, at the hour of 10 o'clock a. m., of that day, to show cause if any they can, why the first mentioned real estate should not be leased from the date thereof until the first day of November, 1893, for the rental of Three Hundred Dollars as is more fully set out in the petition on file herein, reference to which is hereby made for further particulars, and also to show cause, if any they can, why the last mentioned real estate should not be leased from the date thereof until the first day of November, 1893, for a rental of $10.00 per month, as is also more fully set forth in said petition, and to which for further particulars reference is here made.

It is further ordered that a copy of this order be published in the Inyo Independent, a newspaper published and printed within the said County of Inyo, for at least two weeks, said publication to be completed before the said 6th day of March, 1893.

GEO. M. GILL,
Judge of said Superior Court.

Dated this 14th day of February, 1893.

[Endorsed.]
SUPERIOR COURT, COUNTY OF INYO, STATE OF CALIFORNIA.
In the Matter of the Estate of John Allen Hannah, Deceased.
Order to Show Cause why Lease of Real Estate should not be made.
Filed Feb'y 14th, 1893.
D. J. HESSION, Clerk.

Do You Wish the Finest Bread and Cake?

It is conceded that the Royal Baking Powder is the purest and strongest of all the baking powders.

The purest baking powder makes the finest, sweetest, most delicious food. The strongest baking powder makes the lightest food.

That baking powder which is both purest and strongest makes the most digestible and wholesome food.

Why should not every housekeeper avail herself of the baking powder which will give her the best food with the least trouble?

Avoid all baking powders sold with a gift or prize, or at a lower price than the Royal, as they invariably contain alum, lime or sulphuric acid, and render the food unwholesome.

Certain protection from alum baking powders can be had by declining to accept any substitute for the Royal, which is absolutely pure.

Not Worth While.

"If you have a few moments to spare," said the visitor, "I should like to call your attention to the superior inducements our company offers in the way of life insurance."

"I am a little nearsighted, my friend," replied the man sitting at the desk. "Will you please read what this paper says under the heading of 'Squallop, the Played Out Demagogue?'"

"Certainly, sir. It says: 'The most gratifying result of the election last Tuesday is that it retires forever from the public gaze that pestiferous and blatant humbug, Jeremiah Squallop, whose mean little soul, contemptible and repulsive carcass, and leprous political influence (?) have made him an eyesore in the community that has tolerated him so long. Farewell, Squallop! If you were not so pitifully insignificant, Squallop, we should rejoice for months to come because of your defeat; but in less than two days you will have been forgotten, and decent people will walk over your political grave without remembering that there ever was a thing in the shape of a man bearing the miserable name of Squallop.'"

"Yes," said the man at the desk, looking up with an air of relief, "I wasn't mistaken. That's the way I read it. It won't be worth your while, my friend, to talk of insuring my life. It isn't worth insuring. I'm Squallop."—Chicago Tribune.

How He Paid the Bill.

Some years ago, when Judge H. G. Hicks was not as prosperous as he has been in later years, he owed a little bill of $25 to a well known firm, and one of the members came to see him about it. The judge, then a plain colonel, lately returned from the war, frankly confessed that he was "busted" and asked for an extension of time.

"Can't do it," said the gentleman; "if you don't pay it we'll have to sue you."

"How can I pay when I haven't got the money?" asked the colonel. "All I want is a little time."

"Well, we'll have to bring suit," said the gentleman, as he started off.

"Hold on," said the colonel, as a bright idea struck him; "if you must sue me, why not give me the case? You will have to employ some lawyer."

"That's so," said the gentleman; "all right, bring the suit."

Col. Hicks brought the suit, confessed judgment, sent in his bill for $50 attorney's fee, collected it, then settled the judgment. From that time on he had all the firm's law business.—Minneapolis Tribune.

Good Judges of Character.

Passenger (alighting from cab)—What's the charge?

Cabman—One dollar.

Passenger—Well, that's quite reasonable. I know by your face you wouldn't try to be extortionate.

Cabman—Thankee. I knew by your face that you'd be too mean to pay more than the legal fare without a lawsuit.—New York Weekly.

In the Tyrant's Power.

Young Mr. Green—Really, my dear, you must get rid of that cook of ours. The dinner is particularly dreadful!

Young Mrs. Green—I don't dare to, Richard. I must give her a week's notice, you know, and there is no telling what she might do in that time!—Munsey's Weekly.

FOR PURE FOOD.

The San Francisco Board of Health Notify Consumers Which is the Best Baking Powder.

San Francisco Chronicle.

The Board of Health can engage in no more laudable occupation than the examination of our food supply and the instruction of the public as to those articles it finds to be pure and wholesome, and which, therefore, consumers should use.

There are quantities of baking powders in the market to use which is certain detriment to the health of the consumer. They are made from alum, or improperly compounded from other chemicals, so that they leave a strong alkaline residuum in the food. Many of these powders, having proved unsalable in the East, have been collected by their manufacturers from the dealers with whom they were left on commission, and shipped to the Pacific Coast. In the effort to gain a foot-hold in this market their unscrupulous manufacturers have indulged in extravagant statements both with reference to their own and other brands, claiming the most improbable endorsements for theirs and defaming the brands best known and longest used upon the Pacific Coast. This information from this high authority, therefore, is most opportune.

The strength in leavening gas indicates both the economical value and the purity of a baking powder. The tests made by Messrs. Thomas Price & Son, the well-known analytical chemists of San Francisco, show the Royal to contain 191 cubic inches of leavening gas per ounce of powder, which was 51 inches more than the next highest in strength. This shows the Royal about thirty per cent. stronger than the best of the other powders and its use that much more economical.

The opinion of the Board of Health is as follows:

We, the members of the Board of Health of the City and County of San Francisco, cordially approve and recommend the Royal Baking Powder. It is absolutely pure and healthful, composed of the best ingredients, of the highest strength and character.

In our judgment, it is impossible to make a purer or stronger baking powder than the Royal.

Spoiled the Murder.

A murderous melodrama held the boards at Jacobs' theatre last week. There was a sprinkling of comedy, however, through the third act on Saturday evening that set the audience agog. The hero of the play had just described to the soubrette how himself and the boys had been down at the blacksmith's "shoeing" geese. He cracked a weak joke in explaining how the geese gathered round a pool of water near the old forge, and how the boys amused themselves by shaking their hats at them, shouting "Shoo, shoo!" The gallery boys caught on at once, and every time the villain unfolded one of his horrible plots on the lives of the hero and heroine the "gods" completely drowned him out with their "shoos."

It was at a very serious situation in the performance. The life of an unprotected young heiress was about to be taken by the unscrupulous scoundrel. The sea rolled heavily and the storm raged fiercely; while the desperate deed awaited execution. "Ha! she comes; she'll never see him again!" He was within arm's reach of her now. He held a bloody knife in his right hand. In a moment he would plunge it into her body, but in the weirdest and most hair standing tones from among the "angels" came, "Shoo, shoo, shoo!" in rapid succession.

The awful scene was broken. The villain jumped three feet in the air and forgot his lines. The heroine forgot herself, and looked her wouldbe murderer straight in the face with horror at the thought of a breakdown, but of course didn't see him. Whether by an act of providence, to save the villain from his nervous plight, or through the effect of inclement weather on the electric wires, every light in the house went out instantly. Affairs were righted after a time.—New York Telegram.

New York's Small Boy in Winter.

A park policeman remarked recently that the winter has had no effect on the pet enemy of his comfort. "The howling wind and the falling snow," he said, "have no terrors for the venturesome small boy. He is out here in all kinds of weather. As soon as a thin coating of ice begins to form on the lakes he wants to test it. He races across the lawns, climbs trees and is up to no end of mischief all day long. Of course we are constantly on the lookout to prevent the boys from doing harm and from coming to grief through their pranks, but they are active and fleet of foot, and can usually get away from us. They are like locusts. They swarm all over the park at once and invent mischief as easily as they breathe. The other day a little chap who had been wandering around finally brought up at the menagerie and handed a baseball bat to Tip, the elephant. Tip took a fancy to it, and his keeper was nearly three hours getting it away from him. He narrowly escaped with a whole head at that."—New York Sun.

Christmas Shopping Fatigue.

A woman stood in the toy department of one of the shops holding in her hand a set of china dishes unusually large and handsome. She was looking at it, evidently trying to make up her mind if she wanted it. Suddenly her hands were empty; there was a loud crash, and on the floor lay a hundred bits of broken china. There was a rush of floorwalkers, salesgirls and customers to the spot. The woman stood still, though her face flushed at the curious eyes directed at her.

"I broke them," she said to the girl serving her. "I am so tired I couldn't hold them. I will pay for them." There was a look in her face which showed it would be a relief to burst into tears from sheer nervous fatigue. And an onlooker thought what a weighty gift it would make if one's friends could be presented with the tangible showing of just the amount of time, strength, effort, thought and nervous wear and tear which their gifts cost. How the bit of money would lighten in comparison with this accumulation!

As it cannot be shown, it must be understood, and if you are wondering why Helen sent a pair of toilet bottles when she must have known you had no less than three pairs in your room now, or why Dick should have hit on a prayer book after having gone to church with you a dozen times when you carried the beauty your aunt brought you from abroad, why just reflect that Helen and Dick thought and pondered on what you would like until what Dr. Holmes calls "the idiotic area" was so hopelessly developed in their craniums that no lucid idea was left.—Her Point of View in New York Times.

Matching Teeth.

Dentists say that the greatest difficulty they meet with in their work is the matching of false teeth with the natural teeth of their customers. The tooth factories supply dentists with rings, upon which are strung thin metal bars, each carrying a tooth at its extremity. There are twenty-five of these sample teeth that run all the way from nearly white to a shade that is almost olive. Some of the twenty-five usually match the patient's teeth, and at any rate enable the dentist to match the teeth by application at the factory.—Washington Post.

A Corner in Shawnee.

TRUE STORY OF A WALL STREET HERO BY HENRY CLEWS.

[Copyrighted. All rights reserved.]

CHAPTER I.

AN EARLY PASSION.

Annie Stockwell's blue eyes looked straight into his own.

Thirty years ago Daniel Hardy was employed as a teamster for a saw mill in Posket, Vt. Born on a farm, his boyhood came to an early end, for stubborn nature yields her harvests in the Green Mountain state only after a severe struggle, and even infantile hands are required for the work. Little knowledge had he of such things as are set down in books. A few years spent at the district school when he was just big enough to be in his mother's way, and not strong enough to be of service, had resulted in his acquiring a passable knowledge of the alphabet and various forms of mischief, and during his teens an occasional term at the winter session had added to his learning the rudiments of "figgering" and a certain ability to misspell most words of two syllables and many of one.

It was while he was a mere child that the passion of his life took root in his nature. Awkward and diffident at the best, he was utterly helpless when Annie Stockwell's blue eyes looked straight into his own. They saw each other at school during the long, hot summer months, when they dozed over their primers instead of playing in the open air. Little Dan looked longer at the bench where Annie sat than at his book, but when she turned toward him up went his soiled and dog eared primer before his face, and hot blood shone through his sunburnt cheeks. Oftentimes Annie found a big red apple or a mellow pear in her desk, but Dan never told who put it there, and when she tried to smile her appreciation across the school room, for she knew well enough, he looked steadfastly at the blackboard.

So matters ran along for years. When Daniel's school days were over he saw Annie at "meetin'" and at sewing circles and tea parties, and walked home with her from all such gatherings as came to an end after dark. He even went to spelling bees in the old school house and stood up to be regularly floored by the first word put to him in order that he might sit proudly by and watch all the contestants drop into their seats, one after another, until Annie should be left alone the victor.

At last a day came when Mr. Stockwell, having slowly awakened to a recognition of his daughter's superior talents, consented to send her to a boarding school. Just what relations existed between Daniel and Annie at the time of her departure it is difficult to determine. They may have talked of marriage, but it is more probable that, having grown up side by side, they left the future to take care of itself, each content with a tacit acknowledgment of trust, as there certainly was of affection, in the other. It was generally believed in Posket that they were engaged.

Daniel was at the postoffice when Annie took the stage to go away. They merely said "good-by" to each other there, but when the dust of wheels and horses' hoofs had obscured the clumsy vehicle in the distance, and Daniel still stood staring at it, the postmaster said, with that kindly impertinence found undisguised in the country, and thinly cloaked by euphemistic phrases in the city:

"Well, Dan'l. I s'pose you 'n Annie'll git married soon's she's done schoolin', hay?"

Daniel started, and his brown cheeks reddened as of old. He thrust his hands deep into his pockets, and, turning with a deep scowl, replied:

"You go to thunder, Mr. Sparks!"

Then he walked abruptly away.

At this time Daniel Hardy was 20 years old, a grown man, whose stalwart frame was yet angular and unwieldy by lack of full maturity. He was strong enough, heaven knows, for any kind of physical labor, and he never lacked for a job. That stern patience that is cultivated by New England farming was characteristic of him, and with it was a steadfastness of purpose that even his neighbors recognized. He never admitted anybody to his confidence, and invariably resented intrusion into his affairs.

Annie was at school three years. At long intervals she visited Posket, and these were seasons of—I was about to say unalloyed bliss for Daniel. The phrase would be strictly true of the first vacation. Boarding school life was so new to her that it had not affected her thought or her demeanor as yet, and her talk to Daniel was of nothing but the strange scenes and people and her delight at seeing her home again.

By the end of another year, however, a change was apparent to all; not in her relations to her lover, but in her appearance, her carriage and her speech. Everybody, except Daniel, regarded it as an improvement; he hardly knew whether he liked it or not.

There were keener observers in Posket than Daniel Hardy. The good women of the village were quick to discern these changes and to understand them. One day a neighbor who called at the Stockwells' discovered Annie, with her sleeves rolled up, scrubbing milk pans in the kitchen.

"I don't 'spect, Annie," said this neighbor, "that you'll go into the kitchen after your eddication's finished; an' then what'll Dan'l Hardy do for his breakfast?"

Annie blushed and gave her pan an extra vigorous rub. Then she tossed her head, and answered:

"I don't mean that any man who is to be my h[illegible] shall have to eat a hired girl."

Then she laughed and avoided further remarks on the subject by talking of cattle and crops. The neighbor went away highly pleased, and twenty-four hours had not passed before the episode, with various pleasant additions, had been narrated to Daniel Hardy. The next evening he called at her house.

"Howdy, Dan'l, glad to see ye," said Squire Stockwell, as Daniel entered the "settin' room." Mrs. Stockwell's greeting was of the same kind, and then Annie rose and gave him her hand in homely country fashion and wished him good evening. Daniel sat on the edge of the chair and began to twirl his hat.

"Let me take your hat, Daniel," said Annie, and the lover wished she had left it with him, for he knew not what to do with his hands.

"S'pose you'll go teamin' again for the sawmill next fall?" asked Squire Stockwell.

"Yes, squire," responded Daniel.

"Have your folks heard how Mis' Bascomb's gittin' on?" inquired Mrs. Stockwell.

"Yes, marm, she's pickin' up," replied Daniel.

And thus the conversation drifted on for five or six dreary minutes, Daniel inspecting, meanwhile, the broad toes of his boots. Then the squire rose and guessed he'd go out to the barn and look after the cows, and Mrs. Stockwell laid down her sewing to see if "things in the kitchen was all right." Daniel was glad they were out of the way—he knew they would pass the rest of the evening together in the kitchen—and he was almost sorry that they went so soon.

"I heerd what you told Mis' Brown about me, Annie."

"Did you?" returned Annie.

"Yes, 'n' while I don't b'lieve in other folks doin' my courtin' for me, I kind o' felt pleased. We've known each other too long, Annie, to have no kind o' nonsense between us. Don't you think so?"

Annie was silent for a moment. Then she looked up with a smile.

"There isn't any nonsense about either of us, Daniel," she said.

"That's so!" he exclaimed, emphatically. "I knowed you'd think so."

Annie was at work on tatting, and apparently absorbed in it, for her head was bent low over her busy fingers. Daniel shifted his feet and clasped his hands behind his chair.

"I kind o' wish," he ventured, with an uneasy laugh, "that folks went to parties in summer."

"Why?" asked Annie without looking up.

"'Cause ef they did we might be there an' there might be a game of forfeits, an' you and I might be told, that is I might be told to kiss you behind the door."

Annie laid down her tatting, and when she raised her head there was a wistful look in her eyes.

"There is no need of a party, Daniel," she said, "for—for you and me."

"No, there ain't!" he assented, and before his retiring nature could assert itself he had stepped across the room to her side, and their lips met for the first time undoubtedly, when no others were in sight or hearing.

Daniel left the house soon after that His cup was full. There was a suspicion of moisture in Annie's eyes as they bade each other good night. What did it signify? That her womanly nature had been fully aroused by this strong, awkward man? or was there an unrecognized sense of something wanted?

CHAPTER II.

A TURN IN THE ROAD.

"Don't, Daniel, don't!"

The vacation previous to her graduation showed still further changes in Annie's demeanor, not to say character. Not alone in her speech and dress, but in her views of her surroundings had she become something different from her former self. She and Daniel were as much together as the arduous duties of work in the country could permit. She told him more about the hills, whose slopes he knew better than his own hand, than he had supposed was within the domain of human knowledge. Books that he had never dreamed of gave her topics for discourse that set his brain in a painful confusion.

Another summer and the finished woman returned to Posket, her school days over. Never had she blushed so red, never had she seemed so coyly shy as when she met Daniel for the first time. There was even a touch of agitation in her tones, and her eyes restlessly sought some other object than her lover's face. She withdrew her hand from Daniel's grasp as if confused at the warmth of his greeting.

Daniel was disturbed, but his faith was unshaken. He called on her as a matter of course. For some reason that was entirely beyond his comprehension she accompanied her mother from the "set tin' room" when that good lady sought to leave the lovers alone. It was many days before he secured the privilege of speaking to her unobserved. In the joy of having her thus before him he forgot that she had appeared to avoid him.

"Annie," he said, and he went to her side, "you ain't going to leave Posket again, be you?"

She turned nervously away and stood in front of the open window, where any chance passer might plainly see her.

"Be you?" repeated Daniel, following.

"Why, no," she answered, her eyes cast down, "I suppose not, Daniel," and of a sudden she raised her head and looked him squarely in the eyes. Such a troubled, wistful expression! Daniel saw but the sweetest, fairest face in the known world.

(TO BE CONTINUED.)

Burglars at Fairfax Court House, Va., blew open the County Clerk's office and scattered the contents over the floor. The will of George Washington was in the safe, but it was undisturbed.

ODDS AND ENDS.

Leisure is time for doing something useful.

Sugar moistened with vinegar is good for hiccough.

Ashmole, the great antiquarian, was a saddler's son.

The Armstrong gun was planned by Armstrong in 1855.

A telegraph line was set up on the Great Western railway in 1838.

The father of David Livingstone was an operator in a cotton mill.

In 1862 there were 15,000 miles of telegraph wire in Great Britain.

Machines for making tacks were first made by Thomas Blanchard in 1806.

Camphor mentnol is an excellent inhalent if one is suffering from catarrh.

The great Latin writer of comedy, Terence, was a slave, as was also his father.

It is estimated that upward of 18,000 horses die or are killed annually in London.

A Queer Superstition.

In Brittany when the body of a drowned man cannot be found, a lighted taper is fixed in a loaf of bread, which is then abandoned to the retreating current. When the loaf stops, there it is supposed the body will be recovered.—Notes and Queries.

SET HIM RIGHT.

Geo. Augustus Sala, the well known English writer, on his last Australian trip, wrote as follows to *The London Daily Telegraph:*

"I especially have a pleasant remembrance of the ship's doctor—a very experienced maritime medico indeed, who tended me most kindly during a horrible spell of bronchitis and spasmodic asthma, provoked by the sea fog which had swooped down on us just after we left San Francisco. But the doctor's prescriptions and the increasing warmth of the temperature as we neared the Tropics, and, in particular, a couple of ALLCOCK'S POROUS PLASTERS clapped on—one on the chest and another between the shoulder blades—soon set me right."

Love in this civilized age should be spelled Love.

"Brown's Bronchial Troches" will relieve Bronchitis, Asthma, and Throat Diseases.

A soft, low voice is an excellent thing in a telephone girl.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

Lavinia—Yes, James and I are to become partners for life. Mabel—And you will be the senior partner. How sweet.

Use Enameline Stove Polish; no dust, no smell.

THE HERCULES.

In placing the Hercules Gas or Gasoline Engine in the field in competition with other gas engines, we do so with the utmost confidence that we are "in it." Our system of operating this engine is so far ahead of all others that it needs but an introduction in any community to insure an immense sale. A woman can handle it. It requires no engineer. It can be started in an instant. No electric spark to get out of order. It oils itself. It beats all others. Write Palmer & Rey, 405-407 Sansome St., San Francisco for particulars. The price and capability will surprise you.

For Simplicity, It Beats the World. It has Fewer Parts, and is therefore less likely to get out of order than any other Gas Engine now built.

Daily Newspaper and Job Office]

We have used your four horse-power "Hercules" Gas Engine for nearly two months now, and have not yet failed to get our edition off on time; on the contrary, we find it the best investment we could have made. For convenience it cannot be beat. Unlike the steam engine it is clean, no coal to shovel into a furnace, no fires to get up, no water to watch to keep the boiler from going through the roof—indeed it is simple and economical in all respects, and we feel that in changing from steam to gas we have secured a donation of $100 per year to the office, independent of all other considerations, and that means that $100 is the difference in the cost of fuel per year between steam-power and gas power. Thanking you for past favors, including the great service done by you in putting an engine like the "Hercules" on the market, we are,

Yours truly, PENNYCOOK & HARRIER,
VALLEJO CAL., Jan. 14, 1892,
Proprs. *Chronicle.*

Running Printing Machinery.

The engine is a daisy! It is up and in splendid running order, and *operates our presses in excellent shape.* We are more than pleased with it, and feel confident that we will be able to introduce the "Hercules" in this county in a manner largely to your interest. REED & HUTCHINSON.

ANGELS, CAL., Feb. 24, 1892.

If you ever feel yourself getting conceited, just remember that the best people are all dead.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free.

Teacher—What is a citizen? Voice in the rear—Please, mum, it's a policeman with his clothes off.

AN ENEMY BAFFLED.

There is an enemy with whom thousands are familiar all their lives, because they are born with a tendency of biliousness. With this enemy they are constantly battling with ineffectual weapons. Hostetter's Stomach Bitters will baffle it. Mere purgatives will not reform a disordered condition of the liver indicated, not by constipation alone, but also by sick headaches, yellowness of the skin and eye balls, nausea, furred tongue and uneasiness, more particularly upon pressure on the right side, upon and below the short ribs. Avoid drastic purgatives which gripe and weaken the intestines, and substitute this world-famous anti-bilious cordial, which likewise removes malarial, stomachic and kidney complaints, rheumatism and nervousness. As a laxative of the bowels, painless but effectual, it improves appetite, sleep and the ability to digest, and possesses the additional advantage of a standard tonic.

The safest way to health, say what you will,
Is, never to suppose we shall be ill;
Most of the ill that we poor mortals know,
From doctors and imagination flow.

Now is the time to treat Catarrh of long standing. Ely's Cream Balm reaches old and obstinate cases, where all other remedies fail. Do not neglect procuring a bottle, as in it lies the relief you seek.

REV. H. H. FAIRALL, D. D., editor of the *Iowa Methodist*, says editorially, "We have tested the merits of Ely's Cream Balm, and believe that, by a thorough course of treatment, it will cure almost every case of catarrh. Ministers as a class are afflicted with head and throat troubles, and catarrh seems more prevalent than ever. We cannot recommend Ely's Cream Balm too highly."

Apply Balm into each nostril. It is Quickly Absorbed. *Gives Relief at once.* Price 50 cents at Druggists or by mail.

ELY BROTHERS, 56 Warren St., New York.

"Who is the belle to-night?" asked she,
As they stood on the ball-room floor;
He looked around the room to see,
And she speaks to him no more.

THE REASON.

Let us look into the force, meaning, reason of the oft-repeated line: Cures Promptly and Permanently.

Pains Endured for 30 Years,

YOUNG MEN! The Specific A No. 1. Cures, without fail, all cases of Gonorrhœa and Gleet, no matter of how long standing. Prevents stricture, it being an internal remedy. Cures when everything else has failed. Sold by all Druggists. Manufacturers: The A. Schoenheit Medicine Co., San Jose, Cal. Price, $2.00.

GG 316 Cures in 1 to 5 DAYS. Guaranteed not to cause Stricture. Mfd only by THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A. Trade Mark

Big G is the acknowledged leading remedy for all the unnatural discharges and private diseases of men. A certain cure for the debilitating weakness peculiar to women. I prescribe it and feel safe in recommending it to all sufferers. A. J. STONER, M. D., DECATUR, ILL. Sold by Druggists. PRICE $1.00.

S.F.N.U. No. 553. New Series No. 4

WOMAN FOR YOU

The very remarkable and certain relief given woman by MOORE'S REVEALED REMEDY has given it the name of Woman's Friend. It is uniformly successful in relieving the backaches, headaches and weakness which burden and shorten a woman's life. Thousands of women testify for it. It will give health and strength, and make life a pleasure. FOR SALE BY ALL DRUGGISTS.

HERCULES

Gas or Gasoline ENGINES

Makes no smell or dirt.
For Simplicity it Beats the World.
No Batteries or Electric Spark to care for.
Just light the Burner, turn the Wheel, and it runs all day.
No double or false Explosions, frequent with the unreliable spark.
It runs with a cheaper grade of Gasoline than any other Engine.

THE SAD FATE OF A FORTY-NINER.

Might Be a Bonanza King if He Hadn't Converted His Mule Into a Calliope.

A party of prospectors had located their dry camp on the headwaters of the Meadow and were having rather indifferent luck. It is a broken up country, and its redeeming feature is the abundance of game of all kinds. While it may be termed a hunter's paradise, it is certainly a miner's sheol. Flour and bacon and beans had run low, and the boys had begun to "cuss" the country.

They were sitting around the fire one night smoking when a visitor, a stranger, with about as little ceremony as Poe's Raven, made his way into the circle and perched, not on a bust of Pallas, but on a busted aparahoe. For about two minutes the remarks were about as extended and interesting as were those of the famous Forty-niner. Finally he was induced to chew, and then he gave an account of himself. He was as near a nobob as a prospector can ever become; that is, he was making no attempt to better his condition, making his way afoot from one prospector's or trapper's camp to another. He was an old man, bowed and wrinkled. It was evident that the end of the rocky trail of life that he was traveling was not far off.

In the course of the evening one of the boys happened to speak of the old man's condition. The old fellow straightened up, adjusted one moccasined foot under him, "Injun" fashion, and remarked: "It may seem a little tough to you fellers to see me knockin' round this way when I ought to be a respectable member of sassiety, holdin' my own with Mackay, Flood, Hearst and Lucky Baldwin. I used to train with them fellers. I'm a '49er, I am, and I might now be a millynair if it wasn't fer a piece of hard luck I struck way back in the 50's.

"I struck out one spring mornin' in Californy with a mule packed with plenty of grub, and a good prospecting outfit. I had two dogs, cross between bull and shepherd, along for company. I packed with me a tin horn that I called 'em up with when they got too far away.

"I was makin' for the Mokeleunne hill district, which hadn't been prospected hardly any yet. I made durned good time, considerin' all things, till on the second week that gosh blamed mule got sick. The sun of a gun began to swell. He got down and rolled. Well, he kept swellin' and rollin' and groanin', and I thought every minute he'd bust."

The sweat stood out on the old man's brow as he related this. He paused a while, reflected, and continued:

"The way I figgered it out was that he had colic. I couldn't think of anything to give him but the soda I used to cook with. I'd heard it was good for the stomach, so I fixed up a drench of soda and water, stuck the dinner horn inter his throat, and commenced pouring the stuff inter him. It skeart him. He sneezed and snorted all at wunst, and spit out the drench. And when he snorted he blowed that 'ere horn. He seemed surprised to find that he wuz a musician. His ears riz, and he pranced 'round an' tooted that derned horn. The dogs heerd the tootin', and, true to their trainin', they come along head an' tail up. That derned mule kep' a tootin' that 'ere horn, all the time a-tootin' the wind off'n his stomach, and all at once, by gum, he struck out a tootin' that horn, an' the dogs follerin'.

"I wuz left thar 300 miles from nowhar, with no grub, mule, dogs nor nothin'. I wandered back to the nearest camp, and sence then I've been a wanderer, with no aim in life but to find my mules an' dogs. For forty years I've been chasin' the cussed varmints. I've seen lots of mules, but none uv'm hed er tin dinner horn in his mouth, nor two brindle dogs follerin' him. Have any of you fellers seen a stray mule around here?"

The old man's story created a profound impression. The boys unanimously elected him grand patriarch and assistant cook for as long as he cared to lay off from his wild and thrilling chase.—Spokane Falls Spokesman.

A Professional Juror.

Talking about professional jurors reminds me that when I was connected with the Smithsonian institution at Washington I knew a man by the name of Scrivener, who perhaps served more times on a jury than any other man at the capital. If anybody approached him with newspapers after a crime had been committed he would wave him aside majestically, saying: "I don't want to know anything about it or discuss the matter. You see I may be called to serve on the jury and a juror never discusses these things." Nothing could induce him to read the newspapers because it interfered with his professional duties as a juror. I think that man served about twenty days out of a month on an average. He could always answer the usual questions as to his opinions on a case satisfactorily to the counsel on both sides and the court. That was the only man I ever knew who made serving on a jury a profession. He was a very intelligent man and probably a fair juror, too.—Interview in New York Herald.

Lying Versus Stealing.

There is a half truth in the reply of the child in the following incident, which is quite impressive; but a lie, frankly acknowledged, is as much a "thing taken back" as is the return of anything that has been stolen.

She came to her mother with the question, "Which is worse, to tell a lie or to steal?"

The mother, taken by surprise, replied that both were so bad that she couldn't tell which was the worse.

"Well," said the little one, "I've been thinking about it, and I think it is worse to lie than to steal. If you steal a thing you can take it back, unless you've eaten it; and then you can pay for it. But," and there was a look of awe in the little face, "a lie is forever."—Youth's Companion.

For Twine, $72,000.

It seems to be the impression of many people that the mail when sent from an office is gathered carelessly together and thrown into a mail bag, which is then locked and dispatched. This is wholly wrong, for even in the smallest offices the letters and cards are all gathered face upward and tied into a neat package. The government furnishes the twine to do this, and some idea of the immensity of the postal service can be formed from the fact that in one year the cost to the government of the twine for this purpose (which, though strong, is of the cheapest quality) was nearly $72,000.—St. Nicholas.

Who Greeley Was.

Two young men stood gazing upon the statue of Horace Greeley Sunday afternoon. They were well dressed and intelligent looking. The fragment of their conversation overheard by the passer by ran thus:

"But why should he have a statue?"

"Why? Oh, he was the inventor of the printing press."—New York Times.

MUSICAL CULTURE.

A Few Well Meaning, But Not Too Kind Hints, for the Amateur.

MUSIC IS HOMICIDAL AND SUICIDAL.

It Devours Its Own Children and Slays Itself.—Radical Changes Concerning Instruments.

As speech to thought, as pictorial art to external nature, is practical music to music the element. And for this outward and audible art form music is dependent on human mediums, and those human mediums require a certain preparation to fit them for the reception and the transmission of their message. To some people, in whose natures musical sympathy is strong, this preparation comes easily and almost unconsciously. But the great majority need a kind of acclimatization before they can breathe and move freely in an element more or less strange to them, and this acclimatization is what we know as "musical culture."

Most people have some latent musical faculty, and this is capable of development. The notion has at any rate died out that it was effeminate for a man to play the piano and impossible for a woman to play the violin. It is not so long since, in the upper classes, no girl's education was considered even approximately complete without a large amount of piano forte drill—music it shall not be called—while a certain proficiency in this respect was too often held to atone for the absence of all other culture.

The violin on the other hand was held to be good only for men; perhaps we should restrict the term and say for fiddlers. Boys now and then learned a little of the instrument at school—a knowledge soon to be dropped and forgotten. The difference now scarcely needs to be pointed out. Boys and girls in numbers, and not a few who are no longer boys or girls, are learning to play on the violin and other stringed instruments. The discovery has been made that, though a virtuoso must begin early, it is not necessary to practice half the day at four or five years old in order to be a good useful player at twenty.

Ensemble classes and school orchestras show that on our amateurs the truth is at last dawning that unlimited solo performance is not the ultimate aim of all music training; that while only a gifted few can attain to high individual excellence and finish, the combination of many atoms of good, too small to be of any use singly, may result in an effect which is not only good, but great, so long as music, not self display, is the object sought after.

It may be roundly stated as a general truth that musical study proclaims itself on the housetops, without ceasing for an instant to assert itself in the garret, in the basement and at sundry intermediate points. The student's friends assist at every stage of his progress; they are involuntary and mostly unwilling participators in his difficulties, his perseverance, his triumph and his despair. Well for them if two or three such dramas are not going on in the house at once, to say nothing of probable puffs of melody and harmony from next door or over the way. That the character of musical practice is far superior to what it used to be avails these helpless ones but little.

To them it is an insignificant fact, compared with the fact that for every victim of coercion who formerly pounded a wiry piano for a couple of hours a day there now are a dozen students of various instruments and singers galore, all practicing away for dear life. Should any link be missing in the continuous chain of sound, it is filled up by barrel organs, street bands, wandering ballad singers, solos on the whistle and other peripatetic instruments.

Good, very good, no doubt. The musical crusader looks on the work and congratulates himself. There must be means to all end. Music requires machinery, and the machinery for music is being brought into a most forward state of efficiency. But the music itself, whence in the future is that to come? The "enraged composer" and his troubles have long been a favorite theme for the efforts of humorists. Yet the fact thus comically represented is no joke, and in the present condition of things it threatens to resume ugly proportions.

Music is homicidal, suicidal. It devours its own children and slays itself. Silence, the absence or cessation of musical sound, is an absolute necessity for musical thought. But putting on one side the troubles of composers, who after all are comparatively few and far between, the born poor things! to be Ishmaels, their hand against every man and every man's hand against them, what on the rest of the world is the effect of this unceasing, often incongruous sound? It is easier to complain than to cure, and far easier to point out these evils than to suggest any effective remedy for them.

If architects and builders would take into consideration the diffusion of noise, and would do something to make walls and partitions music proof, it would be much. There are continental towns both in France and Germany where practicing is prohibited by law, except at certain stated hours. For a large and enviable portion of mankind the remedy against the evil lies in getting used to musical sound, and so unconscious of it.—Nineteenth Century.

A Cannon Exploded in His Mouth.

It is on record that a German called Bucholz lifted with his teeth a cannon weighing about two hundred pounds and fired it off in that position. While performing at Epernay, in France, the same feat the barrel of the gun burst. Miraculously he was not killed, although several of the fragments were thrown over fifty yards. At Berlin two strong men appeared, one of whom performed the same trick as Samson, and his rival, Sandow, of bursting iron chains by contracting, and so enlarging, the biceps of his arm.—Chambers' Journal.

REVENGE AND SUICIDE OF A RAT.

The Rodent Punishes a Physician for Experimenting on Its Body.

Dr. T. J. Richie, a physician of Beaver Falls, Pa., has had an experience with a rat which he will not forget. He has been experimenting on rats, dogs and cats and other small animals for the purpose of studying the process of digestion. He would place the animal under the influence of chloroform, and then after cutting them open and noting the working of the digestive organs would sew up the wound, anoint it with a healing salve and then let the animal go.

Saturday he captured a large rat and placed it under the influence of the drug, when, to his surprise, he discovered that the animal was one that he had previously operated upon.

He examined it for a second, and then, just as he turned to his case to get the necessary instruments to make further investigations, the rat revived, jumped from the table, sprang into the open fireplace and escaped up the chimney. The doctor, thinking the rat would pop out of the top of the chimney, ran out on the street to see it, but no rat appeared.

That night as he was asleep he was awakened by a sharp pain in his finger, and opening his eyes he saw a rat, which proved to be the one which had escaped from him the previous evening, scamper off the bed and up the chimney again. He examined his finger and found it badly bitten.

He washed and bound up the wound and went to sleep, only to be again awakened by the same rat biting his nose. He chased it away, but he got little sleep that night, for the rat kept returning, and when he attempted to kill it the wily little creature always successfully took refuge in the chimney.

The next night, and for several nights afterward, the rat disturbed his rest by its persistent and bloodthirsty attacks. Dr. Richie couldn't help but be curiously interested in the little fellow's welfare, even though his experience was rather unpleasant.

Finally he stopped up the chimney, but the rat managed to get out. He then left the door of his room open, thinking the rat would seize the chance to leave the premises. He also set a trap for it, but he didn't catch it until Monday evening.

When the rat saw the doctor it showed every sign of terror, and when he put the tramp on the table and brought out his bottle of chloroform and sponge, it gave a despairing squeak, tore savagely at his abdomen with its sharp teeth until the wound, only imperfectly healed from the previous operation, burst open, its bowels pushed out, and the poor little animal rolled over, kicked convulsively and died. It had committed suicide rather than submit to another operation.—Butler (Pa.) Citizen.

Seed Wheat Four Thousand Years Old.

Has the wheat found in the catacombs of Egypt ever been known to germinate?

A great many cases are known in which the catacombs of "mummy wheat" has sprouted and produced its kind. The first experiment was made by the famous Wilkinson about 1840, who planted a number of grains taken from a tomb believed to be nearly 4,000 years old. The grains germinated, the stools producing from fifteen to twenty stalks. The ears were of remarkable size, some of them exceeding six inches in length.

The quality of the wheat produced was about equal to that known at present as Egyptian. The extreme dryness of the Egyptian climate no doubt contributed to the preservation of vitality in the grains, but even with this favoring circumstance the immense length of time during which the grains retained their germinating power renders the circumstance very remarkable.—St. Louis Globe-Demecrat.

A Strange Custom.

According to a Yorkshire (England) notion, a new born infant should always be placed in the arms of a maiden before it is touched by anyone else; and in some instances its right hand is bound in a cloth during the first day of its existence in order that it may gather riches when grown to manhood or womanhood estate. In many parts of the United States, Germany, France and Holland, as well as throughout the British Isles, it is considered very important that an infant should "go up" before it goes down in the world. Thus, if a child is born in the lower story of a house, it is instantly bundled up by one of the old women and carried upstairs; if the event occurs in the upper story the same old woman is expected to take the child in her arms and clamber upon the top of a table, bureau, or even a chair—anything to get the little one up in the world.—St. Louis Republic.

Nature's Nervine.

Dandelion is the coming nervine for women. More than one experienced physician tells of its use in cases of nervous depression and melancholy almost suicidal. Hysteria with indigestion is most successfully treated by dandelion alone, using a strong decoction of the roots. For school girls growing green and black with overstudy or bad circulation from any cause, for excitable women and those hysteric subjects who make their friends' lives a burden if not their own, the simplest remedy is a cup of strong dandelion coffee three times a day. But it must be strong and from the roots, fresh as possible, not the dried stuff sold as dandelion, which is half bread crumbs, and the other half any age with the life roasted out. No official preparation compares with the decoction of herbs and roots fresh from the garden or well kept at first hand.—Shirley Dare's Letter.

The Light of the Sun.

The sun gives 600,000 times as much light as the full moon, 7,000,000,000 times as much as the brightest star in the sky and 36,000,000 times as much as all the stars in the heavens combined. In size the sun equals 1,300,000 earths, but owing to its smaller density its weight equals only 300,000 earths.—Current Literature.

FACTORY GIRLS.

Sketches of Their Lives in the Great Mills of Lancashire, England.

AT THE LOOM FROM CHILDHOOD.

Provisions Made by the Oxford Factory Owners for the Recreation of Their Employees.

For the recreation of their hands mills have no provision whatever—as a rule, that is. There are a few exceptions, and only a few. Unique certainly are the Oxford mills at Ashton-under-Lyne, in connection with which the late Mr. Hugh Mason founded a little colony. For outdoor sports there is a large play ground, with swings, etc., and a bowling green attached. When the weather is unfavorable the hands can go to the recreation rooms. On the ground floor of these is a reading room liberally supplied with newspapers and periodicals, and having a library of 700 volumes.

A coffee room leads off it, and from that again the baths are reached. Up stairs is a large lecture room fitted with desks and with a platform at the end. Busts of great men are on pedestals round the walls. Scott and Burns are in a niche together, as is fitting, and near them are Homer, Shakespeare, Dante and Milton. Michael Angelo looks at Raphael, Bright and Cobden, Newton and Watt, Franklin and Washington—all are there; and at intervals there are also hung portraits of inventors and improvers of cotton machinery. In connection with these rooms there is a good brass band. Sewing and other classes, too, are held, while during the winter months concerts and lectures are of frequent occurrence. Of all this it should be noted Messrs. Thomas Mason & Son defray the expenses.

From other portions of the district we take the following. The secretary of a cotton operative spinners' association is stated to have said:

"Any girl who wants work can have it in the mills. That labor market is never overstocked. At the present time, particularly in the spinning department, some firms are shorthanded. Nowadays many girls in Manchester do not care to go into the mills; they would rather work in the warehouses and shops."

"There has been an improvement in the lot of the factory workers?" asked the interviewer.

"Yes," replied the secretary, "in every way; wages are higher, hours shorter. But, mind you, hands have to work harder while they are at it, because the machinery runs faster and they have to look after more of it. Why, in my young days a weaver tended only two looms, now she tends four."

Throstle spinners, the writer adds, work with as little clothing as possible and generally in their bare feet, though some wear slippers. Cardroom hands wear straight pinafores, cut away at the neck and with short sleeves. The distinctive parts of the mill girl's dress are clogs on the feet and a small snawl—'handkerchief,' they are called—on the shoulders.

Weavers, though there is nothing peculiar about their dress, can generally be distinguished from other factory girls. They have a personal trade mark—their front teeth are often bad, and besides many of them have at times a peculiar gesture. Drawing in the breath to suck weft through a shuttle causes the teeth to decay. The mannerism is similarly explained.

In a weaving shed the noise is deafening. You cannot hear your own voice. So the weavers attract one another's attention by a shrill "Whoo!" and converse by means of signs and by watching the movements of the lips. They are so proficient in labiomancy that they can follow a private conversation anywhere if they can see the speakers' faces. This circumstance explains a common observation that is otherwise enigmatical. "Mind what tha'rt sayin'" one gossip will remark to another, glancing suspiciously at the object of their talk, "oo's a wayver."

Some mill girls never do any housework; their ignorance in which branch of female education is consequently colossal. Hundreds cannot make a pudding or a pie for the life of them, and the writer has heard of a lass putting a rabbit in a dish whole and making a crust for it with suet. There are factory girls on the other hand—and these are in the majority—who take their full share of cleaning, cookery, needlework, etc.

As a rule, too, the lasses are in every way respectable. When a factory lass and her sweetheart go off on a trip or take a week at Blackpool or Southport or the Isle of Man, as often as not she pays the expenses. She it is who in due course buys the furniture—aye, and perhaps the ring and all the rest. Whether she will stand treat in this or not, the four loom weaver need never remain single. Among factory girls she corresponds to the heiress of ordinary life, and as such has no difficulty in obtaining a husband.

When offsprings become old enough they are sent to the mill, as their parents were before them. The typical Lancashire woman does not like the idea of their aiming higher. As they soon receive good wages their parents are rapidly placed in comfortable circumstances—more comfortable than they ever knew perhaps. This state is the factory operatives' summum bonum—the position beyond which he or she very rarely goes.—Cassell's Journal.

No Difference Perceptible.

Jones—Very stupid girl, that Miss Wilpin.

Smith—How so?

"Why, you see we were guessing conundrums the other evening, and I asked her what was the difference between myself and a donkey."

"Well?"

"Well? Why, by Jove, she said she didn't know."

"Well, as far as that goes, I don't either."—Texas Siftings.

WEATHER PREDICTIONS VALUABLE.

Rev. M. J. Savage Says Gen. Greely's Forecasts Are Nearly Always Right.

In spite of the fact that I often hear it said that the prophecies of the weather bureau are generally wrong, the records of 1890 prove that they were correct more than 85 per cent. of the time. And most of the misses meant only that the predicted change was a little earlier or later than the time set. Now, considering the capacity of New England weather to outwit the wisest prophet, I submit that this is a most remarkable record. In the office at Washington I examined a large map of the United States, in which were speck pins or pegs, indicating all the stations from which reports are constantly received. These reports cover force and direction of the winds, barometric conditions, temperature, cloud, rain, snow, clear, all that are helps to a knowledge of atmospheric conditions. Twice a day lithographed maps are issued and sent out all over the country. These contain an accurate and graphic picture of the conditions all over the land. It was interesting to take the maps of a week and trace the changes day after day.

The general informed us that he was obliged to make his predictions precise and definite. And yet a little thought will show that such precision must be beyond any human certainty. Let us look at a concrete case and see:

Here, for example, is a storm center in northern Texas. It is moving at a definite speed east by north. Just which way will it go? Will it keep straight on, or will it turn farther north or farther south? Will the velocity of its movement increase or diminish or remain unchanged? By studying the atmospheric conditions in those regions toward which it is moving a shrewd calculation can be made. But suppose those conditions change? The experts in the office may hold different opinions, but some one must decide and the prediction must be made.

Brother Talmage the other day accounted for the failure of the government prophesies by saying that pious prayers sometimes interfered. Said he, "A storm starts; but after it has gone a little way it strikes a prayer and glances off." This is an element of uncertainty not usually taken into account. But if people are going to interfere with the matter in this way, of course they have no right to complain of any failures on the part of the bureau.

But, leaving this one side, a little careful thinking will show how exceedingly difficult it is to forecast a matter so uncertain. It is a wonder to me that no larger number of failures occur.

The worth of this work (which, on the whole, is the best in the world of its kind) is incalculable. To our agriculture, to our shipping and to many other interests it is of untold service.

More attention should be given to the purely scientific side of it. But this is not Gen. Greely's fault.—M. J. Savage in Boston Globe.

Crankiness of Opera Singers.

Tenors are more troublesome than other singers. That is because they have a fair knowledge of the laws that govern supply and demand. The good tenor voice is more scarce than any other, and it is worth more to its possessor, and he is naturally more careful of it. An operatic tenor oftentimes makes himself positively disagreeable to all about him by his senseless course. In his opinion the happiness of mankind and the movements of the planets all depend upon the state of his vocal organs. To him life begins and ends with the voice, and to be happy it must be in good trim.

A tenor especially is easily thrown out of condition, and because he is so sensitive is one reason why he is so impractical. His whole mind and his entire existence are concentrated upon his vocalization, and he becomes in time the worst representative of that division of humanity known as cranks. When he is not anxious about his condition he is worried lest in the evening's performance he shall not be able to strike his high "C" with proper force and clearness, and after he has struck it he is alarmed lest his organ may have been overstrained in the effort. All this narrow channel of thought and action tends to make him foolish. There are exceptions to this rule as there are to every rule, but these exceptions are few.—Chicago Post.

Ancient Gloves.

There is nothing new under the sun. The carving of a long glove has been found in a hole where cave dwellers once lived. Just when these strange people existed has not been decided, but was thousands and thousands of years ago, and the sculptured glove is of the same shape as the many button ones worn by ladies of the present. The gloves of the ante-glacial occupants of a cave are supposed to have been made of roughly dressed skin sewed with needles of bone; but they were worn just the same, and the general pattern remains unchanged.

There is plenty of other evidence that gloves are of very remote origin, although none that goes back so far. The Anglo-Saxons wore gloves in the Seventh century, but the men were the ones then to observe the custom, the ladies covering their hands with their sleeves. Earlier than this Norman officials and high personages of that country covered their hands, and in many places in the Bible the word "shoe" is used when scholars maintain it means "glove."—New York Ledger.

The Jumping Bean.

One of the curious products of Mexico is the jumping bean, a vegetable curiosity, whose freaks of acrobatic agility have never been fully explained by the scientists. They grow in pods, each pod containing three beans. Each segment is rounded on one side and A shaped on the other, greenish yellow in color, and in circumference about the size of a large lead pencil. When placed on a table they roll over and skip about, sometimes actually jumping a good two inches. When held between the thumb and forefinger they are felt to beat as strongly as the throbbing of a strong man's pulse. The agricultural department at Washington has been acquainted with the rarity since 1884.—St. Louis Republic.

Signs of Weather.

A recent little work on barometric plants, published in France, gives, among other interesting facts, the following: If the stalks of clover and other leguminous plants stand upright there will be rain; if the leaf of the wood sorrel turns up it is a sign of a storm, as is also the closing of the convolvulus flower, the expanding of the lettuce flower and the turning upside down of the flower of the pitcher plant, but if the last named stands erect it will be fine, as it will be if the flower or the sorrel opens.—New York Times.

Good Football Clothes.

"Does the czar play football?" asked an American sightseer at St. Petersburg, as he inspected the emperor's steel vest and boiler iron trousers.

"Oh, no," replied the guide, "these are merely to protect his imperial majesty from the Nihilists."—Epoch.

HELD AT BAY.

A British Army Officer's Adventure With Three Ferocious Tigers.

TOO NERVOUS TO FIRE A SHOT.

The Striped Beasts Play all Around Him.—The Death Cry of His Horse Attracts His Friends.

"Tell you the most exciting adventure of my life?" said Lieut. Charles F. Stewart, formerly of her majesty's army in the India service, but now a resident of Birmingham, Ala. "Well, I met with quite a number of more or less thrilling adventures hunting lions and tigers in the jungles, but only once did I lose all hope. I shall never forget that hunt; in fact I shudder every time I think of it. Two other officers, English visitors in India, and myself went into the interior for a tiger hunt. We camped near a large jungle, where tigers were reported by the natives to be plentiful. We had three servants with us, and in addition employed a dozen natives, several of whom had much experience in tiger hunting.

"The first day in the jungle we killed a young tiger, and then we hunted four days without catching sight of another. We would spend the day beating through the jungle and return to our camp at night. There was plenty of smaller game, but we were out for tiger or nothing. The sixth day out we went into a portion of the jungle where it was not so dense, and we could make our way on horseback very well. We kept pretty well together until noon, but found no game. At noon we stopped to eat a cold lunch, and, as it was extremely hot, the others of the party decided to rest for two hours before they proceeded.

IN A BAD PREDICAMENT.

"While the others were resting I mounted my horse and rode alone toward a small stream a short distance to the right of our camp. Along the bank the jungle was so dense that my horse could not get through. I turned to go back to camp, but had advanced only a few steps when my horse stopped with a loud snort of terror. I looked ahead, and there, not more than 100 feet away, were three of the largest tigers I ever saw. They were standing still, and seemed undecided whether to attack us or to run away. My horse was trembling with fright and I could not move him forward or backward. I raised my gun to shoot, then lowered it again, for I realized that if I killed or crippled one of the beasts the others would be upon me before I could fire again.

"The tigers seemed still undecided what to do, and I shouted at them as hard as I could, thinking possibly I might frighten them away. At the sound of my voice the beasts lashed their tails and began to play about like huge cats, but all the time they were advancing toward me. For a few seconds I was thinking very fast, trying to decide on some plan of action. I thought of urging my horse forward and riding right past them as rapidly as possible. I buried my spurs in my horse's sides, but he would not move. Every moment the frightful looking beasts were coming nearer and nearer.

"Now they were creeping and gliding through the tall grass, just as a cat creeps upon a bird. I thought of another plan, and lost no time in putting it into effect. Bending forward I removed my feet from the stirrups, raised myself out of the saddle and slipped along the back of the horse until I dropped to the ground. The horse was now between me and the tigers, and if he would only stand still until they sprang upon him I might be able to escape unnoticed during the struggle I knew would follow. My horse seemed paralyzed with fear, and I began slowly backing away

CHASED BY THE BEASTS.

"I had not gone ten feet when I saw three great tawny bodies rise in the air and come down on the back and neck of my poor horse. When the horse felt the sharp teeth and claws tearing into his flesh he gave one long, piteous, almost human cry and then began to struggle for his life. Taking advantage of this struggle I was getting away as fast as possible. I saw my horse go down with the tigers tearing at his throat and sides, and I knew the struggle would soon be over. For a moment I felt I was safe, and turning I started on a run toward camp. After running a few steps I looked back, and, to my horror, saw one of the tigers coming bounding after me. His hideous jaws were covered with blood and his eyes gleamed like balls of fire.

"I turned and raised my rifle, but before I could pull the trigger I saw the other two tigers leave the dead horse and come bounding toward me. Then I lost hope. Great drops of perspiration rolled down my face, and my knees were so weak I could scarcely stand. I determined to risk a shot at the first tiger anyway, and reduce the fearful odds I had to contend against. I fired, but my nerves were too weak, and I missed. At the sound of the shot all three of the beasts stopped for a moment, then they began creeping forward for a spring.

"I said a prayer of some kind and gave myself up for lost. It seemed to me I stood there an age watching those angry beasts creeping nearer and nearer. My nerves were about to give way entirely under the terrible strain when I heard a noise behind me. A moment later a deafening volley of rifle shots, and then I sank to the ground in a faint. The cry of my horse had been heard at the camp, and half a dozen of the native hunters were sent out to see if I was in trouble. They came up just in time, and the well aimed shots from their heavy rifles killed all three of the beasts."—Elmira Telegram.

About Business Letters.

A business letter is a curious specimen of literary art. Brevity is its salient feature—its weakness and its strength at the same time. One always feels that the man who wrote it was terribly pressed for time, and was over anxious to economize on paper and ink. The sentences are short and snappy. Fantastic and unauthorized abbreviations fill it. Personal pronouns are eliminated on every occasion—in fact, sense and form are immolated on the altar of brevity—and the result is a letter which is as free from padding as a linen handkerchief.

The portentous "Gents" with which it is often begun, and trite "Yours truly" with which it is always concluded are characteristic of the contents.—Buffalo Express.

According to the assertion of the eminent physiologist, Sappy, the stomach contains 5,000,000 glands by which gastric juice is secreted.

A good dinner is one of the greatest enjoyments of human life. Mere money is a very inadequate compensation to a complete cook.

A Clever Collie.

T. Sidney Cooper, the English animal painter, says that he often made valuable studies in Cumberland, at places where Scotch drovers halted with their cattle for the night. On such occasions he often had a chance to see illustrations of an animal's intelligence, as well as of its physical perfection.

One day, when there was a pouring rain, a man consented to sit for me at the inn where I was staying. He brought his collie with him, and both of them were dripping wet, so he put off his plaid and laid it on the floor by the dog.

I made a very successful sketch of the man, but before I had finished it the dog grew fidgety with the wet plaid, and his master said, "Tak' it awa', mon, tak' it awa'!"

The dog took the end of it between his teeth and dragged it out of the room.

After I had finished the drover's portrait I asked him if he thought his dog would lie quiet for a time, as I wished to sketch him.

"Oh, yes, mon," he answered, "he'll do anything I say to him. Watch! Watch!" he called, and then "whustled" for him, as the Scotch say.

As the dog did not appear, we went together to look for him, and found him sitting before the kitchen fire with the end of the plaid in his mouth, holding it up to dry. I expressed my admiration of his intelligence, and the master replied:

"Ah, he's a canny creature, sir! He knows a mony things, does that dog, sir. But come awa', mon, the gentleman wants to mak' your picture."

So we returned to my room, and the handsome collie sat for his portrait.

Improved Chair for Theatres.

To the theatre managers of this country is commended a new form of chair for use in theatres, music halls, etc., which is now being introduced into England. This chair is already in use in several theatres in Germany, and is intended not only to prevent panic in case of fire, etc., by enabling the audience to gain the exit doors more easily than hitherto, but also to allow officials of the theatres and members of the audience to move with freedom from one place to another.

For this purpose the seat and back of the chair are free to move, and are connected suitably together, so that by means of a counterbalance weight a mere touch of the hand will cause the seat and the back to move simultaneously on hinges to a vertical position, the seat by raising and the back by lowering, thereby allowing free passage along or through the tiers. The very idea of such a device, when the absurd amount of inconvenience and annoyance suffered in comparative patience by the ordinary theatregoer is considered, raises up visions of comfort and pleasure which it seems hard to believe will ever be realized.—New York Telegram.

A Very Wide Awake Eye.

A man of the shabby genteel order went into the reading room of one of the hotels, and seating himself in an easy chair drew a paper from his pocket. He held the paper before him, and while his left eye remained closed he appeared to be reading. Time slipped by, and it was several hours before the watchman was attracted to him. During the next hour the fellow never moved, and with fear and trembling the watchman went to his side.

The right eye gazed mechanically at the paper, and, fearing that its owner had died in that position, several of the employes of the hotel gathered around him. He was given a rough shake, which brought him to his feet, and explanations followed. The man had no money and did not want to walk the street in the pelting rain. His right eye was an altificial one, and by holding a paper in front of him and closing his left optic he could sleep, while to all appearances he was reading.—Providence Telegram.

The Rat and the Swan.

During a dreadful storm, when the river Tyne had flooded the country all around, a number of people were assembled, watching the huge masses of hay swept along in its rapid course. At length a swan came in sight, struggling sometimes for land and at others sailing in its stately manner along with the torrent. As it drew near a black spot was observed on its snowy plumage, which the spectators were astonished to find was a living rat; and it is probable it had been borne from its dwelling in some hay rick, and, seeing the swan, had hastened to it for a refuge. On the bird arriving on land the rat leaped off its back and scampered away, but a man having no respect for the sagacity which the rat had displayed killed it with a blow of his staff.—New York Mail and Express.

TO IMPROVE COOKING RECEIPTS.

As a matter of useful information it may be stated that whenever a cooking receipt calls for a baking powder the "Royal" should be used. The receipt will be found to work better and surer, and the bread, biscuit, rolls, cakes, dumplings, crusts, puddings, crullers or whatever made, will be produced sweeter, lighter, finer-flavored, more dainty, palatable and wholesome. Besides, the "Royal" will go further or has greater leavening power, and is therefore more economical than any other powder.

Many receipts as published still call for cream of tartar and soda, the old-fashioned way of raising. Modern cooking and expert cooks do not sanction this old way. In all such receipts the Royal Baking Powder should be substituted without fail.

The greatest adepts in the culinary art are particular to use the Royal only, and the authors of the most popular cook books and the teachers of the successful cooking schools, with whom the best results are imperative, are careful to impress their readers and pupils with the importance of its exclusive employment.

The Royal Baking Powder is the greatest help of modern times to perfect cooking, and every receipt requiring a quick raising ingredient should embody it.

INDEPENDENCE, CAL.

FRIDAY, MARCH 3 1893

The investigation of Attorney General Hart affords a fine illustration of how public business is managed. A political "worker," i. e. a useful political tool, was appointed Secretary of the Board of Harbor Commissioners of San Francisco. An expert briber and ballot-box stuffer only needs opportunity to become a thief—he is that already at heart—and when Gray got a chance he stole the funds belonging to the Commission. Three Commissioners had become sureties for their Secretary, and when his stealings were discovered suits were brought against them to recover the stolen money. The total amount claimed by the State in these suits was $184,526. Of course it was the duty of the Attorney General—Marshall then held that office—to prosecute the suits. But Mr. Marshall had his political interests to take care of. It was politics that got him the office, and all that "was in it", and he hired a set of attorneys in San Francisco to attend to the suits. Attorneys are always as "willin" to take these suits as Barkis was to take Peggoty. Mr. Marshall employed them, but they looked to the State, not to him, for payment, and the State purse is big. The suits were not concluded when Mr. Marshall went out of office. He was succeeded by Johnson, who was a better "fence builder" than Marshall, and a "fence" is equally important to politicians and to gentlemen of the profession of the Artful Dodger. Every politician has his Fagin. Of course Mr. Johnson had his "fence" interests to attend to, and he employed another set of attorneys to help in the suits. Why not? It would be ungenerous to prevent one's friends when a safe opportunity offers to have a whack at the State Treasury. But the business was not settled when Johnson went out of office. Byron cried,

"I want a hero; an uncommon want,
When every year and month sends forth a new one,
Till, after cloying the gazettes with cant,
The age discovers he is not the true one."

Well, we wanted a hero for the office of Attorney General. We had tried several lawyers and the result was not satisfactory. Heroes were not plentiful. In fact there was not a single real live hero around. But it was a ground hog case; we had to have one, even if it were necessary to create one. The Devil then had business that required his personal attendance at Washington as Father of lies. But he had a first-class Lieutenant on the Pacific Coast, and to Tom Fitch was entrusted the task of creating our hero. Success was assured when his choice was made. Tom at once turned us out a hero who had instructed Grant and Sherman how to win the battle of Chattanooga, but who generously refused to claim the credit that was his due until both of them were dead, and he was needed for Attorney General of California. We elected our manufactured hero, and he at once elected a new set of attorneys to help in the famous suits. Instead of continuing to sue for the whole amount of $184,526, our heroic Attorney General compromised for the sum of $17,847.76, being less than one tenth of the amount claimed by the State. Of course the parties who had got off so easily were glad enough to pay the money to the Attorney General, but now a new difficulty occurred. A lawyer would at once have paid the money to the State Treasury and taken his receipt which would have ended his responsibility, but the Attorney General, being a hero, didn't know what to do with it. The caution that had prevented him from claiming the glory for the victory of Chattanooga, while Grant and Sherman were alive, prompted him to say nothing at all about the matter. Or maybe he really had learned the first rule of law, which is, that when an attorney recovers money in a suit his first duty is to keep it himself. But "the best laid schemes o' mice an' men gang aft agley." By accident the Legislature discovered that the Attorney General had money belonging to the State, and then the "hero" asked a Judge to tell him what he should do with it. Now all the attorneys that had been employed to recover this money have put in bills for their fees, and the amount of these bills is more than two thousand dollars greater than the whole sum recovered. Again we say this case is a fine illustration of how machine politicians attend to public business. The Attorney General not long since "got religion", and he will doubtless find great consolation in reflecting upon the promise made to another repentant sinner when he was nailed to the cross.

GOVERNOR SEWARD'S LOST BET.

He Fails to Establish His Identity and Loses Twenty Dollars.

The other afternoon, when the shadows were growing longer in the streets and the day was taking on a somber hue, a little group of politicians sat in the city hall regaling each other with ye stories of ye olden time. Among those reeled off was the following regarding an experience of William H. Seward, who was then governor of the Empire State. It seems that while traveling around through the rural districts and making sure that his political fences had no very bad breaks in them, he came one evening to the humble abode of a farmer.

It was too far from the town where he was stopping to go back that night, and so he asked permission to stop there. This was cheerfully granted, and after partaking of an old fashioned country supper the old farmer invited his unknown guest to take a ride across the country with him, he having an errand to do in a neighboring village. With all the suavity for which Mr. Seward was justly famed, he accepted the invitation, and as they drove along in the gathering twilight he entertained the old farmer with all manner of campaign experiences and stories.

The old farmer's native shrewdness caused him to wonder why the stranger should show him so much attention, and at last he blurted out:

"Say, be you a book agent?"

"Not that I know of," was the governor's smiling rejoinder.

"Perhaps you're a lightning rod man, eh?"

"No, sir; you are wrong again."

"Then you're a sewing machine man."

"No, sir."

"Well, then, by gosh, you must be a politician.'"

Mr. Seward at once acknowledged the soft impeachment, and then informed the inquisitive old fellow that he was the governor of the state of New York. This quieted the old fellow for awhile, but at last he could hold in no longer, and he quietly informed Mr. Seward that he thought he was a liar. Mr. Seward, however, insisted on the truth of his story, and the dispute finally resulted in a wager of twenty dollars. The money was placed in an old lantern that was carried in the wagon to be used in case of emergency, and it was agreed that the first person they met was to decide as to the ownership of the money. Should he fail to recognize Mr. Seward as governor the former was to win, and vice versa.

The test soon came. Driving by the shop of a wayside blacksmith, the proprietor himself stood in the doorway. The farmer stopped his wagon and Mr. Seward said:

"My friend, my veracity has been questioned by the gentleman with me, and I should be pleased to have him convinced as to who I am. Will you be kind enough to tell him?"

The man of brawn and muscle peered at Mr. Seward long and earnestly. Then turning to the farmer he said, in awe-struck tones:

"He's all right, Bill! I know him! He's Thurlow Weed, by gosh!"

The farmer took the twenty dollars and Mr. Seward was poorer by that amount than when he started out.—Chicago Mail.

A Trick of Cross Examination.

In an action for payment of a tailor's bill, a witness swore that a certain dress coat was badly made, one of the sleeves being longer than the other. "You will," said Erskine slowly, having risen to cross examine, "swear—that one of the sleeves was—longer—than the other?"

Witness—I do swear it.

Erskine (quickly, and with a flash of indignation)—Then, sir, I am to understand that you positively deny that one of the sleeves was shorter than the other?

Startled into a self contradiction by the suddenness and impetuosity of this thrust, the witness said, "I do deny it."

Erskine (raising his voice as the tumultuous laughter died away)—Thank you, sir; I don't want to trouble you with another question.—San Francisco Argonaut.

Soldiers Prefer Grain Food.

Cornmeal was the grand necessary of life to those legionaries who, led by Cæsar, subdued the world, and who counted themselves starved and were apt to mutiny if reduced to the "famine fare" of animal food. Even British troops have been known to suffer from an exclusive meat diet, as indeed we found to our cost in the Zulu campaign of 1878, while the preference of the Roman soldiery for the vegetable food has its justification in the experience of the Russian army, and still more of the German one in 1870, which carried that memorable campaign to its triumphant close on the Erbswurst (pea sausage favored for a little bacon).—London Lancet.

Large Family.

Patsy Dooley was a very poor arithmetician, and was puzzled by a great many questions of numbers which did not enter other people's heads.

One day a new acquaintance remarked in his presence:

"I have eight brothers."

"Ye have eight brothers?" said Patsy. "Then I suppose ivery wan o' thim has eight brothers too?"

"Certainly."

"Arrah, thin," said Patsy, "how many mothers had the sixty-foor o' ye?"—Youth's Companion.

Paper Fire Engines.

A novel fire engine is being tried by the Berlin fire department. The carriage is constructed entirely of papier mache, all the different parts—body, poles, etc.—being fashioned in the best possible way. The weight is much less than the ordinary carriage, while the durability is equally great.—New York Journal.

Force of Habit.

First Little Girl—Your papa is awful cross.

Second Little Girl (apologetically)—He used to be an elevated railroad guard.—Good News.

ANOTHER LOST BONANZA.

Plenty of Evidence in Arizona to Show Where Gold Was Once Found.

The legends of lost mines of fabulous wealth in Pima county are almost numberless, and it might be truthfully added, generally mythical. The old timers can tell of them by the hour, and a few persons have been shown glittering evidences in confirmation of the wonderful tales reluctantly recited with superstitious dread of the consequences of their perfidy by almost superannuated Indians and Mexicans.

That the precious metals were mined on a gigantic scale in the dim past the many remaining evidences already discovered fully verify, yet the investigation of those that chance has revealed has seldom proved financially successful. Old arrastres covered with the decay of centuries, and crude smelting furnaces that have almost returned to the dusty destiny of all matter, speak of industries once in active operation that history and even aboriginal tradition fail to mention.

Some of the traditions told sound like fairy tales, and one, however skeptical, cannot but become deeply interested in their recital. As a sample of the highly plausible, well authenticated and extremely seductive narratives, one related by Charles O. Brown, of this city, may be received with interest.

"Speaking of old mines," said Mr. Brown, "I have spent a good deal of time and money in hunting up clews, and one mine was actually found, and I can go to it any time. Out in the Silver Bell country I can take you to a mountain so full of tunnels and shafts that, if they were in good condition, you could travel through all day long and not reach the end.

"A number of old timers have visited it, and, judging from the vast work done there so long ago, they concluded that a great mine of some kind had existed there, which had likely been worked out. Many times has it been located, and though its walls, roof and floor were carefully scanned and sampled, the result, while showing some gold, was discouraging, assays showing from a trace up to several dollars per ton.

"Many years ago I talked with an old Papago Indian, with whom I was on very friendly terms, having often extended him little favors, about the gold and silver mines. In a burst of confidence he told me that a great many years ago, when he was a very small boy, the Indians at San Navier del Buc made weekly trips to a very rich gold mine. On Saturday night they returned with the products of their toil. The priest in charge of the mission kept a small table in front of the altar, covered with a white cloth, upon which the pious toilers placed their metallic offerings to the church.

"This table was often covered with golden nuggets, varying in size from a pea to one's fist, and it was a rich sight. After the usual service the priest would descend, and as he picked up each precious piece he would proclaim the name of the donor and afterward would call them forward to receive the special blessing of heaven. On the following Monday they would again take up their march in a northwesterly direction for the mines, and for a very long time this was repeated, until the priests were driven out of the country, when they abandoned mining entirely.

"The old Indian had one time gone with the miners, who followed a well beaten trail toward the Silver Bell country, and he saw them take out the gold. He agreed to show me the place, and out of curiosity I sent a man with him one day. They went out to the old mine I have spoken of in the Silver Bell country, and when they reached a certain gulch the Indian pointed to the top of the mountain and said he would find a shaft there, covered with cat claw bushes, out of which the most gold was taken. The man found everything just as the old Indian told him, but long disuse had filled up the shaft until it was nearly full.

"On returning, the old Indian could not be found. He had gone ahead and was not met for several days. He then said he did not dare to show the mine to the white people, and protested that he did not show it for fear the Great Spirit would take his life. He said the white man had found it, but he did not show it.

"I visited the mine afterward, but the work necessary to clean out the shaft was too great and too expensive to undertake, and it has never been touched."—Arizona Enterprise.

True Courtesy.

On one occasion Robert Browning's son had hired a room in a neighboring house, in order to exhibit his pictures there, and during the temporary absence of the artist, Mr. Browning was doing the honors to a room full of fashionable friends.

He was standing near the door when an unannounced visitor made her appearance, and of course he shook hands with her, greeting her as he had the other arrivals.

"Oh, I beg your pardon," she exclaimed, "but, please, sir, I'm the cook. Mr. Barrett asked me to come and see his pictures."

"And I am very glad to see you," returned Mr. Browning, with ready courtesy. "Take my arm, and I will show you round."—Temple Bar.

A Chinese Girl's Fall.

On Nov. 28, 1880, a schoolgirl named Ng A Soo fell from the roof of a four storied house, a distance of sixty or seventy feet. Her skull was fractured in several places and the right parietal eminence was deeply impressed. Enough to kill anybody, one would say, or at the best, to induce lifelong idiocy! Not a bit of it! In exactly six weeks Ng A Soo left the hospital, "seemingly" says the clinical report, "in no way the worse for her fractured skull."—London Hospital.

Occasionally the English viper will attempt to engulf too large an animal, and Mr. Bell found one on Poole heath the skin of whose neck had thus been bursted in several places.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY, the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Despricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North-west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

BORN.

BULPITT—In Round Valley, Feb. 17, 1893, to Mr. and Mrs. W. C. Bulpitt, a son

JOHNSON—At Bishop, Feb. 21, 1893, to Mr. and Mrs. J. F. Johnson, a daughter.

WRINKLE—At Lone Pine, Feb. 25, 1893, to Mr. and Mrs. L. F. J. Wrinkle, a son.

MARRIED.

STEWART—DODGE—At the residence of the bride's parents, at Lone Pine, March 1, 1893, by I. H. Mulholland, J. P., C. W. Stewart to Miss Martha Z. Dodge.

DIED.

AHERN—At Keeler, March 2, 1893, Dennis Ahern, a native of Ireland, aged 62 years.

J. A. McKenzie, of Lone Pine, visited Independence yesterday.

The little son of Dr. Middleton, of Lone Pine, is suffering with an attack of scarlet fever.

It is reported that J. R. Moffitt has sold his ranch at Georges Creek to Fred Eaton of Los Angeles.

The carpenter work upon the new church at Lone Pine has been completed and the structure is now in condition for holding religious services in it.

H. M. Yerington, D. A. Bender and R. J. Laws were at Independence last Sunday. They were making a trip over the C. & C. road with a special train.

Mr. and Mrs. Meysan, of Lone Pine, accompanied by their daughter, Miss Adelina Meysan, will start for Los Angeles on Sunday, where they expect to visit for a couple of months.

The N. S. G. W. will produce the celebrated drama, "Caste", just as soon as Miss Lena Thompson is sufficiently recovered to take part. Due notice will be given when the time arrives.

Roberts and Bush have got their plant in order for making borax and will soon begin shipping. They have already enough made for a cargo or two. They are reported to have a good claim.

S. P. Smith, of Bishop, writes that he will visit Independence soon with his stallion Antare. An advertisement for this fine young horse and the thoroughbred stallion Pickpocket, will soon appear.

O. I. Mairs started for Los Angeles with a private conveyance last Sunday. He expected to reach Mojave in time to assist in loading the band of beef cattle which he and Fred Holbert are interested in.

Jas. Herod passed through town this morning on his way to Big Pine from Bakersfield. He brought over a band of work horses and will clear and seed a large tract of land belonging to him south of Big Pine.

The *Index* has had a happy habit of resurrecting old files of the *Independent* and comparing articles of different dates. The last issue of the *Index* would make a curious comparison with every issue of that sheet for the past six years.

The *Index* says it has "faithfully attempted to defend the C. & C. R. R. for the past six years for glory." Wonder if it abuses it now because the *glory* has ceased to be forthcoming? It looks to a man up a tree as though the C. & C. R. R. has quit putting up *glory* for the *Index*.

The Legislature has made prize fighting a felony. This ought to have been done long ago. Every feature of barbarism, brutality and villiany is connected with prize fighting. The principals are brutes and their backers are swindling scoundrels, or rich fools like Baird, who is backing Mitchell. The Legislature has done credit to itself and the State by putting an end to a disgrace.

The *Independent* has been working steadily for many years to secure railroad connection with Los Angeles. Everybody in Owens Valley agrees with us that our only hope lies in this direction. And at last we have converted the *Index*, whose C. & C. *glory* has been discontinued, by the way. That's right, neighbor. Join the vast majority, and the much desired object may be attained.

A Finish At Last.

About sixteen years ago the few settlers then at Big Pine began to build a canal for irrigation purposes. The people were poor and the work went on slowly, nothing at all being done sometimes during intervals of a year or two. When the Crocker Brothers bought the McMurry property a few years ago and went to live at Big Pine, they put new life into the project. During the winter now ended the work was pushed vigorously, and now nothing but a few finishing touches remains to complete what for the originators was a great undertaking. The canal will cover at least twenty-five thousand acres of as fine land as any in the valley. It is intended by the people of Big Pine to celebrate the formal opening of the canal soon with a grand jollification to which all the people in the county will be welcome.

A Great Anniversary.

The Keeler anniversary will be held with all the usual festivities. St Patrick, as usual, will be certain to attend, and Mr. and Mrs. Barnes are already preparing to do honor to a guest so venerable and illustrious. Supervisor Wilson and Supervisor Fitzgerald are pledged to provide shamrocks for the occasion. Everybody who can will go to Keeler on the 17th to share the pleasure that never fails on the great anniversary.

Borax.

About eighteen tons of borax per month are taken out from the works of Conn and Trudo in Saline Valley. J. R. Eldred has the contract for hauling; his team of twelve animals brings seven and a half tons each trip. Part of the road across the Inyo Mountains is steep and makes very hard hauling.

Thanks.

To the many kind friends whose constant attentions and services were unceasing while they could be useful, and whose sympathy was manifest in the dark hour of bereavement we hereby tender our heartfelt thanks.

MRS. JOHN LUBKIN AND FAMILY.

Notice.

All parties are hereby cautioned against Hunting, Shooting, or otherwise trespassing on the premises of the undersigned.

Georges Creek, Feb. 12, 1893.

Settle and Save.

All persons indebted to the undersigned are hereby requested to come forward and settle their accounts with money or notes. By so doing debtors will save money and oblige

THOMAS & HILL,
Big Pine.

The Stewart—Dodge wedding at Lone Pine on Wednesday evening was a very quiet affair, only the immediate relatives of the contracting parties being present. After the ceremony was performed and congratulations duly presented the company sat down to an old fashioned wedding supper. Good things abounded, and the wedding cake of mammoth proportions was cut by the bride, and toasts to her happiness were quaffed in copious libations of old port. May the young couple enjoy a long and prosperous career.

Several mining experts have recently inspected the Hirsch mine, and it is quite likely that a sale may be effected.

NEW ADVERTISEMENTS.

Proposals for Care of Indigent Sick of Inyo County.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California at the office of the County Clerk until, and not later than 10 o'clock, a. m., on Thursday, April 6, 1893, to contract for the care of the indigent sick of Inyo County for the term of one year beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amounts for which parties contracting will maintain all indigent sick properly admitted to contractor's care, on the basis of an average of four patients per day throughout the year; to include all medicine, nursing, board, lodging and washing, and the burial and funeral expenses of any indigent sick person who may die while under such maintenance and care. Said bids must designate the price per person at which all excess of patients over the average of four each day throughout the year will be cared for, such excess to be paid for by extra allowance on presentation of bills, duly verified at the regular meeting of said Board immediately after said contract has expired—the average of four per day to be paid for at the regular meetings of the Board, on bills duly verified, by warrants drawn upon the Hospital Fund of said county.

The person or persons to whom said contract shall be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of said contract.

The maintenance care and management of such indigent sick by such contractor shall be at all times subject to the inspection of said Board of Supervisors, or any member thereof, or any person appointed by the Board for such purpose.

Bids must be indorsed, "Proposals for Care of Indigent Sick," and the same will be opened between the hours of 10 o'clock a. m. and 2 o'clock p. m. on said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

Proposals for Boarding County Prisoners.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of Inyo county, at the office of the County Clerk until Thursday, April 6, 1893, up to the hour of and not later than 10 o'clock a. m. of said day for the boarding of Inyo county prisoners, at the County Jail in Independence and at the Bishop Branch Jail—separate bids for each locality for the term of one year, beginning May 10, 1893 and ending May 9, 1894. Said bids to designate the price per diem for each prisoner, and said board to be paid for by warrants drawn upon the General Expense Fund, upon bills duly verified and presented at the regular meetings of said Board of Supervisors.

Bids must be indorsed "Proposals for Boarding County Prisoners," and the same will be opened between the hours of 10 o'clock a. m. and 2 o'clock p. m. on said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

Proposals for Services of County Physician.

Notice is hereby given by the Board of Supervisors of the County of Inyo, State of California, that sealed proposals will be received by said Board, at the office of the County Clerk until 10 a. m., and not later, on Thursday, April 6, 1893, for the services of a Physician qualified under the provisions of "An Act for the Regulation of the Practice of Medicine and Surgery in the State of California," attending the indigent sick in charge of the contractor for the care of such persons for the term of one year, beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amount per annum for which said Physician will give due and regular medical and surgical attendance upon said sick, and also all such services as may be required for prisoners in charge of the Sheriff.

The person to whom said contract may be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of such duties. Said services to be paid for by warrants drawn upon the Hospital Fund, upon presentation of bills, duly verified, at the regular meetings of said Board.

Bids to be indorsed "Proposals for Service of County Physician," and the same will be opened between the hours of 10 o'clock a. m., and 2 o'clock p. m., of said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

ORDER FIXING TIME AND PLACE FOR HEARING OF PETITION TO LEASE CERTAIN REAL ESTATE AND DIRECTING NOTICE TO BE GIVEN.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of the Estate of John Allen Hannah deceased.

Upon reading and filing the petition of William L. Hunter, Executor of the last will and testament of John Allen Hannah, deceased, praying that he be authorized, empowered and directed to lease certain of the real estate belonging to said estate, which is described as follows, to-wit:

The S ½ of the S E ¼ and S ½ of the S W ¼ of Sec. 10; the E ½ of the S E ¼ of Sec. 9, and the N E ¼ of Sec. 15, all in Township No. 10 S. R No 34 E., M. D. M., situate in Inyo County, California.

Also lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12 in Block No. 29, in the town of Independence, California, as the same appears of record by the official plat of said town now on file in the office of the Recorder of the said County of Inyo.

Wherefore it is hereby ordered that all persons interested in said estate appear before the Judge of said Court on Monday, the 6th day of March, 1893, at the Judge's Chambers, in the Court House in the town of Independence, County of Inyo, State of California, at the hour of 10 o'clock a. m., of that day, to show cause if any they can, why the first mentioned real estate should not be leased from the date thereof until the first day of November, 1893, for the rental of Three Hundred Dollars, as is more fully set out in the petition on file herein, reference to which is hereb made for further particulars, and also to show cause, if any they can, why the last mentioned real estate should not be leased from the date thereof until the first day of November, 1893, for a rental of $10.00 per month, as is also more fully set forth in said petition, and to which for further particulars reference is here made.

It is further ordered that a copy of this order be published in the Inyo Independent, a newspaper published and printed within the said County of Inyo, for at least two weeks, said publication to be completed before the said 6th day of March, 1893.

GEO. M. GILL.
Judge of said Superior Court.

Dated this 14th day of February, 1893.

[Endorsed.]

SUPERIOR COURT, COUNTY OF INYO, STATE OF CALIFORNIA.

In the Matter of the Estate of John Allen Hannah, Deceased.

Order to Show Cause why Lease of Real Estate should not be made.

Filed Feb'y 14th, 1893.

ROYAL

IS THE

Best Baking Powder

The Official Government Reports:

The United States Government, after elaborate tests, reports the ROYAL BAKING POWDER to be of greater leavening strength than any other. *(Bulletin 13, Ag. Dep., p. 599.)*

The Canadian Official Tests, recently made, show the ROYAL BAKING POWDER highest of all in leavening strength. *(Bulletin 10, p. 16, Inland Rev. Dep.)*

In practical use, therefore, the ROYAL BAKING POWDER goes further, makes purer and more perfect food, than any other.

Government Chemists Certify:

"The **Royal Baking Powder** is composed of pure and wholesome ingredients. It does not contain either alum or phosphates, or other injurious substances.

"EDWARD G. LOVE, PH. D."

"The **Royal Baking Powder** is undoubtedly the purest and most reliable baking powder offered to the public.

"HENRY A. MOTT, M. D., PH. D."

"The **Royal Baking Powder** is purest in quality and highest in strength of any baking powder of which I have knowledge.

"WM. MCMURTRIE, PH. D."

The Government Report shows all other baking powders tested to contain alum, lime or sulphuric acid.

Autographic Treasures.

Among the treasures of the two literary societies of the university are many valuable and interesting letters. Rummaging through a pile of these epistles at the Phi Cappa hall were found many letters from men who have immortalized themselves—Clay, Calhoun, Webster, Hayne, Davis, Lee. They are their letters of acceptance of honorary membership, or in reply to some letter forwarded them by the society. The most beautiful of all—and in fact it might be pronounced one of the most lovely letters ever written—was a letter of acceptance of honorary membership in the Phi Kappa society, written by Theodore O'Hara, the poet.—Athens (Ga.) Banner.

Some Old Acorns.

C. R. Robertson once found a cavity in a large burr oak tree in which about a pint of pin oak acorns had been stored. The excavation in which the acorns were found had been made by woodpeckers, and was in the most solid part of the tree. Mr. Robertson says that, according to Chambers, there was 398 years' growth of wood over the end of the cavity, yet all the acorns were as fresh as if only put away by the birds or squirrels the fall before.—St. Louis Republic.

Valued Indorsement

of Scott's Emulsion is contained in letters from the medical profession speaking of its gratifying results in their practice.

Scott's Emulsion

of cod-liver oil with Hypophosphites can be administered when plain oil is out of the question. It is almost as palatable as milk—easier to digest than milk.

S.S.S. CURES MALARIAL POISON

Nature should be assisted to throw off impurities of the blood. Nothing does it so well, so promptly, or so safely as Swift's Specific.

LIFE HAD NO CHARMS.

For three years I was troubled with malarial poison, which caused my appetite to fail, and I was greatly reduced in flesh, and life lost all its charms. I tried mercurial and potash remedies, but to no effect. I could get no relief. I then decided to try S.S.S. A few bottles of this wonderful medicine made a complete and permanent cure, and I now enjoy better health than ever.

A Goat Protective Association.

Out in that part of the northeastern section of this beautiful city of magnificent distances where the festive goat blossoms as the rose of Sharon and the lily of the valley, and his fragrance fills the soft Swampoodle air, a goat protective association has been formed to the discomfiture of Poundmaster Einstein and the defeat of the ends of justice. One of the rules and regulations governing the internal economy of the glorious capital of 62,625,250 people, more or less, provides that a goat which wanders unlicensed upon the purple hills of Swampoodle, and browses on her luscious tomato cans or masticates her esculent old boot legs, may be apprehended by the minions of the law, and being duly impounded, its owner shall pay the sum of $1 in the coin of the realm for its restoration to the empurpled heights and the enjoyment of the tomato cans aforesaid.

But the people affected hate this tyrannous restriction upon the liberty of the goats and their own property rights, so each man's castle is a house of refuge to the innocent kid or the rancid old butter, and when the minions of Einstein appear every door is opened, and the fleeing goats escape pursuit and are hidden away until the danger is averted. By this means the goat population in the northeast is rapidly increasing, while the poundmaster's goat fund is actually dwindling away to invisibility, and the poundmaster refuses to be comforted.—Washington Star.

Characteristics of Handwriting.

Handwriting has its characteristics, and is a study in itself to those who want to become familiar with its peculiarities. It can very easily be told whether a person whose writing you want to identify is a man or a woman, a minor or adult. It is very seldom a handwriting assumes its permanency before the writer is 25 years old. The age of the writing can approximately be determined by various methods. If it has a Spencerian appearance you may know it was written after 1882, as at that date the Spencerian system was introduced. If it is the black aniline ink that is generally used everywhere now, you may know it was written after 1873. The older inks had iron or some diluted dyestuff for a basis, and preceded the aniline. An analysis of the writing will most generally determine the date of the writing.—St. Louis Globe-Democrat.

To Prevent Paint From Scaling.

To prevent the paint on iron or wood from scaling off when exposed to the weather, first thoroughly wash the parts to be painted and then brush over the surface with hot linseed oil. By following this method, especially with iron articles, no scaling of the paint will occur. In cases where the articles to be painted are small and can be readily heated, it is better to heat them and plunge them into the oil. The thin liquid oil when hot enters into the pores of the metal, absorbs the moisture, and the paint then applied so firmly adheres that frost, rain or air cannot effect a separation.—Philadelphia Record.

Japanese Bells.

Bells were in use in China, Japan and India long before they were known in Europe. In the space fronting the temples of Nikko, Japan, there are enormous bells of exquisite purity of sound, too heavy to be suspended in any tower which this people build, and so they are swung on low frames of stout timber, the bell being only three or four feet from the ground.

They are rung by means of battering rams, made of long joists of hard wood, suspended so as to swing by the united aid of many human hands. They give out soft and muffled, though deep and far reaching, notes.—Youth's Companion.

He Was a Pounder.

The millionaire was desirous of employing a slugger to protect him from dangerous visitors, and a big two fisted fellow applied for the place.

"How much will you charge for your services?" inquired the cautious millionaire.

"Aw, I don't know," said the slugger carelessly. "About fifty dollars a pound, I guess."

The millionaire looked at the applicant's knotted muscles and heavy hands and concluded that the figures were not too high.—Detroit Free Press.

A Corner in Shawnee.

TRUE STORY OF A WALL STREET HERO BY HENRY CLEWS.

"Annie," he exclaimed, "I don't know why you come here to the winder where everybody can see as hasn't got no business to, but I don't care. Everybody knows that I've been courtin' you since we went barefooted together to the red school house, an' it'll take mor'n Mis' Gamble's tongue to keep me from kissin' you as I had ought to."

Annie started to raise her hands, but Daniel was too quick for her, and he held her head in his arms while he pressed his lips to her cheek, for she turned her face away. When he let her go she sank into a chair and looked—not at her lover. Daniel Hardy was not an analyst. He felt her resistance; he was vaguely disturbed by it, but he could not tell what was wrong, even if anything was. He took a chair near Annie and began:

"I've be'n lookin' for'ard to this, Annie, ever sence you went to school three years ago. I made up my mind then that when you come home I would have money enough laid by to set up housekeepin'."

"Don't, Daniel, don't," interrupted Annie, and she reached impulsively forward and took one of his great hands in both of hers. "Don't let us talk of it now, please."

"But I done it," he persisted; "they's money in the bank, an' I've got a chance to buy the old Ransum place, an' by a little fixin's it'll do fust rate till we can build a new house onto it. The sile jist 's good 's they is in the county, 'n if you liked it better, I p'sume the bank would let me have money enough to build to oncet. Everything's ready jest 's soon 's you are, 'n' it shall be jest 's you want it, 'n' I don't perpose to hurry you neither, 'scept it's a long time I've b'en awaitin'."

"You are so good," Daniel, and Annie was almost crying; "but please don't speak of it now; wait a few days, do!"

She bent her head down and kissed the brawny, soil-worn hand she held, and kept her face there to conceal the tears that ran over it.

After a strange pause, "All right," said Daniel; "all right, Annie, jist's you say."

She raised her head, dashed away the tears and smiled, and, without knowing exactly how or why, Daniel left the house.

Two weeks passed, during which Daniel held his peace in painful wonderment while sundry disquieting rumors gained currency in the village. They did not reach Daniel's ears at once, for few people cared to intrude upon him, but it was said by so and so that one of Annie's classmates had a handsome, wealthy brother who had visited his sister many times throughout the past school year, and who had been very attentive to the Posket beauty during the graduation festivities.

The first intimation that Daniel received that others than himself were sensible of some change in his relations to Annie came from our friend Postmaster Sparks. The usual concourse of villagers was idling in the store one evening waiting for the stage to bring in the mail. Daniel was there, silent and somber.

"Got a touch of malary, Dan'l?" asked the postmaster; "you don't seem to be lookin' 's smart's usual."

"I'm so's to be settin' up, Mr. Sparks," responded Daniel, evasively.

"Yaas," drawled Mr. Sparks; "they's several sicknesses 's don't confine a man to his bed, hay?"

As Daniel made no reply, the kind-hearted postmaster continued:

"You're a younger man th'n I am, Dan'l, but you've got more sense th'n most boys of your age 'n' you'd ought to have seen that you can't spect too much in affeers of the heart. Hay, Daniel?"

Daniel rose from the cracker barrel on which he had been sitting.

"Mr. Sparks," he said slowly, and all the villagers listened intently; "you be an older man th'n I be, 'n' you'd ought to have learnt to meddle with nobody's business that don't consarn yourn. Mebbe though, bein' postmaster, you can't help it."

If ever a sally pleased the listeners that one did. Sparks was notorious, even in rustic Posket, for his persistence in learning about the correspondence that passed through his hands.

"They's no sense in gittin' excited, Dan'l Hardy," he said, "'n' they's no call for you to be sassy to a man's went to school with your father. Everybody in Posket 'n' fer miles around knows that you've be'n courtin' Squire Stockwell's daughter, the Lord knows how long, 'n' be'n engaged to her for goin' on three year, 'n' p'raps more; you've's much's admitted it yourself. An' all I've got to say is, it's a long lane that aint got no turnin'."

Daniel's heavy jaws were shut hard together, and down went his clinched fists into his pockets. He stood still for a moment, and none of his neighbors ventured to address him. Then he left the store without waiting for the stage and went home.

It did not need that gossips should inform Daniel of the rumors concerning the rich young man from New York, for he came in person to Posket shortly after the scene in the postoffice. He wrote his name—Theodore Wellman—on the register of the village tavern, and asked the landlord about the fishing in the neighborhood. From this inquiry to questions about people and to Squire Stockwell's standing in the community was a simple matter, but the landlord, while willing enough to answer, was by no means hoodwinked. He knew the trend of Posket gossip, and Mr. Theodore Wellman had not finished his supper before the landlord was morally certain that this was the man who had become the rival of Daniel Hardy. When the meal was finished and the New Yorker had smoked a cigar, he inquired the way to Squire Stockwell's, and sauntered off up the road. Then the landlord put on his hat, left his hired man in charge of the tavern and repaired to the postoffice. The store was full, as usual, and the landlord bade a general good evening to his neighbors, and sat down near the door on a soap box.

"City chap come to your place on the stage, didn't they, Mr. Jenkins, hay?" asked Postmaster Sparks.

"Yep," replied the landlord, pulling a straw from a broom and transferring it to his mouth.

"Boston?"

"Nop."

"Springfield, 'spose?"

"Nop, neither. 'Twa'n't Springfield."

"Twa'n't New York?"

"Yep, 'twas."

"Goin' to stop long?"

"Didn't say."

Landlord Jenkins exercised his teeth on the straw, waiting for somebody to take up the line of examination that the postmaster had temporarily laid down, and as no one seemed ready to do so he added after a pause: "But I have an idea he is."

"How so, landlord?" queried the postmaster, masking his burning desire to know under an affected indifference.

"Wal," said Jenkins, "this here man's name is Wellman, with Theodore to the front of it, 'n' he comes from New York. He brought some new fangled fishing rods 'long 'n' says he's goin' to try for trout. Huh! then he goes 'n' asks a string of questions ten rod long 'bout Squire Stockwell. Says he knowed some of the family, but never met the squire, wants to know ef it's the proper thing to speak to Stockwell as squire; asks ef his family is enjoyin' good health; looks off at the mountings when I slyly says a how Annie seems to miss her boarding school, and then he asks the names of all the hills roundabout, 's ef he didn't care a dried pea about the Stockwells; 'n after supper asks the way to Stockwell's house 'n' goes there. 'Pears to me 'taint trout he's come down a fishin' for."

As a matter, of course, all Posket knew before another sundown that "Annie's city feller" had come to town on a sparking errand. Squire Stockwell had not suspected it from the nature of Mr. Wellman's call, but he was made to see the matter in its true light by several of his neighbors during the day following.

With all the town he had looked forward to Annie's marriage with Daniel Hardy as a foregone conclusion and it seemed like questioning the ways of Providence to suggest a different order for their lives. The affair troubled him seriously and his anxiety was by no means lessened when, after supper, he saw Wellman strolling up the gravelled path that led to the front door. It was one of those evenings, too, on which Daniel was certain to call. It occurred to the squire that something ought to be done—but what?

For several minutes he fidgeted uneasily while Mr. Wellman chatted of his day's sport with the rod. He was indeed a handsome man, tall and well proportioned, and his smooth cheeks and refined features looked none the worse for the scorching that a day in the open air had given them. He talked entertainingly, too, and, what was better, like an unassuming, honest man.

Presently the squire rose and excused himself in the best way he knew, and went out, leaving his wife, who was also disturbed about the situation, to entertain the probable suitor. Annie was there, to be sure, but her face was grave and her tongue inactive. Squire Stockwell wandered out to the front gate and gazed earnestly down the road. He was right. The sun had but just gone down and the figure he had seen tramping sturdily down the hill was that of Daniel Hardy.

Two or three commonplace remarks passed between them, and Daniel's somber face grew dark. The squire began to wonder why he had left the house to intercept the visitor, and at last he asked, with a great effort:

"Hear any news when you came through the village, Dan'l?"

"Yes, I did, squire, an' I s'pose that's what you're standin' here for, an' not lettin' me in."

"Wal, Dan'l, I ain't a goin' to do no interferin', 'n' Lord knows you'll be welcome to my house the blackest day in the year. You know me, Dan'l, an' I know you. It 'peared to me that p'raps ef you knowed, you wouldn't keer to come in tonight."

The squire's rugged face was luminous with compassion. Daniel gave one glance at him, another at the darkening hills and asked:

"Is he in there with her?"

"Yes, Dan'l, he is, but understand me, so fur's I know, nothin' has b'en said between 'em 's should change matters. Nothin' has be'n said to me 'cept 'bout fishin' an' railroad sheers. We hain't had no chance to speak to Annie, but ef it comes to a pint, Dan'l, you shan't be the sufferer. No child o' mine shall play fast 'n' loose with a likely young man 's she's be'n pra'tically promised to for years."

"Squire Stockwell," rejoined Daniel, and there was a rough, grating sound in his throat, "there shall be no forcin' of Annie where I'm consarned. Ef she can't take me after what I've done and b'en, ef this man 's I've heerd about has b'en fillin' her mind with what ain't true, ef—wall, the long an' short of it is, Squire, I've waited, 'n' I kin wait again."

"Said like a man, Dan'l," exclaimed the Squire, though he gained but a dim notion of what was passing confusedly in the young man's mind. "Now that you know how things is, do you want to come in?"

"I don't see no reason why I should stand aside because you've got a visitor," replied Daniel.

There must have been something grim in Daniel's entrance to the "settin' room," for Annie was dreadfully pale and a sense of constraint was shared by all except Mr. Wellman. The conversation was as general as this polished gentleman could make it until he withdrew. Then the squire and his wife started for the kitchen, and as Annie showed a disposition to follow them, Daniel said:

"I want to speak to ye, jist a minute, Annie."

She remained standing with eyes cast down, and when the door closed on her parents Daniel went on:

"I aint goin' to say anything of what you've forbid me, Annie, nor I ain't goin' to hurry you; I jist wanted to remind you that I'm a waitin' for you to say the word, jist 's you told me to. I shant say a word to-night ef you don't look up," he paused, and it seemed as if Annie tried to raise her head, but if so the effort ended in a shudder. So he continued: "Not tonight then, but p'raps to-morrow, or the next time I come. Good-by."

He took her unresisting hand in his for a moment and then left the house.

Late the next afternoon, just as Daniel had deposited a huge log in the mill-yard and was about to turn his oxen's noses homeward, he was confronted by Annie Stockwell. It was three miles from the squire's house, but the walk had not brought color to her cheeks, and the sight of her lover gave no brightness to her weary eyes.

"My goodness, Annie!" exclaimed Daniel, "you look sick. Here, sit down on this log."

"No, Daniel," she replied, in a low voice; "I must hurry back. I came here to see you."

[TO BE CONTINUED]

HOW PEOPLE SAY GOOD-BY.

Observations on the Subject from a Traveling Salesman of Chicago.

"When I'm on the road," said a traveling man at the Sherman house, "I make a study of the different manners in which different people bid their friends good-by. A business man comes on the car with his wife, gets a seat for her, puts her bundles in the rack, presses her hand, and perchance gives her a matter of a fact kiss and is gone, and the whole has been done so quietly that no one has taken any notice of it. A young lady accompanies her young lady friend to the train. After going from one end of the car to the other and back again they find a seat that will answer. The young lady is going up the road ten miles and will be gone till the next day. 'Well, good-by, Lil,' says one. 'I do hate to say good-by,' says the other. 'I wish you were going with me.' 'Oh, so do I.' 'Well, good-by.' 'Good-by.'

"Then they kiss. 'Hope you'll have a nice trip.' 'So do I.' 'I shall be lonesome till you come back.' 'Oh, pshaw!' 'What's wrong, dear?' 'I forgot the novel I was going to read on the train.' 'Too bad, but you can get another.' 'What a pretty dress that lady at the end of the car has.' 'I think the stripe is too narrow.' 'Well, I guess the train is starting, so good-by.' Another kiss. 'Good-by.' And thus they go on as long as the train will wait for them.

"Then there is the lovers' good-by. It is very different from any other. In many good-bys there is much more said than is meant, but the lovers mean much more than they say. The sly look that flashes from eye to eye has a whole world of meaning in it for them. And the good-by clasp of their hands telegraphs whole volumes of affection from heart to heart. And when they kiss—well, there isn't a person in the car but would like to steal a taste of their bliss. And sometimes there are amusing things occur in the hurry attending the good-by salutations. A train I was on stopped at an Iowa town one day and an honest country couple entered the car. Their appearance and manner indicated that they were unaccustomed to traveling.

"The wife was provided with a seat, and the husband, who was to be left alone, went outside and talked through the open window to her. She was giving him detailed instructions how to look after the household during her absence. The engine began blowing off steam and it was necessary for her to speak very loud to make her husband hear. The noise suddenly ceased just when she was in the middle of one of her sentences, but she did not seem to be aware of it, and the passengers all smiled as she shouted on the still air, 'And don't forget to change your underclothes every Sunday.' I don't know of anything more mixed with tears and smiles than are the good-bys spoken at the railway stations."—Chicago Herald.

Statuary for the People.

Statues of fine Carrara marble are choice and elegant additions to any room. For those whose means do not admit of such expensive decorations are the plaster casts of the art stores, which may be protected by enameling or painted in ivory tints. Nearly all of the choicest bits of statuary, such as the Winged Mercury, the Venus de Milo, and all the well known figures of ancient gods and goddesses are to be had in plaster, and are often excellent imitations of the marbles, and very gratifying to the lover of artistic forms. With careful usage they will be ornamental for a long time. Bas-reliefs in plaster, hung against plush, felt or plain silk panels, are effective and artistic.—New York Ledger.

Corundum, as the reader probably knows, is the oxide of aluminum, the crude form of the sapphire, and on account of its hard surface is used to grind metallic surfaces, particularly tools. It differs from emery in a greater freedom from oxide of iron, the latter containing about 25 per cent. of this impurity, while corundum contains a much smaller proportion. The larger part of the corundum wheels in existence are used by manufacturers of agricultural implements and of stoves.—Springfield (Mass.) Homestead.

Money talks; but the man who bets a hat is merely talking through it.

For Throat Diseases and Coughs, "*Brown's Bronchial Troches*," like all other *really good* things, are imitated, and purchasers should be careful to obtain the genuine article prepared by JOHN I. BROWN & SONS.

Something that speaks louder than words—a fifty-cent tip to the waiter.

Watson's Peerless Polish. The only dressing for fine shoes that is absolutely guaranteed to do as represented or money refunded, wherever purchased. Your shoe dealer sells it.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Use Enameline Stove Polish; no dust, no smell.

Try Germea for Breakfast.

How to Come to a Stop.

SAINT JACOBS OIL TRY IT

When we least expect them, accidents will befall us, a verification of the old adage that the unexpected always happens. The following recites how an active business man was suddenly brought down.

THE TRAIN STOPS.

CINCIN., O.—"Recently while in the act of alighting from my car, I stepped upon a stone, which, turning suddenly under my foot, threw me to the ground, with a severely sprained ankle.

THE MANAGER STOPS.

Suffering exceedingly, I was helped into my car, and my man rubbed me most generously with arnica and kindred remedies, but to no avail.

A POINT TO STOP AT.

Reaching a station where St. Jacobs Oil could be procured, two bottles of it were bought, and the application of it resulted at once in a relief from pain, which had well nigh become unbearable. I was out and about my work in three days."

W. W. PEABODY, Prest. & Genl. Man. O. & M. R. R.

The Pain Stops. THAT'S THE ST. JACOBS OIL POINT

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

"Life is full of paradoxes." "Yes." "Yes. It is the fast liver who has the sluggish liver."

THE FATHER OF MANY ILLS.

Constipation leads to a multitude of physical troubles. It is generally the result of carelessness or indifference to the simplest rule of health. Eugene McKay, of Brantford, Ont., writes:

"I had for several years been a sufferer from constipation, had taken a great many different remedies, some of which did me good for a time but only for a time, then my trouble came back worse than ever. I was induced by a friend, whom BRANDRETH'S PILLS had benefited, to try them. Took two each night for a week, then one every night for about six weeks. Since that time I have not experienced the slightest difficulty whatever, and my bowels move regularly every day. I believe firmly that for sluggishness of the bowels and biliousness BRANDRETH'S PILLS are far superior to any other."

Always credit a wise man with what he does not say, and charge the fool's words up to him.

AN ENEMY BAFFLED.

There is an enemy with whom thousands are familiar all their lives, because they are born with a tendency of biliousness. With this enemy they are constantly battling with ineffectual weapons. Hostetter's Stomach Bitters will baffle it. Mere purgatives will not reform a disordered condition of the liver indicated, not by constipation alone, but also by sick headaches, yellowness of the skin and eye balls, nausea, furred tongue and uneasiness, more particularly upon pressure on the right side, upon and below the short ribs. Avoid drastic purgatives which gripe and weaken the intestines, and substitute this world-famous anti-bilious cordial, which likewise removes malarial, stomachic and kidney complaints, rheumatism and nervousness. As a laxative of the bowels, painless but effectual, it improves appetite, sleep and the ability to digest, and possesses the additional advantage of a standard tonic.

In the terse and telling phraseology of the slum barrooms a long drink of any kind is now "a neckwash."

$100 REWARD $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address, F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

One woman has gone insane because of her hired girl. Perhaps that is the easiest way.

A FOOT-HOLD for Consumption is what you are offering, if your blood is impure. Consumption is simply Lung Scrofula. A scrofulous condition, with a slight cough or cold, is all that it needs to develop it.

But just as it depends upon the blood for its origin, so it depends upon the blood for its cure. The surest remedy for Scrofula in every form, the most effective blood-cleanser, flesh-builder, and strength-restorer that's known to medical science, is Doctor Pierce's Golden Medical Discovery. For Consumption in all its earlier stages, and for Weak Lungs, Asthma, Severe Coughs, and all Bronchial, Throat, and Lung affections, that is the only remedy so unfailing that it can be *guaranteed*. If it doesn't benefit or cure, you have your money back.

No matter how long you've had Catarrh, or how severe, Dr. Sage's Remedy will effect a permanent cure. $500 reward is offered by the proprietors of this medicine, for an incurable case of Catarrh.

"German Syrup"

JUDGE J. B. HILL, of the Superior Court, Walker county, Georgia, thinks enough of German Syrup to send us voluntarily a strong letter endorsing it. When men of rank and education thus use and recommend an article, what they say is worth the attention of the public. It is above suspicion. "I have used your German Syrup," he says, "for my Coughs and Colds on the Throat and Lungs. I can recommend it for them as a first-class medicine."—Take no substitute.

No Trees of 1st quality can ever be sent by mail. Mayhap you know it. By freight, prepaid if preferred, we ship safely 4, 5, or 6 ft. trees; 2-yr. Roses of rare excellence—everything! You actually pay less than for the puny stuff. 1,000 acres Nurseries. 20,000 acres Orchards. Exact information about trees and fruits. Stark Bros., Louisiana, Mo.

OPIUM Morphine Habit Cured in 10 to 20 days. No pay till cured. DR. J. STEPHENS, Lebanon, Ohio.

A Mother's Story

"When my boy was 2½ years of age, a fall brought on hip disease, which gradually grew worse until, when he was 6, **he could not walk,** and we had him treated 9 months at the Children's Hospital in Boston. But when he came home he was worse, and the doctors said **nothing could be done.** I began giving him Hood's Sarsaparilla and he improved at once. The 14 abscesses on his hip healed up, his appetite improved and he could walk, at first with crutches, then without. He is now **perfectly well,** lively as any boy." MRS. EMMA V. DUFF, Walpole, Mass.

Willie Duff.

Hood's Sarsaparilla Cures

HOOD'S PILLS do not purge, pain or gripe, but act promptly, easily and efficiently. 25c.

25 DOSES 25¢ THE GREAT TAKE THE BEST COUGH CURE 25¢ 50¢ & $1.00

SHILOH'S CURE.

Cures Consumption, Coughs, Croup, Sore Throat. Sold by all Druggists on a Guarantee. For a Lame Side, Back or Chest Shiloh's Porous Plaster will give great satisfaction.—25 cents.

SHILOH'S VITALIZER.

Mrs. T. S. Hawkins, Chattanooga, Tenn., says: "*Shiloh's Vitalizer 'SAVED MY LIFE.' I consider it the best remedy for a debilitated system I ever used.*" For Dyspepsia, Liver or Kidney trouble it excels. Price 75 cts.

SHILOH'S CATARRH REMEDY. INJECTOR

Have you Catarrh? Try this Remedy. It will relieve and Cure you. Price 50 cts. This Injector for its successful treatment is furnished free. Shiloh's Remedies are sold by us on a guarantee to give satisfaction.

TOWER'S TRADE MARK FISH BRAND

The Best Waterproof Coat in the WORLD!

SLICKER

The FISH BRAND SLICKER is warranted waterproof, and will keep you dry in the hardest storm. The new POMMEL SLICKER is a perfect riding coat, and covers the entire saddle. Beware of imitations. Don't buy a coat if the "Fish Brand" is not on it. Illustrated Catalogue free. A. J. TOWER, Boston, Mass.

OFFICE REMOVAL.

DISEASES OF WOMEN.

Dr. A. T. EHRENBERG, GERMAN PHYSICIAN,

occupies again his former office at

216 Kearny Street, - San Francisco, Cal.

Nearly 40 years of practice.

Consultation in English, German and French

If You Think any kind of a crop will do, then any kind of seeds will do; but for the best results you should plant

FERRY'S SEEDS.

Always the best, they are recognized as the standard everywhere.

Ferry's Seed Annual is the most important book of the kind published. It is invaluable to the planter. We send it **free.**

D. M. FERRY & CO. DETROIT, Mich.

MANN'S BONE CUTTER

Will cut Dry or Green Bones, Meat, Gristle and all. Green Cut BONES will double the number of eggs—will make them more fertile—will carry the hens safely through the molting period and put them in condition to lay when eggs command the highest price and will develope your chicks faster than any other food.

Feed Green Bones and use **Creosozone** to kill the lice, and you will make *fifty per cent* more profit.

Send for Catalogue and prices.

PETALUMA INCUBATOR COMPY, PETALUMA, CAL.

YOUNG MEN!

The Specific A No. 1.

Cures, without fail, all cases of **Gonorrhœa** and **Gleet,** no matter of how long standing. Prevents stricture. It being an internal remedy. Cures when everything else has failed. Sold by all Druggists.

Manufacturers: The A. Schaenheit Medicine Co., San Jose, Cal.

Price, $5.00.

G Cures in 1 to 5 DAYS. Guaranteed not to cause Stricture. Mfd. only by THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A. Trade Mark

Big G is the acknowledged leading remedy for all the unnatural discharges and private diseases of men. A certain cure for the debilitating weakness peculiar to women.

I prescribe it and feel safe in recommending it to all sufferers.

A. J. STONER, M. D., DECATUR, ILL.

Sold by Druggists. PRICE $1.00.

BACK FROM TOWN.

Old friends allus is the best,
Halest like and heartiest;
Knowed us first, and don't allow
We're so blame much better now!
They was standin' at the bars
When we grabbed "the kivvered kyars"
And lit out fer town, to make
Money—and that old mistake!

We thought then the world we went
Into beat "The Settlement,"
And the friends 'at we'd make there
Would beat any anywhere!
And they do—fer that's there biz;
They beat all the friends they is—
'Cept the raal old friends like you
'At staid home, like I'd ort to!

W'y, of all the good things yit
I ain't shet of, is to quit
Business, and git back to her
These old comforts waith ere—
These old friends; and i' old hands
'At a feller understand.
These old winter nights, and old
Young folks chased in out the cold!

Sing "Hard Time's 'll come ag'in
No More!" and neighbors all jine in!
Here's a feller come from town
Wants that air old fiddle down
From the chimbley! Git the floor
Cleared fer one cowtillion more!—
It's poke the kitchen fire, says he,
And shake a friendly leg with me!
—James Whitcomb Riley in Century.

Bank Cars.

New Zealand has set an example which might advantageously be followed in certain parts of this country. In the same way as we have "cathedral cars" it has "traveling banks." A clerk representing the bank travels up and down a railway line for the transaction of the ordinary business of the bank with those who have not sufficient facilities for coming into the city. Laden with a sachel containing his supply of cash, and provided with a teller's usual precautions against robbery, the clerk makes the carriage his headquarters, and there receives visits from customers at the way stations, changing checks or taking deposits as occasion may require. This plan is said to prove profitable to the bank and a great convenience to the settlers, who are saved all the trouble of journeying to town to relieve themselves of surplus money or to procure change. It is not difficult, however, to see that the New Zealanders are not properly educated in the matter of train robbery.—New York Commercial Advertiser.

Mr. Bradlaugh's Windfall.

An interesting incident in the life of the late Mr. Bradlaugh, M. P., has escaped notice in the many biographical sketches. At a time when Mr. Bradlaugh was most in need of money he narrowly escaped coming in for a windfall of over £20,000. A Barnstaple gentleman named Tuberville—a brother of Mr. R. D. Blackmore, the famous author of "Lorna Doone"—had such an admiration for the junior member for Northampton that, after a very short acquaintance, he executed a will in his favor.

Mr. Tuberville died shortly afterward at Yeovil under circumstances which necessitated an inquest, and it then transpired that another will in favor of a young lady had been made. The latter will was disputed, and, eventually, as the result of a compromise, Mr. Bradlaugh obtained £2,000.—London Tit-Bits.

He Was Not to Blame.

One day on a railroad car a lady allowed her little boy, who could barely speak distinctly, to play about the car, and bye and bye, to the horror of all of us, she discovered him complacently sitting outside on the steps. She brought him in, and although the punishment inflicted was mild his little heart seemed to be completely broken. When, presently, the train stopped at a station, great choking sobs could be heard distinctly all over the car, and suddenly we were all convulsed by a grieving, reproachful and utterly desolate little voice exclaiming, "Say, mamma, when a—naughty old—trainman leaves—a door wide open, how can—a baby help going out?"—West Shore.

Trumped His Partner's Ace.

At a social gathering a few evenings ago, the conversation turning upon luck, a gentleman remarked: "All this talk about thirteen being an unlucky number is sheer nonsense. What, for instance, is luckier than holding thirteen trumps at whist?"

"Humph!" replied another gentleman, "I held a thirteen trump hand once and didn't make more than one trick with it?"

"How could that be?"

"Well, you see, my partner was somewhat hot tempered, and when I trumped his ace he jumped up and threw me out of the room."—Boston Globe.

Early Icehouses.

In America icehouses have been known for at least 200 years. They were at first very primitive affairs, being nothing more than deep cellars, the flooring made of boards or stone, upon which was placed a layer of straw or sawdust. The sides were lined with boards set about a foot from the wall, and this space was filled in with sawdust, tanbark or straw. A rough, thatched roof completed the structure, which was then filled with ice, between the layers of which tanbark or sawdust was strewed.—Detroit Free Press.

Not in the Second Hand Business.

As Sheridan was entering court one day carrying his books and briefs in a green bag, according to the custom of the time, some of his brother barristers, thinking to play a joke on him, urged some boys to ask him if he had old clothes for sale in his green bag. "Oh, no!" instantly replied Sheridan, "they are all new suits."—San Francisco Argonaut.

A Scotch student had a curious method of studying. He spread out his books where the hearth rug would naturally have been, and lay there at full length, learning his task by the light of a fire made from roots of decayed trees which he had dug in a wood near Edinburgh and carried to his lodgings.

It is easy enough to smile when you tread upon rose leaves; but try it when each step leaves blood prints upon the thorns. Some of the lines in your face may curve downward then.

CHILLY FANATICISM.

Cranks Who Find Delight in Taking Frigid Plunges in Midwinter.

I found myself at the Serpentine at an unusually early hour in the morning. A little way out in the water, in front of the diving board, was a ladder lying on the ice, and in front of this ladder were two trestles. Between these two trestles the ice was broken away, leaving a space of water to dive into about ten feet long by five or six wide, the trestles being placed there for the purpose of keeping the miserable little plunge bath select from the skaters.

To the left of the trestles was another ladder lying on the ice. Near the bank I found a policeman who was communicative. The bathers form a kind of club, and number about twenty, he told me. They bathe every morning. No matter what the weather is, in they go just the same. All classes of people belong to the club, I was further told, and some came from a good distance. One enthusiast is 75 years old. His hair and beard are white as snow.

Just behind us was a very fine old elm tree. "That," said the policeman, "is their favorite tree. That is where they dress and undress." I soon found that this was the case, as the bathers came up. The first man to arrive lost no time in undressing, but went to the tree and threw off his clothes, chatting to the policeman the while. Then he sped gayly to his little patch of water between the trestles. Into the water he jumped—it is very shallow here—and dipping underneath it began to throw out some very large blocks of ice to the right and left of him.

This done, he leaped nimbly on to the diving board, poised himself, plunged and disappeared beneath the water, but only for a few moments. He was out again in that space of time and ran nimbly to the tree, where he quickly dried himself and rather shyly dressed. The others also undressed quickly, mounted the board and dived, but only once, and they were out like the other man and rapidly drying themselves. They never take more than one plunge in the cold weather. This was the general routine of all the bathers, who seemed to enjoy the bath immensely, uttering delighted "Ahs!" as they went in and came out.

"How do you feel?" said I to one who was drying himself, "cold?"

"No; all of a glow—warm all over."

"How do you feel when you go in first—cold?"

"No, not at all. Of course it's use."

He went on to say that he had indulged in the cold plunge bath for twelve years and never missed a day. Nor did any of the others miss if they could help it. Rain, hail or snow—in he went and in they went. "I've been in when it's been 20 degs. below freezing point," he said delightedly; "it's only about five now," and he seemed sad because it was too warm.

"And you like it?"

"Rather—most healthy thing in the world—feel quite fresh for the day. A-a-ah!"

The bathers are allowed by the authorities to have this special lot of water all to themselves, and very jealously they guard their privilege. On Christmas day they have a swimming race of a hundred yards, with first, second and third prizes—but not for money.—London Graphic.

Just the Thing.

It is difficult for us all to realize that "one man's meat is another man's poison." A dear old lady, whose parents belonged to the Society of Friends, is accustomed to tell a whimsical story of her own childish grief over her lack of finery, and the effort she afterward made to save her little daughter from like privations.

"When I was a child," she says, "it was my great cross that I could not wear bright colors. I longed for blue ribbons and red roses, and one summer, when I was to have a new hat, bought from the milliner in town, it seemed to me my heart would break if it were not like those worn by 'the other girls.' Would not some kind angel interfere, and persuade my mother to order a pink flower or a glowing ribbon?

"Nothing of the sort happened. In spite of my protests a white chip hat was selected, and trimmed with a modest white ribbon. I wore it all summer with rebellion in my heart.

"I grew up in due time, and married the minister of a religious body which did not enjoin plain clothing or sober colors, and when my little girl was born I resolved that she should have all the childish delights which I had been denied.

"Her little hats were trimmed with warm, soft colors, and when I thought her old enough to choose one for herself I took her with me to the milliner's. Perhaps I had an idea that I was atoning to my own childhood for its joys denied.

"'Now, dear,' I said, 'you shall have any hat you like if it is suitable for a little girl. Look round and see what you prefer.'

"The dear little thing was highly delighted, and went gravely about the store, with the important air of a middle aged shopper. Finally, after examining the entire display several times over, she stopped before a stand in one of the windows.

"'I will have this,' said she decisively. 'I like it best of all.'

"It was a white chip hat, trimmed with white ribbon, and it was almost exactly like the one I had detested so many years before."—Youth's Companion.

From Different Standpoints.

Ethel—Oh, at last! It has been years, Alphonse, since I saw you.

Alphonse—Oh, my own Ethel, it has been centuries!

Ethel's Father (up in the library)—Mary Jane, who was that you just let in?

Mary Jane—It was Mr. Cumlots, sir.

Ethel's Father—Great guns! this is the ninth time he's been here this week. He might as well live here.—London Tit-Bits.

CRIMINAL BEASTS.

Curious Study of Man's Dealings With Animals in Ancient Times.

BRUTES AMENABLE TO THE LAW.

When Magistrates Solemnly Heard Arguments Over the Guilt or Innocence of Birds and Beasts.

A book which will delight all lovers of the curious and grotesque, as well as provide food for serious thought, has appeared at Naples under the title of "Criminal Beasts." Its author, Signor d'Addosio, describes it as a mere attempt to deal with the subject. He prepared it without assistance, and admits that it only imperfectly covers the ground he has outlined. Yet it presents a perfectly astounding array of facts and veracious incidents relating to the supposed amenability of brutes to the civil law.

The reader is first reminded that the ancient laws of the Egyptians, Indians, Persians, Hebrews and Greeks attributed rights and duties to animals, and decided that equally with men animals were subject to praise or blame, reward or punishment. For this reason severe penalties were instituted against men who took the life of animals, maltreated or hurt them without reason, and equally severe penalties were awarded to animals for acts hurtful to the lives or property of men. Little by little these laws, which flourished when mankind was still childlike and ingenuous, fell into disuse as the human race became aware of its immense superiority, and finally the cold and reasoning Romans denied to animals any rights and duties, and pronounced them to be void of conscience or personality, without, however, deciding that they were mere machines.

Then came a reaction. The Middle Ages, distinguished for the predominance of imagination over reason, leaped back at a bound to superstition and barbarism, and all rights and duties were restored to animals, together with such responsibility that when they committed any act hurtful to man or his works they were summoned as criminals and subjected to the rigor of the law. In the Sixteenth century this humanizing of animals began again to decrease, until in the Seventeenth century it entirely disappeared.

After this historical sketch, Signor d'Addosio considers the advance of science in relation to the animal kingdom. The theory of evolution, which ascribes to brutes the rudiments of human attributes, is carefully reviewed. The modern school of science, says the author, declares that, in common with mankind, animals possess reason will, conscience, language, sentiments and sociability, and that the whole difference lies in the more or less in quantity and not in quality. The modern penal school now begins to ask: "What is crime?" and itself replies that crime is a natural phenomenon, common to plants and animals equally with men. Now, slyly observes Signor d'Addosio, if this theory be carried out to its logical consequence, it would result that an animal which sinned against human society ought to be punished for its crime, as it was in the Middle Ages.

The curious lawsuits which were in the Middle Ages so often instituted against members of the animal kingdom were sometimes penal, sometimes civil. The former were directed against animals that had destroyed human life, or resorted to magic and diabolical works, when the accused were put in prison, tried, sentenced, condemned and executed according to all the formalities of lawsuits against human criminals. The civil suits were directed against such animals or insects as attacked and damaged corn fields, vineyards, orchards, meadows and so on, or in any other way were hurtful to the possessions of men.

When prayers and processions had been resorted to in vain an appeal was made to the local ecclesiastical judge, who cited the destroyers to appear before him and nominated advocates for and against. The inhabitants of the damaged district did the same, and the trial took place with solemnity and with all the tedious details and long winded arguments of mediæval justice and jurists. The sentence generally condemned the accused insects or animals to leave the invaded territory within a given date, on pain of curses and excommunication, and almost always assigned some uncultivated place where they could retire and live as they pleased. Often when the creatures had been deaf to the sentence a new trial and verdict were undertaken to carry out the excommunication.

There are given in the book, on the authority of official records, accounts of a vast number of trials of horses, cattle, fowls, dogs, goats, snakes, leeches, etc. The majority of cases are taken from the records of French courts, though Italy furnishes a goodly number. In Naples itself, for example, an ass was solemnly tried and condemned to be burned to death, a proceeding which called forth a scoffing poem from a wit of the period. Civil suits were generally directed against vermin, such as caterpillars, grubs, leeches, locusts, rats, mice and so on.

In 1451 a suit was instituted against the leeches which infested the ponds in the neighborhood of Berne, in Switzerland, and the bishop of Lausanne, in his instructions to his parish priests of Berne, which instructions were solemnly approved of by the professors of the University of Heidelburg, mentioned that it would be advisable to procure "some of the aquatic worms and place them before the magistrates." This was done, and the leeches, both those present and those absent, were ordered to leave the places they had so boldly infested within three days on pain of incurring the malediction of God.—New York Tribune.

Jewish Fathers.

I observe that American fathers, whether from the exactions of business or other reasons, do not ordinarily come to my office with their ailing children. The whole matter is often left in the hands of the wife or some relative. Germans are more apt to come than Americans, and Hebrews most of all; and indeed I cannot refrain from expressing my admiration of the domestic life of the better class of Jews in New York, which so far as I have observed it is in many respects more nearly what it should be than that of any class in our community.—Henry L. Taylor, M. D., in Popular Science Monthly.

An Old Question Answered.

"What is the deepest depth of ignorance?" asked the philosopher musingly, and the man of the world made haste to answer, "It is the ignorance displayed by a railway official when there is a wreck on his road."—St. Joseph News.

A GOOD DAY FOR BEANS.

Why a Young Man Sympathizes with the Baker's Wife.

"How much do you ask for beans?" inquired a small boy of the baker's wife.

"Twenty cents a pan; give you back five cents when you return the pan," answered the woman without looking up from the squashy matter that she was stuffing into cream cake shells. It took her about half a second to make her answer.

The boy had hardly gone before a young woman in a blazer suit came in.

"Will you please tell me," said this woman, "the price of your beans?"

"Twenty cents a pan; give you back five cents when you return the pan," answered the baker's wife as she scooped a heaping spoonful of slush and drove it spitefully into one of the shells.

"What's them beans worth?" demanded a hungry looking man, whose appearance indicated that he was in the furniture van business.

"Twenty cents a pan; give you back five cents when you return the pan," answered the baker's wife.

"Good morning, madam," said an old chap with a white choker; "beautiful day, madam."

"Yes," said the baker's wife, "nice air today."

"Kind of air to give a man an appetite," suggested the parson.

"Yes, I should think so," assented the baker's wife.

The old man looked about the store a minute, and then going up in front of the baker's wife he asked, "Madam, will you kindly tell me the price of those appetizing beans in the window?"

A shade of sadness passed over the fair face of the baker's wife, but she answered as before, and without a second's loss of time, "Twenty cents a pan; give you back five cents when you return the pan."

"I should thunk you'd go crazy over those blamed beans," said a young man who was having coffee and cakes at a little table in the rear of the shop.

"What's that?" demanded the baker's wife sharply.

"I said that I should go crazy if I had to fool with those old beans as you do," said the young man.

"So would I if it kept up like this all the time," the baker's wife said. "But it don't. Beans go in streaks just as everything else does. I may not have another inquiry for beans this whole forenoon."

She had though. Before the young man had finished paying for the coffee and cakes a tall, lank creature, in a faded calico wrapper, had been there asking, "How much's your beans?" and the baker's wife had told her:

"Twenty cents a pan; give you back five cents when you return the pan."—New York Times.

The Sailor's Memory.

A grizzled old seadog sat on the stringpiece of a Delaware avenue wharf one evening recently and discoursed wisely upon maritime topics. "Pilots have kind o' one sided kind o' memories," he said. "You know they get paid so much per foot draft, and so when they pick up a nice big deep water vessel with a full cargo why she pays 'em handsome. And yet they hardly ever remember the names of the vessels they take up and down the river and bay, and you'll hear 'em yarnin together and talkin about 'that 11-foot brig or that 15-foot 6-inch ship or that four masted schooner the—the—the, oh, hang it, the one that drew about twenty-one foot and steered so all fired hard.'

"Why, I know one old pilot who'll spin good yarns all day long and all night right on top of that, and tell of what happened to him on fifty vessels, from sloop yachts to whalin big clipper ships, and he'll never mention 'em by any mark except what water they drew when he had 'em in charge. Pilots is mighty important men, but their memories is awful warped for names."—Philadelphia Record.

Trout as Mice Eaters.

Trout have been caught in the upper Annandale streams which have been feeding on the mice, or field voles, with which our pastures are plagued. A Moffat lady who had got a present of trout from a friend living near Evan water was the other day surprised to hear her domestic scream, and on inquiring the cause found it was due to the presence of a vole in the stomach of a half pound trout. A gentleman angling in Moffat water caught a pound trout near Bodesback, and on cutting up the fish found a whole vole in its stomach. The voles run to the streams in dry weather, and many of them are drowned. It will be strange if the trout has to be classed with the hawk, the owl and the weasel as a "natural enemy."—Dumfries Courier Correspondence.

The Word Quarantine.

The word quarantine comes from the Italian "quarantina." The monkish or the late Latin term was applied by the Anglo-Saxons about Egbert's time. It was then the custom to compute periods of time by forties, and a vessel coming from a suspected or diseased port was prohibited any intercourse with shore for forty days. Others say that the Venetians first introduced the practice and the name.—Cincinnati Commercial Gazette.

INSANE RULERS.

Monarchs Whose Idiosyncrasies Create a Vast Amount of Trouble.

THE SAD CASE OF OTTO OF BAVARIA.

Amuses Himself by Trying to Kill His Subjects With a Gun Rendered Harmless by His Attendants.

Whether monarchs go mad oftener than other people it is not possible to decide, but it is certain that their madness cuts a much larger figure in history. And it really seems that their mad antics have been more erratic than the average, even from Nebuchadnezzar to Otto of Bavaria. When the king becomes a raving maniac his ministers have a comparatively easy problem to solve. It is the half mad fellows who give trouble, such as Caligula, Caracalla, Louis XV, George III and crazy Paul of Russia.

The last named was probable the most thoroughly diseased monarch to live and go about in the disguise of an ordinary man of modern times. His three daughters inherited many of his ailments, and the fact that the grandson of one of those daughters is now emperor of Germany is spoken of by thoughtful Germans with an ominous shake of the head. The Bourbons, once the noblest race in Europe, died out of slow moral and physical decay, and the descendants of the famous Charles V of Spain and Austria went the same way. Of all conditions that which gives most trouble to friends is when a man is intellectually disordered a little too much to be trusted and not quite enough to be shut up. And unfortunately this is the sort of madness to which monarchs are most prone.

Fortunately for Bavaria, however, her king has long since passed that point. King Ludwig drowned himself in a fit of melancholy mania several years ago, and King Otto, his brother, succeeded. He is of the same remarkable physical development as his dead brother, tall and broad and muscular, with a tremendous reach of arm and an immense stride. His hair is long, shaggy and uncombed. His unkempt beard reaches below his waist. He dresses in black broadcloth, of which he gets a new suit twice every week, for he has such a strong idiosyncracy against napkins and towels and handkerchiefs that he refuses to carry or use any of them, and makes his coat tails and sleeves do for all three.

Only occasionally, when his sixty-year-old nurse, Mme. Marie, approaches him, does a gleam of intelligence cross his blurred features. Sometimes he devotes hours to disjointed discussions of all sorts of questions with purely imaginary persons. He then gesticulates furiously, and often becomes beside himself with rage over the suppositiitious obtuseness of his opponent. Twice weekly he sinks into a state of almost unbroken lethargy. During such a fit he smokes cigarettes constantly, sometimes as many as a hundred a day. With every cigarette he uses a whole box of matches, for after having lighted his cigarette he carefully sets off with the match all the other matches. A dozen times or more he has just escaped burning himself to death.

His favorite amusement is shooting at peasants—not pheasants, as a recent dispatch had it. He takes aim from his window with a gun loaded with powder and wadding (he believes there is ball in it), and as the peasants pass on a distant road he bangs away. Those who have been instructed and paid for doing so fall as if killed, and Otto is hugely delighted. He is still addressed as "Your majesty," and a mock state is kept up about him, but the administration is in the hands of his uncle, the Regent Luitpold.

KING OTTO OF BAVARIA.

Charles XII of Sweden was long in that unhappy condition—unhappy for other people—when he had too much sense to be withstood and too little to control himself. He lived quite too long for the good of Sweden and was killed in a senseless campaign of a useless war. Caracalla began his reign as Roman emperor by murdering his brother Geta, and went on with such reckless fury that he had some 20,000 people put to death before his attendants got desperate enough to kill him. The Russian Emperor Paul was killed in all probability because his nobles felt in danger from his freaks.

King Otto is but slightly cruel, and is dying fast enough now, as his madness has taken the form of abstinence, amounting to slow starvation. He is nearly forty-three years old. He has never been anything but a name in the government of Bavaria, never even approaching the picturesque personality of his elder brother, King Ludwig, the lunatic whose oriental extravagance, gorgeous palace, energetic eccentricities, furious midnight drives and royal patronage of Wagner astonished the world, and who died so miserably. King Otto's uncle, Prince Luitpold, is the next in succession to the Bavarian throne. Prince Luitpold carries his seventy years with vigor, and is an able man.

She Said "Boo."

A woman living in the suburbs of Hartford was aroused by a noise at the window the other evening, and dimly saw a man's face peering in through the blind. She silently crept out of bed, and reaching the window suddenly popped up and shouted "Boo!" The would be burglar fled.

An Ancient Piece of Music.

The most ancient piece of music which is still in existence is believed to be the "Blessing of the Priests." This song or chant was said to have been sung in the temple at Jerusalem, and is still to be heard in the Hebrew synagogues in Spain and Portugal.—Philadelphia Ledger.

An Elevated Railroad Episode.

She was a Normal college girl, and she decided to take the Sixth avenue elevated railroad up town. Being in haste, she carried her coin in her mouth, that she might lose no time at the ticket window. When she reached the ticket window she swallowed the coin and several people missed several trains while she coughed it up again. When her ticket was deposited she discovered herself to be on the down town side. She was in a hurry, and she gritted her teeth and ran down stairs. Then she got rattled, crossed Twenty-third street instead of crossing the avenue and, mounting, found herself where she had been before.

She stuck her tongue out at the gateman and started again. As she crossed Sixth avenue the gateman on the down town side called to the gateman on the up town side that a crazy girl was coming. She came. She was a good deal out of breath, and she stuffed a $5 bill through the window. As a train drew up she swept together her change, mostly silver, flung it into the ticket box, and, firmly grasping her ticket, dashed for a place. The gateman dragged her back, but she did not believe him. Then, while the station telegraphed to the central office for instructions, she sat and made faces at the gateman over the way. And the gateman on the down town side called to the gateman on the up town side:

"Are you going to the ball this evening?"

And the gateman on the up town side called to the gateman on the down town side: "Not this evening."—New York Sun.

Cured of a Superstition.

Speaking of superstitions among sick people a hospital physician said: "Upon one occasion one of the convalescents was sitting near the window when he observed a small dog barking furiously while running along the ground directly underneath. Suddenly the animal stopped, and looking upward began to sniff the air and then commenced digging in the earth at a furious rate and keeping up an incessant whining. The patient called an attendant and told her that he wished to be put back to bed, as the time was fast approaching for his demise. The nurse remonstrated and tried to laugh the man out of the absurd notion, but it was without avail, and the patient had his wish granted and for several days grew rapidly worse.

"I inquired into the cause, and upon being told tried to make the man see how foolish it was to relinquish all hold he had upon life. But the idea had such a firm hold upon him that I was finally obliged to resort to extreme measures, and threatened to send him into the streets to die if he was not better in three days. As I anticipated, the dread of dying upon a public highway counteracted the effect of the presentiment, and within the allotted time the patient improved wonderfully, and was afterward discharged a cured man—cured, as he afterward told me, of both his ailment and his superstitions."—Chicago News.

Louis the Eighteenth and Talleyrand.

The duties of my position kept me in Paris and made it impossible for me to go and meet Louis XVIII. I saw him for the first time at Compiegne. He was in his study—M. de Duras brought me to it. The king on seeing me held out his hand and said to me in the most amiable—nay, the most affectionate—manner: "I am very glad to see you; both our houses date from the same epoch. My ancestors were more clever than yours; had it been the reverse, you would say to me today, 'Take a chair, come here near me, let us speak of our affairs'; whereas today it is I who say to you, 'Sit down and let us talk.'"

I very soon did my uncle, the archbishop of Rheims, the pleasure of repeating to him the compliments paid by the king to our family. I repeated them the same evening to the emperor of Russia, who was at Compiegne, and who with much kindness asked me if I was satisfied with the king. These were his own words. I have not been weak enough to relate the opening of this interview to any other person.—Talleyrand's Memoirs in Century.

A New Reading System for the Blind.

A new method of teaching the blind to write has been invented by a French lady residing in Angers. For some years Mlle. Mulot has been doing all in her power to alleviate the sufferings of those who have been deprived of eyesight.

Mlle. Mulot has been three years in bringing her new method to perfection. The system is a very simple one. A small album of 5 by 4 inches, having two brass gratings at the corners, contains all the arrangements necessary, and the writing is done by a hard pencil upon soft paper. The letters taught are Roman in character and very angular or square in outline. Of course each letter is separate, which makes it very easy to read.—New York Journal.

Finger Nail Jewelry.

A San Francisco modeler of statuary has a set of shirt and cuff studs made of Chinese finger nails set in gold. He points with pride at his exclusive possessions, which are made of a Chinaman's finger nail which was four inches long when cut. The nail in the studs presents a shiny appearance and is susceptible to changes in the weather. Their owner claims that they were successfully used by him as a weather barometer when he first got them, but their usefulness in this direction had been lost through age.—San Francisco Letter.

Odds Is the Difference.

When a subject of the king of Dahomey is ailing he is bled from the arm. If this doesn't cure him he is laid on his face and two men walk up and down his spine. If this fails, his case is called incurable, and he is left to shift for himself as a very obstinate fellow.—Detroit Free Press.

At the Table; Guests Present.

Mamma—Why, Bessie! Get down from the back of your chair. What are you doing?

Bessie—Mamma, you told me little girls should be seen, not heard.—Demarest's.

STAMP BANKS.

A System of Small Savings That is Becoming Very Popular.

HOW THE METHOD IS CONDUCTED.

A Plan That Appeals Especially to Children, but Men and Women are Also Among the Depositors.

"The 'saving stamps' have let us into an almost new and profitable field of business," says Edwin F. Mack, cashier of the Citizens' Savings bank. "It has increased our business more in eight months than we were able to do by other methods in five years. The beauty of the arrangement is that it reaches a class of people who ordinarily have no business with any bank. When it is considered that we get this new business at the rate of less than one-half a cent on the dollar, and that this expense is more than covered by the actual operation of the system, we are pretty well pleased.

"The cost of the stamps is only one cent for fifty, the cost of the books is very small, and the expense of getting the stamps in the hands of depositors is also very slight. To offset this we have the use of the money from the time it is received for stamps until the stamps are turned into us as record of deposit. The persons buying the stamps let them accumulate for weeks and even months before having the amount entered on their regular bank books. We get interest on this money for that time without charge, and as this amounts to several thousand dollars the profit is quite an item.

"Of course we are not philanthropists, but we take much satisfaction in knowing that the system is inducing a large number of people to save money who never did before. We have agents in many of the large factories, and the young employes after getting their pay buy a few stamps, while otherwise they would spend every dollar of their wages. They would not come down to the bank and open up an account with the small amount. But after they have a little start with the stamp process they very frequently come to the bank with a five dollar or ten dollar deposit. We have some depositors with hundreds to their credit who made fifteen and twenty cent starts. These are the ones that are liable to be the big customers of the future, and we are very glad to have their early trade.

"The corner grocerymen, who are our agents, tell how the system works. For instance, a woman goes in with $1 to buy groceries, and has five, ten or perhaps twenty-five cents left, which she invests in stamps She leaves her book with the grocer and he cares for the stamps. The children, if they have no books of their own, are instructed to invest part of the small change in stamps. Her husband, instead of spending his small change for cigars, lends a helping hand by placing a few stamps in his wife's book.

"With the children the stamps are like the merit cards which you and I used to get at school. Each Sunday we got a little card and when we got a dozen of those we got a large card, and so many of those deserved a still larger and more brightly colored card. The delight of accumulating these cards you can well remember. It is the same with the children and these stamps. They hustle around until they get twenty stamps to fill a page and are much tickeled when they can make the first entry in their bankbook.

"The stamp saving system has proved to be a very good thing for us," said E. C. Bowman, cashier of the Detroit savings bank. "Unlike any other stamp system of savings, our stamps are of different denominations and different classes of customers are accommodated. For instance, we have 5 cent, 10 cent, 25 cent and 50 cent stamps, and $1, $2, $5 and $10 cards. That is to say, when a card is filled it has these respective values. Our customers have learned this, and those who make enough money so that they frequently can deposit 25 cents at a time do not bother with 5 cent stamps, which require so much 'licking' and 'pasting.' We were somewhat surprised ourselves to see the popularity of the larger denominations.

"Of course the working of the system is pretty well understood. We have 125 agents at present, and the stamps are placed in their hands. It requires several thousand stamps a day to supply their demands. The depositors place the stamps on a card, and when this card is full they get a credit on their bank book. We make the feature incidental to our banking business, and think it admirable because it enables us to reach every class of people who may be induced to save money. It has largely increased our business, not only by the depositors who use the device, but the people who come with them. Fully 75 per cent. of the depositors are children, and, of course, their accounts are small, but very frequently their fathers come to the banks where the children are doing business."

While the reporter and Mr. Bowman were in the basement of the banking building looking over the record of the stamp business, the cashier called attention to several wooden cupboards which he said contained all the saving bank books issued by the bank from 1849 to the present date. They were numbered from 1 up to 73,000. Then he showed No. 13, which was issued to a young man who was then employed on a railroad. The man is still a depositor in the bank, and there has never been a time since when he did not have a small balance. He still has the same number, is still in the employ of the same company and ought to have a snug bit of property by this time.—Detroit News.

In the department of Coahuila, Mexico, extensive preparations are being made to introduce the culture of grapes suitable for conversion into raisins. This is the first experiment of the kind made in the country.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, MARCH 10.....1893

An exchange in a rather unfriendly criticism of the new cabinet officers says, "Mr. Cleveland appears to have selected them not because they have any claim to political honors, but for expert knowledge and capacity for administrative work. He will have about him a company of men, intelligent, faithful and honest, but whose fortunes will be of his own creation (Gresham and Carlyle of course excepted), and who may be depended upon to carry out his plans in the smallest detail." The critic, perhaps unconsciously, confers the highest praise upon the President and the men he has chosen for his cabinet. Mr. Cleveland knows well that he was selected and made President by the people, and against the bitter opposition of machine politicians. He knows that no machine politician will use any great office for any other purpose than the advancement of his party, and in the end the party is but himself and is own selfish interests. As a rule no men hate each other with a more devilish hatred than prominent politicians of the same party, and a council of such politicians is sure to be distracted by jealousies, by backbiting, by treacherous efforts to thwart each other, by everything, in short, but hearty co-operation for the good of the whole people. Politicians are no better now than they were two hundred years ago, and all the villainy then practiced in England by Sunderland, Danby, St. John and other great political leaders, needs but opportunity to be equaled in our own time and country. Mr. Cleveland has done much good for the public service' but nothing better than keeping machine politicians out of the great offices of the cabinet.

It would seem that comic blunders are inseparable from Irish affairs, no matter how grave, or even how terrible the occasion may be. An organization whose name is the "Loyal" something or other, threatens armed rebellion if the law making power of England confers home rule upon Ireland. Surely in no other country could be found subjects whose only claim to "loyalty" is based upon open threats of armed rebellion and treason. It is worth remark that all this threatened "loyal" rebellion is confined to a few counties in Ulster, and that every man of the "loyal" traitors is a protestant. All the lawlessness used to be charged against the catholics, who are four-fifths of the population of Ireland; but now they obey the law and their "loyal" opponents are arming to defy it. Should home rule become a law the power of England would enforce obedience to it, and the total and speedy submissisn of these foolish and noisy fanatics would be as comical as their title of "loyal."

In dealing with the railroads the Democratic Assembly has honorably and faithfully kept every pledge made to the people in the Fresno convention The removal of the servile and grossly incompetent Board of Railroad Commissioners; compelling the railroads to obey the law and pay taxes as private citizens must do,—These and other necessary laws touching railroad management were passed by the Assembly. But the Senate is a Republican body. Its leaders are notoriously tools of the railroads, and there every measure passed by the Assembly with intent to make the great corporations do what is just and reasonable has been defeated. No better contrast of the two parties need be wished for.

It looks very much as if the Southern Pacific Company means to strike back in deadly earnest against San Francisco in return for the bitter war made upon that corporation. The Company have built an immense wharf at Santa Monica and are making other great improvements at heavy cost, which proves that it is intended to make that a great shipping point. From Santa Monica to New Orleans is the shortest connection by rail between the Gulf of Mexico and the United States, and an immense traffic already exists over that route Aside from any hostility between the railroad and San Francisco, it saves hundreds of miles and avoids long heavy grades to send freight across the continent to Santa Monica instead of San Francisco. All increase of railroad facilities in Los Angeles county increases the need for rail connection with Owens Valley and hastens the time when we will have it. From San Francisco we have absolutely nothing to hope. Nature has fixed barriers that make closer relations impossible, and the people of that city have never shown the least interest in us.

How to Pronounce "St. Louis."

"Of the many momentous local problems that are shaking St. Louis to its very foundation, and one in fact which agitates to a greater or less degree the entire country," said Colonel Dyer to a representative, "is the correct pronunciation of the name of my prosperous city. I have just arrived from St. Louis, and when I left there the discussion was heated. Shall it be St. Louie or St. Lewis?

"A gentleman once said to me that he could distinguish a western man from an eastern man by his pronunciation of the words St. Louis and Iowa, and I guess he's right. Thank heaven the pronunciation of Arkansas is a matter of judicial and legislative settlement. The house of delegates and council, the legislative bodies of the city, will probably soon be called upon by petition to determine the question, as was the legislature of Arkansas. Then there will be fun, I assure you. Nearly everybody out west and most of the people in the city say 'St. Lewis.'

"Nevertheless St. Louie, as we all know, is the correct pronunciation, though if we give the French pronunciation to Louis, why should we not give it to Saint, which not one man in a thousand, unless he is a French scholar, can twist around his tongue. So it is with the pronunciation of Iowa. The Iowan and western man say 'I-oway,' with a long accent on the 'I,' and make 'way' of 'wa.' The eastern man says 'Iowah,' with the accent on the last syllable."—Washington Star.

Government Control of Railroads.

Abler men than I have proved to satisfaction that under government care not only could cheaper railroad accommodations be obtained, but better ones, and the examples of Germany, Russia and Australia have demonstrated that it is as practicable for railroads to be run by the government as it is to administrate the mailing system or to handle an army and navy. What difference would there be between a navy yard and a car shop? It has been demonstrated by these countries that, though the accommodations are better and cheaper, still a surplus remains, which flows back to the people, and, what is more important, that there is no possibility of railroad strikes, and thus of a sudden interruption of the circulation of commodities.

I have endeavored to place only one side of the question in its proper light—viz., that new times require new forms of government, and that the functions of the government must constantly be changed so as to adapt themselves to the needs of the people, which in their turn are brought about by changing conditions. If this one side of the question be properly understood, all arguments and objections against the nationalization of railroads must fall to the ground. This one side of the question once understood, methods and means to arrange and accomplish the nationalization of railroads will be forthcoming.—Rabbi Solomon Schindler in Arena.

"King's Juries" In Pennsylvania.

"Do you know we are probably one of the most thoroughly back numbered cities in the country?" said Thomas Morrow of Pittsburg at the Lindell yesterday. "Of course we take a great deal of pride in our progress, our enterprise, and all that sort of thing, but still we're behind the age—away behind it. Why, do you know that we have actually got a law that provides for trial by king's juries? Just fancy that, will you? A system of king's juries in a big American city in 1893! Isn't it enough to kill you? Summoning men to serve their king and sit in a jury box as peers! It was a king's jury that tried the Duquesne rioters, and now their attorney has appealed on the ground that king's juries are not to be recognized at this late day. He is also preparing a bill to take before the legislature repealing this old and nonsensical but disagreeable law."—St. Louis Globe-Democrat.

Another Souvenir Coin Proposed.

There is a chance that the country will have some more souvenir coins. When Mrs. Potter Palmer was before the senate subcommittee on appropriations in advocacy of the additional $93,000 desired for the board of lady managers, she suggested that $10,000 of the sum be given in souvenir coins, and the suggestion apparently met with the favor of the committee. It is the intention to have the coins of the value of 25 cents each, making 40,000 quarters. They will bear upon one side the head of Queen Isabella of Spain, on the other a picture of the Women's building at the fair and will be known as the "Isabella coin." The price at which they will be sold has been kept discreetly secret.—Washington Post.

Sleighs and Girls and $98.

Two young men met on Woodward avenue the other afternoon.

"Been sleighing yet?" inquired one.

"No," was the brief reply.

"Why not?"

"Oh, because."

"Because what? Because you can't get a girl, that's why," nagged the first one.

The other looked at him with profound pity.

"Girls nothing!" he said. "Why, my dear boy, if I could raise $1 to put in a sleigh for every dozen girls I could raise for the same purpose, I could go sleighing three times a day from now until the Fourth of July," and with that he passed on.—Detroit Free Press.

In France it seems there has lately sprung up a desire to make horses last longer than they do at present, in spite of the horse eating proclivities of the Parisians.

Three new crematories were built in Germany last year, and in Italy there are 22 now in operation. In France 3,741 bodies were disposed of in 1891 by burning.

It is expected that 16,000 carloads of exhibits will be received at the grounds of the World's fair between now and the 1st of May.

A Paris Telephone Company.

In Paris the idea of entertainments by telephone has been so far developed that a company has been formed to provide a theater telephone service. Instruments are placed in clubs, hotels, cafes and restaurants, and various performances are constantly on tap. By dropping a half franc into a slot the vicarious theater goer obtains communication with his favorite playhouse for five minutes, and if he times his connection properly he can hear the song which has become the hit of the season at a very small charge. A private service of a similar nature is also contemplated, and before long it will be quite natural for a host to give a theater party in his own drawing room.

There is always a peculiar fascination for the general public in listening by means of the telephone to entertainments which are given at a distance. One of the most attractive features of electrical exhibitions is always the telephone section, where a number of telephones provide entertainments "on tap" from theaters and concert halls. This was particularly noticeable at the Paris electrical exhibition held some years ago, and at the Lenox lyceum in New York. The telephone section was crowded all the evening with delighted listeners.—Electricity.

The Struggle for Bread in Vienna.

The distribution of bread to the poor of Vienna took place Tuesday between 11 o'clock and noon, in order to make sure that only the unemployed received alms. Though 6,200 large loaves, which had cost 1,200 florins, or £100, were given out, several hundred starving people had to go away empty handed. The scenes witnessed were perhaps the worst that have occurred as yet. It was pitiable in the extreme to see wretchedly clad women, with babies in arms, and children, fighting as for their lives for a loaf of bread, into which, hot as it was from the bakery, they cut like hungry wolves.

Similar scenes were witnessed at the distribution of bread to men. About twenty people fainted in the crush, and those who saw the bitter disappointment of the many who, after waiting for hours, finally received nothing, will never forget the spectacle of human misery and want. Four thousand two hundred loaves were given away yesterday, when the crush was so enormous that a number of poor women, with babies in their arms, and several old men fainted away and required medical attendance.—Vienna Cor. London Standard.

A Big Ferry on Lake Michigan.

A marine experiment of great importance to Milwaukee is announced. The Toledo, Ann Arbor and Northern Michigan railroad is about to build a large ferry steamer to test the feasibility of carrying trains of cars across Lake Michigan from Kewaunee to Frankfort. The new steamer will cost a quarter of a million of dollars, and will be large enough to carry forty freight cars, and she is to be fast enough to make the runs across the lake between the points named in about five hours. The distance is sixty miles.

The ferrying of cars in this manner will result in a great saving, as it costs from six to twelve dollars a car to make the transfer of freight from the cars to the steamers, and besides, the loss through breakage incident to such transfers will be prevented. It is thought the experiment will prove successful, as freight trains have been thus transferred for years between Cape Charles City and Newport News, a distance of forty miles, across the mouth of Chesapeake bay, where the water is sometimes very turbulent.—Milwaukee Wisconsin.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the South-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the Northwest quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and alls bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

Sunday Schools, Fort and Lone Pine 10 a. m.; Independence, 2 p. m.

COURT NOTES.

Geo. M. Gill, Superior Judge.

Estate of John A. Hannah, deceased—Order for Executor to lease real estate.

Estate of Barna Peeler, deceased—Confirmation of sale of personal property.

Estate of John Mullane, deceased—Settlement of final account. Richard Hession, executor, filed petition for discharge.

Mrs. Henry Levy returned home last Monday from San Francisco; she has been gone several months.

J. J. Gunn is doing well at Minnietta and is reported to have ore enough in sight to warrant a trip to the big fair at Chicago.

Hon. A. J. Gould is reported to be in poor health and not able to do anything. His friends have urged him to come from Darwin to Independence for a while but he refuses.

Alexander Clark had a letter from England a few days ago, informing him of the death of an aunt at the age of 97 years and 3 months. This very aged lady could read and write without the use of glasses up to the day of her death.

Jake Miller is now an "honest farmer." He was the "genial landlord" of the Palace Saloon at Independence up till last Tuesday, but on that he gave up possession, went out of the business and left town for his farm near Big Pine.

After an absence of several years at Darwin Mat. McDonald took possession of the Palace Saloon last Tuesday. Mat is an old timer at Independence and his old friends and many new ones are pleased to see him in business here again; he has a cordial welcome for all at the Palace.

The question is raised, can the County Treasurer serve as Deputy Assessor? The statutes of 1889, page 240, provide that the offices of Treasurer and Tax Collector may be held by the same person, but the specific mention of these two offices might exclude all others.

C. Anthony of Darwin in town last Tuesday. He reports mining business quiet at the old camp. Superintendent Reddy has about a dozen men at work at the Defiance; only three or four men are at work at the Lucky Jim, and this is about all that is doing at present at the camp.

Bertrand Rhine will leave town to-morrow for San Francisco. He goes to take part in the entertainments to celebrate the engagement of his sister, Miss Sofia Rhine, who is engaged to be married to Mr. Moses Frank, a merchant at Calistoga. While in the City Mr. Rhine will buy a large stock of all kinds of spring goods.

Last Sunday afternoon snow began falling and continued through the night and on till Monday afternoon. The fall was very light and the snow melted nearly as fast as it fell. At one o'clock Monday afternoon the thermometer stood at 59 in the shade, and with that temperature the snow melted very rapidly and soon not a trace of it remained on the ground.

Not long since a stranger passing up the valley was invited by a farmer a few miles from Independence to stop and eat dinner. After the guest had gone the farmer's wife learned something more about him, and in a tone of deep regret said: "If I had only known he was Pat. Reddy's cousin I would have put his tea in the china cup." She has but one cup of that kind.

Hale Brothers and Co., of Sacramento, are well known to the people of Inyo county. For several years past orders for goods have been sent to the firm from all over the county, and so far as known no customer has yet made a single complaint about an order. The firm desire to retain the business already secured and to gain new customers. Attention is invited to their new advertisement.

Jonathan W. McMurry Dead.

A letter from J. J. Moore states that his father-in-law, Jonathan W. McMurry, was stricken with apoplexy on the last day of February. He was paralyzed in the right side, and from the moment he was stricken never spoke again. He was a native of Tennessee, aged about 63 years. He was one of the early settlers of Owens Valley, and owned the fine property at Big Pine, which was bought by the Crocker Brothers about five years ago. Soon after selling his property he went to Reno, Nevada, where he stayed but a short time; from there he went with his family to Fairhaven, Washington, where he died.

Eight Years Weather.

KEELER, CAL., March 4, 1893.

The Chief of the Weather Bureau directs the publication of the following data, compiled from the record of observations taken at this station during a period of eight years, for the month of March.

TEMPERATURE.

Mean or normal temperature, 59.3°.
The warmest April was that of 1888 with an average of 63.4°.
The coldest April was that of 1886, with an average of 55.6°.
The highest temperature during any April was 86° on April 13, 1888.
The lowest temperature during any April was 32° on April 11, 1887.
Average date on which last "killing" frost occurred (in spring), April 12.

PRECIPITATION.

Average for the month 0.10 inches.
Average number of days with .01 of an inch or more, 2.
The greatest monthly precipitation was 0.82 inches in 1885.
The least precipitation was 0.00 inches in 1892.
The greatest precipitation recorded in any 24 consecutive hours was 0.49 inches on April 27-28, 1885.

CLOUDS AND WEATHER.

Average number of clear days, 18.
Average number of partly cloudy days, 12.
Average number of cloudy days, 2.

WIND.

The prevailing winds have been from the S. W.
The highest velocity of wind during any April was 44 miles N W on the 17, 1887.

H. E. WILKINSON, Observer.
Weather Bureau.

Meteorological Summary.

Following is the report of the Weather Bureau Station at Keeler for the month of February, 1893.

Mean barometer.....30.079
Highest barometer 30.369
Lowest barometer.....29.714
Mean temperature 44.3
Highest temperature, 24th..... 64.
Lowest temperature, 15th.....26.
Greatest daily range temp'ture, 25, 24 h.
Least daily range temprature, 12, 14th.
Prevailing direction of wind, N. W.
Total movement of wind, 5565 miles.
Extreme velocity of wind, direction and date, 60 miles S. W. on 8th.
Total precipitation, 0.73 inches.
Number of days on which .01 inch or more of precipitation fell, 4.
Number of clear days..... 11
Partly cloudy days..... 5
Cloudy days 12

H. E. WILKINSON, Observer,
Weather Bureau.

Not Even a New Name.

An item is going the rounds that a new cattle disease has appeared from which many cattle are dying; this disease is called "charbon." There is nothing new about it, not even want of knowledge of the fact that in many diseases, and other things also, different words mean the same things. Charbon, anthrax, blackleg, all are but different names for the same disease. Not only cattle, but horses, pigs, sheep, cats and dogs have died from this disease in great numbers. Even human lives have been lost by it. It is a highly dangerous disease, and in every case where an animal dies from it the body should be burned. Pastures have been poisoned and the disease spread by burying in the ground dead bodies of animals that had died from it.

Some Snow.

L. Gray came down from Kearsage canyon Wednesday, he says there is as much snow on the mountains now as the total aggregate fall of the past five years. Mr. Gray has lived in the mountains nineteen years and in all that time never saw in any one season so much snow as at present. He is confident that up in Onion Valley the snow is now fifty feet deep on the level It is worth remark that the winter was one of the mildest since the whites settled in Owens Valley; at Independence there was not a day but violets, myrtle or jasmine flowers could gathered in the gardens.

Sale of Borax Claims.

A. L. Tubbs, Assignee for the Harmony Borax Co. and others, has sold to F. M. Smith patented borax claims in Death Valley, this county. The consideration is $550,000; of this amount $150,000 was cash down, a mortgage has been recorded for the balance. The claims were patented several years ago by William T. Coleman & Co. of San Francisco.

Proposals for Care of Indigent Sick of Inyo County.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California at the office of the County Clerk until, and not later than 10 o clock, a. m., on Thursday, April 6, 1893, to contract for the care of the indigent sick of Inyo County for the term of one year beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amounts for which parties contracting will maintain all indigent sick properly admitted to contractor's care, on the basis of an average of four patients per day throughout the year; to include all medicine, nursing, board, lodging and washing, and the burial and funeral expenses of any indigent sick person who may die while under such maintenance and care. Said bids must designate the price per person at which all excess of patients over the average of four each day throughout the year will be cared for, such excess to be paid for by extra allowance on presentation of bills, duly verified at the regular meeting of said Board immediately after said contract has expired—the average of four per day to be paid for at the regular meetings of the Board, on bills duly verified, by warrants drawn upon the Hospital Fund of said county.

The person or persons to whom said contract shall be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of said contract.

The maintenance care and management of such indigent sick by such contractor shall be at all times subject to the inspection of said Board of Supervisors, or any member thereof, or any person appointed by the Board for such purpose.

Bids must be indorsed, "Proposals for Care of Indigent Sick," and the same will be opened between the hours of 10 o'clock a. m. and 2 o'clock p. m. on said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

Proposals for Services of County Physician.

Notice is hereby given by the Board of Supervisors of the County of Inyo, State of California, that sealed proposals will be received by said Board, at the office of the County Clerk until 10 a. m., and not later, on Thursday, April 6, 1893, for the services of a Physician qualified under the provisions of "An Act for the Regulation of the Practice of Medicine and Surgery in the State of California," attending the indigent sick in charge of the contractor for the care of such persons for the term of one year, beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amount per annum for which said Physician will give due and regular medical and surgical attendance upon said sick, and also all such services as may be required for prisoners in charge of the Sheriff.

The person to whom said contract may be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of such duties. Said services to be paid for by warrants drawn upon the Hospital Fund, upon presentation of bills, duly verified, at the regular meetings of said Board.

Bids to be indorsed "Proposals for Service of County Physician," and the same will be opened between the hours of 10 o'clock a. m., and 2 o'clock p. m., of said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

Proposals for Advertising Delinquent Tax List.

Notice is hereby given that pursuant to an order of the Board of Supervisors of Inyo County, State of California, made January 10, 1893, sealed proposals will be received for publishing the List of Delinquent Taxes of said County and State for the fiscal year 1892-93. The first publication thereof to be made on or within five days before or after the first Monday in June, from copy to be furnished by the Tax Collector. Bidders must state the rate per square of two hundred and forty ems nonpareil for the first and each subsequent insertion, for the time designated by, and including such postponements as may be ordered by said Tax Collector.

All bids must be endorsed "Proposals for Publishing Delinquent Tax List," and addressed to the Clerk of the Board of Supervisors, and will be received up to and not later than the hour of 10 o'clock a. m. of said day, and opened by said Board on Thursday, April 6, 1893, between the hours of 10 a. m. and 2 p. m. of said day, the right to reject any bid being reserved.

Royal Baking Powder

Strongest, Purest, Most Economical.

As to whether any of the baking powders are equal to the "Royal," the official tests clearly determine. When samples of various baking powders were purchased from the grocers, and analyzed by the United States Government Chemists and the Chemists of State and City Boards of Health, the reports revealed the fact that the "Royal" contained from 28 per cent. to 60 per cent. more leavening strength than the others, and also that it was more perfectly combined, absolutely pure, and altogether wholesome.

As most of these powders are sold to consumers at the same price as the "Royal," by the use of the Royal Baking Powder there is an average saving of over one third, besides the advantage of assured purity and wholesomeness of food, and of bread, biscuit and cake made perfectly light, sweet, and palatable.

The official reports also reveal the presence, in other powders, of alum, lime or sulphuric acid, by which their use is made a matter of grave danger to the consumer.

Whenever a baking powder is sold at a lower price than the "Royal," or with a gift, it is a certain indication that it is made from alum, and is to be avoided under all circumstances.

Unsafe.

Some people seem to have a special faculty for bumping their heads, stubbing their toes and falling over things. With the Vernons this might fairly have been called a family trait. The father, the daughter and the two boys literally went stumbling through the world. Mrs. Vernon herself being the only one whose feet did not appear to be all the time standing in slippery places.

Once there was a singular crisis of accident in the family, a veritable epidemic as it were.

Mr. Vernon gave himself a black eye on the corner of the basement door, coming up from a visit to the furnace; Hattie, in opening the stubborn sliding doors of the library, was thrown against the wall in their sudden liberation under her efforts and hurt her forehead; John rushed against his bedroom door in the darkness on his way for his slippers, and was upset with bruises, and Frank tripped over the attic threshold and fell down the attic stairs.

Mrs. Vernon administered arnica and sympathy for two days; then she quietly made a trip to the upholsterer's, and one evening that same week, when her family arrived from office and school, they found portieres instead of doors all through the house.

"They are very pretty, mamma," said her husband, "but why such a sudden innovation?"

"I've long wanted them myself," answered Mrs. Vernon, "but I felt at last that they had become a necessity. Dear, literal old Mrs. Hotchkins was in to see me the day after you all got hurt, and I was giving her an account of your woes, and she said: 'Well, now, I must say, Mis' Vernon, that with a family like yours, doors are dretful dangerous things to have in the house!'"

"And so," laughed her husband, "the portieres are put in to protect us from the dangerous doors!"—Youth's Companion.

Children of the Future.

It is a dreadful point about microbes that the only way to avoid having them in a virulent form is to have them in an artificial or attenuated form. The children of the future will not run through the present gamut of infantile disease, but they will probably be subjected to inoculation with various microbes every few months. First, they will be vaccinated for smallpox; when they have recovered from that they will be taken to a Pasteur institute to have a mild form of rabies. Next they will be given a dose of the comma bacilli to prevent cholera, and so on through all the evergrowing series of disease microbes. Oh! luckless child of the future! you will never be ill and never be well; your health will be awfully monotonous; you will never know the weariness of the first night of measles, when it was so nice to lie in mother's lap and feel her cool hand on your forehead; you will never know the joys of convalescence, when oranges were numerous and every one was kind to you because you were not well; and your end will be to die of debility. How glad we are that we live in the present, with all its ups and downs of health to lend variety to life and death.—Hospital.

Once, says a writer, I suddenly opened the door of my mother's room and saw her on her knees beside her chair and heard her speak my name in prayer. I quickly and quietly withdrew with a feeling of awe and reverence in my heart. Soon I went away from home to school, then to college, then into life's sterner duties. But I never forgot that one glimpse of my mother at prayer, nor the one word—my own name—which I heard her utter. Well did I know that what I had seen that day was but a glimpse of what was going on every day in that sacred closet of prayer, and the consciousness strengthened me a thousand times in duty, in danger and in struggle. When death came at last and sealed those lips the sorest sense of loss I felt was the knowledge that no more would my mother be praying for me.

PURE FOOD IN CONGRESS.

The act of Congress authorizing the examination of the baking powders has resulted in the most unprecedented compliment to the Royal Baking Powder. The tests were made in the Government Laboratory at Washington, and the official report shows that the Royal is superior to all others in leavening strenth—being over thirty per cent. above the average. The report also shows the purity of the Royal Powder and the wholesomeness of its ingredients.

This is probably the highest compliment of an official character ever paid to a proprietary article, though no more than the great army of baking powder consumers would expect in behalf of their old friend and favorite.

The result of the official examination, as thus determined, will, of course, make the "Royal" the standard for Government purchases.

ON THE ITALIAN COAST.

Pale evening paused on a purple peak
To greet the sun ere he sank to rest;
Her brows he kissed, and her pallid cheek,
And left a blush on her dusky breast.

Then viewless lassos she softly threw
Around the necks of all living things,
Bringing them home in the twilight blue,
Amid patter of feet and flutter of wings—

Into the blue and out of the gold;
Sea birds home to their airy nests,
Lowing herds to the humble fold,
And children home to their mothers' breasts.

Tonight I pa sed on a purple peak,
When daylight died on the darkling main,
And something moistened my weary cheek
As thoughts long dead came to life again.

But there were no lassos my birds to draw,
My birds, my herds and my children home.
The night alone and her stars I saw,
And shadowy Ætna's awful dome.

O restless soul! Can nothing restore
The pride and promise of former years?
Or art thou a surge on yon iron shore
Which breaks and forever disappears?
—William E. S. Fales in New York World.

Admirals Rivals in Rhyme.

A London friend sends me quite a pretty story anent the daughter of Sir Edwin Arnold. She is her father's secretary and his companion in most of the journeys round the world. During her recent stay in Japan her majesty's China squadron ships and the American Pacific fleet were in the harbor of Yokohama at the same time. Sir Edwin and his daughter entertained the admirals of both fleets at luncheon, and in return were naturally invited on board the ships. The American fleet was first visited, and upon leaving the gallant American admiral presented Miss Arnold with a beautiful bouquet, tied with ribbons of the ship, as a token of the respect of himself and his officers.

This American courtesy came to the ears of the English commander, and not to be outdone by his American brother he presented Miss Arnold with a larger bouquet and doubled the number of ribbons. Then the American admiral sent Miss Arnold a few verses of his own composition. This was going a little further than the English officer was capable of, but he had some verses written to Miss Arnold and dispatched them to her three days afterward. The daughter then told her father, and she immediately found a third contestant. That same afternoon brought her another beautiful bouquet and attached was a card bearing the following lines:

TO MY DAUGHTER.

Oh, happy maid, whom two great flags conspire
To honor—blending rich melodious posies,
When admirals rhyme, the muse unstrings her lyre
To bind in pride their mayflowers and their roses.
EDWIN ARNOLD.

—Philadelphia Times.

Mrs. Gladstone.

She is one of the most charming looking women you ever saw—a sweet, kind face framed in full, soft, lovely hair and topped by a cap of velvet and lace. A gown that falls in artistic folds and doesn't rustle, and a way of looking at you as if she were interested in everything you said—that's Mrs. Gladstone. She does not care for society as it is meant by the round of balls and receptions and the giving and going to them, but she is delighted when she is at the head of her own dinner table and has about her a circle of friends who know and love her and Mr. Gladstone. Unlike the wife of any other prime minister, she never went in for having a salon, for surrounding herself with rich and powerful friends who would simply care to be received at the house of a prime minister, and yet have no real interest in the cause which he so thoroughly and entirely championed.

Instead, she has given her time to caring for him, to seeing that he was under any and all circumstances as comfortable as possible, and that in this way his health was preserved for the nation for whom he did so much good. Her happiest moments are when she is with her husband at Hawarden, but on every important occasion she has always been by his side. Just remember that this means going over the country in railway trains, being for hours on open air platforms, and then you will understand why the people of England worship Mrs. Gladstone as a heroine.—Cor. Ladies' Home Journal.

There are two prominent occupations in which there seems to be no distinction of sex in regard to honor or compensation. On the stage and in the field of literature men and women meet as equals.

Lucca, the singer, will hereafter devote herself exclusively to teaching, and she will receive only eight pupils, and such as show that they have a good future before them.

No less than 17,000 young girls and women, homeless, friendless, helpless and foodless, sleep in the open-all-night shelters of Stepney Green, London, in a year.

A Corner in Shawnee.

TRUE STORY OF A WALL STREET HERO
BY HENRY CLEWS.

Annie looked appealingly at the brown, somber face before her, and the tears began to flow.

"You've come to tell me bad news, Annie," Daniel said, and Annie nodded, for her quivering lips refused to speak.

"You've be'n a long time comin' to it," was Daniel's comment, and at that the heart sick, conscience stricken girl sank down in the dust and sobbed aloud. The young man stood over her a moment, his features working as if he suffered from a poisoned arrow, and then he stooped and raised her to her feet, saying: "Better not set there and cry. Ef you've come to the pint of droppin' me, it's 'cause you've found suthin' better, 'n' I had oughter be the one to do the cryin'. Ain't that so, Annie?"

"No, no," she exclaimed, retreating a step, "you are so good and I am so bad; you have no cause to weep, unless because you believed in me and I have treated you so cruelly."

Across Daniel Hardy's slowly moving thoughts there shot a terrible suspicion.

"Bad, Annie?" he whispered, "bad. Has that infernal New Yorker"——

"Oh, hush! hush!" she interrupted; "let me tell you. You think I should have told you before. Yes, I should, but not as long as a year ago. I was honest with you then, I thought I loved you, and it was not until the day before I came here that I realized my mistake. Do not forgive me, Daniel, my friend, but listen. I know you will, for you have always been so good. I felt the change coming over me months ago, and I resisted it, and even at the last moment I turned my face away from what I knew to be real love because I could not be so wicked as to make you unhappy without trying to love you. I thought that if I came home and saw you it would leave me and the old love come back. Do you understand?"

"No," said Daniel, "I don't. No citified girl with fine clothes and a soft voice could 'a' turned my heart."

"I know," she cried, "I am too wicked to be loved by anybody; but Daniel, I refused to listen to Mr. Wellman at the school, and told him he must not come here to see me. Yet I—I—Daniel, I love him, he's a good man, but when he asks me again, I shall refuse him. I shall not marry him even though I cannot love you as I ought to. You believe me, don't you, Daniel?"

Daniel picked up the ox goad that he had let fall and replied:

"I'm glad you didn't listen to him at school, Annie. I don't b'lieve 'twould ha' be'n in me to forgive you for takin' him afore you let me drop."

"But, Daniel," she persisted, "I shall not marry him. You believe that?"

The yonng man busied himself a moment in getting his oxen in readiness for a start before he faced her and said:

"I hain't had no eddication, Annie, in book larnin' an' I hain't traveled fur from Posket; but I expect you an' him will git married, an' I advise you to take him fust as last. So fur's you're consarned there'll be no more trouble from me. You'd better git on the cart an' let me drive you home. It'll be's quick's you kin walk, an' nuff sight easier."

This Annie refused to do, and without as much as a good-by, she started rapidly up the road. Daniel drew one long breath as she disappeared around a turn in the road and then started his clumsy oxen in the same direction.

CHAPTER III.

MR. WELLMAN'S PERIL.

Each hand held a fragment of the limb.

For once Daniel Hardy's small stock of wisdom served him well for the purposes of prophecy. Theodore Wellman roamed about the Posket forests for it may be two weeks, and then the definite announcement was made that he and Annie Stockwell were to be married. One day Daniel was busy extricating logs from the snarls and jams in the mill stream a half mile above the mill, when he came upon Wellman, his rod and bucket thrown aside, reclining idly in the shade and watching the picturesque scene.

For a moment Daniel stood back of his rival, struggling with a tremendous impulse to throw him over the cliff.

Was it caution that restrained the brute within him? Did the human element in his nature shrink from murder unfairly done? Did it seem cowardly to take an enemy unawares?

A log that Daniel had released from a jam above the cascade swung into an eddy as if fearful to make the plunge, and caught one end against the bank near the rivals. Daniel pushed it off with his foot, and the next second it went dashing down to the pool below. Its course attracted the attention of the idle fisherman, and he turned lazily about to see what moved it from the bank. As he saw Hardy he raised his eyebrows slightly, but betrayed no especial interest in the meeting.

"Ah, Mr. Hardy, I believe," he said. "I suppose then it is to you that I am indebted for the magnificent spectacle I have been enjoying since those logs began to go over the falls. Look at that one now! how it sticks there, right on the edge—ah! over it goes! Remarkably interesting."

Daniel looked his languid rival in the eye for a moment without speaking, and then turned aside to continue on his way to the mill.

"Wait a minute, Mr. Hardy," called Wellman; "I want to speak to you."

Daniel paused.

"Ef you hed anythin' important to say to me," he said, "you wouldn't ha' waited tell I ran across you in the woods."

"Pardon me," interrupted Mr. Wellman; "you are apparently right, but it has been due solely to a desire on my part to avoid any seeming intrusion on your affairs that I have refrained from calling on you."

"You an' I don't speak edzackly the same language, Mr. Wellman," returned Daniel, "but ef you mean that you didn't keer to put your foot into my business, I kin understand thet."

Mr. Wellman smiled and sat up.

"That's one way of putting it, Mr. Hardy," he said, "but now that we meet here where none of your good country people can take notice of us and spread exaggerated reports about us, it seems to me worth while that we should try to come to an understanding, for I believe you think I owe you an explanation."

"You owe me a darned sight more'n thet, Mr. Wellman," replied Daniel.

Mr. Wellman at once became very serious.

"I am sorry you think so," he began, "for, you know, I cannot see it. You must know that a woman's affections are not to be forced; you cannot hope to turn them into the channel you desire, and if she freely gives her heart to another, you cannot reasonably complain. It's hard, I admit; I think I know how you feel, for not so very long ago Miss Stockwell rejected me."

"Don't you think," interrupted Daniel, "that her name might's well be left out of this argyment."

"As you please, Mr. Hardy, but you see if it was not for her we should not be talking in this way."

"No, sir!" exclaimed Daniel, "not by a thundering sight! 'Taint her as hes brought you an' me to argyfyin', but you, Mr. Wellman."

Mr. Wellman bit his lips and half regretted that he had attempted to reason with this boorish rustic.

"Well," he said, "suppose I am; let that pass. What I wanted to show you was, and in saying it I take you for a reasonable, fair minded man, that the lady in question is naturally fitted for a different kind of life than that she would lead if she settled down in Posket. You know that she has become a brilliant, educated lady, and it is perfectly natural that a man in the class to which she has raised herself should be more attractive to her than—ah—well, frankly, than an honest but uneducated man. I don't want to be offensive, but you must see what I mean."

There was a momentary confusion in Daniel's mind as he felt, rather than thought, that a girl who was born in Posket should find Posket good enough to live in, as had her own mother; and that a Posket boy whom she had encouraged to love her should be good enough to live with, but out of the bitter turmoil of his thoughts this came:

"You're a settin' yourself up, Mr. Wellman, to be a better man than I be. Well, I'm not disputin' but what you may be; but s'pos'n you was to stand up, an' you an' me was to git a good, square grip on each other's collar, an' s'pos'n we was to wrastle a bit, which of us do you s'pose would pitch the other over the falls?"

Even Mr. Wellman, man of the world and somewhat impressed with his own knowledge of human nature, was nonplused by this proposition. He sat still for some time looking at the waters swirling past him. At last he stretched himself out lazily again and said, in the languid tones he had first employed:

"Oh, well, if you can not look at this uncomfortable matter as a reasonable man should, you ought to take a business view of it. The young lady's affections were in the market. You made your bid, but I just happened to get a corner on them, and you ought to be content to stand your losses."

Then he resumed his inspection of the noisy cascade, smiling a little at his own cleverness in bringing a painful conversation to so brilliant and conclusive a close. The tumbling water made a deal of fuss in going over the cliff; it foamed and boiled, and shouted to the trees to see it pound the rocks in the pool below to impalpable powder; but above its petty roaring Mr. Wellman, stretched at full length at the very edge of the descent, heard a sound that turned his bronzed face to a deathly pallor, and made him spring to his feet and turn about.

No. Daniel Hardy had not started forward to hurl him over the waterfall. He had reached for the branch of a tree just above his head, and had wrenched it from the trunk. Holding it out at arms length he twisted the green fiber until the bark wrinkled and peeled, and each hand held a fragment of the limb. Both these he threw down at his rival's feet.

"Damn, you, Mr. Wellman," he hissed. Then he strode away into the forest.

Mr. Wellman looked after him in profound amazement. He glanced down at the broken limb, which seemed to quiver in each part from Daniel's touch, and up at the tree from which it had been torn, and down at the black, rock flooded pool below the falls. His face had not lost its pallor, and as he picked up his fishing rod his hand trembled violently, and his step was unsteady, as he slowly took up his march to the village tavern.

Annie Stockwell was married in the October succeeding her engagement to Mr. Wellman. It is still related in Posket how Daniel Hardy went to the wedding and joined the festivities that followed. His behavior, it seems, was dignified, and his somber face never hinted at the determined purpose which had become the mainspring of his actions. Mr. Wellman took his wife upon a long European tour, and eventually they merged their lives in the social wilderness of New York.

(TO BE CONTINUED.)

A Noble Work.

Mrs. James S. Gibbons has turned her beneficence in the channel of charity and her large contributions to the Women's Prison association have done much to make its standing solid and sure. Mrs. Gibbons was one of the first founders of the home, and it has been mainly through her untiring efforts that a law has been passed demanding that women prisoners should be searched and looked after by women. Mrs. Gibbons visits all the prisons and talks with the women. When they leave the prison she gives them a refuge in the home until they get started, and oftentimes she finds them situations.

"Mine is a particular calling, that of helping the female prisoners," she said. "Such a woman is the most unhappy of all human beings. Once a criminal always one, and the world has not a tear for her. Our prison association hunts all these women up and leads them to a higher and nobler purpose in life."—New York Recorder.

THE HERCULES.

In placing the Hercules Gas or Gasoline Engine in the field in competition with other gas engines, we do so with the utmost confidence that we are "in it." Our system of operating this engine is so far ahead of all others that it needs but an introduction in any community to insure an immense sale. A woman can handle it. It requires no engineer. It can be started in an instant. No electric spark to get out of order. It oils itself. It beats all others. Write Palmer & Rey, 405-407 Sansome St., San Francisco for particulars. The price and capability will surprise you.

For Simplicity it Beats the World. It has Fewer Parts, and is therefore less likely to get out of order than any other Gas Engine now built.

Daily Newspaper and Job Office.

We have used your four horse-power "Hercules" Gas Engine for nearly two months now, and have not yet failed to get our edition off on time; on the contrary, we find it the best investment we could have made. For convenience it cannot be beat. Unlike the steam engine it is clean, no coal to shovel into a furnace, no fires to get up, no water to watch to keep the boiler from going through the roof—indeed it is simple and economical in all respects, and we feel that in changing from steam to gas we have secured a donation of $100 per year to the office, independent of all other considerations, and that means that $100 is the difference in the cost of fuel per year between steam-power and gas power. Thanking you for past favors, including the great service done by you in putting an engine like the "Hercules" on the market, we are,

Yours truly, PENNYCOOK & HARRIER,
VALLEJO CAL., Jan. 14, 1892,
Proprs. *Chronicle.*

Running Printing Machinery.

The engine is a daisy! It is up and in splendid running order, and *operates our presses in excellent shape.* We are more than pleased with it, and feel confident that we will be able to introduce the "Hercules" in this county in a manner largely to your interest. REED & HUTCHINSON.

ANGELS, CAL., Feb. 24, 1892.

In the terse and telling phraseology of the slum barrooms a long drink of any kind is now "a neckwash."

One woman has gone insane because of her hired girl. Perhaps that is the easiest way.

"Life is full of paradoxes." "Yes." "Yes. It is the fast liver who has the sluggish liver."

A bride visited half a dozen game-dealers yesterday hunting for "Welsh rabbits."

THE FIRST LAW OF NATURE.

This self-preservation is acknowledged to be, and people who adopt against the encroaches of disease a genuine medicinal safeguard, accredited by experience and the sanction of physicians, afford a happy illustration of the wisdom of the saying, in the health they restore and continue to enjoy. Among maladies, against the growth of which Hostetter's Stomach Bitters affords efficient protection, diseases of the kidneys and bladder are fraught with the utmost peril and exhibit great obstinacy when opposed by ordinary means. The Bitters can and will subdue them. No testimony is stroner than this. Used at the outset and persistently, the best results may be expected. This medicine also eradicates liver complaint, constipation, dyspepsia, malaria, rheumatism and nervousness.

Employer—So you want a fortnight's salary in advance. But suppose you should die tomorrow? Clerk (proudly)—Sir, I may be poor, but I am a gentleman.

IMITATORS AND IMPOSTORS.

The unequalled success of ALLCOCK'S POROUS PLASTERS as an external remedy has induced unscrupulous parties to offer imitations, which they endeavor to sell on the reputation of ALLCOCK'S. It is an absurdity to speak of them in the same category as the genuine porous plaster. Their pretentions are unfounded, their vaunted merit unsupported by facts, their alleged superiority to or quality with ALLCOCK'S a false pretense.

The ablest medical practitioners and chemists and thousands of grateful patients unite in declaring ALLCOCK'S POROUS PLASTERS the best external remedy ever produced.

Beware of imitations, and do not be deceived by misrepresention. Ask for ALLCOCK'S, and let no solicitation or explanation induce you to accept a substitute.

The Anglomaniac refers to patent leather as his "varnished boots."

The proprietors of Ely's Cream Balm do not claim it to be a cure-all, but a sure remedy for Catarrh and Cold in the head.

I have been afflicted with catarrh for 20 years. It became chronic and extended to my throat, causing hoarseness and great difficulty in speaking, indeed for years I was not able to speak more than thirty minutes, and often this with great difficulty. I also, to a great extent, lost the sense of hearing. By the use of Ely's Cream Balm all dropping of mucous has ceased and my voice and hearing has greatly improved.—Jas. W. Davidson, Attorney at Law, Monmouth, Ill.

Apply Balm into each nostril. It is Quickly Absorbed. *Gives Relief at Once.* Price 50 cents at Druggists or by mail.

ELY BROTHERS, 56 Warren St., New York.

He began, "Is it cold enough for——and then froze up.

Irritation of the Throat and Hoarseness immediately relieved by "*Brown's Bronchial Troches.*"

When the American in France found a hole in his sock he exclaimed, "Gaul darn it!"

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

For gentlemen's fine kangaroo shoes Watson's Peerless Polish has no equal. Will preserve and make them wear longer. Ask your shoe dealer for it.

Use Enameline Stove Polish: no dust, no smell.

Try Germea for Breakfast

MOTHERS, and especially nursing mothers, need the strengthening support and help that comes with Dr. Pierce's Favorite Prescription. It lessens the pains and burdens of child-bearing, insures healthy, vigorous offspring, and promotes an abundant secretion of nourishment on the part of the mother. It is an invigorating tonic made especially for women, perfectly harmless in any condition of the female system, as it regulates and promotes all the natural functions and never conflicts with them.

The "Prescription" builds up, strengthens, and cures. In all the chronic weaknesses and disorders that afflict women, it is *guaranteed* to benefit or cure, or the money is refunded.

For every case of Catarrh which they cannot cure, the proprietors of Dr. Sage's Catarrh Remedy agree to pay $500 in cash. You're cured by its mild, soothing, cleansing, and healing properties, or you're paid.

Nearly 40 years of practice.
Consultation in English, German and French

The Sower
Has no second chance. The first supplies his needs—if he takes the wise precaution of planting
Ferry's Seeds
Ferry's Seed Annual, for 1893, contains all the latest and best information about Gardens and Gardening. It is a recognized authority. Every planter should have it. Sent free on request.
D. M. FERRY & CO., Detroit, Mich.

PATENTS
Best legal advice. Best patents obtained. Offices:
Dewey & Co.,
220 Market St., S. F., and Washington, D.C., London, etc.

FRAZER AXLE GREASE
Best in the World! Get the Genuine! Sold Everywhere!

Old Gold and Silver Bought; send your old Gold and Silver by mail to the old and reliable house of A. Coleman, 41 Third Street, San Francisco; I will send by return mail the cash, according to assay; if the amount is not satisfactory will return gold.

No Trees of 1st quality can ever be sent by mail. Mayhap you know it. By freight, prepaid if preferred, we ship safely 4, 5, or 6 ft. trees; 2-yr. Roses of rare excellence—everything! You actually pay less than for the puny stuff. 1,000 acres Nurseries. 20,000 acres Orchards. Exact information about trees and fruits. Stark Bros., Louisiana, Mo.

OPIUM Morphine Habit Cured in 10 to 20 days. No pay till cured. DR. J. STEPHENS, Lebanon, Ohio.

MANN'S BONE CUTTER

Will cut Dry or Green Bones, Meat, Gristle and all. Green Cut BONES will double the number of eggs—will make them more fertile—will carry the hens safely through the molting period and put them in condition to lay when eggs command the highest price and will develope your chicks faster than any other food.

Feed Green Bones and use Creosozone to kill the lice, and you will make *fifty per cent* more profit.

Send for Catalogue and prices.

PETALUMA INCUBATOR COMP'Y, PETALUMA, CAL.

YOUNG MEN!
The Specific A No. 1.
Cures, without fail, all cases of Gonorrhœa and Gleet, no matter of how long standing. Prevents stricture, it being an internal remedy. Cures when everything else has failed. Sold by all Druggists.
Manufacturers: The A. Schwabe Medicine Co., San Jose, Cal.
Price, $1.00

BIG G
Cures in 1 to 5 DAYS. Guaranteed not to cause Stricture.
Mfd only by THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A.
Big G is the acknowledged leading remedy for all the unnatural discharges and private diseases of men. A certain cure for the debilitating weakness peculiar to women.
I prescribe it and feel safe in recommending it to all sufferers.
A. J. STONER, M.D., Decatur, Ill.
Sold by Druggists.
PRICE $1.00.
Trade Mark

WOMAN FOR YOU
The very remarkable and certain relief given woman by MOORE'S REVEALED REMEDY has given it the name of Woman's Friend. It is uniformly successful in relieving the backaches, headaches and weakness which burden and shorten a woman's life. Thousands of women testify for it. It will give health and strength, and make life a pleasure. FOR SALE BY ALL DRUGGISTS.

"IT IS IGNORANCE THAT WASTES EFFORT." TRAINED SERVANTS USE
SAPOLIO

HERCULES
Gas or Gasoline
ENGINES

Makes no smell or dirt.
For Simplicity it Beats the World.
No Batteries or Electric Spark to care for.
Just light the Burner, turn the Wheel, and it runs all day.
No double or false Explosions, frequent with the unreliable spark.
It runs with a cheaper grade of Gasoline than any other Engine.

SOUL TO BODY.

So we must part, my body, you and I,
Who've spent so many pleasant years together;
'Tis sorry work to lose your company,
Who clove to me so close, whate'er the weather,
From winter unto winter, wet or dry;
But you have reached the limit of your tether,
And I must journey on my way alone
And leave you quietly beneath a stone.

They say that you are altogether bad
(Forgive me, 'tis not my experience),
And think me very wicked to be sad
At leaving you, a clod, a prison, whence
To get quite free I should be very glad.
Perhaps I may be so a few days hence;
But now, methinks, 'twere graceless not to spend
A tear or two on my departing friend.

Now our long partnership is near completed,
And I look back upon its history;
I greatly fear I have not always treated
You with the honesty you showed to me,
And I must own that you have oft defeated
Unworthy schemes by your sincerity,
And by a blush, or stammering tongue, have tried
To make me think again before I lied.

'Tis true you're not so handsome as you were,
But that's not your fault and is partly mine.
You might have lasted longer with more care,
And still looked something like your first design.
And even now, with all your wear and tear,
'Tis pitiful to think I must resign
You to the friendless grave, the patient prey
Of all the hungry legions of decay.

But you must stay, dear body, and I go,
And I was once so very proud of you;
You made my mother's eyes to overflow
When first she saw you, wonderful and new;
And now, with all your faults, 'twere hard to find
A slave more willing or a friend more true.
Ah, even they who say the worst about you
Can scarcely tell what I shall do without you.
—Cosmo Monkhouse in Boston Budget.

American Youth Not Thorough.

A bureau drawer may seem to be a simple "mechanical" thing to make. In many cases it is, though there is room for art in even the simplest bureau drawer. But in late years a great demand for fine and beautiful furniture has arisen, and richly carved and ornamented articles have been manufactured in this country.

One of the firms engaged in this manufacture in an eastern city had need, a year or two ago, of a number of "escutcheons," or metal plates, used in covering keyholes, for bureau drawers. There was a demand for new things of this sort. The "new things" might well enough have been old escutcheons pretty closely copied; but it was necessary to draw them and adapt them to the new use, and no one could be found in this country who was capable of doing that work. The decorations of these drawers were provided from abroad and at great cost.

The manufacturers of all kinds of brass and other metal ornaments to be used on wood have had the utmost difficulty in obtaining good designs for this kind of work, and artists in almost every case have had to be brought from Europe.

I asked a manufacturer of certain articles of this kind, "Have you ever attempted to train American youths to design these things?" "Yes," he answered, "but they would not study enough."

This answer had become an old story to me.

It is not to be supposed that a people so ingenious, sagacious and industrious as the Americans will continue so impatient to earn money that they will not take the steps necessary to earn it most surely and easily. There are signs already that American boys and girls are coming to realize how excellent an opening for their endeavors there is on the artistic side of our growing industries.—J. E. Chamberlin in Youth's Companion.

A Feat in Engineering.

Is M. Eiffel prepared to put an awning over Trafalgar square when the sun shines and remove it promptly without the aid of a central support or steam engines, or even chains? The arch of the Colosseum is certainly not less. This may seem a trifling matter to the thoughtless, because they have never considered it. Roman engineers covered in that vast expanse with some woolen material, and they worked the ponderous sheet so easily and smoothly that it was drawn and withdrawn as the sky changed. The bulk of it must have weighed hundreds of tons, all depending by ropes from the circumference. But the ancients thought so little of this feat that they have left us only one trivial detail of the method.—St. James Gazette.

Perfumed for a Thousand Years.

The mosque of St. Sophia, in Constantinople, is always fragrant with the odor of musk, and has been so for hundreds of years, ever since it was rebuilt in the Ninth century, the curious part of it being that nothing is done to keep it perfumed. The solution to the seeming mystery lies in the fact that when it was built, over 1,000 years ago, the stones and bricks were laid in mortar mixed with a solution of musk.—St. Louis Republic.

He Stretched It.

A West Virginia school teacher warned the girls that any one who chewed gum was not only to be classed with the cow creation, but could not hope to enter the kingdom of heaven. After he had been licked by several fathers and brothers he put his theory in his pocket and skipped out.—Detroit Free Press.

Olfactory sensations are probably received from material emanations from the odoriferous substance, the emanations being absorbed by the fluid in which the microscopic ends of the olfactory nerves are constantly bathed. This moisture is so essential to the proper action of the nerves that its absence, as in certain stages of a cold, may for the time quite destroy the sense of smell.

Carbon gives humanity a revenue three times as great as that which is derived from all the silver and gold mines combined. In this colossal revenue given by coal Great Britain has the lion's share. At present it draws upon its coal mines for $200,000,000, and it sells $50,000,000 worth to the whole world.

The Maltese are mainly the last surviving remnant of the Carthagenian branch of the old Phœnician people. Malta was the half way station between Carthage and Sicily, long held by the Carthagenians, and of which Hamilcar, the father of Hannibal, was at one time governor.

A volcanic feature of Iceland is the Solfatara valleys, plains studded with a number of low, cone shaped hillocks, from whose tops jets of steam ascend. In other places boiling mud issues from the ground six to eight feet into the air, as in New Zealand.

Dr. Foveau de Courmelles, of Paris, alleges that he has succeeded in conveying by the electric current to diseased internal organs of the human body the constituents of medicaments suitable for their recovery.

TAMING WILD BIRDS.

Feathered Creatures Are as Susceptible to Kindness as Human Beings.

When young I raised many wild birds and as the time is coming for their mating and busy season for building and rearing their young it may give some young folks pleasure to explain the method by which I was perfectly successful.

I watched the nest of such as I desired to get until the young birds were old enough to feed and not old enough to fly or get scared. I then loosened the nest carefully, placed it in a tight cage near the bars, with a ledge outside from which it might be convenient for the parent bird to feed them. The cage should be hung in some convenient place near where the nest had been located, on a tree or bush, out of the reach of cats.

At first the old birds are shy, and manifest their disapprobation by rapid darting around and scolding in loud voices, yet I never found them to desert their offspring, but feeding them regularly. I would then begin to feed them, too, with a little sweet biscuit, berries, seeds and worms or some green stuff. The old birds attended them for a time, finally leaving them to my care. There is a current idea afloat that after they find their young prisoners the old birds poison them. It is not so, as I have tested it thoroughly. After removing the cage to the house, the old birds having ceased their care, I fed them in the usual way, paying the same attention to cleanliness and carefully giving them fresh water for frequent bathing.

I once raised a pet yellow bird, a lively little feathered creature, about the size of a canary and almost similar in color. The plumage of the male was of a bright yellow color; wings, tail and crown black. The plumage of the female was more of a brownish yellow. They build their nests in bushes of lichens cemented and interwoven together, and lined inside with some soft substance. They were very thick around the house, as they generally are where mustard seeds are plenty.

I learned to have confidence in giving them their liberty by accident. One harvest day mother came out to the field and excitedly told me that my pet bird had escaped from the cage, which I had set in the window of an upper room. I came to the house feeling sad, as a child would, and found my bird perched in the topmost branch of a high pear tree, gleefully enjoying its freedom. Procuring a biscuit from the house I called to it, and received its chirping answer as it turned its head and recognized its once master.

To my surprise it flew down, perched upon my shoulder, fed upon the biscuit, and allowed me to put it in the cage again. After that I gave it liberty. Nothing delighted it so much as to hop out of the cage on to my finger, fly to my shoulder and manifest its great delight by stooping, ruffling its feathers, spreading its wings in quivering pleasure, and sticking out its little bill to be kissed like a pouting child.

I had it in the shop one day, hopping around, when it suddenly fell over as in a fit, but recovered only to relapse into another while on my shoulder and died in my hands. I buried it lovingly back of the barn, with a post for a head tone.—Nature's Realm.

Talleyrand Meets Bonaparte.

I had never seen him. As already mentioned, he had written to me—on the occasion of my appointment as minister of foreign affairs—a long, carefully composed letter, in which he evidently intended I should discover a different man from the one he had hitherto shown himself on the stage of public affairs. On the very evening of his arrival in Paris he sent me an aid-de-camp to inquire at what time he could see me. I replied that I was at his disposal; he sent me word that he would call on me at 11 o'clock the next morning. Of this I informed Mme. de Stael, who the following day at 10 o'clock was in my drawing room. There were also present several other persons brought by curiosity. I recollect that Bougainville was among them. The general being announced I went to meet him. As we crossed the drawing room I introduced Mme. de Stael to him, but he hardly paid any attention to her; he noticed only Bougainville, to whom he addressed some pleasant words.

At first sight he struck me as a charming figure; the laurels of twenty victories are so becoming to youth, a handsome eye, a pale complexion and a certain tired look. We went to my study. This first conversation was, on his side, without reserve. He referred with much courtesy to my appointment to the ministry, and laid emphasis on the pleasure he had felt in corresponding in France with a person of a different stamp from the directors.

Then, with scarcely any transition, he said to me, "You are a nephew of the archbishop of Reims, who is with Louis XVIII." (I noticed that on this occasion he did not say "with the Count of Lille.") "I, too," he added, "have an uncle who is an archdeacon in Corsica. It is he who brought me up. In Corsica, you know, being an archdeacon is the same as being a bishop in France."

We soon returned to the drawing room, which was now full, and he said aloud: "Citizens, I feel deeply the greeting you accord me. I have done my best when carrying on the war, my best when making peace. It is for the directory to know how to turn my efforts to profit for the happiness and prosperity of the republic."

Whereupon we repaired together to the directory.—Talleyrand's Memoirs in Century.

Husband Saved, but Umbrella Lost.

A man and his wife rushed across the street in front of a horse car, and the ground being covered with frozen snow the man slipped and fell on the track. The horses were coming along at a sharp trot, and it seemed to every one who saw the man fall that he would surely be run over. His wife screamed, and the driver shut down his brake with might and main and pulled the horses away from track on which the man lay. When the car came to a standstill the front platform was over the man and the wheel almost touched him.

The man was so frightened that he crawled out of his dangerous position with difficulty. Not unnaturally, he forgot to bring his umbrella with him, and it was run over and broken in two when the car started again. The wife's feeling when she saw that her husband was unhurt was one of the greatest joy, but as soon as she discovered that he had allowed his umbrella to be run over this changed to anger.

"You fool, you!" she exclaimed, "aren't you satisfied with nearly being killed without going and having your umbrella, my Christmas gift to you, ruined? What's the matter with you anyway? Haven't you got sense enough not to fall down in front of a car?"

She went on in this strain until she and her husband were out of hearing. The poor fellow looked as if he felt that he had escaped the car wheels only to meet a worse fate, and the men who witnessed the little scene murmured, "Deliver me from a shrewish wife!"—New York Tribune.

OVER TREE TOPS.

How the Amazon River Overflows its Banks Every Year.

MILLIONS OF ACRES INUNDATED.

When the "Wild Hog River" Becomes the Paradise of Swamp Loving Brutes.—Floating Islands.

The worst inundations of Louisiana and eastern Arkansas are but spring freshets compared with the monster floods that visit the Amazon valley every year with a regularity equaled only by astronomical events and tax collections. The rainfall of northern Brazil is about three times that of the webfootiest counties of Oregon, and in midsummer the thunder showers that drench the woods every afternoon resemble a daily cloudburst. On the Northern Pacific no other word would be applied to an atmospheric waterfall, darkening the air like a London winter fog for hours together, and swamping a house, if the roof should leak, through an aperture of a few square inches.

Rains of that sort are apt to occur day after day for a series of weeks, and their effect on the lowlands can be only imperfectly indicated by the fact that the Amazon river drains an area of more than 2,000,000 square miles. The Mississippi, too, drains half the eastern slope of a country larger than Brazil, but its largest affluents are dwarfed by the third class tributaries of the South American father of waters.

Not such flowing lakes only as the Rio Negro and the Madera, but the Purus, the Yavari, the Qurua, the Hingo, the Papajos and dozens of other streams rarely mentioned on this side of the isthmus, enter the main river through a delta miles in width and deep enough for the largest river steamers of the St. Lawrence.

About the middle of summer these streams begin to rise, those from the southwest first, those from the northwest and north a few weeks later, and a fortnight after the arrival of the second supplement the valley of the Maranon, the "wild hog river," as the early colonists called the Amazon, becomes a paradise of swamp loving brutes. The tapis, the peccari and the fish otter celebrate the picnic season of their summer life, and herds of wild deer begin their westward exodus. Near Monte Beira, in the province (now state) of Matto Grosso, the woods in midsummer get full of game as a hundred years ago the foothills of the Southern Alleghanies swarmed with wild pigeons when the forests of the north were buried in snow.

A more than usually sudden rise of the flood cuts off many of these fugitives, who are thus reduced to the alternative of making for the highest accessible ground, further east, till every knoll becomes a hill of refuge, crowded with timid brutes whose survival depends on their escape from the giant cats and boas who may approach their stronghold by swimming, if the water should have submerged too large a portion of the continuous forest.

About two months after the beginning of the rainy season the deluge of the lowlands reaches its maximum. Thousands of square miles are submerged so effectually that canoes can be paddled through forests apparently free from underbrush, since only the taller trees, with their network of climbing vines, rise like islands above the surging waters. The swollen rivers have found new currents; the broad gurgling streams twist and eddy through the leafy wilderness, tearing off whole groups of trees, with all their roots, but making amends by depositing hillocks of driftwood, which soon get covered with tufts of new vegetation.

The pressure of the surging flood against these mounds of alluvium soon becomes enormous, but the deep rooted stems of the adansonia and the canoho tree may resist till new deposits of driftwood consolidate a number of mounds, thus forming good sized islands, with a down stream base of perhaps half a mile, but a narrow head deflecting the current left and right, like the wedge shaped front of a stout bridge pier. At the time of their incipiency these new islands may be tenanted only by river lizards, but necessity is the mother of successful exploration, as well as of invention, and a week after its birth the driftwood hill swarms with animal refugees, hogs, deer and capybaris jostling each other in their struggle for a base of operations, thus often getting noisy enough to attract the prowling carnivora.

The climbing talent of the great cats saves them the trouble of emigration. The jaguar and the ocelot become entirely arboreal, traveling like monkeys from branch to branch, and making themselves at home in the tree tops—so much indeed that some of them go to housekeeping and raise a litter of cubs in the cavity of a hollow tree.

Their larder is replenished by all sorts of pheasants and wood hens, who make their headquarters in the underbrush, but who are now obliged to take up lodgings on the lower branches of the unsubmerged trees. By climbing around the stem and rising suddenly in view an ocelot can scare a roost of gallinaceous fowl out of their wits and strike down two or three of the clumsy youngsters before the whole flock contrives to take wing.—San Francisco Chronicle.

Amy—It seems strange to me that you and Mr. Linger have never married, or at least become engaged. He seems devoted to you.

Mabel—If it wasn't for that unfortunate impediment in his speech we might have been engaged by this time.

Amy—I know he stutters dreadfully; but I wouldn't reject him on that account if I were you. He's a good hearted young man, and would make a good husband.

Mabel—Oh, it isn't my fault.

Amy—Then what is the trouble?

Mabel—It's this way. He has begun to propose five or six times, but he is so slow about it on account of his stuttering that some one always comes in before he gets through and interrupts him, and I think he is discouraged now.—Harper's Bazar.

Students in a Horse Car.

It is seldom that one student so successfully gets the best of another in public by practical joking as did a senior in a Fair Haven horse car. Two devoted chums boarded the car when only one seat, close to the door, was vacant. To the amusement of the spectators, each eloquently but vainly endeavored to persuade the other to accept the vacant place. Finally they decided to toss up a penny to settle the matter, stipulating that the loser should sit down and hold the other in his lap. With student-like deliberation they carried out this plan, and after the toss-up both calmly sat down on the single seat. Soon the car stopped, and at the door appeared a handsome young woman. Instantly the man who had won the tossing contest of a moment before saw his opportunity and made the most of it.

"Won't you please to accept my seat?" he said softly in his most polite manner to the maiden, gracefully uncovering his head and slowly rising.

"I thank you," said the young woman, blushing, and apparently pleased by the student's marked attention, she proceeded to take the seat.

The other college man had been absorbed in thought, and so quickly and quietly was the action taken that he had not realized his companion's joke until he found the young lady innocently attempting to appropriate the place in his lap. Then with a suave "and take mine, too," that startled and at first nonplussed the third party in the joke, he darted from his seat just in time to save the young lady from complete embarrassment. Among those who seemed most highly amused by the joke, however, was she who unconsciously had participated in it.—New Haven Cor. New York Times.

Bad Luck.

"I hopped out of bed on the wrong foot yesterday and"——

"Bad luck?"

"Just so. I am not superstitious, but I have noticed that as soon as a person gets in the habit of doing things in a certain, set fashion, anything that tends to change or disturb that fashion is likely to upset a man's equilibrium. In my case it makes me nervous and in a degree foreboding. You know when a sleight of hand man starts to do a trick and for some reason fails he has to begin all over again. He cannot go on from where he failed, because his muscles have been trained to act in a certain definite order, to depart from which means inability to accomplish the feat in question. Now I fancy it is much the same with our daily lives. We acquire the habit of doing a thing thus and so, and if for any reason we are obliged to depart from our accustomed method we do not feel right about it—a suggestion of what physicians call hyperaesthesia.

Of course I know that hopping out of bed on one foot or the other is no criterion for a change of luck; yet, as I said before, habit makes the sum total of our lives, and a violation of the little habits of daily life leads us to look, quite at unawares, for happenings, occurrences, etc., out of the ordinary. We actually begin to look for something going wrong, and it is an easy deduction thus to associate circumstances that otherwise are as distant as the east is from the west. Hence our fund of superstitions, ill omens, etc., etc.—of which hopping out of bed on the wrong foot is a fair illustration."—Deiroit Free Press.

A Fortune Paid for Board.

Sixty thousand dollars for board and lodging is pretty steep, but that's what Frank Parmelee, the omnibus man, has paid the Grand Pacific hotel. Mr. Parmelee is the oldest boarder in the house. He was the Grand Pacific's first guest. He helped destroy the first meal placed on the table. He hasn't missed a meal in seventeen years, except when he was out of the city, for he has not been sick a day in all that time. He is certain to have his appetite with him at all times. He is 74 years old, but he is as active and energetic as a boy. Perhaps the credit should be given to the wonderful digestive apparatus which he has concealed about his person.

Mr. Parmelee eats two meals each day in the big dining room and one meal in bed some time during the night. For fifty years Mr. Parmelee has never failed to awaken in the middle of the night and refresh himself with a square meal, consisting of such wholesome food as lobster salad, cold sausage and mince pie. Because of his consistent diet Mr. Parmelee is of a happy and frolicsome disposition.—Chicago Herald.

Faces with Lanterns Behind Them.

There is nothing more catching than a face with a lantern behind it, shining clear through. I have no admiration for a face with a dry smile, meaning no more than the grin of a false face. But a smile written by the hand of God, as an index or table of contents to whole volumes of good feeling within, is a benediction. You say, "My face is hard and lacking in mobility, and my benignant feelings are not observable in the facial proportions." I do not believe you. Freshness and geniality of soul are so subtle and pervading that they will, at some eye or mouth corner, leak out. Set behind your face a feeling of gratitude to God and kindliness toward man and you will every day preach a sermon long as the streets you walk, a sermon with as many heads as the number of people you meet, and differing from other sermons in the fact that the longer they the better.—Dr. Talmage in Ladies' Ho Journal.

The Hall of Tara.

A reader asks, "When did the kings and nobles of Ireland hold their last gathering in the hall of Tara?"

Tradition has it that the last assemblage in the hall of Tara took place in the year A. D. 544. The great triennial council of the Irish nation was held there for several centuries previously, but because a criminal who had fled for safety to the monastery of St. Ruan had been dragged to the hall and executed the holy abbot and the monks cried aloud against the sacrilege and pronounced a curse upon its walls. "From that day," says an old chronicler, "no king ever again sat at Tara."—St. Louis Globe-Democrat.

An Iron Watch.

At the mechanical fair held at Worcestershire, England, Browther Brothers exhibited a watch, in perfect running order, constructed wholly of iron. The object of this curiosity was to illustrate the malleability of iron and its consequent adaptation to a wide variety of novel uses. Such articles, when made of iron, may be easily electroplated with gold or silver, or adorned with all the beauty of the enameler's art.—St. Louis Republic.

Dolls of the latest pattern are now manufactured in great numbers in England and in this country. Yet these countries continue to import some of the cheaper kinds from Germany. The extent to which dolls are manufactured in England may be judged from the statement made a few years ago in the house of commons that a manufacturer had an order for £500 worth of dolls' eyes.

THE PALACE CAR.

What it Costs to Travel in One and How it is Usually Equipped.

A PALATIAL DWELLING ON WHEELS.

If You Have Plenty of Money You Can Live Luxuriously While Traveling.—Linen for the Cars.

It costs only $50 a day to hire a completely furnished and palatial dwelling house on wheels, containing seventeen beds. In front is an "observation room." Next come two drawing rooms, both fairly spacious. Behind these is a dining room twelve feet long. The middle part of the car is occupied by berths, which are comfortable sofas during the day. In the rear are a good sized kitchen, a china closet, a pantry, a bathroom and a cold storage closet. All linen for table and beds, tableware, crockery and every other necessary are supplied. Three servants are provided also without extra charge—a skilled cook, a waiter and a porter, who are under the orders of a tenant. Heating and lighting are thrown in. After ten days the rental is five dollars less per diem. Thus luxuriously housed, the occupant can travel wherever he wishes all over the continent by paying the railways eighteen fares for transportation. However, if more than eighteen passengers are carried in the car, so many extra fares must be paid. He can stop at whatever points he desires and have his car side tracked, making his home in it during his stay.

If he chooses he can bring along his own servants, linen, tableware and wines. He is at liberty to furnish the commissariat himself, or the company will supply everything in that way for him, charging only 15 per cent. over and above cost and rendering to him the bills. The latter is by far the better plan, inasmuch as trouble is saved and affairs are attended to more satisfactorily by the company, which understands the business and can buy food cheaper besides. The cook is always a capable person, and, having a time schedule for a journey across the continent, he will telegraph ahead to various points for such luxuries as may be obtainable at the markets in different cities, thus arranging for fresh fruits, butter and eggs, and even for a newly cut bouquet to be put on the table every morning at breakfast. All of this is susceptible of variation. One can engage an ordinary sleeping car for $40, a sleeping car with buffet for $45, or dining and observation car combined for $40. A hunting car, provided with kennels for dogs, racks for guns, fishing tackle, etc., costs only $35 a day. Service and all incidentals are in every case thrown in.

But one can do better than this if he has plenty of money to spare. He can hire a complete traveling hotel for $210 a day, in the shape of an entire train, consisting of four sleeping cars, a dining car and a buffet smoker. An observation car may be added at an expense of $40 more. The buffet smoker represents in some respects the highest development of the modern parlor car. It includes a bar, a barber shop, a bathroom and a library, wherein can be found books, writing materials and the newest magazines and pictorial and daily papers.

In short, it is a small club on wheels. There is no other country in the world where luxury in traveling is so highly appreciated as it is in the United States. Abroad it is said that the only people who go by rail "first class" are the nobility and the Americans. Of course the person who charters a whole train must pay the railways for transportation at least eighteen fares per car, though west of the Mississippi the minimum rate is usually fifteen fares. No car can be rented for the prices above given for less than three days.

It has recently become the fashion for actresses to travel in private cars. Nowadays a conspicuous star usually insists on being provided with such a conveyance as part of the contract for the tour which she signs with her manager. Bernhardt always carries a small menagerie with her, which could not very well be accommodated in a public vehicle. Theatrical companies very commonly hire one or more cars while traveling, that being a convenient and agreeable method of transportation.

Dining cars are usually owned by the railways and are managed by the palace car companies. Ordinarily they are run at a considerable loss, being attached to trains merely as an attraction to passengers. The expense of conducting them is enormous.

Arrangements made between the palace car companies and the railways regarding sleeping cars vary very much. Sometimes the latter pay as much as two or three cents a mile for the use of each sleeper, where, as is particularly apt to be the case in the south, the passenger traffic is not sufficient to repay the car companies. In such cases a railroad is often obliged to provide the necessary convenience at a loss to itself. The item of washing is a very costly one in the running of sleeping cars, inasmuch as no piece of linen is ever used twice without going to the laundry. A sleeper, on leaving New York for Chicago or St. Louis, receives a "stock" of 120 linen sheets, 120 pillowslips and 120 towels. This gives change for two nights. Fifteen or twenty clean towels are always kept on the washstand. The washing is done in New York, Boston, Buffalo, Chicago, St. Louis and other cities, being given out in great quantities at the low rate of one dollar per hundred pieces. An equipment of linen lasts about one year, at the end of which it must be renewed. It is purchased by wholesale—$50,000 worth at a time.—Philadelphia Times.

A Baby's Peculiarities.

Young Mother—I wonder why the baby always wakes up crying.

Young Father (wearily—I suppose he's mad because he's been making no trouble.—Good News.

TWO STORIES OF THACKERAY.

He Had a Weakness for People with Titles, but at Heart He Was Kind.

Mr. G. P. A. Healy, the portrait painter, contributes to The New Haven Register some reminiscences of the famous men who have sat for him or with whom he has in other ways been acquainted. Thackeray, he says, was never a sitter of his, but he met him on several occasions. Two of these meetings gave him an insight into two of Thackeray's characteristics—his weakness for titles and the society of high born people, and his real kindness of heart, which he was given to concealing with a kind of false modesty. Mr. Healy says:

One day in Paris I met Thackeray in the street.

"What, you here, Healy,' he said. "I thought you were in America." I replied that I was painting at No. 15 of that very street, and that if he had a moment to spare on the following Thursday I should be happy to show him my work.

At the time appointed he called, and was, for him, most amiable. In the course of the conversation he said, "So we are to meet this evening." I looked unintelligent, and he added, "Why, yes, Thursday evening. Didn't you say we were to meet at Lord Holland's?"

"No," answered I; "I am not invited."

"Ah! Really? Good afternoon!" he said, and almost instantly left the place, evidently quite disgusted at having lost his time with one whom Lord Holland had not seen fit to recognize.

Some years later I called on Thackeray in Boston. He received me with a sarcastic smile, assuring me that he felt exceedingly honored that I should condescend to think of a poor man of letters like himself. I answered with great seriousness:

"Mr. Thackeray, you quite mistake the motive of my visit. It is not the man of letters I have come to see; it is the man who cheered the last days of a poor young fellow named Cook."

Instantly his manner changed. "What! Did you know Cook?" and he spoke as feelingly as if sarcasm had not become with him a second nature.

Cook, a young American painter whom I knew in Paris, very poor and friendless, fell ill, and there was nothing left for him but to go to the hospital. There I found him, not only ill, but in terror of the doctors, who, according to his story, made use of him for all sorts of surgical experiments.

"If you can't get me out of this place I shall die of fear!" he exclaimed one day, when I called.

I immediately started a subscription among the artists, who are never deaf to such appeals, and Cook was taken to the country. He had a cheerful room in a farm house, and could be carried into the garden, where he enjoyed every ray of sunshine. A more grateful and happy creature I never saw.

The poor fellow's most constant visitor was Thackeray, who watched with him night after night, and cared for this young stranger as if he had been one of his own blood, and I am very sure that, in order to give the dying man one bright hour, the celebrated author would have refused even a duke's invitation.

A Matrimonial Scheme Frustrated.

The Empress Maria Theresa was left a widow at an age when her beauty was yet striking. She was secretly informed of a scheme projected by her three principal ministers, to make themselves agreeable to her; of a compact made between them that the losers should not suffer themselves to be infected with any feeling of jealousy toward him who should be fortunate enough to gain his sovereign's heart; and they had sworn that the successful one should be always the friend and support of the other two. The empress, being well assured of this fact, one day, after the breaking up of the council over which she had presided, turned the conversation upon the subject of women, female sovereigns and the duties of their sex and rank.

Then applying her general reflections to herself in particular, she told them she hoped to guard herself all her life against weakness of the heart, but that if ever an irresistible feeling should make her alter her resolution it should be only in favor of a man proof against ambition, not engaged in state affairs, accustomed and attached only to a private life and its calm enjoyments—in a word, if her heart should betray her so far as to lead her to love a man invested with any important office, from the moment he should discover her sentiments he should be contented to resign his place and his influence with the public. This was sufficient. The three ministers, more ambitious than gallant, gave up their projects forever.—New York Ledger.

Royalty in a Yankee City.

There is a public library in a New England city to which Edward King, of Newport, had made gifts, including several statues. On the pedestals of these was duly inscribed an acknowledgment to the donor. A lady who was being shown about the library one day paused to look at one of these figures, and read aloud the legend:

"'Gift of Edward, King of Newport,'" she read, with the superb stupidity of which the human intellect is capable only in great moments. "Why, bless my soul! I did not know that Newport had ever had a king!"

WHY THE BISCUITS WERE BAD.

It was no fault of the cook, although she was blamed by the mistress because the biscuits were not as light, delicate and finely flavored as usual.

When it was too late the cook found she had been imposed upon by the grocer or his boy, who had given her a new brand of baking powder in place of the Royal, which she had always used with good luck, and which had been ordered. She had used the new kind, spoiled the biscuit and got a scolding.

The Royal Baking Powder, as every cook knows, is always to be relied upon. It is one of the greatest aids she has. She is always able with the least trouble to make the very finest biscuits, cakes, muffins and crusts. Many a cook's reputation has been made by the delicious things she has been able to make with it. It is no wonder that she is indignant when the grocer sends her another baking powder in its place, which spoils her food, injures her reputation and brings her blame.

The grocer sends her the new brand of baking powder simply because it costs him so much less and he can make more profit by selling it than he can on the Royal. The Royal is made from the very finest materials and costs much more than any other brand, which accounts for its superiority, although it is sold to consumers at the same price.

The cook should examine carefully the label of the baking powder and see that she is not imposed upon. If the grocer sends anything but the Royal, send it back, as one cook did five times until she got the Royal. The only safe way is for the cook to have the finest things to work with, and the Royal is not only the finest but the most economical to use because it goes so much further.

LONDON POLICE.

What Lawyer Wellman Observed on His Visit to the World's Metropolis.

PROMOTION DEPENDENT ON MERIT.

The Force in the British Capital Something to be Proud of.—Free From Political "Pulls."

The history of the London police has yet to be written, and a very curious record indeed would be that of the successive changes, always in the direction of improvement, which have been made in the constitution, the discipline and the dress of the metropolitan and city police since the force, established by act 10 of George IV, commenced duty on Sept. 29, 1829. Although the blundering and inefficient force of police constables had by this time discarded their swallow tailed coats and their stovepipe hats, the city authorities, excepting for a very short period in 1848, hesitated to provide the force with any weapon whatsoever excepting a lantern and a rattle.

Even as late as 1860 the metropolitan police force numbered only 5,200 constables, although the city had over 3,000,000 inhabitants. At present its total strength is 14,081, maintained at a cost of a little over £1,000,000 ($5,000,000). This civilian army was practically founded by the second Sir Robert Peel while home secretary, and was bitterly opposed in the outset by a large section of the public press. The London police force, once a national scandal, has now become, however, the pardonable pride of every inhabitant of the city.

At the head of this army of 14,000 police is a sinle commissioner called the chief commissioner of police. He is appointed by the queen and holds his office for life. A general in the army of twenty years' standing is always selected for the place—some soldier who has distinguished himself for his executive ability. The present chief commissioner is Sir Edward Bradford, K. C. B., K. C. S. T., who organized the king of Persia's cavalry some years ago. His salary is £2,500 or $12,500. This commissioner has the appointment of three assistant commissioners at a salary of £1,500 ($7,500) and allowances of about £500 a year extra. These assistants are chosen from the ranks of barristers who have distinguished themselves for upward of twelve years in the criminal courts. Next in rank come four chief constables, who likewise must be chosen from the list of army officers in good standing.

There is strictly no politics in any of these appointments, and they are all for life or during good behavior. It would seem fitting to put an experienced army officer at the head of such a body of men and especially fitting to join with him as his assistants three experienced criminal lawyers.

In addition to the 14,000 uniformed police there are 600 detectives and 500 mounted police. The department breed all their own horses, and they board in barracks—all bachelors belonging to the force—at one shilling a week.

The pay of an ordinary constable is from thirty to thirty-six shillings ($7.50 to $9) a week. The detectives or inspectors receive £185 ($925) a year, and £5 ($25) advance for each year of service for ten years and then £10 advance for the next fifteen years. After twenty-five years' service they are pensioned for life on two-thirds pay. The sergeants of police receive forty-five shillings ($11.25) a week and are only chosen from the ranks of constables. Every one connected with the force, excepting the commissioner and his assistants and the four chief constables, must rise in the service from the lowest ranks.

No ordinary policeman is allowed to carry a revolver excepting in the suburbs, where revolvers are handed to the men when going out on duty and are inspected each morning to see if any shot has been fired. Each officer must likewise report each use of his stick or truncheon. There is almost no drunkenness found among the force. Most of the men are recruits from the country and are farmers' sons. Any policeman found intoxicated off service is put back from two to three years in rank and pay, and if found drunk while on service is discharged at once.

Any one visiting London for the first time is stunned on week days by the tour billion of movement in its streets and the constant eddies at all the great crossings in the whirlpool of its business life such as no other city in the world can show. It is estimated that over 20,000 vehicles pass the Bank of England each day. Such a thing as a block or stoppage in the stream of vehicles for more than a moment is never allowed to occur, thanks to the skillful management of the police under the present perfect system. There is an officer at nearly every street corner, and any driver or cabman who advances a yard beyond the upraised hand of the officer may expect to have his number taken and is certain to have a two pound fine to pay. If he drives on his license is forfeited. This is not a rule simply, for the law is invariably enforced, and the consequence is absolute order and freedom from blocks.

The police seldom use force. It is not necessary in a city where the laws are enforced with unfailing promptness and certainty. In consequence perhaps the most unruly class of men in the world—the London cabbies—stand in absolute awe of the police. This feeling is shared equally by all tradespeople. I was assured on the best authority that there was not a disorderly house or policy shop in the entire city of London with its 690 square miles and its streets and roads measuring 6,600 miles in aggregate length and over 5,000,000 inhabitants. It is commonly said of London that there are more Scotchmen there than in Edinburgh, more Irish than in Dublin, more Jews than in Palestine and more Roman Catholics than in Rome. Nothing is allowed to be sold in the way of either food or drink after 12 o'clock, and every public restaurant or bar must be closed by 12:30. This rule is kept to the very minute, or the license is forfeited. Nobody once convicted of even a misdemeanor can obtain a license for a bar or public house in London.

The fidelity and bravery of the London police were well shown in 1884 when a couple of officers on duty at the parliamentary building discovered a lighted dynamite cartridge in the hallway directly under the hall in which the house of commons was sitting at the time. The two men seized the cartridge together and ran with it burning in their hands out into the open courtyard, where it exploded. Both men are crippes for life. Both are deaf and blind, and one has lost his reason. They were at once promoted to the rank of sergeants and pensioned for life. One was summoned to Windsor castle, where the queen herself decorated him with the Albert medal. The officer who was confined to the hospital was then visited by the queen in person, who presented him with the Albert medal.—Francis L. Wellman in New York Herald.

INDEPENDENCE, CAL.

FRIDAY, MARCH 17.....1893

San Francisco merchants keep squealing like a pig under a gate for outsiders to come and help them, as they have lost all their business. At this time one hundred millions of dollars are held by the banks of the City drawing four per cent interest. Several efforts have been made to promote enterprises that would be of vast benefit to San Francisco. And yet with all that immense capital every such enterprise has failed for want of support. If San Francisco should become as desolate as Tyre and Sidon no pity would be deserved by a city whose people are so unenterprising and narrow minded.

Much wonder is expressed why Los Angeles should send such a man as Carpenter to the Senate. There may have been a method in the seeming madness, however. Los Angeles is saved from the curse of railroad monopoly that weighs so heavily upon San Francisco. The conditions at Los Angeles compel the railroads to make improvements and concessions that are of great benefit. At San Francisco the Southern Pacific, like Robinson Crusoe, is monarch of all it surveys, its right there is none to dispute. The electors of Los Angeles, when they sent Carpenter to the Senate knew that he would serve the railroad through thick and thin, without hesitation or scruple of any kind, and help to keep the yoke on the neck of San Francisco. When Los Angeles needs another kind of a man in the Senate he will be sent there.

Sacramento got such a shock as an earthquake could not have given it, when the Legislature with a rush put through a resolution to move the seat of government to San Jose. Article XX of the Constitution provides that no law for moving the capitol shall be valid or binding unless submitted to the people at general election and voted for by a majority of qualified electors. San Jose would be a better location than Sacramento, so far as climate, drainage and pleasant surroundings are concerned. But very large sums of public money have been expended upon buildings and grounds at Sacramento, and if a new seat of government were decided upon, all that money would be nearly a total loss to the tax-payers. San Jose proposes to give ten acres of land as a site, and a million of dollars for buildings. But if this sum should provide a suitable building for a State Capitol, yet at every session of the Legislature large appropriations would be demanded for other necessary buildings and improvements. Very few of the people at large have any business that calls them to the State capital, and consequently very few care whether or not the country about it is healthy or unhealthy, pleasant or unpleasant. There is never a scarcity of candidates wanting to go to the Legislature, and perfectly willing to absorb the foul odors that fill the legislative chambers. In fact they are willing to absorb almost anything. If the present capitol with its poisonous vapors would kill off this class of legislators, Sacramento would be in no danger of losing the seat of government through a vote of the people. Unfortunately, while many legislators are tough enough to deserve killing, they are too tough to be easily killed. There is no telling in advance what the vote would be on a proposition to move the seat of government to San Jose, but the certainty that a majority in favor of it would entail large expense may influence many to vote against it.

Blaine's Day of Fate.

It is a curious fact that many of Mr. Blaine's friends and many of the newspaper men here who have watched his career held firmly to the belief that he would die on a Sunday. Sunday was his day of fate. He was born on that day, and it constantly recurs in connection with the chief events of his life. It was on Sunday that he regained possession of the noted Mulligan letters, with which that person was seeking to blast his career and drive him from public life. It was on the Sunday previous to the assembling of the Republican convention at Cincinnati in 1876 that he suffered the sunstroke which played no inconsiderable part in breaking down the Blaine forces and nominating Hayes.

It was on a Sunday that he prepared his celebrated Florence letter declining to be a candidate in 1888, and it was on the same day that he sent a peremptory cablegram to the same effect to Representative Boutelle at Chicago. It was on Sunday that his letter to Chairman Clarkson last February was given out in which he said his name would not go before the coming convention. His statements of the American side of the Behring sea controversy and the New Orleans affair with Italy were given out on Sunday.

His resignation of the portfolio of state was twice determined on Sunday, the first to President Arthur and the second to President Harrison, although the latter was not sent to the president until Monday morning. That his last illness was hopeless became known to the public Sunday, Dec. 18, and it was on Sunday, three weeks later, that his physicians finally admitted the hopelessness of his case.—Washington Cor. Chicago Inter Ocean.

The Woman Won.

An exciting race took place Monday afternoon in Walla Walla between Mrs. Mary E. Miller of Kennewick, Yakima county, and Frank Foster of the same place. They both came in on the evening train over the O. and W. T., and neither waited for the car to stop but jumped off and made frantic runs for hacks. The woman offered to buy the hackman's team if he would get her to her destination in time, and the man slipped a $5 piece into the driver's hand in order to facilitate matters, and in less time than I take to tell it both hacks were speeding up the street at a breakneck gait.

What was the cause of all this? Why, it was a race between them to see who could get to the United States land offices first to file on a piece of land near Kennewick. The man arrived there first, but made a mistake and got into the wrong office, and in the meantime the woman had arrived and slipped in ahead of him. The woman also had her witnesses with her, while the man was unprepared in this important particular; consequently she "got there with both feet."—Washington Statesman.

Natural Gas Raises a New Law Question.

A resolution was introduced in the city council tonight to begin a suit for damages, involving several hundred thousand dollars, against the Northwestern Ohio Natural Gas company, which has its wells in this county adjoining those of the city, and which supplies the city of Toledo with gas. The resolution is the result of a long study of the legal aspect of the case by Mr. Alexander, who introduced it, and upon his recommendation it was referred to the city solicitor, who, it is understood, is in favor of vigorously prosecuting the suit. As the rock pressure has gradually decreased, the Northwestern company has introduced three immense pumps at a station six miles from the city, at a cost of $50,000, in order to force the gas through the 40 miles of pipe and suck it from the ground. This has greatly injured the city's territory, and the claim will be made that the use of artificial means to get the gas from under the contiguous territory of the city is illegal. The question has never been raised in the courts.—Findlay Cor. Cleveland Plain Dealer.

Another Airship Invented.

Another airship has been projected by M. Grensfelder, who has just received his patent papers from Washington. The ship is a cigar shaped affair, 100 feet long and 30 feet in diameter. It will hold 35,000 cubic feet of gas and carry 2,800 pounds. The feature of the invention is that it can be steered. There are several mechanical innovations for which great results are promised. The invention varies from most airships in that it can float in the water. The framework will be of steel or aluminium, the ribs being covered by a light airtight cover, which will receive several coats of varnish. The gas will be stored in a chamber at each end, and there will be space left for a cabin in the middle. In this cabin the electric motor, anchor and all the other mechanism will find a lodgment. A strong partition will separate the machine and passenger quarters.—St. Louis Letter.

General Butler's Famous Yacht.

There is considerable speculation in yachting circles, now that General Butler is dead, as to into whose hands the old America will fall. Mr. Paul Butler told me that he had not the slightest idea as to whether he should retain it or not. Current opinion in Lowell has decided that he will not. His pet hobby is canoeing, and it is doubtful if he will change at this day. The general's last cruise, by the way, he told me, was taken with the New York Yacht club, when he sailed up with them from Newport, the America giving many of the new yachts a tussle. After that he took a number of short trips up along the north shore, but this was his last cruise.—Boston Record.

The 1892 Fire Loss.

The fire loss of the United States and Canada for the month of December, as compiled from our daily files, amounts to $12,354,450. Added to the figures for the previous months of 1892 this shows a total for the year of $132,704,700. The losses for 1891 were $137,716,150, and for 1890, $106,993,345.—New York Commercial Bulletin.

KENDALL'S SPAVIN CURE.

STAR, LANE CO., OREGON, Feb. 8th, 1892.

DR. B. J. KENDALL CO.,

Dear Sirs:—I have used your KENDALL'S SPAVIN CURE for the last twelve years never being without it but a few weeks in that time and I have made several wonderful cures with it. I cured a Curb of long standing. Then I had a four year old colt badly Sweenied; tried every thing without any benefit, so I tried your liniment, and in a few weeks he was well and his shoulder filled up all right, and the other, a four year old that had a Thoroughpin and Blood Spavin on the same joint, and to-day no one can tell which leg it was on. These statements can be proven, if necessary; the four year olds are now seven and can be seen any day at Cottage Grove, Or. S. Z. PAXTON.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the Northwest quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

WILLIAM L. HUNTER.
Executor of the Last Will and Testament of John Allen Hannah deceased.

COURT NOTES.

Geo. M. Gill, Superior Judge.

TUESDAY, Mar. 14, 1893.

Estate of Schuyler Williams, deceased—Petition for letters testamentary, Order admitting will to probate. Issued letters to Frank Elijah. Order of publication of notice to creditors. Order appointing appraisers.

Estate of John F. Lubken deceased—Time appointed for probate of will.

James Jones was down from Fish Spring yesterday.

S G. Sneden Esq. of Bishop spent several days in town this week.

Mr. and Mrs. P. H. Mack a e expected home next Monday.

Charley Summers was at Independence some days this week making inquiries as to the number of beef cattle that can be got here.

W. J. Dunn of Bishop went south last Tuesday with twenty head of horses. They were a good looking lot of all-round work animals.

B. F. Gray went down from Hawthorne to Keeler on Monday. He is interested in the development of borax claims in the southern part of the county.

T. J. Goodale of Fish Spring brought to Independence a load of hams and bacon of his own curing last Tuesday. Mr. Goodale puts up a first-class article.

Murphy says it always takes him half an hour to get his hair cut. It takes the barber twenty-five minutes to find the hair and five minutes to do the rest.

Storm prevailed on the mountains several days during the past week. On Wednesday night a slight sprinkling of snow reached down to Independence. There is a vast mass of snow on the mountains now.

In the general appropriation bill as it passed the Assembly was the usual sum for agricultural associations. This sum was stricken out in the Senate and the bill was therefore sent back to the Assembly. There the appropriation was insisted upon and the Senate had to give way.

Recent rains have made the bottom lands of the valley miry and destroyed most of the dry grass. Stockmen are driving their herds up on the mesa lands toward the mountains, where young grass is coming up. A good many old cows and weak animals have died along the river since the ground got so wet.

A car-load of potatoes was sent down on the train last Monday from Mason Valley. Part were left at Bishop and the balance taken to Keeler. There will be rotten potatoes to throw away in the valley after awhile, but now the producers hold them at such prices that consumers send to Nevada and get what they need. The farmer should keep as well posted as the merchant on market values.

Fruit Prospect.

At Independence the prospects for a good fruit crop are excellent. John Baxter says his apple trees never were so full of fruit buds as now, the same being also true of apricot, peach, nectarine and pear trees. The rains of the winter months were followed by cold nights; this kept back the blossoms till the leaves and blossoms come together, giving protection to the young fruit against frost. Other fruit growers give like reports.

A Good Magazine.

Among all the Magazines for March the *Californian* has a right to a place in the front rank. A specialty is made of having one or more articles in each number of the *Californian* descriptive of our own State and of other parts of the Pacific coast. In the March number the country about Mount Tamalpais is described. There is also an article on the State of Washington and another on the California glaciers in the grand region west of Mono Lake. All these articles are written in an interesting way and are valuable as giving accurate information. An article on the District of Columbia gives information about the national Capital and its government that every citizen ought to posess, but of which very great numbers of well informed people are entirely ignorant. There is an interesting article on Algiers and another on Indian masks. All of these are copiously illustrated, and this part of the work is excellent. Short stories and poems are included in the number and a few good literary criticisms. Order from San Francisco. Price, 25 cents.

A REPETITION

Facts Concerning Owens Valley That Have Been Told Many Times.

In answer to requests for information about Owens Valley the following summary is given; all the facts have been often published in this paper at greater length:

The Valley is reached from the north by the Carson and Colorado Railroad, connecting with the Central Pacific at Reno, Nevada, distant from Keeler, the south end of the Valley, 325 miles. From Keeler to Mojave the distance south 121 miles and a stage and mail line connects there twice each week with the Santa Fé and Southern Pacific railroads. From Mojave to Los Angeles the distance is 100 miles. Owens Valley lies along the eastern base of the Sierra Nevada mountains; the Inyo mountains bound it on the east and between these two ranges the Valley is about ten miles wide on an average. The altitude of the Valley above sea level is about 3,600 feet. Independence, the county seat, is in almost exactly the same latitude as Gibraltar. The Valley is over 100 miles long and contains about 500,000 acres of cultivable land, the soil being mostly sandy loam. Wheat, oats, barley, corn, millet, all yield good crops. Timothy and other grasses yield excellent crops; the great fodder crop of the Pacific Coast is alfalfa, and that of Owens Valley is far superior inality to any grown anywhere else in California; the average yield per acre for each season is five tons. This is not so heavy a yield as in some other regions, but the superior quality amply compensates for the difference. An average yield of marketable potatoes is seven tons per acre, and the quality is unsurpassed. Root crops of all kinds are excellent in quantity and quality; the same is true of vegetables, and the variety is as great as anywhere else. Owens Valley is especially noted for the excellence of its deciduous fruits. The altitude above sea level is an offset to latitude, so that while in other parts of California deciduous fruits grown in the same, or nearly the same, latitude are insipid, dry and spongy, here they are piquant, juicy, solid and of excellent flavor, and keep well. Peaches, apricots, nectarines, plums of all kinds and prunes are of excellent quality. Bartlett and other of the best varieties of pears never fail to give good crops. But the chief fruit is apples, and these are eagerly sought after far outside the limits of the State. The soil and climate appear to be especially well suited to grape growing; no finer table grapes are produced in any country; wine of delicious quality has already been made here and experts who have examined the country assert that the finest brands of Europe will in time be equalled by wine made in Owens Valley. The climate is perfect for curing raisins, there being complete absence of fogs or rain in the curing season. No large vineyards have yet been planted in the Valley, only enough to prove all of the foregoing statements. The United States observer at Keeler reports as follows for the month of Feburary: Lowest temperature the 15, 26°. Highest temperature, the 24th, 64°. Snow rarely falls in the valley and then but very lightly and all disappears in a few hours. The supply of water for irrigation is virtually unlimited. Owens river rises in the Sierra Nevada Mountains in Mono County. It flows south, enters Owens Valley at its northern extremity, runs the entire length of the Valley and ends in Owens Lake. The length of the river is 150 miles. The lake is eighteen miles long and ten miles wide. The average fall of the river in the valley is about six and a half feet per mile. The current is therefore rapid and the stream is fordable by horses at but few places. Like the Mississippi and other streams Owens river has a flood season about the end of May or early in June. Then the volumn of water is immense, being many times what it is in winter.

The present population of the Valley is is about 3200. The towns are Bishop near the north end, Big pine farther south, next Independence, the county seat, then Lone Pine. Keeler is on the east shore of the lake at the present terminus of the railroad. In addidition to the graded common school Bishop has a good academy with a faculty of able teachers. School houses are located at suitable places throughout the Valley. Great interest is taken in education by all the people. Bishop has two churches, Independence and Lone Pine, one each. Very little water is yet taken from Owens River, nearly all the land now under cultivation being irrigated by streams coming down from the Sierras. Immense snow fields lie upon the mountains the year round, and from these the streams come down at short distances apart the entire length of the Valley. Many of these streams contain an abundance of trout and afford excellent sport to anglers. It was not noted in the proper place that in summer the heat is never excessive. The altitude and dry atmosphere prevent that. The reason why the population is not much greater is because is it so far to any great center of population by the railroad now in existence. San Francisco is about six hundred miles away, with a long stretch of desert and the Sierra Nevada Mountains to cross to reach it. About 120 miles of road southward will connect the Valley with two transcontinental railroads at Mojave. This will let the Valley products into Los Angeles, where there is market for fruit, hams and bacon, dairy products, farm products of all kinds, cattle and other things that can be produced here in unlimited quantity. Great quantities of silver and lead ores, and of marble will also be sent over the road. Owens Lake could supply the whole world with carbonate and bi-carbonate of soda. This is got by letting the lake water evaporate from ponds made along the lake shore. Several thousand tons of soda are now made that way each year and are sent by rail to San Francisco. D. O. Mills of New York is the principal owner of the works. With rail to Los Angeles the output would be increased ten fold. Large quantities of borax would also be shipped over such a road. The large stream of population now flowing into Southern California only needs just such an opening as this road would afford for enough of it to be diverted this way to fill Owens Valley in three or four years. The rout is over an open valley having an average grade of less than nine feet per mile, and without a single serious obstruction to overcome.

Must Weigh a Pound.

Another legal change makes it necessary that a two-pound roll of butter shall contain thirty-two ounces. From twenty-six to twenty-eight ounces was all the buyer got under the old way. The butter-makers did not gain anything by the swindle, however, unless where the butter was sold direct to the consumers. Jobbers bought from makers and paid just for the number of pounds each lot weighed, and then retailed charging each roll as two pounds.

Teachers' Institute.

A change in the school law leaves it with County Boards of Education to determine time and place for holding County Institutes. The change was made through Assemblyman Mack. The old law left the matter with County Superintendents and the result was not always satisfactory.

MISCELLANEOUS.

(Official.)

Proposals for Care of Indigent Sick of Inyo County.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California at the office of the County Clerk until, and not later than 10 o clock, a. m., on Thursday, April 6, 1893, to contract for the care of the indigent sick of Inyo County for the term of one year beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amounts for which parties contracting will maintain all indigent sick properly admitted to contractor's care, on the basis of an average of four patients per day throughout the year; to include all medicine, nursing, board, lodging and washing, and the burial and funeral expenses of any indigent sick person who may die while under such maintenance and care. Said bids must designate the price per person at which all excess of patients over the average of four each day throughout the year will be cared for, such excess to be paid for by extra allowance on presentation of bills, duly verified at the regular meeting of said Board immediately after said contract has expired—the average of four per day to be paid for at the regular meetings of the Board, on bills duly verified, by warrants drawn upon the Hospital Fund of said county.

The person or persons to whom said contract shall be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of said contract.

The maintenance care and management of such indigent sick by such contractor shall be at all times subject to the inspection of said Board of Supervisors, or any member thereof, or any person appointed by the Board for such purpose.

Bids must be indorsed, "Proposals for Care of Indigent Sick," and the same will be opened between the hours of 10 o'clock a. m. and 2 o'clock p. m. on said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

(Official.)

Proposals for Services of County Physician.

Notice is hereby given by the Board of Supervisors of the County of Inyo, State of California that sealed proposals will be received by said Board, at the office of the County Clerk until 10 a. m., and not later, on Thursday, April 6, 1893, for the services of a Physician qualified under the provisions of "An Act for the Regulation of the Practice of Medicine and Surgery in the State of California," attending the indigent sick in charge of the contractor for the care of such persons for the term of one year, beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amount per annum for which said Physician will give due and regular medical and surgical attendance upon said sick, and also all such services as may be required for prisoners in charge of the Sheriff.

The person to whom said contract may be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of such duties. Said services to be paid for by warrants drawn upon the Hospital Fund, upon presentation of bills, duly verified, at the regular meetings of said Board.

Bids to be indorsed "Proposals for Service of County Physician," and the same will be opened between the hours of 10 o'clock a. m., and 2 o'clock p. m., of said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

Proposals for Advertising Delinquent Tax List.

Notice is hereby given that pursuant to an order of the Board of Supervisors of Inyo County, State of California, made January 10, 1893, sealed proposals will be received for publishing the List of Delinquent Taxes of said County and State for the fiscal year 1892-93. The first publication thereof to be made on or within five days before or after the first Monday in June, from copy to be furnished by the Tax Collector. Bidders must state the rate per square of two hundred and forty ems nonpareil for the first and each subsequent insertion, for the time designated by, and including such postponements as may be ordered by said Tax Collector.

All bids must be endorsed "Proposals for Publishing Delinquent Tax List," and addressed to the Clerk of the Board of Supervisors, and will be received up to and not later than the hour of 10 o'clock a. m. of said day, and opened by said Board on Thursday, April 6, 1893, between the hours of 10 a. m. and 2 p. m. of said day, the right to reject any bid being reserved.

Health Officers Speak.

City, State and National Authorities report the Royal Baking Powder in every way Superior to all others.

STATE CHEMIST, CALIFORNIA: The ROYAL fulfils all the requirements. Our tests show it has greater leavening power than any other.

STATE CHEMIST, WASHINGTON: There is no question but the ROYAL is the strongest, purest and most wholesome baking powder in the market.

U. S. GOV'T FOOD REPORT: ROYAL BAKING POWDER is shown a pure cream of tartar powder, highest of all in leavening strength.

CANADIAN OFFICIAL TESTS: ROYAL BAKING POWDER is commended as of highest excellence, and shown to be greatest of all in leavening strength.

SAN FRANCISCO BOARD OF HEALTH: We cordially approve and recommend the ROYAL BAKING POWDER. It is absolutely pure and healthful, composed of the best ingredients, of the highest strength and character.

BOARD OF HEALTH, SEATTLE, WASHINGTON: Finding in analysis that it is entirely free from any adulteration, we heartily recommend the ROYAL BAKING POWDER for its great strength, purity and wholesomeness.

BOARD OF HEALTH, TACOMA, WASHINGTON: In our judgment the ROYAL is the best and strongest baking powder before the public.

BOARD OF HEALTH, SPOKANE: Certainly there is no baking powder known to us equal to the ROYAL.

DR. BINSWANGER, UNIVERSITY OF OREGON: It is also my opinion that there exists no purer, better or stronger baking powder than the ROYAL. I confidently recommend it.

Do not permit the slanderous stories of interested parties to influence you in using any other than The Best, The Royal.

How She Calc'lated.

A mathematical brain, or as some people say, "a good head for figgers," is a convenient thing to possess. But there is one old lady in a Massachusetts town who evidently does not set a high value on her reputation in this respect, though she no doubt considers herself a good "calc'lator," notwithstanding.

She keeps a small crockery shop, the only one in the place. Her stock is limited, both as to quality and quantity, but her customers never find fault. "Aunt Judy," they say, "is so obliging!"

One day a stranger in the town was attracted by a placard above some glass tumblers in her shiny show window. "Eight cents apiece, a dollar a dozen."

"That strikes me as rather queer," he said to himself, and walked into the shop.

Aunt Judy regarded him affably over her spectacles as she sat rocking behind the counter, and rose at once.

"Is there anything you'd like, sir?" she asked.

"Why," said the gentleman, "I thought I'd like to ask about those tumblers out there in the window. How does it happen that they're more expensive to buy by the dozen than singly? When I was a school boy, twelve times eight was ninety-six," he added in a jocose tone.

"So it was in my day," said Aunt Judy, with some severity of tone; "but I keep those tumblers, young man, to accommodate, and the disappointin' a customer who might come in for an extry tumbler, havin' broke one, after I'd sold the whole dozen to one person, is more expense than four cents to me, sir!" and she seated herself in her rocking chair with the air of a person who made a telling point.—Youth's Companion.

Bigger Salaries Needed.

"If any provide not for his own he is worse than an infidel," even if he neglects his family to make laws or to interpret them for his country. A man who is dependent upon what he earns, and who can earn $10,000 or $15,000 or $20,000 a year outside of congress, is going to think twice before he sacrifices that income for a salary on which he cannot have a home in the city where he must live more than half the time, and cannot give his children the education which he had planned for them. And if he thinks twice, the chances are greatly against his going to Washington, or tying himself down to an even smaller salary if he be a lawyer and the path opens for him to him a seat in the federal court.

The present system operates to fill congress with men whose wealth is so great that the size of the salary is a matter of indifference. The tendency to elect to the senate and house men who are rich, and who would never have been thought of for such offices except for their riches, is already so strong as to be alarming, and yet the nation goes on year after year neglecting one perfectly obvious way to resist it. Make the salary of a congressman large enough for one to live as well at the close of the century as a senator or representative lived at its beginning, and seats which now often go without a contest to unqualified millionaires will again be sought by men who are capable of rendering the best service to the state.—Century.

"German Syrup"

My niece, Emeline Hawley, was, taken with spitting blood, and she became very much alarmed, fearing that dreaded disease, Consumption. She tried nearly all kinds of medicine but nothing did her any good. Finally she took German Syrup and she told me it did her more good than anything she ever tried. It stopped the blood, gave her strength and ease, and a good appetite. I had it from her own lips. Mrs. Mary A. Stacey, Trumbull, Conn. Honor to German Syrup.

HEAPS OF TURKEY AND PIE.

Patrons of the Newsboys' Lodging House Feast on the Fat of the Land.

"Quit yer pushin behin dere!" "Bust in th' door!" "Shove up de grub!" "Aw, let a feller in!" "Lemme at de feed!" "Soup!" "Turkey!" "San'whichers!" "Meat 'n p'tate!" "Pie!" "Wow!" "Whoop! Hooray!"

Two hundred newsboys of all races, colors and ages shoved, hustled, shouted, whistled and whooped in the upper room of the Newsboys' Lodging house at 9 Duane street. From below appetizing odors arose. The doors that separated the crowd from the 28th newsboys' dinner creaked under the vigorous efforts of the famine stricken urchins. Finally they swung open, and a torrent of hungry humanity poured into the dining room and took possession of the benches that flanked the well supplied tables. Then up rose a dull and continuous sound such as is made when a housewife chops up celery in a wooden dish. It arose from 200 pairs of jaws working with vigor and speed. Occasionally there was an interruption and an appeal to Superintendent Heig.

"Hey, mister, dis mug here's swipin me pie! I seen him chuckin it down 'is neck w'ile I wasn't lookin."

"Ah, go cut yer t'roat wid a turkey bone! How cud yer see me when yer wasn't look in?"

"Well, I seen yer anyhow. Give up now."

An examination proved the truth of the accusation, and the pie was returned amid the sobs of the despoiler.

"Don't make me git out, mister. I on'y tukit fer me starvin wife an fambly."

"How many starvin wifenfamblys yer got?" demanded the boy on the other side of the speaker, extracting two turkey bones smothered in mashed potato and a piece of ham from the youngster's pocket. "I'll give yer a clump in th' ear yer go feedin yer starvin wifenfambly on my grub."

This was doubly strong evidence, and the offender had to go, which he did, having previously stuffed his mouth full of everything within reach, with the noble resolve to get all he could out of the dinner anyway.

When the first 200 had devastated the tables a new supply was furnished, and more boys were let in. About 600 in all were fed. It took 700 pounds of turkey, 4 barrels each of potatoes and turnips, 600 assorted pies, 280 pounds of ham and 60 gallons of tea to satisfy them. All this was the gift of Mr William M. Fleiss of 47 Broadway, who gives a dinner to the boys every year. It was 9 o'clock when the last lot of eaters arose with sighs of repletion and filed out to smoke cigarettes in the hall. This process finished, they scattered to their homes, ready to get up in the morning and sturdily earn their own dinners throughout another year by bootblacking and the sale of "extrys" until next winter brings them another free banquet.—New York Sun.

The American and French Cabinet Systems.

In France the president names his ministers, but they must have the confidence of the chamber—that is to say, they are not his ministers, but ministers of a fluctuating majority of the deputies. This fact has made the president as a matter of fact removable during his term of office, as was proved when M. Grevy, unable to get a cabinet together which had the confidence of the chamber or to obtain the consent of the senate to its dissolution, was forced to resign, as if he had been an outvoted prime minister. In practice the cabinet system, the system of ministerial responsibility to an elected chamber, seems to require, in order to give it stability, a permanent and even hereditary head of the state, who cannot be affected by parliamentary fluctuations.

The presidential system as exhibited in the United States appears to owe its stability and working efficiency to the fact that the president is the master and not the servant of the cabinet, and that neither he nor it is dependent upon a majority of the representative chamber nor at a general election. The attachment of the French people to the republican form—perhaps we ought rather to say their want of attachment to any other—with their regard for personal ascendency, for the democratic autoritaire, suggests that they will find a stable equilibrium in remodeling their institutions after the American rather than the English fashion—that is to say, in the qualified monarchy of the presidential system rather than in the unlimited democracy of our modern parliamentary regime.—London Saturday Review.

The modern Peruvians use coca leaves, chewed with some alkali like lime, to sustain them during long and arduous labors. In the chemical preparation of the extract of coca, according to the pharmacopœia, hydrochloric acid is used with the alkali.

What's in a Name?

A Corner in Shawnee.

TRUE STORY OF A WALL STREET HERO BY HENRY CLEWS.

Daniel "teamed it" through the winter, and when spring had come he surprised one of the village store keepers by applying for a situation. Let the arguments and explanations be understood. Daniel wanted to learn business; the store keeper thought well of him, and gave him the desired clerkship. Daniel developed a fondness for conversation and became acquainted with summer visitors who could inform him as to the methods of business on the Stock Exchange. In such talks he never failed to inquire the exact meaning of a "corner." Some of the elder people were in doubt lest Daniel would lose his head and wreck his life and little fortune in ignorant speculations. They regarded Wall street as a community of robbers, and were morally certain that no man with a good living elsewhere should venture in their way. But as Daniel kept at his post year after year, serving his employer faithfully, and now and then increasing his deposits in the bank, doubts as to his career changed to confidence that he would be a solid citizen some day, and might even go to the legislature.

It is known that one of his enterprises in behalf of his employer consisted in securing an agreement with a great New York grocer to take a large quantity of butter from him at a lower rate than that usually paid, and then by personal canvass among the farmers securing all the butter they could make at a price somewhat less than that they usually received. The consideration being that he would take every pound off their hands. This arrangement, satisfactory to both parties, netted the store a handsome sum for a country trader.

Eventually Daniel became a partner and after that the sole proprietor of the store. He kept up his interest in the stock reports of the New York paper, and conducted many a successful enterprise in his own field. Perhaps he had his failures, too, but if so, they are not remembered at Posket. He "traded" in real estate, organized the farmers into a milk exchange, through which he obtained for them steady prices and for himself a comfortable addition to his income.

At last a day came when, without warning to his neighbors, he sold out all his interests and departed for New York. Accounts vary as to the amount of ready money he brought with him. By some it is put at $25,000, but it is my impression that it did not exceed $12,000. I well remember the day he came, for I chanced to be in a friend's office when a tall, uncouth, ill dressed countryman stepped awkwardly in and said:

"Kin I set down here a spell?"

Space will not permit me to relate the thousand and one stories of his experience in the street. I can only indicate his general course. For months he came into that office every day and sat there through board hours, watching the boys putting up quotations, and listening to the conversation of the speculators about him. Not once did he venture a dollar. He was entirely willing to be guyed as long as he was not turned out and as long as he continued to pick up information.

He was tolerated because of his interesting appearance and quaint remarks, but nobody ever heard him utter a word that indicated his purpose. The fact is that he was slowly acquainting himself with the character and the characters of the street. His retentive memory served him well, and his patience better. He came to understand stock dealing without operating, and he also came to know some of the faces that are rarely seen in the street. They are those of men who live at their ease, but watch the market, and now and then swoop down upon it, buy a lot of stock for cash, sell perhaps within a few days, and then retire and wait for another season of depression. Daniel watched such men and learned a lesson.

One day when there was a general panicky feeling abroad he astonished the broker in whose office he had settled by putting $5,000 in bills into his hands to secure a purchase of a certain popular stock that had been going down. He protected himself by a liberal margin and sat down again in the office to wait. When he sold he cleared over $1,000.

This was the beginning of a long series of transactions, all conducted on a conservative basis, and all so far as known profitably; and at last it came to be a saying among those who knew him that one should follow Daniel Hardy. The difficulty was to discover what Daniel was doing. He was close as an oyster, and his operations were by no means confined to the office where he spent most of his time. Nevertheless, though he was regarded as a shrewd and successful man, nobody ever dreamed that he would become a dominant factor in the street.

Occasionally he met Mr. Wellman, then at the head of a banking house of some importance. The banker said to him:

"I am glad to hear that you are getting on well, Mr. Hardy. If I can be of any assistance to you in the way of information, or otherwise, let me know."

"Thankee, Mr. Wellman," responded Daniel, gravely, "I may call on you some day."

The time came, after several years, that Daniel Hardy was invited into pools for effecting deals in various securities. He accepted some of the invitations and refused others. From the well known character of the men with whom he associated I wonder how he escaped ruin more than once. His conservatism never deserted him, and beneath his uncouth exterior was a tenacious intellect, wonderfully sharpened by contact with the world.

Now all through these years he had been studying one thing more than all else: Theodore Wellman's business habits. He learned what the banker's favorite stocks for speculation were, through whom he dealt, and many details unnecessary to repeat here. At last came the famous "Shawnee railroad deal." The common stock of this road amounted at par to $10,000,000, but it ruled in the market at about 50.

It was one of the "fancies" in which Mr. Wellman delighted to speculate. A selling movement began in this stock one day and it proceeded from Wellman's house. The price had gone down a full point, when an obscure broker on the floor of the exchange began to take every block of it that was offered. The decline ceased and a contrary movement set in. Still this obscure broker bought. Everybody began to rush for his Shawnee and offer it to this broker and pretty soon the question ran from mouth to mouth:

"Whom does Brown represent?"

Nobody could tell. Up went the price of Shawnee and at the close of the day's proceedings it was quoted at 70. The next day the movement continued and leading among the sellers was Mr. Theodore Wellman's broker. Every effort was made to break the mysterious purchaser, but without avail, and at the end of trading Shawnee was at 113, with a record of three thousand more shares sold than were in existence. On the third day the effort to break the purchaser ended in offering to him a lot of stock sent from a distant city by special train. Every share was taken.

The bears were in despair. They had to get Shawnee stock with which to fulfill their engagements to deliver. The obscure broker was ready to sell, but he wanted something like 300 for his shares. It meant ruin to many, and there were several speedy suspensions. Among them was the house of Theodore Wellman.

Soon after the announcement a messenger brought word to him that if he would call at Brown's office a proposition for a settlement would be laid before him. He went over at once and found others of his ruined associates on the same errand, but he alone was admitted in a back room. There sat Daniel Hardy, sonber as of old, but there was an expression of cold satisfaction in his eyes.

"You, Mr. Hardy!" exclaimed Wellman.

Hardy made no reply at once. He sat stock still, looking straight at the ruined speculator. Wellman appreciated the situation immediately, and sinking with a groan into a chair, he covered his face with his hands. Presently Hardy spoke.

"I understood that you hev' contracted to deliver 'bout two thousand more sheers of Shawnee than was ever took out of the stock book."

Wellman nodded.

"Hm," continued Hardy; "some of the sheers is in thet safe in the corner; pra'tically all the rest of them as was issued is in my control, where I kin git 'em when I want 'em. Ef I understand it, that means that you hev got to settle with me at my own figger. Ain't thet so?"

"It is, Mr. Hardy," groaned Wellman.

"P'r'aps," went on the torturer, "p'r'aps you may be able to sell those fictishyous 2,000 shares to a somebody for suth in', but I don't keer for 'em. Lemme see, I think you clever people, you with the eddicated intellecks, calls this arrangement a corner. I believe you used that word to me once. Didn't you?"

Wellman's answer was a convulsive shudder. There was silence for a moment, and then Hardy fairly shouted:

"Look up, Mr. Wellman!"

Startled, the broken speculator raised his head. Hardy stood up, and looked down at him for a full minute. Then he said slowly:

"I've been lookin' for'ard to this a long time, an' now you've got to settle, an' you can't, you can't do it."

"For God's sake, Daniel Hardy," cried Wellman, "do not continue this useless cruelty. I am in your power. You have ruined me; it will take much more than I possess to satisfy your claim, but name your figure and let me do my best."

"Cruelty, is it? Huh, I s'pose 'tis. That's what I've cornered ye fer. I could ha' thrown you over the falls at Posket. Now I've licked you at your own game."

Wellman was completely broken by the sudden blow, morally as well as financially. His nerve and dignity left him, and for an hour Daniel Hardy kept him fawning, begging and crying in abject misery. Then other ruined men were admitted and a settlement was arranged on terms that need not be detailed here. Some of the unfortunates have not yet recovered. Wellman's apparent failure was the worst of all, but to everybody's surprise he secured credit somewhere that enabled him to slowly pick himself up.

The fact is that Daniel Hardy, having glutted himself with revenge, felt something as near as revulsion of feeling as his hard nature would admit; and within twenty-four hours of the scene in Brown's private room he had secretly supplied the credit that his enemy's house needed.

The Shawnee deal was his first great operation, and his last of any kind in Wall street.

* * * * * * *

Except in names, this recital is one of facts. The man and the woman, the hero and the heroine, still live. Many men in Wall street today will recognize them, even under the filmy mask I have given to their identity.

THE END.

Five Classes of China Teas.

The green teas of China are divided into five classes, which take their names from the districts in which they are grown, being known as Moyune, Tienke, Fychow, Taiping and Pingsuey. Of these the quality ranges in the order given, and only the Moyune and Tienke are considered first class, all of the others, however handsome in appearance, furnishing beverages of inferior flavor. The Moyune is of two kinds, Nankin and Packeong, the former being the more valuable; in fact Nankin Moyune may be said to stand at the head of all green teas. No coloring is used; the leaves are small, bright green and perfect.

The Tienke is very pleasing in appearance, the leaves being of a silver green hue, and the beverage is light in color, with a pungent flavor, but not so rich and fragrant as the Moyune. The other varieties are largely sold for "mixing," and are never offered in their true character for first class teas. The Pingsuey green teas are of so poor a quality that their importation, either into this country or Great Britain, is forbidden by law.—Good Housekeeping.

Diet for a Healthy Man.

A wholesome diet in good health for a man of business, who walks a fair distance, or indulges in some equivalent out door exercise, would be abundant and palatable, inviting in appearance and accompanied by plenty of pure, cool water, lemon and orangeade, the juicy fruits and salads, the succulent vegetables, meat and vegetable soups, beef and mutton—preferably boiled or roasted—sea fish, clams, oysters, game, poultry, digestible sweets and tea, coffee, cocoa or chocolate in moderation. Frozen ices and creams eaten moderately, when the system is not overheated, are refreshing and nutritious. Whole wheat bread, baked potatoes, milk, cream and new cheese, new laid eggs, either boiled or poached, will complete an ideal dietary for a healthy man who uses his brain rather than his muscular powers.—Harper's Bazar.

Walking In Her Sleep.

A young girl some time ago was observed to be perambulating the housetops in a certain street of one of our large towns. Her parents were communicated with and steps were at once taken to prevent any mishap befalling her. She successfully walked the length of several houses, then returned and passed through the window into her own room.—Boston Globe.

ODDS AND ENDS.

Turpentine is good for lockjaw.

A sister's office is a noble and gentle one.

The father of Dr. Rush was a farm laborer.

The friend of everybody is nobody's friend.

THE HERCULES.

In placing the Hercules Gas or Gasoline Engine in the field in competition with other gas engines, we do so with the utmost confidence that we are "in it." Our system of operating this engine is so far ahead of all others that it needs but an introduction in any community to insure an immense sale. A woman can handle it. It requires no engineer. It can be started in an instant. No electric spark to get out of order. It oils itself. It beats all others. Write Palmer & Rey, 405-407 Sansome St., San Francisco for particulars. The price and capability will surprise you.

For Simplicity it Beats the World. It has Fewer Parts, and is therefore less likely to get out of order than any other Gas Engine now built.

Daily Newspaper and Job Office.

We have used your four horse-power "Hercules" Gas Engine for nearly two months now, and have not yet failed to get our edition off on time; on the contrary, we find it the best investment we could have made. For convenience it cannot be beat. Unlike the steam engine it is clean, no coal to shovel into a furnace, no fires to get up, no water to watch to keep the boiler from going through the roof—indeed it is simple and economical in all respects, and we feel that in changing from steam to gas we have secured a donation of $100 per year to the office, independent of all other considerations, and that means that $100 is the difference in the cost of fuel per year between steam-power and gas power. Thanking you for past favors, including the great service done by you in putting an engine like the "Hercules" on the market, we are,

Yours truly, PENNYCOOK & HARRIER,
VALLEJO CAL., Jan. 14, 1892,
Proprs. *Chronicle.*

Running Printing Machinery.

The engine is a daisy! It is up and in splendid running order, and *operates our presses in excellent shape.* We are more than pleased with it, and feel confident that we will be able to introduce the "Hercules" in this county in a manner largely to your interest. REED & HUTCHINSON.
ANGELS, CAL., Feb. 24, 1892.

SAWING CORDWOOD.

HEALDSBURG, Cal., Dec. 16, 1891.
Messrs. Palmer & Rey, 405-407 Sansome street, San Francisco, Cal.
DEAR SIRS:—I wish also to state that my afternoon's run of your engine turned out very satisfactory. I sawed from about 2 to 5:30 P. M., between six and seven cords of dry black oak wood twice in two, and it gave me no bother whatever. If it only keeps up that record, and I don't see why it should not, I consider it a great success. I consider, under favorable circumstances, it will saw two cords per hour easy. I will, from time to time, advise you how the engine is doing.

Yours truly,
HENRY FOX.

BOTTLING SODA WATER.

NAPA SODA SPRINGS, Jan. 15, 1892.
Messrs. Palmer & Rey, 405-407 Sansom street, San Francisco, Cal.
GENTLEMEN:—I believe I have now given your Gasoline Engine a fair test, and am ready to say that it answers satisfactorily to all you claim for it. It is easily started, steady in action, sufficiently powerful, and cheap in cost of running. I use gasoline gas in running it. It has increased my output of soda water 1,000 dozen per day.

Yours truly,
JOHN P. JACKSON,
Propr. Napa Soda Springs.

Three cigarettes can be smoked in a newly invented holder, which is aptly called "The Dude-killer."

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

The devil gets the man who has one harmless looking little sin that he wants to keep.

THE FIRST LAW OF NATURE.

This self-preservation is acknowledged to be, and people who adopt against the encroaches of disease a genuine medicinal safeguard, accredited by experience and the sanction of Physicians, afford a happy illustration of the wisdom of the saying, in the health they restore and continue to enjoy. Among maladies, against the growth of which Hostetter's Stomach Bitters afford efficient protection, diseases of the kidneys and bladder are fraught with the utmost peril and exhibit great obstinacy when opposed by ordinary means. The Bitters can and will subdue them. No testimony is stronger than this. Used at the outset and persistently, the best results may be expected. This medicine also eradicates liver complaint, constipation, dyspepsia, malaria, rheumatism and nervousness.

Texas comes forward with a man who has not slept in the past ninety days. He probably manages to get in some sleep at night.

Ladies, why use shoe-dressings that have alcohol, acid, and ammonia in them, and spoil your shoes? Watson's Peerless Polish has none of these injurious ingredients. It is guaranteed.

Sold by druggists or sent by mail, 50c. E. T. Hazeltine, Warren, Pa.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Not one man in a dozen will tell the truth if you ask him why he wears a plug hat.

HIS PERSONAL EXPERIENCE.

Hon. James W. Husted, while serving his sixth term as Speaker of the Assembly of the State of New York, writes:

"STATE OF NEW YORK, ASSEMBLY CHAMBER, ALBANY, Jan. 16, 1890.

I desire once more to bear my testimony to the value of ALLCOCK'S POROUS PLASTERS. I have used them for twenty-five years past, and can conscientiously commend them as the best external remedy that I have known. Years ago, when thrown from a carriage and seriously injured, I gave them a thorough trial. In a very short time the pain that I was suffering disappeared, and within a week I was entirely relieved. On another occasion, when suffering from a severe cough, which threatened pulmonary difficulties, which I was recommended to go to Florida to relieve, I determined to test the plasters again. I applied them to my chest and between the shoulder blades, and in less than a fortnight was entirely cured. On still another occasion when suffering from an attack of rheumatism in the shoulder to such an extent that I could scarcely raise my arm, I again resorted to the plasters, and within a few days the rheumatism entirely disappeared. I have them constantly by me, whether at home or abroad. My family as well as myself have found them to be a sovereign remedy, both for external and internal troubles. I never had but one kidney difficulty in my life, and the application of the plasters cured me in a week. I desire, as I said before, to bear my testimoney in a public way to their efficacy, and I know of no better way of doing it than by giving you my personal experience."

The book agent is another thing that never goes without saying.

$100 REWARD $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Very Green—She—Did your grandfather live to a green old age? He—Well, I should say so. He was buncoed three times after he was seventy.

For Coughs, Colds, and Throat Disorders, "*Brown's Bronchial Troches*" have *proved* their efficacy by a test of many years. *Sold only in boxes.*

Lung stoppage will soon succeed heart failure in medical circles.

Use Enameline Stove Polish; no dust, no smell

HIGH LIVING, if you keep at it, is apt to tell upon the liver. The things to prevent this are Dr. Pierce's Pleasant Pellets. Take one of these little Pellets for a corrective or gentle laxative—three for a cathartic. They're the smallest, easiest to take, pleasantest and most natural in the way they act. They do *permanent* good. Constipation, Indigestion, Bilious Attacks, Sick or Bilious Headache, and all derangements of the liver, stomach, and bowels are prevented, relieved, and cured.

They're *guaranteed* to give satisfaction in every case, or your money is returned.

The worst cases of Chronic Catarrh in the Head, yield to Dr. Sage's Catarrh Remedy. So certain is it that its makers offer $500 reward for an incurable case.

Easily Taken Up

Cod Liver Oil as it appears in Scott's Emulsion is easily taken up by the system. In no other form can so much fat-food be assimilated without injury to the organs of digestion.

Scott's Emulsion

of Cod Liver Oil with Hypophosphites has come to be an article of every-day use, a prompt and infallible cure for Colds, Coughs, Throat troubles, and a positive builder of flesh.

Prepared by Scott & Bowne, N. Y. All druggists.

The Grip Twice

"I have had the grip the last two winters. Last winter it prostrated me so that I had no strength and could not do my work. I **sat down and cried** many times, I was so blue and discouraged. I had great pain in my back and across my kidneys and through my whole body. I also had a bad cough. Hood's Sarsaparilla just about **saved my life.** It gave me strength so that I could do my work and **made me feel well.** I shall always be a warm friend to Hood's Sarsaparilla. I do not want anything better for a family medicine." MRS. LIZZIE CLARK, Washington Village, R. I.

BURIED ALIVE.

Details of Three Remarkable Cases of Unfortunate Interments.

A HUSBAND'S HORRIBLE DISCOVERY.

His Wife's Skeleton Found Outside Coffin.—Resuscitated by Students.—Saved by Kisses.

The wife of a wealthy merchant was taken suddenly ill with a disease that baffled the science, skill and medical knowledge of all the physicians in the neighborhood. She appeared to have a succession of violent swoons which lasted for different periods. She regained consciousness after long intervals and talked intelligently to those around her.

After she had been ill for a week she began to sink, and late one night relapsed into a deadly faint. Three days and three nights passed, and still she did not recover.

The physicians made a thorough examination and unanimously declared that life was extinct. Pulsation had entirely ceased. Her face assumed a deathlike pallor. The features became hard and rigid, and the limbs stiffened.

A PITIABLE CASE.

Dead she certainly was, said all the medical men, and two days afterward she was interred in the family vault. When a twelve month had passed away the merchant married again. Soon after his second marriage the vault was opened to receive the coffin of a relative. The merchant himself touched the spring which caused the lid to fly open.

As the top of the vault swung back on its hinges a skeleton, with an ominous rattle, fell into the arms of the gentleman. It was the skeleton of his first wife, and a brief search disclosed all the dreadful details.

The unfortunate lady had evidently been only in a prolonged swoon. As a broken coffin lay on the floor of the vault it was presumed that, on waking up and finding where she was, she had struggled violently and caused the coffin to roll off the shelf, on which it had been placed, on to the floor.

A large bone lay close by the skeleton, and with this she had evidently tried to attract attention by striking the roof of the vault. The oil in a lamp, left by a workman, had all been consumed by the poor creature. Exhausted by want of food, she had gradually sunk and died in reality.

SAVED BY KISSES.

The foregoing episode is somewhat gruesome, but we can now quote two examples followed by happier results. A young French lady, deeply in love with a student, was informed by her father, an old man who had made his fortune by selling rags, that she would have to marry a friend of his, also a retired rag seller, whose age was almost treble that of the young girl. On hearing this announcement she was seized with a violent illness, and in a few days succumbed to it. She was buried in a church yard not far from Paris.

On the same night the young student, frantic with grief and rage, formed the idea of unearthing her, possessing himself of her beautiful black hair, and then, after killing her father and the would be bridegroom, drowning himself in the Seine. At dead of night he proceeded to the grave yard, disinterred the corpse, and was covering the inanimate lips with passionate kisses when he noticed that the right eyelid quivered very slightly.

With eager haste he bore her to the nearest house and applied restoratives with such success that she soon completely recovered and was able to fly with him on the following day to Germany, where they were united.

CONSCIOUS THOUGH BURIED.

Electricity has been responsible for restoring a man who was declared to be dead by the most expert medical authorities. A young German doctor, of fine physique and excellent health, was seized with an unaccountable illness and shortly afterward died. He was buried in a ten foot grave.

Some friends of his, medical students, entertained doubts as to his demise, and resolved to experiment upon him with a very powerful electric battery.

With much difficulty and toil they opened his grave, removed the body from the coffin and bore it hastily to their dissecting room. Hour after hour they spent in fruitless attempts to restore animation by means of electric shocks, until at last the gray streaks of dawn warned them that it was high time to replace the body in the grave.

One young student, however, begged for another minute, as he had a pet theory which he wished to try. Hastily making a gash, he applied the wire to a small pectoral muscle. Instantly the young doctor arose, staggered to the middle of the room and fell heavily to the floor.

Restoratives were applied, and soon the supposed corpse was able to relate his experiences. He asserted that he had never been unconscious for a moment from the time the doctors had pronounced him "dead" to the time when the "pet theory" had produced such happy results. How awful his feelings and thoughts must have been we can imagine.—London Tit-Bits.

The Blue Danube.

Among the most important rivers in Europe is the Danube; in fact, it is the second river. It has a length of 1,700 miles; it and its tributaries drain a valley having an area of over 300,000 square miles. Many nations live along its banks and those of the rivers which flow into it, and nearly thirty dialects are spoken from its source to its mouth. It rises in the Black forest to the north of Switzerland, and almost in sight of the French frontier. Through Bavaria and Austria is its course, through Hungary, past Servia and Bulgaria, Roumania and Roumelia, while tributaries flow in from Bosnia and Macedonia on the south and Poland on the north, so that practically the valley of the Danube comprises the most important portion of eastern Europe.

It runs through the battle ground of civilization and savagery. Here the Romans contended with the Scythians and the Huns; here the Greek empire strove to maintain its supremacy over the hordes of savage tribes which came down from the steppes of Russia; here, after the empire of the east faded away, Charlemagne contended with savage tribes of semi-Asiatics; here all Europe fought the Turks for generation after generation, until by a great battle fought under the walls of Vienna the flood of the Mohammedan invasion was rolled back toward Asia.—New York Ledger.

Castor oil, it is said, if regularly applied each day to a wart, will remove it without leaving a scar. The time it takes may try the patience of the user—from two to six weeks being required—but if faithfully used it will remove the most obstinate warts.

Uncle Ras' Perpetual Pass.

Erastus Baldwin, of Campville, Conn., now in the nineties, and known as the aged Nimrod, is undoubtedly the oldest commuter on the Naugatuck railroad. He has enjoyed the privilege of a free pass since the road was built, and he takes lots of solid enjoyment out of his occasional fishing trips to Bridgeport. When the Naugatuck railroad, in 1889, desired to extend its tracks from Waterbury to Winsted, Mr. Baldwin owned three and one-half miles on the Litchfield side. He was pleased when he learned from the company's agents that a railroad through his land was contemplated. He said to them: "If you can build a railroad through these rocks and hills here, you can build her. Ras Baldwin will be the last man in the world to interfere, and all I want is the right of way for myself and wife as long as we live."

From that time until the early part of October, 1873, Uncle Ras, as he is called, enjoyed his privilege undisturbed. Then he was ejected from a train by a new conductor because he refused to pay fare. The conductor explained that he was acting under instructions from E. Ferris Bishop, a newly elected president, but that only angered Mr. Baldwin more, and he never rested until he had walked all the way to Litchfield to consult Henry B. Graves, an attorney for the company. He swore vengeance on the company, but finally consented to give the company a chance to explain. Within a week Mr. Baldwin received a very satisfactory letter of explanation and a perpetual pass for himself and his wife. Mrs. Baldwin used the pass until she died.—New York Sun.

Not Comforted.

A lady was walking in a country road, and passed a district school house just as the scholars were dismissed. There were big boys and little boys, black children and white children, tall girls and short girls. The teacher herself came out last, closed and locked the door with a snap, and walked away up the hill.

Only one child was left, a little girl of eight or nine, done up in a purple hood and a knitted "comforter." She lingered on the steps, looking sadly up and down the path and into the doorways, evidently trying to find something.

The lady approached and asked what was troubling her. It was her mitten that was lost, the child said, with perfect faith in the lady's sympathy. She had only one left, and they were new, and her mother would scold her so! It was a new mitten, the poor little thing repeated, pitifully—red, with open work on the wrist.

The lady joined in the search, but quite in vain. Then she tried a little philosophy on the youthful mind.

She told the little girl not to care; to tell her mother bravely, and not mind the scolding. There were many things in life to be borne with courage; she herself had lost many things—friends and possessions and hopes—but she had learned to be very brave about it.

"Yes," said the child, to whom the argument brought no comfort—"yes, but did you ever lose your mitten?"—Youth's Companion.

Eating a Good Deal in a Short Time.

"Have you any idea," remarked the cashier of one of the largest lunch restaurants in New York, "how many minutes the average down town business man devotes to his midday meal?"

"At a venture," answered the reporter, watching the hurried play of knives and forks about him, "I should say fifteen minutes."

"You set about the time usually estimated," returned the cashier, "but in reality half that time would be nearer right. The average time consumed for lunch by the patrons of this establishment is just eight minutes. The fact is," continued the cashier," after the reporter had ventured a foreboding for New York digestion, "people find it such a trifling and unobtrusive matter just to get 'a bite of lunch' that few realize what a gigantic business it is merely to supply hungry people down town at noon, because few bring their lunches with them, and from the formation of the city none can go home.

"This establishment feeds 3,000 people a day, and the amount of food required to care for that patronage is enormous. For example, when we put 'hash' on the 'specials' enough is made up actually to fill a wagon. We are not the largest lunch room, however."—New York Tribune.

George Washington's Fastidious Kinsman.

Lawrence, Earl of Ferrers, a distant relative of George Washington, had a most tyrannical temper, and one day, in a fit of passion, he cut down with his sword his steward, an old gentleman named Johnson. The latter had given no provocation for the deed, and the crime was an act of brutality, inexcusable save that the earl may not have been well balanced mentally. He was brought to trial for killing Johnson, and demanded and received the privilege of being tried by his peers.

The house of lords was thronged during the hearing. The evidence proved to be conclusive, and Ferrers was sentenced to be hanged at Tyburn. Appeals were made to the king for clemency, but in vain. Ferrers met his fate with considerable bravado. He was carefully attired for the occasion, and insisted on providing a silken cord for the ceremony. To this whim the executioner agreed, and the earl was turned off otherwise like any other common felon.

It may be worthy of mention that this unfortunate nobleman was not only related to George Washington, but was also a direct descendant of King Edward III of England. His motto, singularly enough, was, "Honor, the reward of virtue."—Chicago Herald.

He Knew the Animal.

The teacher of a Sunday school had been reading a story of the centurion who had great faith, and whose servant was healed at the Lord's word. The teacher had dwelt on the lesson of the story, and had seen that that was properly enforced; and then she said to a bright boy in the class:

"And now, can you tell me what a centurion is?"

"Yes'm," said the boy, very promptly; "it's a horse with a man's head on."—Boston Transcript.

The Fish Supply of London.

Large as seems the demand for fish in the metropolis, it does not amount to a single fish per day of all sorts for each denizen of this vast city. To give the people of London only a periwinkle a piece would require so many bushels that the baskets containing them, placed one over the other, would overtop the cross of St. Paul's. No fewer than 20,000,000 of plaice and 800,000,000 of herrings are sold in the metropolis every year.—London Tit-Bits.

Children not yet full grown, and invalids who are convalescing favorably from some exhausting illness, should have a liberal diet in milk, eggs, fruit, vegetables, and such a digestible meat as mutton, or not high game.

SHOP TO COURT.

The Story of a Pretty Philadelphia Shop Girl Who Became a Peeress.

A ROMANCE OF FIFTY YEARS AGO.

Diana Blake's Dancing Won a Husband and Position.—She Left the Stage for a Home in England.

Forty years ago Eighth street, from Market to Arch, was bordered with two story houses, most of them contemporary with 1820 and given over to small notion stores, the proprietors living in the second floors. The business done was very limited, old Mrs. Harback making more money in her little candy store than any merchant on the street. Miss Rachel Lang kept a dry goods and trimming store in the neighborhood of Eighth and Filbert. She was a kindly old Scotch lady, who would as soon have had a man behind her counter as a German band before the door.

So all her assistants were girls. Gloves were the only men's wear sold in this shop, and Miss Lang noted with satisfaction that her sales in this line were rapidly increasing, but it never occurred to her that this was due to any other cause than the excellence of her goods, although in fact her gentlemen customers cared very little for the price and quality of what they bought so long as they were waited on by Diana Blake, who was generally admitted to be the loveliest girl within the city limits.

Long nosed, sallow faced ladies, with undeniable social records and pockets full of money, often visited the store and wondered by what caprice of fortune a common Irish shop girl should have had such a dower of beauty which in the fitness of things ought to be the inheritance of women having Quaker ancestors and big bank accounts.

AS A SHOP GIRL.

One of them went so far as to suggest to Miss Lang that Miss Blake's good looks were too apparent for her station in life, but went away much offended when the little Scotch lady remarked "that if every one minded their own business we would all get along better."

Diana was born in Galway, Ireland, but had come to America when an infant. She was a type of that Irish beauty as scarce in these days, according to John Brougham, as hens' teeth. Dark blue eyes, like wells of living water, shaded by long, dark lashes, blue-black hair, and a complexion that was simply marvelous, were added to a sweet voice, graceful form and manners at once piquant and modest. Her father was a day laborer, and the family lived in Chester street, above Race.

Although Diana fully appreciated the exigencies of her position, there was one temptation she could not forego, and that was dancing. When only 6 years old she had taken lessons from Signor Julian, who had a school at Tenth and Vine streets. The fact that he was an Irishman named McCaskey did not make him less efficient as a teacher, and when his pupil was 12 years old he secured her employment at the Walnut Street theatre in one of those elaborate ballets that so delighted our unsophisticated grandfathers. Her talent soon won recognition, and the dollar she received for each performance did much for the family income.

DANCING WINS A HUSBAND.

No whisper of this had reached her employer, and it was not until she was 18 that Manager Wood made her an offer of $18 a week and it became necessary for her to quit Miss Lang. That lady was a good Presbyterian, and looked on the stage as the broad road to destruction, but Diana justified herself through the family necessities, and she now went on the stage as danseuse premiere and took the name of Sophia Lee.

Her success was pronounced from the first, and the jeunesse doree, represented in those days by gawky young gentlemen in gorgeous vests and clashes so tight that they looked as if skewered onto the wearer, paid the pretty dancer many squeaky compliments, at which she laughed good naturedly, though she discreetly kept her admirers at a distance.

About 1843 one of the Barings, a nephew of Lord Ashburton, visited this country and was welcomed by the best society with effusion. With him came a young Englishman named Richard Hardy. He saw Miss Lee at the theatre, was struck with her grace and beauty and secured an introduction. He was a thorough gentleman, and addressed her not as a professional but as a lady.

Diana fell in love with a rapidity that startled herself. After a month's quiet attentions Hardy spoke out. He loved her and wished to make her his wife. She spoke to kindly Billy Wood the manager. He played the part of heavy father to perfection; pointed out the evanescent character of success on the stage, the hardships and perils of professional life and advised her not to neglect an opportunity of securing a position at once permanent and honorable, as he had no doubt that her avenir as a wife would be a happy one.

A BEAUTIFUL WIFE.

Diana accepted Hardy, and they were married at St. Joseph's by Father Harbelin. In society it was regarded as a distinct mesalliance; the bride poor, an Irish girl and a stage dancer; but Hardy and his pretty wife cared nothing for the opinions of the broadbrims and Aminadab Sleeks that prevailed then in Philadelphia, and left at once for New York. Before the honeymoon was over the first trouble came. Hardy's father warned his son that such a marriage would end all intercourse with his family, but Richard had means of his own and found no trouble in getting employment.

In less than a year old Hardy relented, and his son and wife left for England to find the father's wealth swept away by reverses in trade.

Sir James Hardy was Richard's uncle, and the head of the family. He was enormously wealthy, and had but one son. He also resented the union his nephew had made, and dying about this time, left him out of his will. Between the inheritance to his vast Kentish property and Richard Hardy were the lives of eight people, and yet, by the caprice of fortune, all these vanished in two years and Richard became a baronet and his wife Lady Hardy.

She took her place in society with a grace and dignity that were natural gifts, and grew more beautiful as time went by. Her first sorrow was the death of her husband. She was then 30, with one son. Two years after she married Count Egmont, a Flemish nobleman of distinction connected with the Russian embassy at Paris, and when presented at the court of the emperor was regarded as one of the most beautiful women in Europe. She survived both her last husband and son, dying in 1869 in Brussels.—Philadelphia Times.

Of 297 popes, four were strangled in prison, eighteen were known to have been poisoned and forty-two met with other forms of violent death.

WRITING TO MEN.

A Suggestion as to How Young Girls May Address Their Male Friends.

The other day a young friend of mine sat on a low stool, a writing pad on her knee and a big pucker on her brow. Presently she lifted two despairing eyes to me and said helplessly:

"I am writing to a gentleman whom I have never met, but with whom I have had considerable correspondence. He has been very kind to me in a delicate way, and I am writing to thank him. How shall I address him? 'My dear sir' sounds so cold, does it not?"

"It certainly does," I replied, laughing at her perplexity, "if the gentleman has been kind to you he deserves something a trifle more friendly than that. Why not begin the note 'My dear Mr. Blank?'"

She dealt me an unmistakable look of consternation. "What!" she exclaimed, in a tone fairly bristling with disapproval and resentment. "Why, he is married!"

"Well," I said, laughing outright, "what if he is married? It is not going to break his marriage vows for you to address him as 'Dear Mr. Blank.' It is a mere matter of form, so common, indeed, that it means nothing save that you have a kindly interest in him. It is a beautiful way to begin a letter—warm enough to be friendly, sufficiently brief to be business like, and cool enough to be formal. Put 'my' before the adjective and you increase the formality, just as the close of the letter 'I am yours sincerely' is more formal than simply 'yours sincerely.'"

"Well," said my young friend, drawing a long breath of relief, "that is perfectly lovely, if you are sure about it. Why, a few months ago I wrote a letter to a gentleman and addressed him as 'dear Mr. So-and-So,' and Aunt Helen saw it, and from the way she looked at me I thought I should die of mortification. 'Is it possible,' said she, and I wish you could have heard the emphasis—it was tragic, 'that a niece of mine has come to this? To call a man dear!' I tried to explain that I didn't mean anything, but she only moaned and wrung her hands, and said I was on the road to destruction. I felt dreadfully about it, because I thought she ought to know, and to this day I have never written 'Dear Mr. Anybody.'"

"But," said I, "consider. Your correspondent is a 'sir,' and he is a 'mister.' Why should 'dear mister' be more familiar than 'dear sir?' Again, as 'my dear sir' is considered more courteous and elegant than 'dear sir,' so I think 'my dear Mr. Blank' is preferable to 'dear Mr. Blank.'"

The rose lips smiled, and so did the violets above them, and I observed that "my dear Mr. Blank" grew beneath the firmly held pen on the smooth paper, and woe is me if ever Aunt Helen learns that I have traveled her crooked stitches out of the fabric of my young friend's mind.—Ella Higginson in West Shore.

The Indians' Regard for Snakes.

The North American Indians will not kill a snake in their path. They hold it in reverence, and although they select great numbers of them to use in their snake dances they never kill them, but when the ceremony is finished take them out on the plains and release them.

Some Zuni Indians from New Mexico with whom I became acquainted refused to repeat their folk lore out of doors for fear the rattlesnakes would hear them.—St. Nicholas.

Why destroy present happiness by a distant misery, which may never come at all, or you may never live to see it, for every substantial grief has twenty shadows, and most of them shadows of your own making.—Sydney Smith.

TO MAKE THE BEST FOOD.

Mrs. Ellen H. Richards, Instructor in Sanitary Chemistry in the Massachusetts Institute of Technology, says: "Baking powders prepared from soda and cream of tartar chiefly are, when put up in tin cans with the maker's name and label, much more reliable than any other form of bread-raising preparation."

Many receipts are given in cook books and newspapers for making biscuit, cake, muffins, crusts, etc., in the old-fashioned way with sour milk and soda, or cream of tartar and soda. In every such receipt much better results will be obtained by substituting the Royal Baking Powder for the sour milk or cream of tartar and soda. Exactly the same gas—carbonic—is produced, but with the Royal Baking Powder there is avoided all alkalinity or acidity in the food, one of which always results from the old-fashioned methods because of the impossibility of mixing the cream of tartar and the soda or sour milk in the proper proportions. Besides, the cream of tartar bought from the shops by the housekeeper is always impure, frequently containing alum, lime and sulphuric acid, while the cream of tartar employed in the manufacture of the Royal Baking Powder is specially refined and chemically pure. With the use of the Royal, therefore, the food is rendered not only more perfect in appearance and taste, but more wholesome.

The British Museum is not very old, but it has been an industrious as well as an intelligent collector. It was started in 1755 and has now twenty-five miles of books and a greater number of curiosities than any other like institution.

STILL BRIGHT AND BOOMING.

Many bright and useful publications come round to us annually and the sight of them is as refreshing, and welcome as the faces of friends on New Year's Day. Friends' faces are kept in remembrance; good books for reference, inasmuch as they lead and teach us what is to be done in many painful straits. One such publication, always foremost, is before us, brimful of sound advice and the raciest bits of fun, original and copyrighted, from the pens of such noted humorists as Bill Nye, Opie P. Read, Danbury-News-Man and others. It is a free gift of the season at the Druggists' counter, and will be sought for as the highly popular St. Jacobs Oil Family Almanac and Book of Health and Humor, 1893. The work differs somewhat from its former editions, but is none the less attractive and in many of its features is the superior of former numbers. One special feature is the "Offer of One Hundred Dollars," open to all contestants, the details of which a perusal of the book will more fully give. The almanac is sent forth by The Charles A. Vogeler Company, Baltimore, Md., proprietors of some of the best known and most reliable medicinal preparations. A copy will be mailed to any address on receipt of a 2-cent stamp by the above firm.

STEREOTYPING.

A Process That has Revolutionized the Art of Newspaper Printing.

IT WAS FIRST INVENTED IN PARIS.

By Its Aid a Great Advance has Been Made in Rapid Presswork in the Past Twenty-five Years.

Of the thousands of people who glance over the pages of a newspaper few have any idea of the work necessary to be done to make the paper what it is. The old saying that "half the world doesn't know how the other half lives" applies perhaps with more force to the readers and the makers of a newspaper than to any one else. This is especially true in these days of modern improvements, when the newspaper man has called to his aid so many of the devices of science, and is constantly absorbing the followers of other callings, besides bringing into being arts that were before unknown.

Among these latter the art of stereotyping, though perhaps little known, is most important and, indeed, essential in the lightning rapidity of today. Every "perfecting" press absolutely requires the use of either stereotype or electrotype plates; and as the latter are much more costly, besides requiring more time, stereotyping is used almost without exception. The type itself could not be used on these presses, mainly because the curves of the cylinders on which the plates are placed are too small. They are made thus small in order to admit of greater speed.

Besides this, if type were used on these presses the forms would have to be reset as many times as there were single presses, and here again the increased time and cost compel the modern newspaper man to look in some direction for relief.

The forms, therefore, must be duplicated by some process or another without causing any serious loss of time or any great expenditure of money. Stereotyping fulfils these requirements.

INVENTION AND GROWTH.

The papier mache process of stereotyping was invented about the year 1845 in Paris. The credit of the invention lies between a Frenchman and two Swiss, James Delegani and Louis Quanchi, all of whom worked in the same establishment in Paris. Not much headway was made for a long time, partly because of the opposition of printers, whom it was thought the invention would throw out of work. So great was this opposition that in the revolution of '48 the only establishment in Paris was wrecked by the mob, and the proprietor, Quanchi, was forced to flee for his life back to Switzerland. He afterward returned, and on one occasion was paid 500 francs by a man from London for the privilege of looking on at the operation. His son is now foreman of The New York Herald.

Delegani went to London, established a shop, and soon after, in 1854 or 1855, began stereotyping the first paper in the world to use the process, The London Times. At first the plates were cast in single columns, and part of the paper was printed from type and part from plates. After a time they began to stereotype whole pages, and made such progress that on the receipt of the news of Lincoln's assassination in 1865 a plate was completed in thirty-five minutes, then remarkably good time.

The process was introduced in this country by John Duncan in partnership with Charles Craske. For a long time they met with no encouragement, and after five years, being $400 behind, Duncan retired from the partnership in disgust and left the business entirely to Craske. A singular commentary on the shrewdness of successful business men is here to be found in the fact that Hoe & Co., the press builders, were violently opposed to the new process. It is safe to say that no single firm in the world has profited more by the invention than this one, which thirty years ago fought so strongly against it.

PLATES FOR BIG DAILIES.

In the latter part of 1860 a suitable press was completed for The Tribune, and that paper was the first one to be stereotyped in this country. Mr. Craske owned the plant, took the work by contract, and employed James Steele, Frank Ferris and others, who had learned the secrets of the business.

In a short time all the other big dailies took up the new art, and for a number of years Craske held the contracts for nine papers in this city, and had in fact a monopoly. At the present time there are upward of thirty papers stereotyped in this city, employing 140 men. To the uninitiated the number of plates required on our big dailies is astonishing. The Sun, for instance, uses every day no less than 150 to 200. The Herald requires over 250, and The World, morning and evening, from 300 to 400.

On Saturdays these figures are doubled, and The World alone "consumes," to use a fitting expression, about 750 plates, every one, of course, being the size of a page and never used but once. After once using the plates this eighteen tons of metal, more or less, is remelted, and nothing is lost except what goes up in smoke.

If "the height of art is to conceal art," then the stereotyper must be awarded "the cake." It requires an expert to tell, from its appearance, whether a paper is stereotyped or not. It seems a characteristic of the trade to work quietly and effectually. They have a model trade organization and have few quarrels with employers, and why should they? Possibly, the poet managed a paper and had the stereotypers in his mind when he said they have

Made a solitude and called it Peace.

—Edwin Arlington in Journalist.

A Diet for Rheumatic Gout.

Dr. John Cutter, of New York, tells of a woman who had been three summers at one of the large sanitariums, but received no benefit. The doctors at the sanitarium told her rheumatic gout was a fiend and incurable; that milk was a perfect food, though in this case it clogged the liver so as to cause serious trouble; that beef was unclean and not fit for food, etc. She went on a diet of meat and a little bread, as vegetables caused bloating, and in three weeks saw decided improvement. A finger that she had not been able to bend to the palm was able to touch it without pain.

Doubtless not a few of the cases of large waists and bloated figures among women, all which are on the way to fevers and rheumatisms, would improve by the strict diet of scraped beef pulp broiled, with toasted brown bread, with little sugar or starchy food.—Shirley Dare in New York Herald.

The onion has a virtue to which thousands of people will swear. This is its ability to ward off attacks of malaria in any form, and to cure cases as rapidly as the strongest doses of quinine.

AN ODD SUPERSTITION.

To See the Goddess Kiss the Washington Monument Brings Good Luck.

The Washington monument leans against the blue sky, a great white shaft, and it towers nearly 200 feet above the Capitol dome, which stands on a hill about a mile away. The Goddess of Liberty is of bronze. She weighs 14,000 pounds, and she stands erect on a great bronze globe on the cap of the dome, measuring 19½ feet from her toes to the tips of the feathers which crown her head. She is a woman of wonderful beauty, and as a Pennsylvania railroad train carries the statesmen out of Washington it goes around a part of the city in such a way that the traveler looking from the windows sees this great figure of the Statue of Liberty coming nearer and nearer to the Washington monument until at last the two are in direct line with his eye, and the great Goddess forms a black silhouette against the pure white of the monument.

This view of the monument has to be caught on a train going at the rate of forty miles an hour. There are a number of car tracks just at the point where it becomes visible, and a passing freight car will shut it out. It can only be seen for a second, and only one time, perhaps, in a dozen trips. Public men leaving the capital on missions keep their eyes glued on the windows, and if they are lucky enough to catch the combination they expect to find their missions successful. If not, some of them feel the superstitious dread of failure assured, and it is strange how many times they are correct.

When Hansbrough went home to seek for a re-election to congress he kept his eye glued on the goddess from the time the train left the station, but just as he was about to see her kiss the monument a freight car rushed in, and the moment passed. He went to Dakota, and failed to get his election. At another time he was left to make his fight for the senatorship. But I will let him tell the story himself.

Said he: "I watched the Goddess as we left the depot. The tracks were full of freight cars and I feared I should miss it. Senator Farwell was with me and he also kept his eyes toward the Capitol. As we went out of the city freight cars increased, and as we neared the point where the two come together the track was full of them. I kept my eye on the window, however, and I just caught a view of the Goddess against the monument between the cars of a passenger train. I was leaning over and watching closely as I did so, and when the two came together I excitedly clapped one hand against the other saying, 'I've got it!' and I nearly scared the wits out of an old woman who sat in front of me and who must have thought I was crazy.

"Well, I went out to Dakota and secured my election. I don't, of course, believe that the monument and the Goddess had much to do with it."—Washington Cor. Philadelphia Press.

Curious Lore About Mandrake.

Perhaps the most extraordinary of the properties attributed to mandrake are those which it shared in common with the rastrivtrava of Russia, of enabling housebreakers to pick locks, which is certainly one of the most amusing developments of the solar theory. "Love," it is said, "laughs at locksmiths," but the connection between the mandrake and "burgling" seems a little forced. There is a tradition that the moonwort will unshoe horses if they step upon the plant, and similar powers have been attributed to the vervain and the mandrake.

It is, on the other hand, still part of the rural lore of Oxfordshire, Buckinghamshire and Hampshire that the root will improve a horse's condition; but this seems to be founded upon the identification of the mandrake with the bryony, which played such a great part in old English herbalism. It is, however, more than doubtful whether the plants belong to the same class. But both are alike in the curious wealth of legend which surrounds them. East and west meet in their folk and flower lore.—Chambers' Journal.

If You Own a Summer Place.

Did the reader ever have a place in the country? If he has and does not want to grow sick of it, or if he has none, but hopes to have one, and does not want to be forced to give it up in disgust, let me give him a piece of advice. Don't undertake too much. Have only 500 square feet of grass, and one tree or half a dozen shrubs, but have all of the best. Dig deep, fertilize liberally, plant the best grass seed and plenty of it, set out the largest trees and shrubs that will be likely to grow, and care for them tenderly, year after year. Dig about them and prune them, and spare no pains to make them the best of their kind; or, let me say at once, that the reader's delight in nature and his desire to imitate her effects will not prevent the failure of his lawn planting.—Samuel Parsons, Jr., in Scribner's.

Business of State Delayed.

Anent Lord Granville's devotion to whist there is the following well authenticated story:

One afternoon, intending to set out for Paris, he ordered his carriage at Graham's at 4. When it came around he was playing whist. At 10 o'clock he sent out to say that he should not be ready for an hour or two yet, and that the horses had better be changed. Again six hours went by, and the coachman appearing was ordered to change them again. Three times at intervals of six hours were fresh horses put in before he was ready to start. When the party rose they were up to their ankles in cards, and the ambassador, it was reported, was the loser to the tune of £8,000 to £10,000.—Boston Globe.

He Buys Gold.

Frank Mangin has one of the strangest hobbies in the world. He comes on the floor and takes a seat and pulls out a roll of greenbacks. There he sits all through the session; and what do you suppose he is waiting for? Only to buy gold! Every man on 'change who has a few pieces of yellow money can get bills for it by applying to Mr. Mangin. The boys all patronize him, and he goes away every day with his pockets loaded down. I once made bold to ask him what he did with the stuff. He was angry in a moment, and told me it was none of my business, and told me in a way that I have never ventured to ask any more questions concerning it.—Chicago Letter.

One Letter Wrong.

A transposition of letters in the same word sometimes produces the most ludicrous results. In "The Still Hour," which was written by Professor Phelps, is the fine line, "The stillness of the hour is the stillness of a dead calm at sea." A large number was printed and disposed of before it was discovered that "clam" had been printed for "calm."—Providence Journal.

A Live Issue.

"Do you believe our ancestors carried tails?"

"Botheration! Who cares? Why don't you ask if they carried pocketbooks?"—Puck.

IN LONDON TOWN.

It is not here I best enjoy
The pleasure that can never cloy,
Of idly roaming London town,
Where such familiar names look down
Upon the wanderer in the street,
From Cheapside, Cornhill and the Fleet.
The noisy, pushing, bustling crowd,
The din of trade and traffic loud,
Confuse the too bewildered sense
And drive a thousand memories hence.
When in the quiet town once more,
Where not a murmur of the roar
Of busy trade or loud displays
Disturb the quiet of her ways,
Backward my soul will turn and then
Will walk these London streets again;
While wits and poets of years gone by,
Who now in dim cathedrals lie,
Will meet me where their memories make
The places dearer for their sake;
And with their shades perchance a few
Of living forms shall mingle too.
So, often when the daylight dies,
Shall I at evening close my eyes
To walk again the Strand, the Fleet,
And every dear familiar street,
And, undisturbed by din or roar,
Find every house and nook once more.
My London, which I carry west,
Is peopled only by her best.

—Walter Learned in Century.

Air the Bedding.

I wish that more people who take upon themselves the care of guests knew how to take proper care of bedding. In the nature of things it is not possible without a great expense to have the covering of mattresses and pillows frequently renewed; therefore every pains should be taken to keep them fresh. It is a common thing to leave rooms which are unoccupied fitted up ready for a guest, with even the sheets and bed covering on the bed. In this way the bed gathers dampness in a cold, unaired room for a long time, and the most serious consequences may result to the first unfortunate guest who occupies that room.

Whenever a room is unoccupied for any length of time the bedclothes should be put away in the linen closet, and the mattresses lifted up from the bedstead, so the air can strike it on all sides. It is a moment's work to dust the bedstead, replace the mattress and make up the bed with thoroughly aired bedclothes, and the refreshment that is experienced from a sleep on such a bed compared with the nightmare of an experience in a room where the bedding has not been aired for perhaps six months more than pays for the trouble. It is a positive injury to a good hair mattress to keep it without properly airing and turning it for months.—Margaret Fairfax in Boston Commonwealth.

Women Who Buy Wedding Rings.

"I see that the old conundrum, 'Is marriage a failure?' isn't so often propounded as it used to be," remarked a jewelry salesman. "Now, if any one ought to be able to answer that little inquiry, you have struck the right party," he added, in reply to my question as to what he had to say about it. "Just at present marriage seems to be a great success. The matrimonial pot is boiling at a great rate in all classes of society. How do I know it? Why, because of the enormous demand for engagement and wedding rings. The curious part of the business just at present is the great many sales we make to women. Why, bless your heart, the women are not at all backward if you take them right.

"Only today I sold four wedding rings to women who came here with the men of their choice. The women paid the bills and seemed happy at the chance. Engagement rings run pretty well, but when the gentleman is short of the funds the lady somehow or other comes to the conclusion that she can get along without an engagement ring. Our business is mostly with the middling and poorer classes."—New York Telegram.

New Social Entertainment.

"Observation parties" are the latest thing in society. An observation party affords a great deal of amusement, and in addition displays the fact that few persons are either good observers or have good memories. The members of the observation party are asked by the host to observe the furnishings of the dinner table, for instance. Then they are given five minutes to write down a list of the articles that are on the table. The person whose memory is best and who can write down within the prescribed time—five minutes, say—the largest number of articles on the table is awarded some sort of a prize.

At one observation party the other evening one young lady was able to remember and write the names of but seven articles that were on the dinner table. The "observation party" as a form of social entertainment is novel, and may be useful in assisting persons to form the valuable habit of correct observation.—Cincinnati Entertainment.

Ungrateful Heathens.

The missionary field seems to have usurped the functions of the rag man and the ash barrel to a certain extent. A woman missionary just home from several years of service in India says the boxes of clothing received by her for distribution among the heathen were a sad commentary upon the charitable missionary spirit of the American women.

"The boxes I received from New York city last year," she said, "among other things, contained over 2,000 corsets, 700 pairs of rubber garters and 3,500 dresses which were ribbed with steel and whalebone. Of course the natives absolutely refused to wear these instruments of civilized, fashionable torture, and the corset business in India has never obtained a foothold. Some of the dresses were available after being cut to pieces, but the India native woman knows nothing about the use of garters, and the entire consignment of second hand stock from Gotham was a dead weight on our hands."—Chicago Mail.

For rich morning gowns the Persian patterned silks, soft and lustrous, are most attractive. Small palm leaves in richly blended colors appear upon grounds of old rose, cream yellow, dove gray and pale green, and in making up even silk embroideries are lavishly used as a trimming.

Queen's college, Oxford, has just celebrated the 550th anniversary of its foundation.

FRIDAY, MARCH 25..... 1893

A Novel World's Fair Idea.

Is it worth while to offer a suggestion for the next vast assembly in Chicago—that of May, for example? Is it worth while to set the American people thinking about the difference between what appeals to the eye and what to the ear? If it be, let the value of the pageant be considered. Let us imagine a vast room, or a great space in the open air, with a dias, on which the colors should be effective and harmonious. Let there be standards and floral decorations in abundance, arranged by some artistic hand. When the few chief dignitaries have been received, let other representative people be brought forward in groups bearing emblems or symbols which indicate their claims to consideration. Let delegations of the various professions and arts, in their appropriate robes, uniforms or traditional dresses, be introduced.

Let the workmen in every craft—the workers in wood, iron, brick, stone, the architects, sculptors, painters, decorators, manufacturers, engineers, carriers—all who have been concerned in making the exposition a success—send their representatives to participate in the opening ceremony. A simple act, the bestowal of medals, wreaths, flags, would give point to the assembly. A sentence from the mouth of some high official, a collect and a doxology would express all that language need say on such an occasion.—Professor D. C. Gilman in Century.

Electric Heating.

Electricity generated for heating or for any other purpose must be produced at the cost of the expenditure of some other form of energy, such as the burning of coal or the force of falling water. As the latter form of power is hardly available for use in New York, it follows that if electric heating is to become a commercial phase of life in that city, current will be supplied to consumers from central stations in which coal is burned under the boilers, precisely similar to existing plants for the supply of light and power. The conversion and transmission of heat by this process is not economical, and current from coal burning stations in sufficient quantities for heating could only be used by the wealthy, to whom its convenience and cleanliness would commend itself.

It is apparent, however, that the "coal barons" would have nearly as much to say about the supply of fuel to such stations as to individual consumers at present, although it is probable that the mere cost of coal and labor would be proportionately reduced by the use of cheaper grades of fuel and by centralization. Doubtless electric heating has a great future, but at present it seems to be principally available in localities where water power can be utilized in the prime movers.—Chicago Western Electrician.

The Ratemaking Power.

This is what Aldace F. Walker, chairman of the joint committee of the Trunk Line and Central Traffic associations, says about railroad rates in The Railway Age and Northwestern Railroader: "The fact is—and it is so often overlooked that it must be stated strongly—the ratemaking power of a railway company is its highest corporate function. It is a charter power. Its control rests ultimately in the state. In acts of incorporation this power is universally conferred upon the boards of directors—the highest seat of corporate authority. It should have been treated with seriousness and as representing the most important duty of the several boards. But instead of this our country has been treated to a carnival of rates—rates—rates. Hundreds of thousands of tariffs have been filed in Washington during the last five years. The directors of every corporation have practically abdicated this most important duty and have left it in the hands of subordinates, who have patiently developed a most ingenious confusion through which they alone are competent to pick their way."

The Color of the Waistcoat.

Life learns from private sources that when a gentleman goes to an entertainment to which he has received an engraved invitation he should wear a white waistcoat. If the invitation is written, he simply wears the usual black waistcoat. It is perhaps unnecessary to inform our readers that the man who ignores this rule is no gentleman. Still we hardly like to advise a hostess to eject from her house every man whose waistcoat is not in perfect harmony with his invitation.

It is not to be expected, however, that his welcome will be as warm as if his waistcoat were what it ought to be. Should he be, for instance, a distinguished author, a high church dignitary or an eminent scientist, the hostess might allow him to sit in the kitchen rather than have him ejected from the premises.—Life.

A Lake That Cannot Freeze.

In the vicinity of Chestertown there is a picturesque lake which, because of the fact that it has never been known to be ruffled or disturbed by the most violent storms, is called Still pond. This pond has never been known to have even a skim of ice on its surface, and during the recent intense cold weather was not frozen, but was a favorite resort for waterfowl.—Cor. Baltimore Sun.

Steam and Electricity In a Tug-of-war.

At the T. H. E. works in West Lynn a few days ago a locomotive was coupled to a mammoth electric motor, and power was applied to them in opposite directions. Neither one gained a particle for quite awhile, but finally with the aid of sand thrown on the track the locomotive came off victorious.—Boston Record.

A pistol ball was recently removed from the right thigh of a man which had been there since 1864. The ball, it is said, had gravitated about a foot and a half through the flesh in the last 29 years.

The consul of the Argentine Republic at Bangor, Me., was called upon recently for the first time in 20 years to affix his seal and signature to a document.

Charity Brightens Their Honeymoon.

Councilman John McWaters and Mr. Charley Jones had perhaps the rarest experience of any of the gentlemen who were engaged in the work of distributing help to the poor. Sunday afternoon these two gentlemen had charge of a wagon together, and many loads of provisions and clothing did they deliver to deserving poor. The name of John Jones of 56 McDonnell street was given them, and they started for the place. They had some difficulty in finding the number designated and inquired of some one near by where they could find 56.

"It's rite down dere," said a youth, pointing toward the place, "an if you fellers will hurry up you'll see a weddin, 'cause John Jones is gettin tied up terday."

They stopped in front of 56, and John Jones, a white man who follows the occupation of carpenter, came out. He was not richly dressed, but he was not on the extreme ragged edge by any means.

"What about getting married, John?" asked Mr. Jones.

"I've been a-thinkin about it," replied Mr. John Jones, "an I'm mighty glad to see you people come, 'cause I need help."

Mr. McWaters and Mr. Jones delivered a liberal allowance of provisions to the groom, and after they had done so he said:

"Gentlemens, if you had been here about 10 minutes sooner you could have been at the weddin. I got married before you drove up."

The two dispensers of charity offered their congratulations.—Atlanta Constitution.

Greece Soon to Be an Island.

The scheme for cutting a canal across the isthmus of Corinth has had its periods of trouble and depression, like other and greater enterprises of the same character, but it appears to be now rapidly approaching completion. The concession was originally granted by the Greek government in May, 1881, to General Turr, with whom was associated M. de Lesseps.

After the original capital had been absorbed and the operations for some time suspended, the operations were taken up by a new company, who in 1890 entered into a contract with a firm who undertook to complete the works on March 10, 1893, under a penalty of £4,000 per month for any delay after that date, but unfortunately about this time last year a waterspout passed over the works, flooding the excavations.

The disaster necessitated a slight extension of the term, but the contractors now promise that a large steamer will go through the canal on the 23d of April next. Great efforts are being made to render the system of lighthouses adequate. The Corinth canal, which will have cost from first to last £2,750,000, will be lit by electricity, with two powerful lights at each end and a row of lights through its entire length.—London News.

Portable Pianos.

An invention, which would be a fortune to the inventor and manufacturer, is a portable piano—that is, a keyboard of six octaves, inclosed in a plain case 41 inches long, 18 inches broad and 8 inches deep; each note to be very faint, but pure, distinct and as correct in tone as the best pianoforte manufactured; part of the top of the case to open and show the keyboard, with a small folded easel for the music to rest upon, the other part of the top to open to allow of the instrument being tuned.

Such an article would be invaluable, as it could be placed on a writing table or dressing table in a bedroom, and the tone being faint its use could not annoy other people when the amateur was practicing. It could be carried about in a leather case as ordinary luggage, and when not in use could stand in a corner of a sitting or bedroom. The price should be moderate, as such an instrument would be sure to become very popular.—Philadelphia Record.

Our Lessening Trade With Spain.

An old export house with European connections, doing a large business in Great Britain and on the continent, has called our attention to the large falling off in trade between the United States and Spain. About a year ago the Spanish customs authorities issued an order demanding that a certificate of origin should accompany all goods entering that country, which practically has resulted in discriminations against goods from the United States. Heretofore orders taken by European travelers for German or other houses could be executed from here, and the fact that they were rebilled by German merchants, for instance, was sufficient to enable them to enter Spanish territory under conditions covered by the favored nation clause. Now that has been changed, to the detriment of American shippers.—Iron Age.

A Lover's Clever Trick.

John Kleunman has been working for John Miller in West Lincoln, Ills. Kleunman became enamored of a daughter of his employer, and the maiden reciprocated the affection, but Farmer Miller resolutely forbade the marriage. The lover then went to town and had a warrant sworn out for the arrest of his intended father-in-law. The daughter was then summoned as a witness, and while the father was waiting for the trial the couple quietly slipped around the corner to a justice and were married. The suit against the old man was dismissed.—Cor. Indianapolis Journal.

Death From a Barber's Razor.

The death of Mr. John Terry of Rector street from a malady brought on by a slight cut in the face which he got while being shaved ought to be an admonishment to barbers. The wound inflicted by the razor in the barber's hand was very slight, but it was the means of admitting into Mr. Terry's system some baneful substance, which may have been in the lather, or on brush, sponge or towel, or on the barber's hand. The result was blood poisoning, from which he died in a week after he had been cut.—New York Letter.

A Common Word Just Now.

"How do you pronounce the name of the island kingdom which wants to be annexed to the United States?" is a question frequently propounded and variously answered nowadays. The most commonly accepted pronunciation, and the one authorized by Lippincott's, Worcester's, Webster's and the Century dictionaries, is, for the name of the principal island of the group, "Hah-wi-e," the second syllable accented, and the "i" pronounced as in "pine." The same question was once asked of a high caste Hawaiian lady, well educated in her own and the English language. She answered:

"The proper pronunciation is Hah-vah-e-e. There is no 'w' in our alphabet, and no letter nor combination of letters which take the sound of 'w' as in English. The missionaries who first translated our language found it difficult to pronounce or express the sound which is, to my ear, correctly conveyed by the letter 'v,' softened and made full. Our 'a' is pronounced broad, as you pronounce it in 'fall,' and our 'i' is like the English 'e.' The rule is to pronounce every vowel, and as the exception to the rule does not affect the double 'i' in Hawaii, you will see that the word is 'Hah-vah-e-e.'"

The insistence upon the "v" instead of the "w" sound is considered, even by some of the well educated and all of the uneducated, as something of an affectation, and one hears "Hah-vah-e-e" on the islands, instead of "Hah-wah-e," about as often as "vahse" instead of "vase" in American society.—New York Sun.

A Dog Trained to Steal.

Frederick Hampton, 45, described as a fishmonger of London road, Croydon, was charged before Mr. Biron at the Lambeth police court with stealing and receiving a lady's silk umbrella, value 7s. 6d., the property of Louisa Squires.

The evidence already given showed that on Saturday the prosecutrix was walking along Kennington Park road with an umbrella in her hand. She saw a trap coming along and a dog running behind. The dog came toward her, took hold of her umbrella and shook it, and she let go.

The dog then ran off with the umbrella in the same direction as the trap. The prisoner, who was driving, was afterward arrested, and upon searching the trap the policeman found seven umbrellas, including the one identified by Miss Squires.

A second case was gone into. Mrs. Henrietta Ray, the wife of Dr. Ray of East Croydon, stated that at the beginning of last month she was walking along London road, Croydon, in company with two other ladies. The witness was carrying a sunshade. A dog suddenly ran up to her, snatched her sunshade and ran after the trap, in which there were two persons. That morning she saw the sunshade at this court.—London Graphic.

Dressing For Shoes.

How difficult it is in winter to keep one's feet even presentable in appearance! Sidewalks are sloppy, crosswalks are muddy, and the air is so cold that it hardens shoe leather until it is no unusual thing for it to crack and become sorry to look upon. Nothing can be done actually to prevent the season from telling upon the wearing qualities of shoes, but a great deal can be done to prevent them from becoming so badly injured as they might otherwise be.

When shoes have become very muddy, the worst of the mud should be knocked off with a thin strip of hard wood, which should be kept for the purpose. A very stiff brush will then take off the rest of the dirt. Now, apply a dressing made by mixing 2 drams of spermaceti oil, ½ pint of vinegar, 3 ounces of treacle and 4 ounces of finely powdered ivory black. The vinegar should be added last. This will make the shoes look almost as well as they did before their rough treatment.—New York World.

Improving the Ballot.

The Australian ballot system, while a good reform in the main, has several features which need amending before it can be accepted as an almost perfect and honest mode of voting. As it now stands, thousands of voters have been disfranchised by the misapprehension of not being allowed to stamp opposite a candidate's name after having once stamped the party emblem. Let there be but one way of voting, by stamping the square by the side of each person that you wish to vote for. A voter once instructed to stamp the square to the left of each person that he wished to vote for will not only not confuse, but actually expedite voting. Another feature of the law which should be changed is the ease with which a partisan board can throw out ballots as defective. As protection in the right of voting is secrecy, so should the ballot be protected after it is cast, so long as the intent of the voter can be ascertained.—Noblesville Ledger.

Over $25,000 For Towing a Steamer.

The British steamer Ohio has received an award of £5,500 for her services in towing into Queenstown in December last the Red Star line steamer Noordland. The shaft of the Noordland broke while she was bound from New York for Antwerp, and while she was thus helpless she was taken in tow by the Ohio and brought safely into port.—London Letter.

A General Designation.

The negro editors of Georgia, representing 12 papers, have issued an address in behalf of the advancement of their race. They recommend that instead of "colored" the word "negro" be used and spelled with a capital letter.—National Advertiser.

A sack sewer in a Pendleton (Or.) flour mill challenges the northwest for the championship on his record of sewing up 600 50-pound sacks inside five hours, or about two sacks a minute.

Moses Loria, who was born in Mantua in 1814, died lately in Milan, leaving $3,000,000 to the city to establish an international home for laboring people out of employment.

ASSESSMENT NOTICE
LONE PINE CANAL COMPANY.

Location of principal place of business, Independence California. Location of works, Inyo county, California.

Notice is hereby given that at a meeting of the Board of Directors held on the 28th day of Jan. 1893, an assessment (No. 3) of Twenty five (25) cents per share was levied upon the capital stock of the corporation, payable immediately in United states gold coin, to the Secretary, at the office of the Company in the town of Independence, Inyo county, California.

Any stock upon which this assessment shall remain unpaid on Saturday, the 4th day of March, 1893, will be delinquent, and advertised for sale at public auction; and unless payment is made before will be sold on Saturday, March 25, 1893 to pay the delinquent assessment together with costs of advertising and expenses of sale.

DAVID HOLLAND,
Secretary.

WE WANT YOU
to act as our agent. We furnish an expensive outfit and all you need free. It costs nothing to try the business. We will treat you well, and help you to earn ten times ordinary wages. Both sexes of all ages can live at home and work in spare time, or all the time. Any one any where can earn a great deal of money. Many have made Two Hundred Dollars a Month. No class of people in the world are making so much money without capital as those at work for us. Business pleasant, strictly honorable, and pays better than any other offered to agents. You have a clear field, with no competition. We equip you with everything, and supply printed directions for beginners which, if obeyed faithfully, will bring more money than will any other business. Improve your prospects! Why not? You can do so easily and surely at work for us. Reasonable industry only necessary for absolute success. Pamphlet circular giving every particular is sent free to all. Delay not in sending for it.

GEORGE STINSON & CO.,
Box No. 488, Portland, Me.

MISCELLANEOUS.

THE ODELL TYPE WRITER.

$20 will buy the ODELL TYPE WRITER with 78 characters, and $15 for the Single Case Odell, warranted to do better work than any machine made.

It combines SIMPLICITY with DURABILITY, SPEED, EASE OF OPERATION, wears longer without cost of repairs than any other machine. Has no ink or ribbon to bother the operator. It is NEAT, SUBSTANTIAL, nickel plated, perfect and adapted to all kinds of type writing. Like a printing press, it produces sharp, clean, legible manuscripts. Two or ten copies can be made at one writing. Any intelligent person can become a operator in two days. We offer $1,000 to any operator who can equal the work of the Double Case Odell.

Reliable Agents and Salesmen wanted. Special inducements to Dealers.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 16 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South east corner of the south east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North-west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER.

Sunday Schools, Fort and Lone Pine 10 a. m.; Independence, 2 p. m.

A. W. D. Carrol is in town.

Bar Silver is still quoted at 83.

John Barnes of Keeler was in town yesterday.

They had sleigh riding down in Tehachipa last week.

F. P. Meysan was up from Lone Pine last Sunday.

Fred Burkhart of Lone Pine was in town yesterday.

President Cleveland was fifty-six years old last Saturday.

Supervisor Wilson was up from Lone Pine yesterday.

Jules Ferry, the eminent French statesman, died on St. Patricks Day.

O. I. Mairs started for Mojave yesterday with Messrs Stock and Vickrey.

Hay is hay these days. There is none for sale in vicinity of Independence.

The Directors of the Lone Pine Canal Company will meet at Independence tomorrow.

The Spring meeting of the Blood Horse Association begins April 1st at the Bay District.

It is a disputed point whether the new metropolis is named Millerville or Grubertown.

Jas. Jones has renewed his lease of the Hannah place at Fish Springs for the present season.

Deputy Sheriff Wilkinson came up from Keeler on Tuesday's train in charge of John Condito.

W. C. Pidge, Superintendent of the Inyo Marble Co. works at Swansea came up on yesterday's train.

Mrs. J. D. Blair returned home on last Friday's train from a visit to her daughter, Mrs. Church, at Hawthorne.

O. I. Mairs arrived home from Los Angeles last Sunday. Fred Holbert is expected to arrive in a day or two.

Sumner will incorporate soon. At a recent election held there the project was favored by a handsome majority.

R. Way went to Bishop last Tuesday to superintend the burning of a lot of lime to be used in constructing the new county vault.

It is reported that Colonel Sutherland has made the statement that the Holmes mine at Candelaria will soon be in operation again.

The Virginia *Chronicle* denies the report that there is any suffering among the families of miners out of employment in Virginia City.

Mr. and Mrs. P. H. Mack arrived home from Sacramento last Monday. After the Legislature adjourned they visited San Francisco a few days.

March is keeping up his time-honored reputation for blustering weather. The sun struggles out a little while in the morning but doesn't last long.

Mr. and Mrs. A. P. Smith and Gustave Sanger were in town this week. Ad. says that Big Pine will celebrate the completion of the Owens River canal some time next week.

J. C. Roeper went to Lone Pine on Wednesday, where he will probably remain for some little time. During his absence Rafael Diaz is in charge of the Independence Market.

On motion of the District Attorney of Esmeralda county in the District Court last Monday the case of Martin Brazzanovich, charged with killing William Robson, was dismissed.

O. I. Mairs says that W. K. Miller has greatly improved his stage line and has quite an extensive passenger traffic. He is running a four horse coach all the way through and makes good time.

John McBride has sent his Joe Hooker—Laura Winston stallion, Bronco, to Oakland to be trained. Bronco is just as well bred as anybody's horse, and barring accidents will make a good showing.

J. W. Lacey came up from Lone Pine on Wednesday on business connected with the estate of Wm. Meyer, deceased. Mr. Lacey has been in very poor health all winter and is barely able to be around now.

Master Harry Mack is the proud possessor of a nearly pure bred New Foundland pup, a recent importation from San Francisco. When full grown he will weigh about 100 pounds.

Good Horse Market.

The people of Mason Valley, Nevada, are wide-awake rustlers, and the Valley is prospering. Recently a number of stockmen clubbed together and paid the expenses of one of their number to go to Chicago and other Eastern points to inquire into the horse market. The emissary returned two weeks ago and reported good market at Kansas City and as the result eleven carloads of horses were driven to Winnemucca and shipped to that place, where arrangements are made for their disposal at good prices. There is no reason why Owens Valley horse raisers should not similarly dispose of a large number of good horses they have on hand. It has been the practice for years past to drive to Los Angeles and the prevailing experience there has been low prices and slow sales. Let us profit by the enterprise of our neighbors.

Held to Answer.

On Monday last Sheriff Gorman received a telegram from Keeler stating that a shooting affray had taken place there the evening previous. He went down immediately and returned bringing William L. Withrow with him. Withrow was examined in the Justice's Court yesterday and held to appear in the Superior Court charged with assault with a deadly weapon. He gave bonds for his appearance for arraingement and was discharged from custody. P. H. Mack, Esq. is counsel for the defense.

John P. Dunn ex-State Controller, has produced figures taken from the books of the Controller's office, showing that the amount taxes due and unpaid by the Southern Pacific since 1882 is $908,534 90, while Carpenter's bill proposes to raise $319,272 48, leaving a difference of $589,262 42. Besides this is the loss on county taxes, which amounts to $933,661.86, which makes a total loss under the Carpenter substitute of $1,552,624.28.

The Independence people who attended the St. Patrick's Day celebration at Keeler last Friday report a most enjoyable time. Mr. and Mrs. Barnes did all in their power to make the occasion a pleasurable one. Quite a number of Lone Pine people were present and many from other parts of the county. The sons of the Green Isle were gathered in full force and all agreed that it was "a bird."

On Monday last an Italian named John Condito, employed at the marble works, was arrested by deputy Sheriff Wilkinson and brought to Independence. Here he was examined on a charge of selling whisky to an Indian and held to answer in the Superior Court. Yesterday he gave the required bail and was released pending his trial.

Messrs. Stock and Vickrey started for Los Angeles yesterday. They expect to return the latter part of next week. The gentlemen expressed themselves as being very favorably impressed with Owens Valley and it is quite likely that they will do something toward developing the country.

On Monday Charles A Richel of Los Angeles arrived at Independence. Mr. Richel is interested in land and water at Bishop and spent several days at that place. He started for Los Angeles via Keeler on Wednesday.

The INDEPENDENT offers the regular prize for Spring poetry. First come first served. Don't be like the present Spring—backward in coming forward.

Constable Murphy returned on Wednesday from a trip to the southern part of the county. He was in search of de Leon's spring of hair vigor.

It is expected the water will be flowing through the entire length of the Owens river and Big Pine Canal by the end of next week.

G. Sanger is fencing all of his land along the line of the railroad. The C. & C. Company furnish the material and he does the work.

Proposals for Care of Indigent Sick of Inyo County.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California at the office of the County Clerk until, and not later than 10 o'clock, a. m., on Thursday, April 6, 1893, to contract for the care of the indigent sick of Inyo County for the term of one year beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amounts for which parties contracting will maintain all indigent sick properly admitted to contractor's care, on the basis of an average of four patients per day throughout the year; to include all medicine, nursing, board, lodging and washing, and the burial and funeral expenses of any indigent sick person who may die while under such maintenance and care. Said bids must designate the price per person at which all excess of patients over the average of four each day throughout the year will be cared for, such excess to be paid for by extra allowance on presentation of bills, duly verified at the regular meeting of said Board immediately after said contract has expired—the average of four per day to be paid for at the regular meetings of the Board, on bills duly verified, by warrants drawn upon the Hospital Fund of said county.

The person or persons to whom said contract shall be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of said contract.

The maintenance care and management of such indigent sick by such contractor shall be at all times subject to the inspection of said Board of Supervisors, or any member thereof or any person appointed by the Board for such purpose.

Bids must be indorsed, "Proposals for Care of Indigent Sick," and the same will be opened between the hours of 10 o'clock a. m. and 2 o'clock p. m. on said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

Proposals for Services of County Physician.

Notice is hereby given by the Board of Supervisors of the County of Inyo, State of California, that sealed proposals will be received by said Board, at the office of the County Clerk until 10 a. m., and not later, on Thursday, April 6, 1893, for the services of a Physician qualified under the provisions of "An Act for the Regulation of the Practice of Medicine and Surgery in the State of California," attending the indigent sick in charge of the contractor for the care of such persons for the term of one year, beginning May 10, 1893, and ending May 9, 1894.

Said bids to designate the amount per annum for which said Physician will give due and regular medical and surgical attendance upon said sick, and also all such services as may be required for prisoners in charge of the Sheriff.

The person to whom said contract may be awarded shall give a good and sufficient bond in double the sum of the contract price for the faithful performance of such duties. Said services to be paid for by warrants drawn upon the Hospital Fund, upon presentation of bills, duly verified, at the regular meetings of said Board.

Bids to be indorsed "Proposals for Service of County Physician," and the same will be opened between the hours of 10 o'clock a. m., and 2 o'clock p. m., of said Sixth day of April, 1893, and the Board reserves the right to reject any and all bids.

Proposals for Advertising Delinquent Tax List.

Notice is hereby given that pursuant to an order of the Board of Supervisors of Inyo County, State of California, made January 10, 1893, sealed proposals will be received for publishing the List of Delinquent Taxes of said County and State for the fiscal year 1892-93. The first publication thereof to be made on or within five days before or after the first Monday in June, from copy to be furnished by the Tax Collector. Bidders must state the rate per square of two hundred and forty ems nonpareil for the first and each subsequent insertion, for the time designated by, and including such postponements as may be ordered by said Tax Collector.

All bids must be endorsed "Proposals for Publishing Delinquent Tax List," and addressed to the Clerk of the Board of Supervisors, and will be received up to and not later than the hour of 10 o'clock a. m. of said day, and opened by said Board on Thursday, April 6, 1893, between the hours of 10 a. m. and 2 p. m. of said day, the right to reject any bid being reserved.

KENDALL'S SPAVIN CURE.

STAR, LANE CO., OREGON, Feb. 8th, 1892.

DR. B. J. KENDALL CO.,

Dear Sirs:—I have used your KENDALL'S SPAVIN CURE for the last twelve years never being without it but a few weeks in that time and I have made several wonderful cures with it. I cured a **Curb** of long standing. Then I had a four year old colt badly **Sweenied**; tried every thing without any benefit, so I tried your liniment, and in a few weeks he was well and his shoulder filled up all right, and the other, a four year old that had a **Thoroughpin** and **Blood Spavin** on the same joint, and to-day no one can tell which leg it was on. These statements can be proven, if necessary; the four year olds are now seven and can be seen any day at Cottage Grove, Or. S. Z. PAXTON.

—Price $1.00 per bottle.—

Royal Baking Powder.

THE GOVERNMENT TESTS ESTABLISH ITS ABSOLUTE SUPERIORITY.

(Data from the latest Official U. S. Government Report on Baking Powders, Department of Agriculture, Bulletin 13, page 599.)

Royal is placed first of the cream of tartar powders, actual strength, 160.6 cubic inches of leavening gas per ounce of powder.

Every other powder tested exhibited a much lower strength than the Royal, the average being 33 per cent. less.

Every other powder likewise showed the presence of alum or sulphuric acid.

The claim that this report shows any other powder of superior strength or parity has been denounced as a falsehood by the Government officers who made the tests.

One Phase of an Old Subject.

There is one phase of the working woman subject that is not often discussed by the wiseacres, whose pros and cons have touched upon nearly every other branch of it in the long arguments and homilies which they have annually brought to bear upon its varied interests, and that is one which is known only to working women themselves, and to those only of a superior order. It will readily be conceded that none have such an excellent opportunity for the study of existing conditions as those whose place is in the thick of the fight, and whose interests are centered wholly in the results of the conflict.

Women of intelligence and ability who are thus situated naturally study the progress of their kind. The problem of their life work is always before them, for the best, self supporting women in every section of the Union are famous for what is known as a "New England conscience." In other words, such workers are zealous to the extreme of nervousness, enthusiastic with an enthusiasm that is known to but few men, and painstaking to a degree which insures for them the frequent sneers of their masculine associates as well as ultimate success in the line which they have undertaken.—Jennes-Miller Magazine.

Observations on live rattlesnakes show that the poison glands become functionally active as soon as the snakes begin to shift for themselves, which must be very soon after birth.

Caligula was stabbed by an officer of his guard whom he had frequently insulted by giving a vulgar expression as the watchword of the day.

Two Stepping Stones

to consumption are ailments we often deem trivial—a cold and a cough. Consumption thus acquired is rightly termed "Consumption from neglect."

Scott's Emulsion

not only stops a cold but it is remarkably successful where the cough has become deep seated.

Scott's Emulsion is the richest of fat-foods yet the easiest fat-food to take. It arrests waste and builds up healthy flesh.

"August Flower"

Miss C. G. McClave, Schoolteacher, 753 Park Place, Elmira, N. Y. "This Spring while away from home teaching my first term in a country school I was perfectly wretched with that human agony called dyspepsia. After dieting for two weeks and getting no better, a friend wrote me, suggesting that I take August Flower. The very next day I purchased a bottle. I am delighted to say that August Flower helped me so that I have quite recovered from my indisposition."

BLOOD POISON

A SPECIALTY. Primary, Secondary or Tertiary Syphilis permanently cured in 30 to 60 days. We eliminate all poison from the system, so that there can never be a return of the disease. You can be treated at home for the same price and under the same guarantees, but with those who prefer to come here we will contract to cure them or refund all money and pay entire expense of coming, railroad fare and hotel bills, if we fail to cure. If you have taken mercury, iodide potash, and still have aches and pains, Mucous Patches in Mouth, Sore Throat, Pimples, Copper-Colored Spots, Ulcers on any part of the body, Hair or Eyebrows falling out, this is the Syphilitic Blood Poison that we guarantee to cure. We solicit the most obstinate cases and challenge the world for a case we cannot cure. This disease has always baffled the skill of the most eminent physicians. A legal guarantee to cure or refund money. Absolute proofs sent sealed on application. Address

CONSUMPTION

MISUNDERSTOOD.

What inward pain we sometimes feel
When we have been misunderstood!
How doth affection's warmth congeal
When ill intent's coined out of good!
How many bleeding hearts there are
Whose greatest bliss was doing good,
Yet for their love received a scar
From dearest friend—misunderstood!

When death hath closed the eyes of one
Whose heart beat ever for our good,
How sad to know their setting sun
Was dimmed by us—misunderstood!
'Tis then we feel the pain we gave
A parent, friend or neighbor good,
And grief overwhelms us like a wave—
Too late, too late—misunderstood!

Oh, could we but live o'er the past
And weave our web of life once more,
Glad rays of sunshine would we cast
Where doubt and darkness reigned before!
Hope is not dead—the Present lives—
Let us redeem it as we should;
The flower that's crushed more fragrance gives
Than had it lived—misunderstood!

But One there is who never fails
To read the heart of man aright,
Though tossed on life's tempestuous gales,
God will sustain us by his might.
Let all our aims in life be pure—
Men may misjudge—still cling to good.
At last the victory shall be sure,
And we shall then be—understood!
—John Imre.

A Brigand's Courtship.

It is said that the captain of a robber band who desires a wife does his courting after this style: Casting his eye on some fair village maiden, he descends upon the occasion of a dance on the green, and mingling with the dancers manages to dance with the fair one himself. Then he charms her with his grace and the beauty of his dancing, whispers love messages in her terrified ears—for well she knows with whom she is dancing—and circling ever nearer and nearer to the outer edge of the company he suddenly gives a whistle, and his men appear in a moment and dash off with the prize, the leader covering their retreat by a fusillade of fire arms which the villagers dare not return, being too much cowed by the bandit's daring.

Honorable marriage by a captured priest who is held in readiness is offered to the girl, who dare not refuse to become the brigand's bride, knowing she can never return to her home below the mountains. It is said that these marriages are exceptionally happy, and that the men love their abducted prizes with constant affection, and that the villages from which they are stolen are forever after safe from fire and rapine at the hands of the band.—Detroit Free Press.

A Great Scheme.

A human phase of city life down town, whose verbal brilliancy disappears when he puts himself on paper, owing to the badness of his spelling, thinks he has hit upon a device for relieving the embarrassment of all who are as sensitive in regard to this failing as he is. Here is the scheme in his own words: "Talleyrand says that speech is the art of concealing thought. By the same token writing should be the art of concealing bad spelling. What we bad spellers need is a system of penmanship upon a basis of radical reform. Let teachers be sent out who will teach us to write a pleasing hand, but in which poor spelling cannot be detected. I have no time to work out a system, but it ought to be easy and very profitable. For instance, why not have 'e' and 'i' written alike in words in which they occur together, with the dot midway over them? Big money is waiting for somebody who will work out the complete scheme."—New York Times.

Testing a Lover in the Metropolis.

A woman recently tested her lover's devotion in a ridiculous way. It was more whimsical than that of the beauty who flung her glove to the lions and ordered her knight to pick it up, and decidedly more absurd.

"Walk from the Battery to Fourteenth street with a soda water bottle as a scarfpin, and I'll marry you tomorrow!" said she. He did. She kept her word.—New York Press.

What Was Left.

Young Mamma—Did you have a nice time at the picnic?

Little Johnny—Nice enough, 'cept at the lunch. I was rowin and didn't get back in time.

"My poor angel! And was everything eaten up?"

"Yes'm. Everything but the things you sent 'em." Good News.

Rather Expensive.

Featherstone—Well, old man, I am glad to hear that you are engaged to be married. Falling in love, sir, brings out qualities in a man that he never suspected.

Ringway—I agree with you. I never knew before (sadly) that I had the capacity for spending so much money.—Exchange.

A clergyman advertising for a change of pulpit "guarantees to keep a congregation awake on the hottest summer's day."

MASSES FALLING FROM THE SKY.

Something About Meteors and of What They Are Composed.

An addition to our present knowledge of meteorites has been presented by Mr. J. R. Eastman, who furnishes a list of iron aerolites, together with a table of their weights and remarks as to the relative occurrences of iron and stony meteorites. According to this gentleman the ratio of weight of the former to the latter is as 1 to 12.23, and the aggregate weight of aerolitic iron which has been observed and discovered up to date on the American continent is about 153 tons. "If the above ratio be true in all cases," he says, "there should have been a fall of about 1,880 tons of lithic meteorites, or in all over 2,000 tons of aerolitic matter precipitated upon the earth."

Mr. Eastman offers the following theory to account for the apparent excess of iron over stony meteorites: "When a stony meteorite falls to the earth it breaks into many fragments, and the ruptured surfaces indicate the nature of the catastrophe. No case is on record where an iron aerolite showed any indication of having been twisted, broken or torn from another mass of the same material.

"The true type of meteorite which reaches the earth from outer space is probably similar to that which fell in Iowa county, Ia., on Feb. 12, 1875. This celestial visitor is composed almost wholly of lithic matter, but scattered through the mass are small grains of nickeliferous iron. This iron may exist in the stony matrix in all forms and sizes, from the microscopic nodule to the mass weighing several tons. When the lithic mass comes in contact with the earth's atmosphere the impact breaks up the matrix, sets free the iron bodies, and they reach the earth in the same condition, so far as mass and figure are concerned, as they exist in the original formation.

"In such cases it is probable that the stony portion of the original body is rent into such small fragments by the explosion that these would not reach the earth in any appreciable size. The larger the masses of iron the more complete would be the destruction of the original body, and the larger lithic meteorites would be those containing the smaller granules of iron."—Iron.

The Manners of "Society."

These geese in stays and starch ("society" people) are ignorant of the true philosophy of good manners, which may be compressed into a single sentence. The secret of good manners is an entire lack of self consciousness. If all men were born with a proper perception of justice bad manners could not exist. It may be somewhat vague, but the almost universal conception of justice is that it is the interest of the stronger, as Plato's sophist has it, and a moment's review of our codes of manners will convince one that this idea is at the bottom of all. All manners are bad which are built upon a substructure of injustice, either inflicted or suffered.

These "best people"—paupers in every essential of noble manhood—have elaborated a religion of which an immense cipher is the symbol. Their range of ideas is so limited as to merely correspond with their physical needs and indulgences, and they have invented (with a wisdom not common among geese and cockatoos) a code of manners which condemns all naturalness, individuality and thought as the brand of the parish.—New England Magazine.

Cardinal Wolsey's Taste for Antiques.

If Quentin Matsys had a picture on the easel, Wolsey was ready to purchase it. If there was a curious clock it was secured for him. His fondness for tapestry amounted to a passion. Trusty agents ransacked the continent to procure choice sets of arras, new and old, for the rising palace. If the owner generally preferred Scriptural subjects, as became a prince of the church, he also collected many hangings wrought with scenes from classic or mediaeval story. Thus, while the walls of one chamber set forth the history of Samuel or David or Esther, those of another glowed with the labors of Hercules, the woes of Priam or the Romaunte of the Rose. In the rooms where he received visitors the tapestries were changed once a week.—Macmillan's Magazine.

Landor's Conversation.

Landor was a man who delighted to talk about his friends to his friends. Of Southey, I remember, he had much to say—things such as one loving brother might say of another. The name of Julius Hare was very frequently on his lips, while in his heart the memory of that pure minded man was canonized. Liberal and free in speech on religion and politics, before it was the vogue to be thus free, yet might Landor's friendships have been shared by an archbishop. It is reported of him that he said, "I enjoy no society that makes too free with God or the ladies."—Mrs. Crosse in Temple Bar.

How Birds Act in a Fog.

Rooks and partridges do not seem to alter their habits in the fog so much as other birds that seek their living in the open country. Partridges are, if anything, wilder than ever; and if the rooks keep nearer home than usual they by no means refuse to fly; their wings make a good deal of noise in the silence of the fog, and often the first notice of their presence is the flapping of the damp wings as they make off suddenly from the unwelcome presence of man. But all other wild birds keep still and moping till the darkness goes.—Spectator.

A Beautiful Glass.

Brother (at the seaside)—I don't think much of that marine glass you have.

Sister—You don't! Why, it's just lovely! It makes every sail look all the colors of the rainbow.—Good News.

A Little Patience Required.

A lady who was staying at a summer hotel beckoned impatiently to the head waiter in the dining room, and said to him: "What is the matter with our waitress? She forgets half of my orders and dashes about so nervously that I can't eat. I wish you would give us some one who knows how to wait on a table."

"Well, now, Mrs. Van Horn," said the head waiter, "I should like to give that girl a chance. She is smart and pleasant and a good girl, and I think you will like her when she gets used to the work. Just now she's got what I call hotel fright."

"Hotel fright?"

"Yes, you know what stage fright is, but I suppose it never occurred to you that a table girl who is learning the work is scared at first at the multitude of things she has to remember and to do, and at being watched and criticised by a tableful of strange men and women.

"Of course if this new girl, Emma, came to your house to see you about something, and was so embarrassed that she did not know what to say, you would try to help her a little and make her more comfortable. When you come to think of it, don't you see that the same thing, a friendly word and suggestion now and then, will encourage Emma, and presently she will have all her wits about her again?

"Some of our best waitresses have hotel fright at first so badly that they are entire failures for a few days. Then they get hold of their work, and we never have any more trouble with them.

"And this isn't peculiar to the hotel business. I've seen new clerks needing patient treatment for store fright, and—but there's Emma, I will go and speak to her," and the philosophical head waiter hurried away, leaving Mrs. Van Horn a wiser and more patient woman.—Youth's Companion.

For Eczema and Ringworm.

Ichthyol and resorcin are two drugs that have received the general approbation of the medical world, and for eczema and ringworm they are not excelled. These two drugs have had doubtful popularity in the past, but of late years they have come more and more into favor as antiseptics and remedies for certain forms of skin troubles. But the drug that is of the greatest interest to those who would have good skins is the microbe destroyer and disinfectant known as hydrogen dioxide. This remedy was first used to bleach the skin white, and to remove powerful stains that had eaten into the skin. Discolorations of the skin caused by powder, potash, sulphur, and aniline dyes are removed the easiest with this drug.

The discoloration of the finger nails, which is natural with some, can be removed by application of this medicine. An instance is recorded of an actress who entered a sulphur bath without removing the cosmetics from her face, and she turned so black that she was not presentable for a long time, but an application of the hydrogen dioxide removed all the stain and color immediately. This drug is also a great microbe destroyer, and it is used with great success in boils, abscesses, ulcers and similar troubles.—Yankee Blade.

Some Very Ancient Pins.

Among the remains of the lake dwellers of Europe have been found bronze pins and bronze brooches, in which the pin forms the prominent feature, many of which are highly ornamented and very beautiful. A few copper and one iron pin have also been found. It is estimated that 10,000 pins have been collected at the lacustrine station of Switzerland alone. A few of these pins have double stems, and were probably used as hairpins. Three have been found at Peschiera, which are exactly the same in form as the safety pins of the present time.

Among the single stemmed pins are many ingenious devices for preventing the spike from passing entirely through the cloth or other material it is used for fastening together. Many of them are so formed that they are thicker in some places than in others. A large number, both of bone and bronze, have the head formed of a loose ring passed through an eye in the pin. A few of them have the appearance of the scarf pins now in use.

In Egypt pins with gold heads have been discovered, while ancient Roman bronze pins and bone hairpins with ornamental heads have been discovered among the relics of Pompeii.—Washington Post.

Wallis' Reasoning.

"Papa, what is dynamite?" asked Wallis.

"It is a powerful explosive," returned his papa.

"What's explosives for?" the boy asked.

"To blow things up," was the answer.

"I guess my nurse must be an explosive, then," said Wallis. "She's blowin me up all the time."—Harper's Bazar.

A Natural Question.

Highwayman—Throw up your hands and give us your money.

Cumso—How can I do that, you idiot? Do you imagine I am a contortionist and can get my nose into my pants pocket?—Life.

J. F. Chase, a veteran of the Fifth Maine battery, is reputed to carry on his body forty-eight scars. He exhibits an empty coat sleeve and an artificial eye, all the result of a bursting shell at the battle of Gettysburg.

St. James and St. Christopher share July 25 between them. In some parts of England the apple trees are blessed on this day, which is said also to mark the success or failure of the hop crop.

Our readers will serve themselves by noticing the remarkable offerings advertised in another column by the Sherwood Hall Nursery Co. of Menlo Park and San Francisco, who are leaders on the coast in furnishing everything for the farm and garden.

Whatever may be said of a sweetheart, she can't be too good to be true.

Why continue the use of remedies that only relieve, when Ely's Cream Balm, pleasant of application and a sure cure for Catarrh and cold in head, can be had.

I had a severe attack of catarrh and became so deaf I could not hear common conversation. I suffered terribly from roaring in my head. I procured a bottle of Ely's Cream Balm, and in three weeks could hear as well as ever, and now I can say to all who are afflicted with the worst of diseases, Catarrh, take Ely's Cream Balm and be cured. It is worth $1,000 to any man, woman or child suffering from catarrh.—A. E. Newman, Graying, Mich.

Apply Balm into each nostril. It is Quickly Absorbed. Gives relief at once. Price 50 cents at Druggists or by mail.
Ely Brothers, 56 Warren St., New York.

You may freeze, you may bust the gas-meter if you will, but at the end of the month, just the same, there's the bill.

AN UNDISPUTED TEST OF MERIT.

A medicine that has been a household remedy for over fifty years and used in that time by more than 150,000,000 persons must have great merit. Such a medicine is found in Brandreth's Pills. This fact demonstrates the value of these pills better than any statement of the proprietors. It will be observed that the dose required to cure is small. One or two pills taken every night for ten or twenty days will cure dyspepsia, costiveness, rheumatism, liver complaint, biliousness, or any disease arising from an impure state of the blood.

Brandreth's Pills are purely vegeble, absolutely harmless, and sale to take at any time.

Sold in every drug and medicine store, either plain or sugar coated.

Or, wise, or dull, or fast, or slow,
A carpet knight, or hero,
Man wants but little here below—
Below what's known as zero.

$100 REWARD $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

Teacher—What part of speech is phonograph? Big Boy—A noun of the feminine gender. Teacher—Why feminine? Big Boy—Because it always talks back.

THE FIRST LAW OF NATURE.

This self-preservation is acknowledged to be, and people who adopt against the encroaches of disease a genuine medicinal safeguard, accredited by experience and the sanction of Physicians, afford a happy illustration of the wisdom of the saying, in the health they restore and continue to enjoy. Among maladies, against the growth of which Hostetter's Stomach Bitters affords efficient protection, diseases of the kidneys and bladder are fraught with the utmost peril and exhibit great obstinacy when opposed by ordinary means. The Bitters can and will subdue them. No testimony is stronger than this. Used at the outset and persistently, the best results may be expected. This medicine also eradicates liver complaint, constipation, dyspepsia, malaria, rheumatism and nervousness.

Evening Things Up—Jagson says he hopes that things may be evened up by making the producers of coal in this world consumers in the next.

ON TRIAL.

That's a good way to *buy* a medicine, but it's a pretty hard condition under which to *sell* it. Perhaps you've noticed that the ordinary, hit or miss medicine doesn't attempt it.

The only remedy of its kind so remarkable in its effects that it can be sold on this plan is Dr. Pierce's Golden Medical Discovery. As a blood-cleanser, strength-restorer, and flesh-builder, there's nothing like it known to medical science. In every disease where the fault is in the liver or the blood, as Dyspepsia, Indigestion, Biliousness, and the most stubborn Skin, Scalp, and Scrofulous affections, it is *guaranteed* in every case to benefit or cure, or you have your money back.

To every sufferer from Catarrh, no matter how bad the case or of how long standing, the proprietors of Dr. Sage's Catarrh Remedy say this: "If we can't cure it, perfectly and permanently, we'll pay you $500 in cash." Sold by all druggists.

Hood's Cures

Miss Huntley.

The marvellous cure of Miss Lettie Huntley of Cortland, N.Y. has attracted wide attention. She was nigh to death's door with hemorrhages caused by ulcers in the stomach. Could eat nothing. When the physicians said **there was no hope,** her mother urged her to try Hood's Sarsaparilla. She reluctantly consented and in a few days felt stronger, bloating subsided, appetite gradually returned, and in a month she **could walk across the room.** In six months she was as well as ever in her life, and has been **in perfect health** ever since. She says: "I know that

Hood's Sarsaparilla

and that alone, **saved my life."**

HOOD'S PILLS cure Liver Ills, Jaundice, Biliousness, Sick Headache and Constipation.

FRAZER AXLE GREASE

Best in the World! Get the Genuine! Sold Everywhere!

PATENTS

Best legal advice. Best patents obtained. Offices:
Dewey & Co.,
220 Market St., S. F., and Washington, D.C., London, etc.

YOUNG MEN!
The Specific A No. 1.
Cures, without fail, all cases of **Gonorrhœa** and **Gleet,** no matter of how long standing. Prevents stricture, it being an internal remedy. Cures when everything else has failed. Sold by all Druggists.
Manufacturers: The A. Schoenhelt Medicine Co., San Jose, Cal.
Price, $2.00.

"A FAIR FACE MAY PROVE A FOUL BARGAIN." MARRY A PLAIN GIRL IF SHE USES

SAPOLIO

WOMAN FOR YOU

The very remarkable and certain relief given woman by MOORE'S REVEALED REMEDY has given it the name of Woman's Friend. It is uniformly successful in relieving the backaches, headaches and weakness which burden and shorten a woman's life. Thousands of women testify for it. It will give health and strength, and make life a pleasure. FOR SALE BY ALL DRUGGISTS.

Justice to All.

It is now apparent to the Directors of the World's Columbian Exposition that millions of people will be denied the pleasure of becoming the possessors of

World's Fair Souvenir Coins

The Official Souvenir of the Great Exposition—

The extraordinary and growing demand for these Coins, and the desire on the part of the Directors that equal opportunities may be afforded for their purchase, have made it necessary to enlarge the channels of distribution. To relieve themselves of some responsibility, the Directors have invited

THE MERCHANTS

Throughout the Nation to unite with the Banks in placing Columbian Half-Dollars on sale. This is done that the masses of the people, and those living at remote points, may be afforded the best possible opportunity to obtain the Coins.

THE FORTUNATE POSSESSORS

of SOUVENIR COINS will be those who are earliest in seizing upon these new advantages.

$10,000 Was Paid For The First Coin

They are all alike, the issue is limited, and time *must* enhance their value. The price is One Dollar each.

HOW TO GET THE COINS:

Go to your nearest merchant or banker, as they are likely to have them. If you cannot procure them in this way, send direct to us, ordering *not less than Five Coins,* and remitting One Dollar for each Coin ordered.

Send instructions how to ship the Coins and they will be sent free of expense. Remit by registered letter, or send express or post-office money order, or bank draft to

Treasurer World's Columbian Exposition, Chicago, Ill.

HERCULES GAS AND GASOLINE Stationary and Marine ENGINES

For Launches, Schooners, Tow Boats, Etc.

For Pumping, Mining Hoists, Printing, Sawing, Turning Lathes, Soda Water Works, Etc.

For simplicity and success they beat the world! Clean, no ashes, smell or dirt. No engineer is necessary; they are easily managed. Their economy for intermittent power is beyond question. No battery or electric spark to care for. No double or false explosions, so frequent with the unreliable spark. The workmanship is the very best. Our ignition tubes are a success; they explode every charge of gas which enters the cylinder. Just light the burner, turn the wheel, and it runs all day. For pumping outfits for irrigating purposes they run all day without an engineer. For hoisting outfits in mines they have met with the highest approval. We give estimates on the entire plant.

TWO BARDS.

A bard who wrote in staves
Once made a heathen hymn.
It had this stern refrain,
That moved as though in pain,
"The underthought of graves
Makes the sea grim."

A south land singer sung
With happy heart and free;
The living, not the dead,
He dealt with, and he said,
"The world is glad and young,
And good to me."

And ever since mankind
Is shuttled back and forth
Between these singers twain
Of glad and sad refrain:
The south land warm and kind,
The bitter north.
—Richard E. Burton in Harper's Weekly.

THE HIDDEN WILL.

On North Broad street, just below where the tracks of the Philadelphia and Germantown railroad cross that thoroughfare, stands a ruined mansion house that half a century ago was brave with pillared porticos and quaintly carved doors and window frames. It is today a cheap tenement house, inhabited by a half dozen families, and the work of improvement has left the entrance door several feet below the sidewalk. In its halcyon days this old mansion was as many feet above its surrounding garden as it is now below the asphalt paved street. It was the home of Jabez Fields, a hard, stern old man, proud as a prince and as reserved and unsocial as he was haughty. His only living relatives were a grandniece, Alice Fields, and a grandnephew, John Wilcox.

John Wilcox was a prosperous Arch street merchant, with a comfortable bank account and a landed and bond and stock estate that made him one of the Quaker City's richest men. He was not on good terms with his aristocratic old granduncle, who despised trade and everybody who labored for a living. It is therefore not strange that the latter totally ignored his grandniece, pretty Alice Fields, who was as poor as a church mouse and a school teacher by occupation. John Wilcox was as avaricious as he was wealthy, and when word was sent to him one day that old Jabez Fields had died suddenly he hastened at once to the dead man's picturesque mansion and locking himself in the library began to search for his granduncle's will. To his joy, in a tin box in which old Jabez used to keep valuable papers, he found the document for which he was hunting. With trembling hands he unfolded the crisp parchment, ran his eyes over the closely written lines and a cry of joy escaped him. He had been made sole heir to the dead man's estate.

Much chagrined was he, therefore, when a letter from Jabez Fields' lawyer, James Dunnet, addressed to Mary Smith, the old man's housekeeper, was shown him. There was a later will, and on the day of the funeral the lawyer would come to the old mansion to read it.

"He's probably left a good slice to some charity," soliloquized Wilcox, after the housekeeper had left the room, and still confident that what was left would come to him he nodded pityingly to his school teacher cousin when they met at the funeral and mentally resolved to make her a present of ten dollars to buy a new hat, gloves and shoes, all of which articles of apparel were very shabby.

It was a misty, lowering day and the old mansion seemed more than ordinarily dull and gloomy when the cousins returned to it after all that remained of their granduncle had been laid at rest. In patience they awaited the coming of the lawyer, but when 10 o'clock arrived and he did not put in an appearance the housekeeper showed them to their rooms and proceeded, with the assistance of the butler, to lock up the house. These two were fixing the fastenings to the big front door when the sound of carriage wheels crunching the graveled drive was heard, and when Mary Smith opened the door Lawyer Dunnet confronted her.

"I have been detained, Mary Smith," he said, "and won't read the will until tomorrow. Have a fire lighted in my bedroom, for this mist has penetrated to the skin; and by the way, Mary, send me up some hot water and a bottle of the old man's whisky. I think a punch will do me good."

The housekeeper assured him that his wants should be attended to, and the influence of the warm punch and the fire speedily made the lawyer very drowsy. Before retiring he took the will from his pocket and laid it on the antique mahogany table which stood in the middle of the room. He was an early riser, and when he leaped out of bed the next morning his eyes turned instinctively to the table. He started back with a gasp of astonishment. The will was gone.

"Ha!" he cried, rubbing his eyes. "That's strange!" And, without stopping to dress, he examined the fastenings of the doors and windows. They were all secure, and, although he searched the room thoroughly, the missing will could not be found.

After breakfast the servants, Mary Smith and the two cousins, assembled in the library and the lawyer took a position in the center of the room.

"When I reached here last night," he began, with his eyes on John Wilcox's face, "I had the last will and testament of my old friend, Jabez Fields, in my possession," and then he told of its mysterious disappearance. He kept his eyes fixed on John Wilcox's face, and the latter shifted uneasily and changed color.

"Do you mean to say that I had anything to do with its disappearance?" he blurted out at last.

"I accuse no one," answered the lawyer quietly, and then he asked for the will which had been found among the dead man's papers by his grandnephew. When Wilcox produced it the lawyer adjusted his spectacles, and with a look of commiseration directed toward Alice Fields said: "Unfortunately the two witnesses to the missing will are dead, but I think we can prove its existence and its contents. If Miss Field wishes"——

"No, no!" protested Alice quickly. "Not for the world," and when Lawyer Dunnet began to read she slipped quietly from the room. There were tears in her eyes as she groped her way from the house and turned her steps toward the city, but she wiped them away and walked very fast. When she reached her humble home she could no longer keep them back, but threw herself upon the lounge sobbing bitterly. So violent was her grief that she did not hear the door open, but she started up with a little cry of fright when a strong arm was passed around her slender waist and a mustached mouth brushed her cheek.

"Ernest!" she exclaimed, starting up.

"Yes, dear, it is I," said Ernest Lowton, and he kissed away the tears. "I met Lawyer Dunnet a few moments ago and he told me the whole story, else I would not have dared come. You are still my poor, hard worked little school teacher sweetheart, and I want you to be my wife. If that will had not so mysteriously disappeared I should have sailed tomorrow for South America."

"Oh, Ernest!" she gasped. "How cruel!" and then nestling close beside him she forgot all about her disappointment in the enjoyment of a blissful and reciprocal love.

A few weeks thereafter they were married, and for several months lived very happily. In the meantime, there being no opposition, the will which John Wilcox had found was probated, and he took possession of the dead man's estate. Having been a very careless man so far as business was concerned, Jabez Fields had left his affairs in a decidedly complicated state, and Lawyer Dunnet was kept busy trying to evolve order out of chaos. Alice had been a wife about five months when her husband was stricken with a low fever. Alice nursed him faithfully, and their little hoard grew smaller and smaller until only a few dollars remained. She had had no intercourse with her cousin since the day of Jabez Fields' funeral, but now when the life of him whom she loved was menaced she plucked up the courage to ask her rich relative for a small loan. Wilcox had taken up his residence at the old mansion, and there she found him busy in consultation with Lawyer Dunnet. Timidly and in halting sentences she made known the nature of her business.

"I never loan money except on good security," said the rich man when she finished, and Alice, with a great pain at her heart and tears in her eyes, staggered rather than walked from the room. Lawyer Dunnet followed her into the hall and touched her arm.

"Accept this from me, madam," he said, in a low voice, and he placed a bank bill in her trembling hand. "I stop here tonight and will call to see you tomorrow."

Sobbing her thanks she passed out into the night and hastened with fleet steps to the bedside of her husband. The doctor was with him, and he whispered to her that the crisis had passed, and if there was no relapse Ernest Lowton would soon be well.

In the morning, much to her surprise, Alice received a note in Lawyer Dunnet's handwriting bidding her hasten at once to the old mansion. Ernest was sleeping quietly, and leaving him to the care of a neighbor she hurried on out to "Oakdale." A servant ushered her into the library, where John Wilcox and Lawyer Dunnet received her. The latter sprang up as she entered and grasped both her hands.

"I congratulate you, Mrs. Lowton," he said. "The missing will, which makes you your granduncle's sole heiress, has been found, and Mr. Wilcox will make no contest."

"The will found!" echoed Alice.

"Yes, and I'm left out in the cold!" snarled John Wilcox. "Allow me to congratulate you," and he stalked angrily from the room.

"It's a very strange story," began the lawyer when the door closed after the irate man, and he drew his chair toward the one on which Alice sat in stupefied wonder, hardly believing her ears. "You know that when I was here the night after the funeral of Mr. Fields that the will, which makes you his sole heiress, mysteriously disappeared. Last night I slept in the room that I occupied on that unfortunate occasion. When I awoke this morning the will was lying on the table just where I left it six months ago. It looked like magic, and I couldn't explain the matter until one of the servants said that he had seen me prowling about the garden fully dressed at 2 o'clock this morning. Then I remembered that when I was a boy I used to walk in my sleep. I thought I had outgrown the habit, but it is evident that while in a somnambulistic state I hid the will, and under the same influence found it again."—Philadelphia Times.

A Rat Climbs a Wire.

Did you know that a rat is a good acrobat? No? Well it is, as an incident which occurred in a well known business house the other night will prove. There is an elevator in the establishment, suspended by a wire cable an inch in diameter. One night while the employes of the place were at work there attention was attracted by a moving object on the cable. An examination showed it to be a rat rapidly making its way up from the basement to the top floor by the most industrious "shinning."

Some time ago one of the men about the place reported that he had seen a rat working its way up the cable. He was laughed to scorn by his incredulous associates, but the truth of the operation was established in the mouths of two or three witnesses, so that it cannot be successfully disputed.—Youngstown Telegram.

Light in the Head.

A Newark woman got to acting a little queerly, but her husband didn't mind it much, and first thing he knew she had given away all her diamonds, $2,000 in cash and all her clothes but one rig. She gave to strangers, and they walked off believing her to be a great humanitarian. —Detroit Free Press.

Not Under the Rules.

"Chief Two Strikes can't have lost anything in this war."

"Why not?"

"Two Strikes can never be out."—Puck.

ELOPED ON A RAFT

A Lumberman Steals His Bride From Her Father's Boat.

HIS OPPOSITION WAS ONLY SPITEFUL

A Romantic Idyl From the Wilds of the Pennsylvania Backwoods Country—An Irate Father Outwitted.

A lumberman dressed in woodsman style came hurriedly into the union depot. Leaning on his arm was a pretty girl about eighteen years old. Her panting breath and fiery cheeks gave evidence of her excitement, which was seemingly made more intense by their rapid walking. Following them was another lumberman, more nervous than the first. He seemed to be on guard, and kept his eyes turned toward the rear ranks. He said nothing until his proteges were on board the day express for the east. A few minutes afterward an older man, with an air of business, elbowed his way through the crowd and confronted the woodsman.

They started an animated conversation about the couple who had just boarded the train, and for a few moments it seemed that a fight would take place. Kindly advice from a bystander saved them from the officers, however, and the two walked off together. Later in the day the older man appeared at the depot and bought a ticket to Brad's Bend, on the Allegheny Valley railroad. He was approached by a reporter and readily consented to tell the story.

His name was Andrew Myers. The girl who had been carried off by the uncouth woodsman was a daughter of Myers. They had eloped from her father's lumber raft. The daring act took place near Brady's Bend, and was the crowning act of a romance made exciting by a determined lover, an irate father and a faithful girl, whose respect for her father's wishes had hitherto prevented a clandestine marriage.

FATHER AND LOVER FIGHT.

The trio live on the Clarion river near Clarington. They are well known in the lumber country. The younger man's name is Frank Snyder. He is prosperous in the woods, and is considered a good business man, but he is rough in his way, and for that reason was not considered by Myers fit to be his daughter's lover. Miss Myers thought differently, however, and for a year insisted on receiving the attentions of Snyder. Nevertheless she refused to elope with her lover, and would only answer "wait."

The rafting season on the Clarion river commenced. Both Myers and Snyder had timber to run to market, and were constantly thrown in each other's way at the river bank. When the rafts were nearly ready to be started they accidently commenced talking about Miss Myers. Kindly expressions led to insinuations, and then a war of words, which was quickly followed by a blow from Myers. A moment more and both were rolling in the mud. They were soon separated, but not until Snyder had made a vow to get the girl. Myers heard the words and became equally determined that his enemy should never be his son-in-law.

A few hours more and both were to start down the river. Myers was afraid to leave his daughter behind, and giving as an excuse the statement that he wanted her to cook for the men, he brought her on the raft and gave her quarters in the rough shanty which is frequently built on large flats. Snyder saw the object of Myers' move, and when the latter pulled out with his raft Snyder quickly followed with his own.

PAPA COMES TOO LATE.

Both rafts arrived at Brady's Bend shortly after 6 o'clock Saturday night. Myers pulled in to tie up for the night, and when about to land Snyder's raft came up. He was acting as pilot himself, and, seeing Miss Meyers standing on the river edge of her father's raft, he ordered his men to pull in such a way that his own raft ran close to that of Meyers. When at the nearest point he jumped from his oar, grabbed the young girl, and, as he leaped back, yelled at his men to pull into the current. It was a daring act, but Snyder had been victorious, and found no trouble in persuading Miss Myers to give her consent to their marriage when the opportunity came. He knew Myers would follow, however, and to make sure their escape he determined to run at night.

They arrived at Sharpsburg next morning. Meantime Myers had come to Pittsburg, and was waiting at Herr's Island for Snyder and his game. But they didn't come. They guessed what he would do, and left him down the river while they went to Union depot on a cable car. Myers heard of this trick about 7:30 and went to intercept it, but he was too late. The woodsman he met at Union depot explained the occurrence leading to the flight, and told Mr. Myers that they were going to Camden, N. J., to get married.

Mr. Myers was still angry when seen at the Home hotel. He confessed that Snyder was a suitable man for any sensible girl, and his chief grievance seemed to be that his daughter should go on a bridal tour with a man whose wedding outfit would startle civilization. Nevertheless he admitted that Snyder had better clothes at home, and his last remark was that if Snyder had made much money lately he would forgive him.—Pittsburg Cor. Oil City Derrick.

Young Heads and Old.

Daughter—You should have turned down the upper corners of your visiting cards, ma, when you called on the bride. That means congratulation. But you turned down the lower corners. That means condolence.

Matron (with dignity)—You'd better wait till you are married before you criticise your ma.—New York Weekly.

Custom Hundreds of Years Old.

Mr. T. Smithson, J. P., of Ripon, is the only mayor in England before whose door a horn is blown every night. This takes place in accordance with a curious custom said to be hundreds of years old.—London Tit-Bits.

Wealth Does Not Bring Happiness.

Senator Stanford is the reputed possessor of $80,000,000. By his own estimate it will be trebled in three years. He has made it all, and life is approaching the end of its activity. He was asked this question, "Does wealth give happiness?"

"No," he answered with promptness, shaking his head slowly.

"Happiness, after the ordinary comforts of life are possessed, does not belong to any post, rank or condition. Great wealth involves immense care. It is care that kills. It is care that put me in my condition. If wealth is intelligently used, there may come a certain happiness from its bestowal."

"Then why this incessant rush after wealth?"

"Bread and butter is the first essential of life; that is, the first necessary stimulus to labor. Then men work hard that they may enjoy the surplus fruits of labor. With our standards of living and the products of civilization a little does not satisfy as a sufficient surplus. The natives of Panama, who can count but ten, will labor hard to reach that goal of acquirements, but that accomplishment satisfies."

"Why are successful Americans seldom satisfied unless increasing wealth already great?"

"Activity has become a habit. They are accustomed to living faster than anywhere else in the world. Many men, too, are not yet educated to enjoy anything but the struggle itself. That education, though, will come in time."—New York World.

The Great Tulip Mania.

Soon after the introduction of the tulip into western Europe boards of trade (providing they had such things in those days) made tulip bulbs a basis of the wildest financial schemes ever known, engendering a speculative fever which went down into history as the "tulip mania" or "tulip craze." The staid Hollanders allowed their "little dike locked land" to become the center of this curious species of speculative frenzy, and for three years—1644-7—the recklessness of the dealers and the disastrous results of the "mania" can only be compared with the "South Sea Bubble." When the "craze" was at its height some varieties of the bulbs sold for ten, twenty and even 100 or 500 times their weight in gold.

A single bulb of the Semper Augustus, "not much exceeding the bigness of an onion sette," was sold on the market for 2,000 florins. But this was not all. The gentleman who purchased it did so with the mistaken idea that it was the only known bulb of the kind in existence, but no sooner did he register purchase than another, "larger somewhat, but not big," was announced, and the poor victim was compelled to pay 4,600 florins for it or see it go to another. This he did and became the owner of two of the highest priced botanical specimens ever purchased.—St. Louis Republic.

It Must Be Well Seasoned.

The young couple had been married, and among those congratulating them was an effusive sort of a woman, who liked to hear herself talk.

"I do not," she said, taking a hand of each in hers, "hope for you unalloyed happiness, for that is not given to any mortal; nor do I ask for you the greatest worldly prosperity, for that often hardens the heart; but I do desire for you that the love which has sprung up in your young hearts shall be ever fresh and green"——

A crusty old bachelor had been listening, and at this point he growled to his neighbor:

"Listen to that woman, will you? By jove, if there is anything in this world that is undesirable, unreliable, unaccommodating, unhappy, unstable, undecided and unimproved, it is green love. Bah!" and he walked away.—Detroit Free Press.

Cleanliness as a Luxury.

Many rich persons, who give alms but never time nor personal investigation to the subject, say, "At least poor people can keep themselves and their houses clean." They do not know that cleanliness demands money and time. Without soap it is impossible to wash towels or sheets or even faces and hands in this grimy city, and hot water is a luxury if you have to save every scrap of coal or wood. I have seen families, naturally inclined to cleanliness, go very dirty indeed for want of hot water, soap and ambition. Ambition is expensive, too, and costs as much as many tangible items to keep up. I can imagine perfect apathy as to smudges and grime if I did not own a towel.—Chicago Post.

Delicate Tyrolean Handiwork.

A curious plaque work is done at Cortini, in the Tyrol, of marvelously fine silver thread and tiny pieces of gold. The men and women employed at it work with strong magnifying glasses and small pincers, with which they sometimes fit into a single tiny leaf no larger than a currant 160 pieces of metal. The odd thing about it is that men working in this way have more delicate manipulation than women, which bears out the dictum of the chiromancists, who declare that large hands are best for detail, small ones for breadth of effect.—New York Sun.

Occupations That Affect the Teeth.

Chloride of lime, employed by bleachers, frequently destroys the enamel and dentine of the teeth. But phosphorus, used so largely in the manufacture of lucifer matches, affects a very large number of persons, women, girls and children greatly preponderating. People who work in soda factories are affected by the teeth becoming soft and translucent; they break off close to the gums.—London Tit-Bits.

The Right Time.

Kind Father—Children, if the clock struck fourteen, what time would it be?

Logical Louise—Two o'clock, papa.

Clever Charlie—Time to get the clock fixed.—New York Herald.

CORAL FORMATION

How the Polyps do Their Silent Yet Lasting Work.

BEAUTIFUL ANIMAL VEGETABLES.

The Lovely Sea Anemones and What is Made From Their Skeletons.—Polyps do Not Toil; They Simply Die.

The term "coral insect" survives in literature, although science discarded it long ago. Possibly the idea of "toil" and "patience" and "building for the future," as the lesson taught by the coral insect, also survives to point a moral and adorn a tale of the same order as one praising the industry of the ant or the bee. Alas for old beliefs! Our grandmothers were exhorted to reflect on the vanity of the moth and the butterfly.

Now it is known that the moth and the butterfly are among the chief agents by which the most beautiful and fragrant flowers are fertilized, and that honey and perfume and color and fruit largely depend upon the energy of the insects formerly despised. The other so called insects have no more energy than a simple vegetable existence. Their toil is nothing greater than dying and leaving their skeletons behind them.

But how beautiful are these skeletons, or a conglomerated accumulation of myriads! And how beautiful and interesting, too, the animal vegetables, or rather flowerlike animals. "Sea anemones" is the popular name given to the whole tribe, with their disklike mouths, their petaloid tentacles, their stomach suggesting seed vessels and their fixed bases corresponding to stout stems, to say nothing of their brilliant colors, rivaling the most gorgeous corolias ever blown.

According to Dr. Gustav Eisen, there are two kinds of corals of the sea anemone order—those which produce coral, that is, the hard, calcareous formation, and those which do not. The popular term "coral," as applied to the accumulated dead skeletons of the dead polyps, is not strictly correct; coral, properly speaking, refers also to the living animal.

The sea flower, although suggesting a plantlike structure, is still a true animal. It has a skin, also rudimentary nerves. It can seize with its tentacles; it can swallow and digest its food and throw out the refuse from its mouth; it can defend itself from its enemies by forcibly ejecting poison from its many stings. It has some sensation. Quite a number of species of polyps have rudimentary eyes, arranged around their circular edges like beads. The hardened base of the sea flower corresponds to a skeleton in a higher order of animal, even though in some anemones the hardness may only be relative.

Coral animals of the sea anemone order reproduce their kind in several ways. One is by ova, which develop perfect polyps within the parent flower. Another mode is by budding; still another by fission. In the latter method a new mouth may form beside the old one in the center of a fringed disk, which then divides into disks, each surrounded by its own tentacles and each leading to its own closed sac. In the budding process branches are thrown out, from which spring new polyps. Tear one polyp to pieces, and each piece may reproduce all the parts it needs to form a fresh polyp.

The familiar tree coral is the result of the budding process. The branches below are the dead skeletons, above which the living polyps have mounted. The singular convulutions in "brain coral" were caused by fission, one mouth giving rise to strings of others, which never completely separated from each other, and so left a continuous line of stony skeletons. It must not be supposed, however, that zoophytes of the style of sea anemones are the only coral producers. Some calcareous secretions are left by animals related to the medusæ, or jellyfish. Other corals come from the bryozoans, which look like polyps, but really belong to the subkingdom of mollusks. The bottom of the sea is largely covered with deposits from such animals. It is even believed that in early times they made up the greater part of limestone strata. Mention must also be made of the beautiful and brilliant corallines, or vegetable corals, calcareous seaweeds, which look like red, white and yellow branched coral, but which, properly speaking, are algae.

Corals of some kinds are found in all seas. Those stony formations popularly called corals are mostly produced within the tropics. Probably the variety best known is the red or pink coral, long esteemed for ornaments. This was found in the Mediterranean from a very early period. Now, however, it has become so rare as to be practically extinct.

The specimens of coral seen in museums and private collections are of course masses of dead skeletons. Hard as rock they are, as might be expected, when it is remembered that the famous reefs of Florida and the Pacific islands are built up of them—no credit to the animals, however, despite the old tale. Yet if the antiquated moral be lost, the study of the calcareous formation is none the less interesting.

There is the fungus coral, a dull gray in color and shaped somewhat as the umbrella of a mushroom, with ridges running from the long mouthlike center to the edge. The lace coral, of a pure white, with delicate wheels, indicates the radiate structure of each animal when alive. The frost coral, just as dainty as its popular name implies, shows a mossy grove of tiny upright spires. The organ pipe coral is a tree form, with smooth, round, nearly perpendicular branches.

The Powers That Be.

First Congressman—What do you think of Senator Saphead's bill?

Second Congressman—I opposed it at first, but lately I have found so much popular opposition to it that I am inclined to think it must be a good thing." —Good News.

One Among Many.

"Do you believe in fate?" he asked.

"I dunno," said the lawyer. "Why?"

"Well, I do. Æons before you and I were born somebody, somewhere, carved out our lives and fortunes."

"Pshaw!" exclaimed the lawyer. "Don't you believe it."

"That's right. You hear what I'm telling you. We're the creatures of destiny. At least I am. I don't know about you."

"What makes you think so?"

"I've been looking back over my life, and through its warp and woof I can see the same thread running from the beginning to the present time. I can see it plainly. I know it."

"How's that?"

"My mission in life is to always be the last man. There's always a long row of men before me every time. Sometimes it's longer and sometimes it's shorter, but I'm always the last of the lot."

"What do you mean?"

"Take dogs. When a dog is born somebody wants him—and gets him. Then somebody else wants him—and gets him. Then somebody else—and so on through the chain until it comes to me. Of course I want him, and get him. Now, you'd naturally suppose that somebody else would want him and get him, just as all the rest of us did. But no. I'm the last man. He's the same dog he was before, exactly as good and all that, and every time he changed hands his price got bigger. But I can't give him away. I'm the end of the chain. I'm the last man. Nobody wants him any more."

"Hard luck," said the lawyer sympathetically.

"It's the same way with everything. I buy real estate, for instance. Hundreds of men have wanted that identical piece of ground before me, and every one of them has got it. That's the trouble. Every one of them. I'm the last man again. I'm the only man left in all the world who wanted that real estate. I'm the end of the chain. I'm the last man. It's tough, but I have to stand it. The fates had a grudge against somebody when they were measuring up my string, and they took it out on me. I know it."—Chicago Post.

Magnitude of Truck Farming.

Truck farming is distinct from market gardening. It is carried on at a distance from market, water and rail transportation being necessary.

Upward of $100,000,000 is invested in this industry, the products reaching a value of $76,507,155 on farms after paying freights and commissions, and realized upon 534,440 acres of land. There are employed in this industry 216,765 men, 9,254 women and 14,874 children, aided by 75,866 horses and mules, and $8,971,206.70 worth of implements. The Norfolk district, embracing 45,375 acres, shipped products valued at $7,692,859; south Atlantic district, 111,741 acres, products $13,183,516; Mississippi valley, 36,180 acres, products $4,979,783.

Nearly 75 per cent. of the truck produced in the United States comes from a belt of country along the Atlantic coast lying east of a line drawn from Augusta, Me., to Macon, Ga.; from southern Georgia, Alabama and Florida; along the north and south lines of railroad in the Mississippi valley from the Gulf to Chicago, St. Louis and Kansas City, and from the celery districts of Michigan and Ohio.

More or less of the truck, however, is produced in all the states. The following figures show the total acreage of the leading vegetables grown upon truck farms of the United States: Asparagus, 37,979; beans (string or snap), 12,607; cabbage, 77,094; kale, 2,962; spinach, 20,195; Irish potatoes, 28,046; beets, 2,420; celery, 15,381; cucumbers, 4,721; watermelons, 114,381; other melons, 28,477; peas, 56,162; sweet potatoes, 28,621; tomatoes, 22,802; miscellaneous vegetables, 82,601.—Washington Cor. Atlanta Constitution.

Tiles for Decoration.

There is nothing more satisfactory than tiles, either from an æsthetic or utilitarian view. Every one is familiar nowadays with tiles as facing to fireplaces and as hearths. The greatest objection to tiling is its cost. It is not at all a difficult matter to set tiles. One of the first essentials is that they be perfectly matched in size. There is often considerable difference in the dimensions and thickness of those of the same size and make. A facing of tiles the depth of an ordinary wainscot is very pretty and easily kept clean. When purchased by the quantity the average price of a plain white tile six inches square is only ten cents each.

A decorated or shaded tile may be purchased from twenty-five cents upward. A decorated tile alternating with a plain tile gives a very pretty effect. A medley of colors is not effective. Blue and white tiling is always pretty for a room facing. A piece of this work above the kitchen sink seems to brighten up a very dark and unattractive room. Nowhere is tiling prettier or more useful than in the bathroom, where it may form the facing of the walls and even the flooring. American manufacturers are making very attractive tiles in relief and in plain shaded effects.—New York Tribune.

A Bishop Wheeling a Barrow.

A story is told of Canon Creighton during his residence in Worcester. One day, passing down a street in one of the poorer quarters of the town, he saw an old woman endeavoring to wheel a heavy barrow filled with coal up an alley. The wheel of the barrow would not, in spite of all her feeble efforts, be forced over the edge of the parapet between the opening and the street. Canon Creighton saw the situation, deposited his umbrella in a doorway and took the old creature out of the shafts of the barrow. Then he addressed himself to the task, and in a moment more the load of fuel was trundling briskly down the alley in front of the future bishop.—Exchange.

Why They Could Not Begin.

Amy (at the football grounds)—Why don't they begin to play?

Dolley—The surgeons haven't arrived yet.—Judge.

A GREAT DAY.

How Sunday was Regarded in Days of Slavery.

NEGROES, AS A RACE, ARE SOCIABLE.

The Plantation Folks Eagerly Looked Forward to the Day of Rest.—They all Went to Meeting.

In the south before the war Sunday was looked forward to with anticipations of unaffected happiness by the negroes on the plantations. With it came not alone the restful idleness of the day, but the additional pleasure afforded by opportunities to attend divine worship, writes Edward Oldham.

The negro, as a race, is a social being. The absence of extraordinary brain power denies him the privilege of thoughtful meditation or the solace of reflection. His intuitive impulse is to loosen the cords that bind him to himself and to seek congenial companionship.

This innate characteristic of sociability was intensified in the plantation darky, whose master's family was usually the center around which a highly social microcosm revolved. Sunday was the day above all the rest when he could give full play to this tendency, and he was never happier than when in the midst of a group hearing himself and others talk. "Gwine ter chu'ch" therefore always meant for him more of a season of social than religious enjoyment, though occasionally there were venerable exceptions to this rule. The darkies from all the neighboring plantations were to be seen at "meetin," and all the grotesque happenings of the week and bits of highly colored gossip were to be exchanged amid hearty guffaws, in which the most innocent good nature abounded.

The ante-bellum negro was always picturesque in his attitudes, adjuncts and surroundings, and particularly so "ober Sundays." The manner of his locomotion to and from the "meetin house" made a striking picture, with a touch of irresistible drollery about it. More than likely he proceeds afoot, and if the day be pleasant he carefully removes his "Sunday shoes" and the thick cotton socks, draws off his coat, throws it over his left arm and dangles the shoes from his right hand. With his impedimenta thus adjusted he advances upon his way with a quick swaying, shuffling gait, a light heart, a plantation hymn at the top of his tongue, or a cheery, rollicking whistle upon his lips. If the roads be muddy, the distance unusually great, or the darky himself the object of the master's or overseer's special favor, he is indulged with the use of a horse, astride whose backbone he strings himself, his wife and a youngster or two. They jog along slowly, putting up with the ludicrous discomfort of the arrangement with every evidence of good humor.

If the attendant upon divine worship be far advanced in years, his master, with that respect for the aged so characteristic of the southern gentlemen of the old school, places at his and "de ole 'oman's" disposal a humble vehicle which has outlasted the greater part of its usefulness. To this he harnesses a plantation mule, whose solemn demeanor and highly deliberate movements are in keeping with the measured, easy going characteristic of the darky twain. They set out, the wabbling wheels describing an endless series of curves, convex and concave. The venerable occupants are seated in split bottom chairs and are attired in their "bes' bib en tucker," with their flaming apparel "settin two ways for Sunday"—to employ the vernacular—by which they mean to suggest the all pervading presence of starch, which plantation darkies were accustomed to use unstintedly. Thus, with an entire absence of self consciousness, the aged couple arrived at the church in due time.

If it be a shrine intended exclusively for dusky worshipers, the building will be a large rectangular structure composed of logs, the apertures between being chinked with mud and clay, and the roof consisting of rows of rough oak clapboards, held in place by long saplings lying lengthwise with the building, and these in turn being secured by prongs of hickory. The most conspicuous adjunct of this humble house of worship is the chimney, which leans away from the structure with a hurt, offended air. It looks as though it were about to topple down, and its heterogeneous materials constitute an impenetrable mystery, held by a framework of sticks and clay.

In the milder seasons of the year the negro worshipers assembled beneath a spacious arbor formed by a framework of saplings resting in the forks of small growing trees, or of others cut down and stuck into the ground. Upon this crude scaffolding were deposited quantities of pine boughs, which protected the congregation from the sun and the showers, and dispersed an aromatic odor that was by no means disagreeable.

An object of the most envious concern to the other darkies on the plantation was the family coachman, or carriage driver, or that of their number who was singled out to go with "young mistis" or any other member of the household to church. Aside from this being considered a recognition of superior merit and a mark of special confidence, it carried with it many privileges which were greatly enjoyed. It meant more comfortable transit to and from church, more presentable apparel, and best of all "good eatin's."

The sermon over, a general handshaking by the dispersing congregation was in order, and sometimes, when a sermon was to follow in the afternoon and the day was a pleasant one, the attendants divided themselves into a little group here and there. The baskets were opened, and the lunches, prepared by the old time southern cooks, were heartily enjoyed. A general interchange of small talk and the news of the neighborhood made the time pass swiftly; then came the second sermon, after which "young mistis" is escorted back to the carriage by some gallant beau, who, seeing her and perhaps the "old folks" comfortably seated within, bows himself away in a Chesterfieldian manner. The sable aristocrat with the rigid demeanor slams the door to with a bang, and with becoming dignity ascends to his perch. Then with calm deliberation he draws up the lap robe and carefully tucks it around him. A moment later the reins are in his hands, and then with a crack of the whip the coach rolls away and is soon lost to sight in a cloud of dust.

The spoon is very ancient and many fine specimens are in existence that were used by the Egyptians in the Seventeenth century B. C.

A prisoner in a Bohemian reformatory has finished a perfect running straw watch which is said to be "no larger than a shirt button."

FRIDAY, APRIL 7 1893

SUPERVISORS' PROCEEDINGS.

INDEPENDENCE, Inyo Co., California.
MONDAY, April, 3, 1893.

On the above named date at the hour of 7 o'clock p. m. the Board of Supervisors of the County of Inyo, State of California, convened in regular session pursuant to law.

Present, Robert Love, chairman; Supervisors Frank Fitzgerald, A. C. Freeman, W. H. Ualemeyer, John Wilson.

Minutes of proceedings of last day of preceding regular meeting read and approved.

Claim of W. J. Harris in the sum of $375 for seventy-five days labor in experting County books was allowed in said sum and the Auditor directed to draw warrant therefor upon the General Fund.

Whereupon the Board adjourned until 9:30 o'clock a. m., April 4, 1893.

R. LOVE, Chairman.
Attest: D. J. HESSION, Clerk.

TUESDAY, April 4, 1893.

At the hour of 9:30 o'clock on the above named day the Board of Supervisors of the County of Inyo, State of California, met pursuant to adjournment and there were present:

Supervisors Robert Love, chairman, Freeman, Fitzgerald, Uhlmeyer and Wilson.

Claims were examined and allowed as follows:

I. J. Woodin, Co Physician Hp fd	$93 75
A. W. Eibeshurz, books, blanks etc.	
Gen. Exp. Fund	411 88
William Smale, Constable fees	17 50
John Dunlap, Justice fees	5 00
Mrs. F. K. Andrews, interpreting	12 00
I. H. Mulholland, Justice fees	6 00
O. I. Mairs, boarding prisoners	74 26
I. H. Mulholland, printing	54 00
C. W. Craig, advertising	102 50
Mamie A. Coughlin, B4 Education	38 50
H. H. Howell, B4 Education	38 50
H. H. Howell, examining insane, Hospital fund	5 00
F. E. Densmore, B4 Education	25 00
R. P. Hession, conveying sick	12 00
P. W. Forbes, Dist. Atty, trav exp.	37 20
Independence Water Co., Water	13 00
J. S. Gorman, telegraph and post	18 52
W. A. Chalfant, printing	26 75
D. J. Hession, postage and exp	8 75
L. Wood, supplies	6 00
Nathan Ruine, supplies	9 00
J. H. Shannon, traveling exp	19 25
J. H. Shannon, B4 Education	38 50
Mrs. Lewis, Hospital	175 00

Board adjourned to meet at the hour of 1:30 p. m.

At 1:30 p. m. the Board reconvened, all the members present, Chairman Love presiding.

Claim of William Smale, in sum of $13, for repairing branch jail at Bishop, directed to be returned for items.

Upon recommendation the claim of A. Carlisle & Co. heretofore allowed in the sum of $182 72 for general election blanks and supplies was allowed in the full sum of $260 75 and the Auditor directed to draw his warrant upon the General Expense fund therefor.

Ordered—That the Auditor draw warrants upon the old Bishop School Bond Fund, special tax collected, in favor of the respective tax-payers entitled thereto for the several amounts paid.

The Board proceeded to examine the coyote scalps and affidavits on file and in accordance therewith certificates were ordered issued as follows:

NAMES.	NO. OF SCALPS.	AM'T.
Ira Brown	2	$10 00
Ambrose Smith	3	15 00
Ransom Elijah	3	15 00
Lew Kain	1	5 00
Frank Elijah	2	10 00
John Kempple	3	15 00
R. H. Williams	4	20 00
Andrew McMullin	1	5 00
W. H. Walker	2	10 00
J. A. Leidy	1	5 00

Said scalps were destroyed as required by law.

Upon motion of Supervisor Wilson, seconded by Supervisor Fitzgerald, and carried by unanimous vote, it was ordered that an ordinance be prepared amending Ordinance No. 43 so as to place all liquor dealers and merchants dealing in liquor in any quantities in one class, and that all such shall pay a quarterly license of $40.

Whereupon the Board adjourned to meet at 9:30 o'clock, April 5, 1893.

R. LOVE, Chairman.
Attest: D. J. HESSION, Clerk.

WEDNESDAY, April 5, 1893.
9:30 o'clock a. m.

Upon date above named the Board of Supervisors of Inyo county, California, met pursuant to adjournment, there being present Supervisors Fitzgerald, Freeman, Uhlmeyer and Wilson, Chairman Love presiding.

Minutes of preceding day's proceedings was read and approved.

Ordinance No. 47, amending Ordinance No. 43, governing and relative to Liquor license, was read, adopted and passed by the following vote:

Ayes:—Supervisors A. C. Freeman, W. H. Uhlmeyer, John Wilson, Frank Fitzgereld, Robert Love.

Noes:—None.

Upon petition of P. A. Chalfant, County Assessor, Ordered: That said officer be allowed the sum of $250 for compensation of deputy for the present year.

Petition of citizens of Lone Pine asking that R. C. Spear be appointed Justice of the Peace for the 4th Judicial Township granted and the Clerk directed to issue certificate of appointment.

Petition of citizens of Lone Pine asking that R. S. Carrasco be appointed Constable for the 4th Judicial Township was granted and the Clerk directed to issue certificate accordingly.

Upon petition of electors of Independence School District it was

Ordered; That a certain order made and passed by the Board on the 7th day of January, 1892, creating a new school district from the territory lying east of Owens River and previously embraced in the Union and Independence School Districts, be decared of no effect, for the reason that no school was opened in said Eastside District within six months after making the order creating the same.

Petition of Geo. W. Huckaby and J. D. Lewis asking for change of boundary line between Bishop and Station School Districts was laid over till next regular meeting.

Petition for Inspector of Apiaries on file and laid over from last regular meeting was on motion rejected.

No. 25. Claim of Henry Ruine for interpreting allowed on the General Expense Fund in the amount of $3 40.

Whereupon the Board adjourned until 1:15 p. m., at which hour it reassembled, all the members being present.

Petitions of citizens and electors of the county on file asking for the appointment of A. O. Collins, J. J. Stewart and W. H. Walker to the position of Sheep License Collector, to serve for the year beginning April 5, 1893, and ending April 5, 1894, were read. All of whom being considered in nomination the Board proceeded to vote with the following result:

1st. For A. O. Collins, Supervisors Freeman and Uhlmeyer; for W. H. Walker Supervisors Wilson and Fitzgerald; for J. J. Stewart, Supervisor Love.

2d. For Collins, Supervisors Freeman and Love; for Walker, Supervisors Fitzgerald Wilson; for Stewart, Supervisor Uhlmeyer.

3d. For Collins, Supervisors Freeman and Love; for Walker, Supervisors Fitzgergerald, Uhlmeyer and Wilson.

Whereupon W. H. Walker was declared duly appointed and the clerk instructed to issue certificate.

Claim of Dr. I. J. Woodin in sum of $57 00 for attendance upon Wm. Mitchell rejected.

Board proceeded to examine coyote scalps and affidavits on file and certificates therefor ordered issued in accordance with the following:

NAMES.	NO. SCALPS.	AM'T.
Indian Bob	14	$70 00
R. P. Hession	2	10 00
James Lane	2	10 00
John T. Rige	12	60 00
Totals	30	$150 00

No. 26. Claim of W. A. Chalfant for printing School Manual allowed in sum of $82 00.

Upon motion of Supervisor Uhlmeyer, seconded by Supervisor Freeman, it was unanimously resolved that R. Way, contractor for the construction of a fire-proof vault, be allowed the sum of $40 for putting in an extra door and that the original plan be changed so as to omit the door between the Treasurer's and Recorder's office.

Moved by Supervisor Fitzgerald, seconded by Supervisor Wilson that A. W. Eibeshutz be allowed the sum of $275 for furnishing a Hall fire proof door for use in the County vault. Carried unanimously.

On motion of Supervisor Fitzgerald, seconded by Supervisor Freeman, unanimously ordered that R. Way be allowed $100 for additional iron supports in said vault; two in the Recorder's and one in the Treasurer's Department thereof.

On motion of Supervisor Uhlmeyer, seconded by Supervisor Fitzgerald, Ordered: That the fire-proof vault be placed against the south wall of the Court House building and that the west wall of said vault be 7 feet 2 inches from the south-west corner of the Court House.

Board adjourned until April 6, 1893, at 9:15 a. m.

R. LOVE, Chairman.
Attest: D. J. HESSION, Clerk.

SPECIAL ANNOUNCEMENT.

We have made arrangements with Dr. B. J. Kendall Co., publishers of "A Treatise on the Horse and his Diseases," which will enable all our subscribers to obtain a copy of that valuable work *free* by sending their address (enclosing a two-cent stamp for mailing same) to DR. B. J. KENDALL CO., ENOSBURGH FALLS, VT. This book is now recognized as standard authority upon all diseases of the horse, as its phenomenal sale attests, over four million copies having been sold in the past ten years, a sale never before reached by any publication in the same period of time. We feel confident that our patrons will appreciate the work, and be glad to avail themselves of this opportunity of obtaining a valuable book.

It is necessary that you mention this paper in sending for the "Treatise." This offer will remain open for only a short time.

WE WANT YOU

To act as our agent. We furnish an expensive outfit and all you need free. It costs nothing to try the business. We will treat you well, and help you to earn ten times ordinary wages. Both sexes of all ages can live at home and work in spare time, or all the time. Any one anywhere can earn a great deal of money. Many have made **Two Hundred Dollars a Month.** No class of people in the world are making so much money without capital as those at work for us. Business pleasant, strictly honorable, and pays better than any other offered to agents. You have a clear field, with no competition. We equip you with everything, and supply printed directions for beginners which, if obeyed faithfully, will bring more money than will any other business. Improve your prospects! Why not? You can do so easily and surely at work for us. Reasonable industry only necessary for absolute success. Pamphlet circular giving every particular is sent free to all. Delay not in sending for it.

GEORGE STINSON & CO.,
Box No. 488, Portland, Me.

MONEY Beginners earn from $75 to $200 per week, and more after a little experience. We can furnish you the business. You can devote your entire time to the work, or only your spare moments. No one who is willing to work can fail to make money rapidly. We make this offer to prove that our business is what we represent it to be. Reader, if you want to know all about a business that will pay you handsomely for all the time you can give to it, write for our pamphlet containing full information, which we send free. TRUE & CO., AUGUSTA, MAINE.

MAKING LACE PAPER.

MINNEAPOLIS HAS THE ONLY FACTORY OF THE KIND HERE.

How a New Industry In Which Germany Excels Came to Be Established In This Country—As Yet It Is In Its Infancy. Nice Work For Women.

Minneapolis can claim a monopoly in at least one industry. There is none like it in the country. Germany is the nearest competitor. The lace paper factory here is the only one in the country. How the industry came to be established here and the development of certain possibilities in regard to it make quite an original story.

A certain business man tolerably well known in Minneapolis once upon a time loaned some money and material to a Russian immigrant who was trying to start a greenhouse in St. Paul. The florist was very grateful for the help, but at the end of six months had not repaid any of the loan. The business man hunted him up and inquired wherefore this negligence. The florist explained his difficulties at some length, and sorrowfully averred that in addition to other burdens he had to support his brother.

"Why doesn't your brother go to work?"

"Pardon, sir. He is honest and industrious, but can find no work at his trade."

"What trade can that be?"

"He is a lace paper maker and there are are no factories of that sort here, and he has not much chance at other trades where he has no skill."

An interview with the paper maker revealed some interesting facts, and after some investigation several Minneapolis capitalists concluded to start a factory to evolve the dainty confections that modern ingenuity says may be made from paper. The industry is still so new that its present condition may be regarded as only an earnest of the future.

The fad for fancy lamp shades makes a special department which was not at first contemplated. Crape paper develops in all the soft, dainty sheen of silk. Women are specially good at this branch of the industry, as it requires patience and that peculiar "knack" which no man ever had, and the woman who possesses it is luckier than if she had beauty, though she never thinks so herself.

Now, this business of making lamp shades and flower pots and paper flowers and dolls is light, clean work and pays well if a woman has the bent for that kind of work.

The prettiest lamp shades I ever saw were being made at the factory. The tobacco leaf forms the latest model. Two contrasting shades of crape paper form the leaf. It is cut in the proper shape, and a delicate wire forms the mid rib of the leaf and makes the shade substantial enough to stand wear. Four long leaves and four shorter ones droop from a common center and make the daintiest shade imaginable. I saw a tiny one of this same pattern for an incandescent light. The red leaves were lined with pale yellow, and how the electric light did glow through the blended colors! A skillful workwoman can only construct four or five of these shades a day. Their price consequently doesn't exactly bring them within the reach of all, but they promise to largely take the place of silk and illusion. The operative earns from $6 to $10 a week in the shade department.

Lace paper for lining the edges of boxes really forms the important part of this industry. Look at a bit of this dainty paper and see how faithfully it reproduces every thread of the lace from which it is copied. When people are told that these delicate patterns are stamped from engraved metal plates, they are apt to look incredulous. Still that is the process.

For many years Germany has controlled this industry. The consul at Berlin in his last annual report states that 7,000,000 pounds of lace paper are exported annually to the United States.

One fine day good fortune befell the industry. A man came in and asked for employment. He was a designer and engraver of plates from Germany. He declined to give any information as to how he knew the factory was in Minneapolis or why he came. He simply said they could try his work, and if they were satisfied he would stay. He has remained ever since. I saw him several times and didn't wonder that there was some hesitancy about engaging him. He weighs about 325 pounds. The face is intelligent and refined, but the bushy beard and long hair, combined with the muscular frame, give the man the appearance of one used to vigorous manual labor. Appearances are deceptive in this case, for he is an artist as well as an engraver, and knows every detail of the business.

He first sketches the design on paper, then takes a block of lead composition, similar to that used for newspaper cuts, and draws the exact pattern with a sharp steel point. Then, with finely graded chisels, he hammers out every little detail so exact that the tiniest thread of the finest lace pattern is visible.

To see the workman hammering out an intricate pattern one would think it an endless task. It is not, however, nearly so tedious as it looks. This engraver will make a plate 20 inches long by 2 inches wide in four days. All the edges of the pattern have to be made in sharp relief instead of being cut into the plate, as in ordinary engraving. This has to be done so that the sharp edges will perforate the paper when the cylinder passes over the plate.

Lace paper has its styles just the same as the real article. The young lady who gets her daily box of bonbons from the confectioner wants the lace edged holder to be in the latest mode. She can also select torchon, valenciennes, spanish, guipure, breton or any other style in the paper just as she can in the thread.

Among the pretty imported notions is that of a cornucopia with a deep lace edge and closed with dainty bows of satin ribbons. This is to hold matinee or theater allowance of candy and will probably be very popular.—Eva McDonald-Valesh in Minneapolis Tribune.

NOTICE OF SALE.
Real Estate to be Sold at Private Sale.
Notice is hereby given that in pursuance of an order of the Superior Court of the County of Yolo, State of California, made on March 13th, 1893, in the Matter of the Estate of W. S. Enos, deceased, the undersigned, the administrator of said estate, will sell at private sale to the highest bidder for cash, and subject to the confirmation of said Superior Court, all the right, title, interest and estate of the said W. S. Enos at the time of his death, and all the right, title and interest that said estate has by appropriation of law or otherwise accrued other than or in addition to that of the said W. S. Enos at the time of his death, in and to all that certain lot, piece and parcel of land situated in Inyo County, California, and described as follows, to wit:
The North-east Quarter, East half of the North west Quarter, North-west Quarter of the South-east Quarter, and North-east Quarter of the South-west Quarter of Section Twelve, in Township Fourteen, South of Range Thirty-five East, Mount Diablo Meridian; also the South-west Quarter of the South-east Quarter, and the South east Quarter of the South-west Quarter of Section One, in Township Fourteen South of Range Thirty-five East, Mount Diablo Meridian; also five hundred inches of water, measured under a four inch pressure, of that certain water right, approprian or water location, situated in the county of Inyo, State of California, commonly known and designated as the Stevens Ditch Company Water right, also one-ninth interest in and to that certain water ditch commonly known and designated as the Stevens Ditch.
That said sale will be made on and after the 17th day of April, 1893, and that offers or bids for said land will be received at the Law office of R. Clark in Beamer's New Block, at Woodlank, Yolo County, California.
W. F. RUSSELL,
Administrator of said Estate.
Dated March 31st, 1893.

RESTORE YOUR EYESIGHT

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death, in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit: Commencing at the South-east corner of the south-east quarter of North-east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lot Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispiteada Lode."

That certain lot, piece or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North east quarter of Section No. twelve (12) and the South west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North, westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of Said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court Deed at the expense of purchaser.

COURT NOTES.

Geo. M. Gill, Superior Judge.

MONDAY, Apr. 3rd, 1893.

Filed petition in insolvency of J. V. Skinner.

Wm. Avery was in town yesterday.

Jake Miller was in town yesterday.

Mrs. M. Lewis has been awarded the Hospital contract.

C. Mulholland started for Los Angeles on Wednesday.

Mrs. Wm. Walker spent several days in town this week.

Dr. Louise L. Woodin has been appointed county physician.

Chas. A. Levy and James McBride were down from Bishop during the week.

All liquor licenses have been raised to a uniform sum of $40 each per quarter.

Webb H. Walker has been appointed sheep license collector for the ensuing year.

The INYO INDEPENDENT contains the complete official county news from this date.

R. O'Neal, S. G. Sneden and J. D. Lewis came down from Bishop on Wednesday's train.

Miss Nellie Craig arrived home last Monday evening from an extended visit to the lower country.

T. F. A. Connelly came down from Bishop yesterday to attend a meeting of the Fair Directors.

The attention of stockman is directed to the notice given by the Tax Collector in regard to propagation license.

There are railroads and rumors of railroads, and still the millennium is not here though it is surely on the way.

Lone Pine is to have a full fledged Justice's Court with R. C. Spear Justice of the Peace and Reles Carrasco Constable.

Mrs. L. Wood is recovering from her recent illness. It was feared for a while that her sickness would terminate fatally.

By a resolution adopted by the Board of Supervisors the new fire-proof vault will be built close up against the Court House instead of ten feet away as at first projected.

P. Labarge offers a fine young half bred Norman stallion for sale. Anybody desiring such a horse will do well do well to communicate with him at Lone Pine.

S. P. Smith was down from Bishop early in the week with his trotting stallion, Antare. The horse has filled out greatly durhe winter as he now weighs 1256 pounds.

The mills of the gods grind slowly but they get there just the same. Murphy is getting even on last winter's wake. He has already got away with one man's eye-teeth.

The V. & T. officials say there is no truth in the report that the C. & C. is to be extended to Port Ballona, Cal., or that the V. & T. is to be made a narrow gauge and connected with the N & C. R. R.—*Bulletin*

W. J. Harris returned to his home at Dayton last Tuesday having completed the examination of the county books and prepared a report for presentation to the Grand Jury, which meets pursuant to adjournment April 25th.

A meeting of the Board of Directors of the 18th District Agricultural Association will be held at Independence to-morrow evening to make the necessary arrangements for holding the coming fair and fixing the date.

The citizens of of Big Pine will celebrate the completion of the Owens River and Big Pine Canal by a grand ball to which everybody is cordially invited, tickets free, April 14th. A committee of arrangements has been appointed to conduct the affair and they are now busy making the necessary preparations. Visitors will meet with a hearty welcome.

The Cudahy Packing Company of Los Angeles has bought the Nadeau vineyard property at Los Angeles and an extensive plant for the killing and packing business is being completed. This packing house will make a market for five hundred hogs per day. The business of the Company is sure to increase with time, and when a railroad from Los Angeles reaches Owens Valley a big trade in hogs will be carried over it. There are many thousands of acres of good corn land here, the crops from which can be converted into first class pork.

Meteorological Summary.

Following is the report of the Weather Bureau Station at Keeler for the month of March, 1893.

Mean barometer 29 967
Highest barometer 30 333
Lowest barometer 29 580
Mean temperature 48.0
Highest temperature, 29th ..... 77.
Lowest temperature, 13th ..... 28.
Greatest daily range temp'ture, 28, 27th.
Least daily range temperature, 9, 8th.
Prevailing direction of wind, S. W.
Total movement of wind, 5673 miles.
Extreme velocity of wind, direction and date, 51 miles S. W. on 11th.
Total precipitation, 0.84 inches.
Number of days on which .01 inch or more of precipitation fell, 6.
Number of clear days 10
Partly cloudy days 11
Cloudy days 10

H. E. WILKINSON, Obrerver,
Weather Bureau.

In the economy of nature all things have their uses. At Azusa, Los Angeles County, a contractor named French was putting in a long line of earthen ware water pipe. The recent heavy rains filled up this pipe solid full of sediment to a length of seventy feet. The pipe is thirty inches in diameter and to take it up would be quite a loss to the contractor. Yet he could not think of any other way of getting the solid mass of sediment out of it. An acquaintance of the contractor helped him out of the difficulty. This man caught two gophers without hurting them. They were taken to the blocked pipe and let loose in the end of it. The little miners went to work for dear life and in twenty-three minutes came out of the lower end of the pipe. A small stream of water turned into the gopher holes flowed the pipe, and in a little while the dirt was all washed out.

Last Sunday morning Mr. H. L. Ryan, a thoroughly competent civil engineer, accompanied by the necessary assistants and crew started a survey south from a stake set on the line of the Seely Ditch survey in the southwest corner of the Broder field. It is not known whether the object of the survey is for a railroad or canal, but it can be used for both as the grades and levels are being taken. And the possibility of carrying a ditch to Salt Wells Valley over the ridge south of Owens Lake will be ascertained. Anyhow it looks like business, and whether railroad or canal it will be a great benefit to the county.

For Sale Cheap.

The stallion, Milo, half Norman, half Hambletonian, dapple grey, 16½ hands high, weight 1600 pounds. Also 15 head of mares and colts. Will sell the above singly or all together or will exchange for cattle. Address

P. LABARGE,
Lone Pine, Cal.

215 Powell St., San Francisco Cal

ORDER OF ADJUDICATION OF INSOLVENCY.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of J. V. Skinner, an Insolvent Debtor.

J. V. Skinner, having filed in this Court his petition, schedule and inventory in Insolvency from which it appears that he is an Insolvent Debtor, the said J. V. Skinner is hereby declared to be insolvent. The Sheriff of the County of Inyo is hereby directed to take possession of all the estate, real and personal, of the said J. V. Skinner, an Insolvent Debtor, except such as may be by law exempt from execution, and of all his deeds, vouchers, books of account, and papers, and to keep the same safely until the appointment of an Assignee of his estate. All persons are forbidden to pay any debts to the said Insolvent or to deliver any property, belonging to such Insolvent, to him or to any person, firm, corporation or association for his use; and the said Debtor is hereby forbidden to transfer or deliver any property, until the further order of this Court, except as herein ordered.

It is further ordered, that all the creditors of said Debtor be and appear before the Hon. Geo. M. Gill, Judge of the Superior Court of the County of Inyo, in open Court, at the Court Room of said Court, in the town of Independence, County of Inyo, on the 9th day of May, 1893, at 10 o'clock a. m. of that day, to prove their debts and choose one or more Assignees of the estate of said Debtor.

It is further ordered, that the order be published in the Inyo Independent, a newspaper of general circulation, published in the County of Inyo, as often as the said paper is published before the day set for the meeting of Creditors.

And it is further ordered, that in the meantime, all proceedings against the said insolvent be stayed.

GEO. M. GILL,
Judge of the Superior Court.

Dated April 3d, 1893.

Propagation License.

Notice to Breeders.

THE ATTENTION OF STOCKRAISERS and Breeders in Inyo County is called to the following provisions of Ordinance No. 44, Section 12:

"Every person who keeps a Stallion, Jack or Bull and permits the same to be used for the purpose of propagation, for hire, must annually obtain license therefor from the Tax-Collector."

Parties failing to procure such Propagation License are guilty of a misdemeanor. Licenses are now due.

J. S. GORMAN, Tax-Collector.

Independence, April 6, 1893.

ANNUAL MEETING

LONE PINE CANAL COMPANY.

Location of principal place of business, Independence, California. Location of works, Inyo county, California.

The Regular Annual Meeting of the Stockholders of the Lone Pine Canal Company will be held at the office of the Company, at the town of Independence, Inyo county, California, on Saturday, the Twenty ninth day of April, 1893, at the hour of One o'clock p. m., for the purpose of electing a Board of Directors to serve for the ensuing year, and the transaction of such other business as may come before the meeting.

DAVID HOLLAND,
Secretary.

Office—Independence, California.

STEEL, BLUE AND WHITE ENAMELED, "DRESDEN" WARE.

A True Old Saying!!

Goods Well Bought Are Half Sold.

Our buyers watch the markets carefully and purchas for cash, thus enabling us to quote telling prices that, compared with value, are small.

85 cents buys one of those gents white unlaundried shirts with a short bosom which does not rumple up or muss made of fine linen. Wamsutta muslin double back and patent continuous strip at neck and sleeve openings.

Windsor ties. As warm weather is at hand twill bring a demand for them which we are ready to supply having 100 dozen for you to choose from at 25 cents each. Come in plain colors, stripes checks and plaids.

GENTS OVERSHIRTS.

In this line we are showing the largest lines and strongest values of any retail line on the Coast. Bought direct from the manufacturers, thus saving you the middle-man's profit.

The line that bids fair to be most popular is the Stanley made with starched collars and cuffs, the bodies soft finished insuring comfort in summer. They come in calicoes, percales, cheviots and madras cloths, light and dark shades, stripes or figures. Prices $1 to $2 each.

Black satine overshirts, solid color or in fine hair line stripes from 50cts. to $1.25 each.

Domet flannel overshirts cut full size and well made. Price 25 cents each.

If you have not received one of our illustrated catalogues let us know. Copies sent free on application.

GENTS SHOES.

$3 buys the best calf shoe to be found anywhere for the money. Comfort and style combined. The bottoms are of the best white Oak tanned stock fastened with standard screws. Come in light, medium or heavy soles, suited to dress or every day wear. Sizes 5 to 11 and none genuine unless stamped "Hale's $3 Shoe on the bottom.

Hal's "School Boy's Pride."

These are one of our very best values in Boy's wear. Made on same shaped last as higher grades and thus ensuring a perfect fit. Come in light or heavy soles. Youths sizes 11 to 2. Price $2. Boys sizes 2½ to 5½. Price $2 50.

Ladies, Misses, and childrens shoes in all grades styles and prices

This spring sees many new novelties in wash dress fabrics. Some look like wool goods. Others, like silks, come in all sorts of effects and colorings. Printed Glorices, printed on pretty grounds, colors cream, tan light and medium blue, 29 in. wide, Price 12½ cts. per yd.

Black brocades. A fine quality of goods with small satin stripes and patterns of white pinhead dots and small figures. 32 in. wide, price 35 cts. per yd.

Cream Crepon Cloths. Something like crinkled seersucker. Very popular. Price 8½ cents per yd.

Samples of dress goods etc. sent free on application.

KENDALL'S SPAVIN CURE.

STAR, LANE CO., OREGON, Feb. 8th, 1892.

DR. B. J. KENDALL CO.,

Dear Sirs:—I have used your KENDALL'S SPAVIN CURE for the last twelve years never being without it but a few weeks in that time and I have made several wonderful cures with it. I cured a **Curb** badly **swenied**; tried every thing without any benefit, so I tried your liniment, and in a few weeks he was well and his shoulder filled up all right, and the other, a four year old that had a **Thoroughpin** and **Blood Spavin** on the same joint, and to-day no one can tell which leg it was on. These statements can be proven, if necessary; the four year olds are now seven and can be seen any day at Cottage Grove, Or. S. Z. PAXTON.

—Price $1.00 per bottle.—

Royal Never Fails.

ROYAL BAKING POWDER is always perfect; no experimenting is necessary with it; the housekeeper never has cause to return it to the grocer and beg for the return of her money. For a third of a century its invaluable qualities have been familiar to American housewives, who have found its use always a guarantee of light, sweet, pure and wholesome food.

Some baking powders are so imperfectly made from cheap and inferior materials that their manufacturers are compelled to take them back in large quantities. During the last year thousands of cases of one brand sold or commissioned upon a "guarantee" have been returned caked, spoiled and useless.

Do not take chances with a baking powder with which there is a possibility of failure.

ROYAL BAKING POWDER NEVER FAILS.

He—Do you love me darling? She—Sometimes I think I do; and then again, when you have on that hideous baggy new overcoat, I doubt the strength of my affection.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

Teacher—Now, Teddy, is Jerusalem a proper noun or a common noun? Teddy—Taituth neither. It's an ejiculation, mum.

Each year finds "*Brown's Bronchial Troches*" in new localities, in various parts of the world. For relieving Coughs, Colds, and Throat Diseases, they have been *proved* reliable. *Sold only in boxes.*

Maritime opinion at Port Townsend is almost unanimous that the derelict sighted off Cape Flattery is the bark Cowlitz, lumber laden, from Port Gamble for San Francisco.

A PICTURE IN FROST TIME.

A window, with wide panes embayed
And half moon seat of old gold cloth,
Looks forth to where the trees are swayed
By winds whose breath is chill and wroth.

And on the glass a filmy veil
Extends, as if to shield the bloom
That nods in greeting to the gale
From midst the warm and cheery room.

Roses and lilies, hothouse pinks
And pansies that no garden dew
E'er wet, and ferns whose fragile links
No woodland pool with shade did strew.

And showing multi-colored tints,
Full clusters of chrysanthemums
Flash back the roseate flame that glints
Where cosily the hearth log hums.

While near at hand sits one who reads
The pages of a book of art,
And naught outdoors or indoors heeds,
Lost in some spirit realm's fair mart.
—William Struthers in Detroit Free Press.

Plain Living.

To the ordinary homekeeping youth plain living is usually the every day diet to which he has always been accustomed, with little regard to its fitness or wholesomeness. With a royal contempt for divergent tastes, he is apt to give a domestic version of the old saying, "Orthodoxy is my doxy, so heterodoxy must be yours." What suits him should suit every one. The same spirit animated Dr. Johnson when he gave his famous definition of "oats" as "in England, food for horses, in Scotland for men." But the whirligig of time has so twisted affairs around that the food at which the great lexicographer sneered little more than a hundred years ago is now an article of daily diet in thousands of English homes. The plainest of plain living it is to us nowadays, but the high thinking of the Seventeenth and Eighteenth centuries was cultivated on a very different aliment. Yet who is prepared to say that greater intellects have ever been known in the English nation than were produced in the days of roistering, wine bibbing and high living, when such minds were developed as those of Shakespeare, Ben Jonson, Dryden, Addison, Swift, Pope and countless others whom time fails even to mention?—Christine Terhune Herrick.

$125,000 for a Book.

The Vatican library at Rome, celebrated for its thousands of valuable books, contains a copy of that most valuable of all books, the Hebrew Bible. Years ago, in the time of Pope Julius, about 1512 or 1514, a most remarkable offer was made for this Biblical treasure. A syndicate (I suppose the company was hardly known as a "syndicate" at that time) of rich Jews was formed for the purpose of getting the Bible out of the hands of the Catholic hierarchy. They made many offers, all of which were refused, capping the climax by offering its weight in gold. As the weight of the book is exactly 325 pounds, that offer was considered as being equivalent to $125,000 of United States currency.—Philadelphia News.

The Father of Pharaoh's Daughter.

Who was the father of pharaoh's daughter? What was his name? The word pharaoh was simply a title, and the phrase "pharaoh's daughter" gives no more information than "the king's daughter" or "the lord's daughter." Three pharaohs of the name of Thotmes, three of the name of Amenhotep and two of the name of Rameses have had their names advocated to be the father of the princess who rescued the infant Moses. There is a controversy going on about it—a controversy revived by the Rev. Professor Heckler at the congress of orientalists in London.

Killed the Cat.

Several years ago a farmer and his wife were sitting opposite each other at a kitchen table in a storm. A cat was lying beside them on the floor near the stove. The lightning struck the chimney over the kitchen, came down, and whirled the table about without injuring either the man or his wife. It struck the stove, passing off by one of its legs, which was melted, killed the cat, and finally went off into the well by way of a nail in the floor.—Exchange.

Some Dress Goods.

The dressmakers of the reign of Louis XV announced that, among other costly goods, they had for sale sad friend's color, doe's belly, scratched face, rat color, fading flower, dying monkey, gladsome widow, lost time, dead alive, sick Spaniard, mortal sin, common harm and chimney sweep.—St. Louis Globe-Democrat.

He Knew His Opportunity.

"I like you well enough, Mr. Sapling, but Ethel is too young to marry yet. I think it better that she should wait until she has arrived at years of discretion, so to speak."

"Yes, and then she will marry some one else."—Indianapolis Journal.

A gentleman who had gone to watch with a sick friend opened a door which led to the cellar, but from which the stairs had been removed. He fell and was killed. What a wicked neglect to have such a door unbarred in the front hall!

Antiochus Epiphanes died suddenly under circumstances which gave the Jews, whose temple he had profaned, occasion to regard his death as a judgment from heaven.

A Lotos of the Nile.

By CHRISTIAN REID.

She laid her hand—a pretty, white hand, gleaming with jewels—on his arm at the last words, and it was fortunate perhaps that she could not tell with what an effort he restrained himself from shaking it impatiently off. A quick feeling of repulsion came over him like an electric shock. Hitherto he had been somewhat flattered, somewhat amused and only occasionally a little bored by the favor which the beautiful and wealthy young widow had so openly accorded him, but now in a second he felt that thrill of disgust which always comes to a sensitive man when he sees a woman step beyond the pale of delicate womanhood. If he had been one shade less of a gentleman, he would have said something which Mrs. Lancaster could never have forgotten. As it was, he had sufficient command of himself to speak carelessly. "I was never quick at reading riddles," he said. "I am unable to imagine what sacrifice I should make by indulging the 'hopeless passion' for Miss Milbourne with which you are kind enough to credit me."

"With which I credit you?" she repeated eagerly. "Am I wrong then? If you can tell me that, Victor"——

But he interrupted her quickly: "You ought to know, Mrs. Lancaster, that this is a thing which a sensible man only tells to one woman, but, since you seem to take an interest in the subject, there is nothing which I need hesitate to acknowledge in the fact that, however hopeless my passion for Eleanor Milbourne may be, it is the very essence of my life, and can only end with my life."

But he interrupted her quickly.

"We all think that when we are young and foolish, and very much in love," said Mrs. Lancaster coolly—whatever stab his words gave the kindly darkness hid—"but I think you are more than usually mad. If she is not already engaged to Marston Brent, she will be as soon as he returns. I know that her family confidently expect the match, and in any case" (emphatically) "Eleanor Milbourne is the last woman in the world whom a penniless man need hope to win."

"I know that as well as you do," said Clare. "I have no hope of winning her and I am going to Egypt next month."

He uttered the last words as if he meant them to end the subject, but it is doubtful whether they would have done so if they had not at that moment found themselves close upon the house, having paid little attention to the path which they were following. As they emerged from the shrubbery they were both a little surprised to see a carriage standing in the full glow of the light from the open hall door.

"Who can have arrived?" said Mrs. Lancaster, not sorry, perhaps, for a diversion. "I did not know that Mrs. Brantley was expecting any one."

"Who has come, Ellis?" Victor said carelessly to a young man who emerged from the house as they approached.

"Marston Brent," was the answer. "It seems the Clytie made a very quick trip, and came into port yesterday, so of course her owner has come at once to report his safe arrival at headquarters."

Mrs. Lancaster, whose hand was still on Clare's arm, felt the quick start which he gave at this information, but she was a discreet woman, and she said nothing until they were standing on the veranda steps and he had bidden her good night, saying that he must ride back to Claremont.

"I understand why you will not remain," she said, "but do not make any rash resolution about Egypt—above all, do not commit yourself to anything." Then she bent forward and touched his hand lightly. "Tell me when you come again that you will join my party for the White Sulphur," she said softly. "It will be the wisest thing you can do."

The result of this disinterested advice was, that as soon as he reached home, after a lonely, starlit ride of six miles, Clare sat down, and wrote to Gen. —— accepting the position he had offered, and promising to report in Cairo as soon as possible.

After this it was several days before the future Egyptian soldier was seen again at The Willows. What went on in that gay abode during this interval he neither knew nor sought to know. He endeavored to banish all memory of the place and the people whom it contained from his mind. They were nothing to him, he told himself. It was impossible to say whether he shrank most from the pain of meeting Eleanor Milbourne with her accepted lover by her side, or from the thrill of disgust with which the mere thought of Mrs. Lancaster inspired him. He buried himself in listless idleness at Claremont for some time, then ordered his horse one day, rode to a neighboring town and made arrangements for the sale of his property with much the same feeling as if he had ordered the execution of his mother. It was when he returned weary and depressed from this excursion that he found a note from Mrs. Brantley awaiting him.

"DEAR MAJ CLARE" (it ran), "why have you forsaken us? We have looked for you wished for you and talked of you for days, but you seem to have determined that we shall learn the full meaning of the verb to disappoint. Will you not come over to dinner today? I think you have played hermit quite long enough. Truly yours, L. M. B."

To say that Clare declined this invitation would be equivalent to saying that a moth of its own accord kept at a safe distance from the glowing flame which epticed it. As he read the note his heart gave a leap. He began to wonder and ask himself why he had remained away so long. Was it not the sheerest folly and absurdity? What was Eleanor Milbourne to him that he should banish himself on her account from the only pleasant house within a radius of twenty miles? A man should have some self respect, he thought. He should not let every inquisitive fool see when and how and where a shaft has wounded him. Why should he not go? A heartache or two additional would not matter in Egypt. As for Mrs. Lancaster, he could certainly keep at a safe distance from her, even if she had not gone to the White Sulphur, as he hoped to heaven she had.

This devout hope was destined to disappointment. The first person whom he saw when he entered the well filled drawing room of The Willows was the pretty widow, in radiant looks and radiant spirits, not to mention a radiant toilet of the lightest possible and most becoming mourning. Despite his previous resolutions, Clare found himself gravitating to her side as soon as his respects had been paid to Mrs. Brantley—a fact which may serve as a small proof of the weakness of man's resolve, and his general inability to fight against fate, especially when it is embodied in a woman's bright eyes.

"What have you been doing with yourself?" she asked after the first salutations were over. "Have you been taking counsel with solitude on the Egyptian question? Or have you decided like a sensible man to go to the White Sulphur? Whatever has been the cause of your absence, you have at least been charitable in furnishing us with a topic of conversation. I scarcely know what we should have done without the 'Victor Clare disappearance,' as Mr. Ellis has called it, during the last week."

"I am sure you ought to be obliged to me, then," Clare said, flushing and laughing. "Assuredly I could not have furnished you with a topic of conversation for a whole week if I had been present."

"Opinion has been divided concerning the mystery of your fate," she went on. "One party has maintained that, rushing away in desperation, when you heard of Mr. Brent's arrival, you started the next day for Suez, the other, that you were hanging about the grounds, armed to the teeth, and only waiting an opportunity to dare your rival to deadly combat."

"How kind one's friends are, to be sure, especially when they are in the country, and have nothing in particular with which to amuse themselves!"

"But what have you been doing? I should like to know if you do not object to telling me."

"I have been very busy making my final arrangements for leaving the country," answered he, stretching a point, it must be owned.

"You are really going, then?" she asked after a minute's silence—a minute during which she was horribly conscious that her changing countenance might readily have betrayed to any looker on how deeply she felt this unexpected blow.

"I wrote to Gen. —— on the night I saw you last, accepting his offer," Clare answered. "Of course I am in duty bound, therefore, to report in Cairo as soon as possible."

"And you will sell Claremont?"

"I have no alternative."

She said nothing more, but he saw her hand—the same white jeweled hand that had gleamed on his arm in the starlight—go to her throat with a quick, convulsive movement. Instead of the thrill of repulsion which he had felt before, a sudden sense of pity and regret came over him now. He was not enough of a puppy to feel a certain keen enjoyment and gratified vanity in the realization of this woman's folly. He appreciated, on the contrary, how entirely she had been a spoiled child of fortune all her life—a queen regnant, to whom all things must submit themselves—and he felt how bitter must be this first sharp proof of her own impotence to secure the toy on which she had set her heart. It was these thoughts which made his voice almost gentle when he spoke again: "You must not think that I am ungrateful for your kind interest in my behalf. You can imagine, perhaps, how much I hate to part with Claremont, which has been the seat of my family for generations, but when a thing must be done there is no use in making a moan over it. I cannot sacrifice my life to a tradition of the past, and that would be what I should do if I clung to the old place, instead of cutting loose with one sharp stroke and swimming boldly out to sea."

"But you might stay if you would," said she, with that tremulous accent which the French call "tears in the voice."

"No, I could not stay," said Clare resolutely. "I have no money, nor any means of making any in America."

This ended the discussion. Even Mrs. Lancaster, fast and daring and willful as she was, could not say, "I have money—more than I know what to do with; take it." Her eyes said as much, but Clare did not look at her eyes. A minute longer passed in embarrassed silence. Then somebody came up, and Victor was able to walk away. As he crossed the room he saw Eleanor Milbourne for the first time since his arrival. He had not even inquired if she was still at The Willows, and her unexpected appearance, for he had begun to fear that she was gone, filled him with a rush of feelings of which the first and most prominent was delight. After all, did it matter whether or not she was engaged to Marston Brent? Simply to look at her was enough to fill a man's soul with pleasure, to steep him in that "dewlight of repose" which only a few rare things on this earth of ours are capable of inspiring. Did any sane person ever fly from the sight of Venus when she held her court all alone in the lovely summer heaven, because he could not possess her magic luster for his own? The comparison was not at all highflown to Clare, whatever it may seem to anybody else. He had always entertained as much hope of winning the star as of winning the woman; and as for an abstract question of beauty, he would have held that Venus herself could not have surpassed Eleanor Milbourne. She was an adorable goddess whom any man might be content to worship from a distance, he thought, and he was preparing to go and sun himself in the glance of her eyes, which seemed like bits of heaven in their blueness and their fairness, when Mrs. Brantley touched his arm and bade him take a newly arrived piece of white muslin in to dinner. Clare looked a little crestfallen, but against the decision of his hostess on this important subject what civilized man was ever known to revolt? He took the white muslin in to dinner, and had the satisfaction of finding himself separated by the length of the table from Miss Milbourne.

(TO BE CONTINUED.)

There's one variety of man
His fellows should ne'er forgive:
That's he who says life's not worth living,
And still continues to live.

TWENTY YEARS' EXPERIENCE.

C. D. Fredricks, the well-known photographer, 770 Broadway, New York, says: "I have been using ALLCOCK'S POROUS PLASTERS for 20 years, and found them one of the best of family medicines. Briefly summing up my experience, I say that when placed on the small of the back ALLCOCK'S PLASTERS fill the body with nervous energy, and thus cure fatigue, brain exhaustion, debility and kidney difficulties. For women and children I have found them invaluable. They never irritate the skin or cause the slightest pain, but cure sore throat, coughs, colds, pains in side, back or chest, indigestion and bowel complaints."

"What makes you think that new Bowery waiter came from Boston?" "Because when I ordered liver and bacon he howled out, 'Chicago *pate de fois gras* and Ignatius Donnelly.'"

NATURE'S SUREST ALLY.

If nature did not struggle against disease, even in weakly constitutions, swift indeed would be the course of a malady to its fatal termination. While nature thus struggles let us, lest worse befall us, aid her efforts with judicious medicinal help. Experience must be our guide in battles with disease, and that 'lamp to our feet" indicates Hostetter's Stomach Bitters as a safe, tried and thorough ally of nature. If the blood be infected with bile, if the bowels and stomach are inactive, if the kidneys fail to expel impurities of which they are the natural outlet, a course of the Bitters is the surest reliance of the sufferer, one, moreover, that is sanctioned by professional indorsement and use for nearly half a century. No American or foreign remedy has earned greater distinction as a remedy for and preventive of chronic liver complaint, malaria, constipation, kidney and rheumatic trouble and debility.

Roosters are a good deal like men. A rooster never gives notice of finding a worm until after he has swallowed it.

The use of Ely's Cream Balm, a sure cure for Catarrh and Cold in Head, is attended with no pain, inconvenience or dread, which can be said of no other remedy.

I feel it my duty to say a few words in regard to Ely's Cream Balm, and I do so entirely without solicitation. I have used it half a year, and have found it to be most admirable. I have suffered from catarrh of the worst kind ever since I was a little boy and I never hoped for cure, but Cream Balm seems to do even that. Many of my acquaintances have used it with excellent results.—Oscar Ostrum, 45 Warren Avenue, Chicago, Ill.

Apply Balm into each nostril. It is quickly absorbed. Gives relief at once. Price 50 cents at Druggists or by mail.
ELY BROTHERS, 56 Warren St., New York.

Mr. Younghusband—Darling, you have been weeping. What is it, my sweetest love?" Mrs. Younghusband—Horseradish!

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Losey, 838 Market street, San Francisco.

Often with the proverb's plan
Saddest havoc may be played.
"Man proposes," said the man—
"No he doesn't," cried the maid.

Try Germea for Breakfast.

Three Children Poisoned

By Impure Vaccination—Covered with Sores

How Their Lives Were Saved.

Mrs. James Thrower
San Jose, Cal.

"When we were living in Chico, Cal., my three children, respectively 5, 7 and 10 years of age, were all in good health until they were vaccinated in January, and after that not one of them was well for months. They were all **blood poisoned by impure matter** used in vaccination. In August I began giving them Hood's Sarsaparilla. They were covered with

Sores From Head to Foot.

After they had taken the medicine for about a month, the eruptions healed, their appetites became natural, they slept well and commenced to gain in flesh. **They have not had a sick day since.** No children are more **robust and healthy."** MRS. JAMES THROWER, San Jose, California.

Hood's Sarsaparilla Cures

HOOD'S PILLS cure Constipation by restoring the peristaltic action of the alimentary canal.

Perfect Baby Health

ought to mean glowing health throughout childhood, and robust health in the years to come. When we see in children tendencies to weakness, we know *they are missing the life of food taken.* This loss is overcome by

Scott's Emulsion

of Cod Liver Oil, with Hypophosphites, a fat-food that builds up appetite and produces flesh at a rate that appears magical.

Almost as palatable as milk.

Prepared by Scott & Bowne, N. Y. All druggists.

Every day a man hears a dozen things he ought to do that he can't do.

Our readers will serve themselves by noticing the remarkable offerings advertised in another column by the Sherwood Hall Nursery Co. of Menlo Park and San Francisco, who are leaders on the coast in furnishing everything for the farm and garden.

It is all well enough to say "don't worry" but the man that doesn't worry has a mind as blank and characterless as a frozen duck pond.

STATE OF OHIO, CITY OF TOLEDO, } ss.
LUCAS COUNTY.

FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.
FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

{SEAL} A. W. GLEASON, *Notary Public.*

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free.
F. J. CHENEY & CO., Toledo, O.
Sold by Druggists, 75c.

Thompson—Suppose a man should call you a liar, what would you do? Jones (hesitatingly)—What sized man?

Use Enameline Stove Polish; no dust, no smell.

ST. JACOBS OIL The Great Remedy for Pain. Cures all the Aches and Pains of Man & Beast.

HAVE YOU GOT PILES ITCHING PILES known by moisture like perspiration, cause intense itching when warm. This form and BLIND, BLEEDING or PROTRUDING PILES YIELD AT ONCE TO DR. BO-SAN-KO'S PILE REMEDY, which acts directly on parts affected, absorbs tumors, allays itching, effecting a permanent cure. Price 50c. Druggists or mail. Dr. Bosanko, Philadelphia, Pa.

JUST FULL of improvements—Dr. Pierce's Pleasant Pellets. To begin with, they're the smallest, and the easiest to take. They're tiny, sugar-coated anti-bilious granules, scarcely larger than mustard seeds. Every child is ready for them.

Then, after they're taken, instead of disturbing and shocking the system, they act in a mild, easy, and natural way. There's no chance for any reaction afterward. Their help *lasts*. Constipation, Indigestion, Bilious Attacks, Sick or Bilious Headaches, and all derangements of the liver, stomach, and bowels are promptly relieved and permanently cured.

They're put up in glass vials, which keeps them always fresh and reliable, unlike the ordinary pills in wooden or pasteboard boxes.

And they're the *cheapest* pills you can buy, for they're *guaranteed* to give satisfaction, or your money is returned. You pay only for the *good* you get.

MOORE'S REVEALED REMEDY CURES Rheumatism.

ASTORIA, OREGON, January 10.
I can state with pleasure that by the use of MOORE'S REVEALED REMEDY my husband was relieved from an old case of RHEUMATISM and my youngest boy cured entirely of INFLAMMATORY RHEUMATISM when the best doctor I could get did him no good. Yours in gratitude,
MRS. N. V. STEELE.

Justice to All.

It is now apparent to the Directors of the World's Columbian Exposition that millions of people will be denied the pleasure of becoming the possessors of

World's Fair Souvenir Coins

The Official Souvenir of the Great Exposition—

The extraordinary and growing demand for these Coins, and the desire on the part of the Directors that equal opportunities may be afforded for their purchase, have made it necessary to enlarge the channels of distribution. To relieve themselves of some responsibility, the Directors have invited

THE MERCHANTS

Throughout the Nation to unite with the Banks in placing Columbian Half-Dollars on sale. This is done that the masses of the people, and those living at remote points, may be afforded the best possible opportunity to obtain the Coins.

THE FORTUNATE POSSESSORS

of SOUVENIR COINS will be those who are earliest in seizing upon these new advantages.

$10,000 Was Paid For The First Coin

They are all alike, the issue is limited, and time *must* enhance their value. The price is One Dollar each.

HOW TO GET THE COINS:

Go to your nearest merchant or banker, as they are likely to have them. If you cannot procure them in this way, send direct to us, ordering *not less than Five Coins*, and remitting One Dollar for each Coin ordered.

Send instructions how to ship the Coins and they will be sent free of expense. Remit by registered letter, or send express or post-office money order, or bank draft to

Treasurer World's Columbian Exposition, Chicago, Ill.

HERCULES

Gas or Gasoline
ENGINES

Makes no smell or dirt.
For Simplicity it Beats the World.
No Batteries or Electric Spark to care for.
Just light the Burner, turn the Wheel, and it runs all day.
No double or false Explosions, frequent with the unreliable spark.
It runs with a cheaper grade of Gasoline than any other Engine.

SO THEY SAY.

They tell me I forget so soon,
And yet, and yet, when you're away,
My mem'ry oft goes slipping back
To little things I've heard you say—
To just the turning of your head,
To some familiar look or way;
And yet—and yet—why should this be?
I do not love you—so they say.

They tell me that my heart is stone,
Yet I can scarcely understand—
Do stones, I wonder, sometimes thrill
At just the light touch of a hand?
Why, when your eyes met mine tonight
Within the dance, I turned away—
And yet—and yet—it cannot be!
I do not love you—so they say.
—Lucy Bostwick in New York Saturday Review.

THE LAST ACT.

Southern Mississippi is covered with a dense growth of the most magnificent specimens of yellow pine, comprising one great primeval forest from the banks of the Mississippi on the west to the banks of the Pascagoula on the east; from Louisiana and the gulf on the south to the Vicksburg and Meridian railroad on the north. Here the forest breaks away, the pines become stunted and scattering, and finally disappear, giving place to live oaks, magnolias and hickories.

The inhabitants of this vast pine forest are an humble set of people, as far as wealth and power are concerned; but beneath their homespun coats beat hearts made noble by the highest element of manhood—pride. Not a weak, foolish pride, such as is manifested by the society butterflies of today, but that higher and holier pride which leads a man to respect his own name, and, respecting that name, scorn to tarnish it by disgrace. To a South Mississippian an insult is a wound that can only be healed by a bath of blood. "Honor" is the first and dearest principle. "Coward" is the lowest name that can be applied to a man.

Near the junction of Bogue Homo and Tallahala creek, in the very heart of the forest, lived two families, distinct in their likes and dislikes, different in all respects, except that they were both poor and both exceptionally proud—the Shellys and the Yawns.

Early in the history of Mississippi, while yet the slumbering echoes of the forests and glades were undisturbed by the sound of the settler's ax and the whistle of the locomotive, John Shelly, a young man of unusual energy, impelled by a spirit of adventure and stories of the vast wealth of the unexplored west, had bidden adieu to the friends and scenes of his youth in North Carolina, and with his young wife had penetrated the untrodden wilderness and erected his humble cabin among the tall pines of southern Mississippi. Here the forest king rarely ventured with his chilling breath, and summer sat enthroned fully nine months of the year. Naught disturbed his peaceful abode, and in time his "clearing" had grown to be many acres in extent, while around him thrived vast droves of stock and a large and happy family.

In the meantime the woods round about had sprung miraculously into life. On every hand new clearings were made, and new families entered upon the scene. The family of John Shelly had ample and pleasant association.

Among the newcomers was Robert Yawn, a young Virginian, highly educated, impetuous and proud. His clearing was next to that of the pioneer, John Shelly.

For some years the families of Shelly and Yawn were firm and unflinching friends. Every turn of the hand was made with reference to each other's comfort. All was peace and good will.

But this tranquil life was brought to a sudden end, and a strife was begun which time only served to imbitter.

The family supplies of the settlers of that neighborhood were purchased at a small crossroads store, which, even to this day, ninety years afterward, remains undisturbed by the growth of the world, remote from the busy whirlpool of advancing civilization—a country store. Of course old Billy Evans, the first proprietor, has for many years slept, under the shades of those tall pines, the silent sleep, yet still an Evans occupies the exalted position of merchant.

It was at this store that farmers of the pine woods would gather every Saturday for a social day together, which, after the advent of the first barrel of whisky at Matakka (we will call the place), gradually grew into a day of carousal and gambling.

It was here that the strong bond of friendship that had existed between the Shellys and the Yawns was broken. A dispute arose over a play at cards, words followed words, which, aided by the baneful effects of bad liquor, soon brought on blows. As a result Robert Yawn's long hunting knife was buried in the breast of his friend John Shelly.

Blood had been spilled, and by blood only was the stain to be washed away. Thus began the fierce vendetta between the Yawns and the Shellys, which terminated only with the death of the last of that name.

For years succeeding the feud existed, sometimes raging at a fervent heat, when a member of either family would be found dead in the swamp, with a gaping wound in his breast, from which issued the blood of life, and almost dying out when for a period of years no encounter would take place.

* * * * * * * *

With the close of the year 1876 came the last act of the bloody tragedy.

It was Christmas day; the sky was overcast. A restless wind blew the fitful clouds hither and thither in their uncertain way. From all appearances one of those long winter rains for which Mississippi is famous was about to begin. Matakka, usually dull, seemed imbued with a new life. The young descendant of Billy Evans, the pioneer, drew many a shining dollar over his counter in payment for the soul consuming liquid which had been the indirect cause of the quarrel between the Yawns and Shellys. The young Mississippians partook of the fiery liquor and waxed warm and quarrelsome as the whisky flew to their brains.

Among the men who filled the crowded barroom stood John Shelly, the last of the race. Never was a grander picture of a man beheld by admiring eyes than he. Tall, powerful and magnificent, his eyes seeming to pierce the very breasts of his associates, he stood as a giant among pygmies. His ready tongue and quick wit provoked a continual strain of laughter. Finally the conversation turned to the feud between the families of Yawn and Shelly; and the only living Shelly was lauded as the victor of one of the most bitter, fierce and long standing vendettas on record in the history of Mississippi.

"Ah! Fate willed it that the name of Shelly should triumph over that of Yawn," exclaimed the young man, and he was well applauded.

A stranger, plainly dressed and wearing a slouch hat, which hid his face from the gaze of the crowd, had entered almost unobserved. Upon hearing this boast, he threw off his hat, exposing to view a face clearly outlined with the features of a Yawn. He approached John Shelly and stood before him.

"Behold a Yawn! That name will never die before that of Shelly."

In an instant all laughter was hushed. With breathless interest every one gazed at the new comer. In every way he was the physical equal of young Shelly, and his flashing eye bespoke of courage in keeping with physical might. Two giants had met upon the arena, and the struggle would be a fierce one.

William Yawn was the last of the name. While the rebellion was at its height he had joined the Confederate army, and at the battle of Perryville, Ky., was captured, and for two years confined in the northern prison at Chase. Released from captivity, he had drifted from place to place, until on this fatal Christmas eve he had landed at his boyhood home, a worn and weary traveler, only to find the sacred ties which bound him to earth broken, and his relatives at rest beneath the pines. The last was a victim to John Shelly, and he resolved that the murderer should die. Firmly imbued with this thirst for revenge, William Yawn had sought his enemy at Matakka—and found him.

For a moment they glared at each other. The fire of fury flashed from their eyes. The warmest blood of their hearts mantled to their cheeks and tinged their brows. The final act was begun.

"A Yawn! By heaven, you shall die!"

"So let it be, John Shelly, but remember I am your equal."

"Never!" hissed Shelly through his set teeth.

"Yes, your equal!" replied the other. "Further, I challenge you to come with me into the depths of the Malochitto swamp, and at midnight let us wipe away all enmity by blood! Blood alone can atone for the wrongs I have suffered at your hand!"

For a moment John Shelly was silent.

Why had Yawn chosen such an unfrequented, lone and weird locality for the fatal meeting? Did he mean treachery?

"Are you a coward?" asked Yawn impatiently.

"No, by heaven! A Shelly never knew fear—especially of a Yawn! No! I will meet you there—would meet and fight you anywhere—on the very brink of destruction!"

"So let it be. At midnight, remember."

With these words the last of the Yawns turned away. He was followed in a short time by his mortal foe, John Shelly.

There was a buzz of excitement among the crowd at the barroom; some advocated following the two and being present at their fatal meeting.

"No," said Evans, Sr., "it will be of no avail. Their's is hatred of the deepest dye. Blood will be spilled. Let there be none to witness. Tomorrow we will search the swamp for the body of the last of either the Yawns or the Shellys—no one knows which it may be."

And with that the suggestion died away.

Midnight makes Malochitto Swamp the realm of Erebian darkness. A dreary, steady rain had raised the waters until none but the most experienced woodsman could have found his way through the sloughs and bayous of the dismal place. But at the hour appointed John Shelly and William Yawn stood face to face—tiger before tiger—devil before devil.

"Well, you are here I see," said Yawn.

"I am here," replied the other.

"John Shelly, this feud between our families has been a desperate one. It will end tonight. Each is the last of his race. One must die. Are you prepared?"

"I am," was the firm reply.

"Then be on your guard."

Knives were drawn, their long, keen blades shining through the Stygian blackness of the swamp.

Clash! clash! the weapons came together. A well directed blow had been skillfully warded off.

Clash! clash! another blow had counted nothing.

The combatants closed upon each other. Their breaths came quick and short. Not a word was said. Each struck to kill; each met a skillful thrust with a skillful parry.

A rumbling sound was heard afar off. It was the sound of a distant thunder.

Then came a flash of lightning, bright and blinding. Taking advantage of its gleam, the combatants renewed their efforts to plunge their daggers into each other's heart. Again they failed.

For another moment they fought in utter darkness. Each now felt that he had met an equal, and that a false step, an unwise thrust, meant death.

The flashes of lightning became more and more frequent, and the rattle of thunder louder and more deafening.

An hour had passed since the fierce struggle was begun. At last a climax was reached. In making a fierce lunge at his opponent's body John Shelly slipped. In an instant the knife of his adversary was up to the hilt in his breast. His warm blood gushed out, dyeing the hummock upon which they fought with a crimson stain.

Gloating for an instant over his victim's fall, William Yawn turned to go. An extraordinarily bright flash of lightning and a deafening peal of thunder finished the act. Seemingly untouched, but as dead as the man beneath him, William Yawn fell back across the prostrate body of John Shelly, and lay pale in death. The avenger was avenged.

With the morning a party of searchers, composed of those who had witnessed the meeting of the night before, ventured into the swamp in search of Yawn and Shelly. They found them where they fell. Yawn's hands were red with his adversary's blood.

"God," they say, "avenged the death of John Shelly, and retribution visited his slayer."

The vendetta was at an end. The curtain had fallen upon one of the most terrible of southern tragedies.—Joseph A. Parker in Drake's Magazine.

Just in the Nick of Time.

The father of the family, disturbed by the noise, entered suddenly:

"Who is doing all this loud talking?" he inquired.

Master Tommy, who was standing on the center table, took off the pair of his grandmother's spectacles he had on, looked solemnly at the congregation of neighbors' children seated in front of him, glanced at the dumb watch he carried, and said:

"My hearers, I leave this subject with you. Services this evening at the usual hour. We will now take up our regular collection. A considerable sum is needed for incidentals, and friends will please respond liberally."

It cost Tommy's father $1 75 to get out of the room gracefully.—Chicago Tribune.

His Hobby.

An insurance agent in Rochester never uses a letter stamp of the current series. He bought up a great lot of stamps of 1859 and 1861, and he uses these on all his letters, and goes about feeling that he is making it hot somehow for the postal department.—Detroit Free Press.

A HOPELESS TASK.

A Woman Tells Why She Gave Up Work Among the Poor and Lowly.

HER EXPERIENCE OF "SLUMMING."

She Discovered That She Could do More Work in Her Own Circle of Refined and Wealthy Friends.

The experience of one young woman in New York, whose parents could afford to keep her in luxury, but who preferred to do missionary work among the poor of the east side, is told by herself as follows:

"Why am I no longer 'slumming' as you call it? Because I have discovered that I can do more good in the social circle where I was born. That may strike you as strange. I only arrived at it myself by actual experience, and it surprised me too. When I first became thoroughly imbued with the idea that I must accomplish some good work for the cause of humanity, I naturally thought that most could be done where the field seemed largest. Comparing the lot of the very poor and ignorant and depraved with the lot of those among whom I had been brought up, there seemed to be no question as to where I ought to go and labor.

"Having overcome the opposition of my friends and having been accepted as a worker by a society which introduced me to the people I wished to elevate, I was a good deal surprised to find most of them did not desire elevation in the way in which I thought best for them. They were willing to be made rich, to be cured of diseases, to have their homes improved by somebody else, to have their children educated by outsiders and to be amused and entertained as much as you liked; but as for endurance, patience, self denial, generosity, meekness, virtue, sobriety, charity, these were not so popular.

"I found, too, that these people rather resented my coming among them. They watched me so closely for any sign of patronizing them that often they had not time to think of the truth of what I said to them. Few of them thanked me for my efforts on their behalf, and I found it hard to remain even a tolerably welcome visitor to their homes without condoning dirtiness, laziness, shiftlessness, wastefulness, rudeness and coarseness. If I were not welcome I could do no good, and if I were always finding fault with the habits of a lifetime I certainly would not be welcome.

"Deeply disappointed, after six months of work, at having made no appreciable permanent improvement in the moral life of those among whom I labored, I asked one godly old woman (for there are as many saints among the poor as anywhere) why I did not meet with more success. 'You're out of your depth, child,' said she. 'What do you know of our lives, of our ways, of our troubles, of our minds, of our way of looking at things? You don't understand us and we don't understand you. We don't see things in the same way, because we don't look at them from the same point.

"'You tell these poor people to be clean without knowing how much money and time, which is the same thing, it costs to be clean. Cleanliness is one of the dearest things in New York. You scorn laziness, but if you had been half fed from the cradle up, and that with food containing little nourishment, you would not have one-tenth of the energy you now have. Laziness is some people's only luxury. We're shiftless, you say, and don't save our pennies.

"'If I denied myself everything but the bare necessities of a life even such as I live, I could not save more than five cents a day, fifteen dollars a year, $750 in half a century, which, if the bank did not burst and rob me of it all, would give me thirty dollars a year to live on when I am too old to work, too full of pains and infirmities to make life on thirty dollars a year a thing to be desired. There's many a slip 'twixt the cup and the lip in fifty years, my girl, and we think it better to employ our spare pennies while we are sure of them. Rude and coarse we are, compared with your standard, but not ruder or coarser than people of your wealth and rank in society were some centuries ago, I am told; so don't despair of us, my dear, but leave us to God and ourselves and time and go back to those who love you.

"'Honestly now, don't you think there is plenty of godlessness, selfishness, greed, lust, cruelty, vanity, envy, backbiting, covetousness, deceit, folly, drunkenness and other forms of vice among the people you know in your own station in life to make a creditable record if you succeeded in removing it?'

"'Yes, auntie,' I said, 'I acknowledge that. There is much to be done even in my own family.'

"'And don't you really think now, if your own life and motives are such as to command the respect of your father, mother, sisters, brothers, cousins and dear friends, that their love for you and yours for them would give you more influence over them than over Bill Sykes, the teamster, whom you hear now blaspheming in the room over our head and threatening to beat his wife for not having his supper ready?'

"'Yes, auntie, I think you're right,' I said as the truth of her words came home to me. So here I am among my own people again, and I believe now that the rich can be elevated just as well as the poor, and that the Creator would just as soon see an educated person reform and lead a useful, virtuous life as an ignorant one, and I can more easily influence the educated one to do so."—New York Tribune.

The Ideal Husband.

This is a woman's description of an ideal husband:

A temperate, moral, intellectual, truthful, energetic, affectionate, thoughtful, forgiving, Christian man, who chooses a wife for her mind and heart rather than face, and waits until sure he has found the right one; who neither scolds nor laughs at his wife and never contradicts her in public; who loves home and children and has certain means for making an honest, comfortable living; who is economical, but not stingy, and unless wealthy keeps his life insured; who understands that women have nerves, need money, enjoy pretty things and are happier for being petted.

Uncle Simon Remarks.

Having heard of the attempt of a citizen of the town to commit suicide by cutting his throat, Uncle Simon sagely remarked:

"Well, if he'd a severated the bugle vein there wouldn't a bin any alternity under the panickes o' heaven!"—Lewiston Journal.

The picked women typewriters employed at the British war office receive fourteen shillings a week for seven hours' work a day, while the charwomen get twelve shillings for five hours' work a day.

A Shrewd Lawyer.

Was this story ever appeared in print? If so, I have never seen it, and I tell it as it was told to me. A certain young Russian, of good family, fell in love with a village girl, whom he wished to marry. His father, objecting on the ground of social disparity, made arrangements by which the girl was betrothed to a young peasant of her own class. Now, it is the custom in some parts of Russia for the bridegroom and his friends to begin drinking early in the day of the marriage, so that when the time comes for the church ceremony the groom has often to be led to the altar and supported by a friend on either hand. This happened on the morning of the marriage of the girl. The bridegroom was led to the altar supported by two men, of whom one was the young gentleman himself.

Now mark his craft and subtlety. When the time came for joining hands he put out his own hand, the groom being too far gone to notice anything, and so was joined in matrimony to the girl. The certificate of the marriage had already been written in the register before the ceremony, a precaution obviously necessary. The wedding over the young noble took the girl from her people at the church door, drove her away and took her to Paris, where they lived together in love and amity for several years. Then the father died, and it became necessary to return to Russia, and if possible, for the sake of the children, to get the marriage duly acknowledged.

This business was intrusted to a lawyer, who visited the village and saw the register. He returned, stating that it was impossible, because the marriage was entered in the books as between the rustic and the girl. Being, however, assured that something must be done, he returned, got possession of the register, and clumsily erased the name of the rustic bridegroom. This done he—at this point you ask what he did, and everybody says, "Filled in the other name." No he did not; he wrote again over the erasure the name of the village swain. Consider this for one moment. You will acknowledge that he was a very clever lawyer, indeed.—Walter Besant in Manchester Times.

Talkers and Conversation.

Some may say that the talker, like the poet, is born, and not made. But, after all, the "warbling-his-native-woodnotes-wild" theory is a very doubtful one. Nature must do much, but art must add thereto. Ben Jonson, in his lines to the memory of Shakespeare, debates this question, and concludes that "a good poet's made as well as born." The same may be said of a good talker. He is in part born and in part made. There are some people without the proper mental qualifications. But even where such natural qualifications exists they do not suffice. A very little social experience makes us shudder at the idea of the untutored talker. We are sometimes tempted to believe that men of the Polonius stamp are sent to remind us that the curse is not yet removed.

But there is a greater nuisance than Polonius. There is the bore of another species—who is brutal and calls it sincerity, or impertinent and calls it anxiety for your soul. Let us have art, then, as well as nature. Distinction in conversation is a very rare thing, more rare even than oratorical power. One great reason for this is that, even among those who would desire it, many do not find the requisite social conditions; and of those who do, not one in a thousand possesses the requisite combination of physical, mental and moral qualities.

Some have powder and no ball, others ball and no powder. Some have great command of language and little of thought. With others the conditions are reversed. I have referred to our modern feverish life as being unfavorable to conversation. There are other social conditions to be considered. Just as a certain combination of gases, which we call the atmosphere, around us is necessary for human life, so a certain social atmosphere is requisite for good talk, and the greater or less amount of social oxygen makes all the difference between languid or commonplace exchange of words and brilliant conversation.—Gentlemen's Magazine.

Growth of Our Language.

The dictionary of the Anglo-Saxon tongue has grown wonderfully since Dr. Johnson's time. "Webster's International Dictionary" contains many thousands of words that are not to be found in the vocabulary of the great English lexicographer, and a considerable proportion of these words apply to new discoveries, arts and processes, to which it was absolutely necessary to give distinguishing names. The nomenclature of science has been immensely extended within the last fifty years, and although some of the new terms are rather far fetched and, except to classical scholars, obscure, many of them are so pat and significant that we can all understand their meaning.

Whenever plain and simple words of Saxon derivation will apply, we think they ought to have the preference, even in scientific technology, over those of Greek or Latin origin. Information for the people should be couched, whenever possible, in language which the great body of the people can easily comprehend. It certainly should not be necessary for a boy to be versed in the dead languages in order to understand his own.

It has been said that the languages which most readily welcome the terms that advancing knowledge needs are likely to endure the longest and spread the most extensively. If this theory is true our own tongue has the best chance of becoming universal, and it may be reasonably supposed that "the last man" will pronounce his valedictory in English!—New York Ledger.

The Bath.

The following instructions of the secretary to the Royal Humane society of England upon bathing will be found of value:

Avoid bathing within two hours after a meal.

Avoid bathing when exhausted by fatigue or from any other cause.

Avoid bathing when the body is cooling after perspiration.

Avoid bathing altogether in the open air if, after having been a short time in the water there is a sense of chilliness, with numbness of the hands and feet; but bathe when the body is warm, providing no time is lost in getting into the water.

Avoid chilling the body by sitting or standing undressed on the banks or in boats after having been in the water.

Avoid remaininning too long in the water, but leave the water immediately there is the slightest feeling of chilliness. The vigorous and strong may bathe early in the morning on an empty stomach. The young and those who are weak had better bathe two or three hours after a meal; the best time for such is from two to three hours after breakfast.

Those who are subject to attacks of giddiness or faintness, and those who suffer from palpitation or other sense of discomfort at the heart, should not bathe without first consulting their medical adviser.

IN A STAMPEDE.

What it Means to Have a Herd of Steers Run Away on the Prairies.

CATTLE DRIVING IN NO MAN'S LAND.

Chasing Frightened and Half Mad Creatures for Hours in the Dark.—A Thrilling Ride.

"Fellers, they air goin' to run tonight." Old Joe, the speaker, turned in his saddle and began to scan the horizon. As he caught sight of a cloud no larger than your hand that was just beginning to show itself away to the northwest, he repeated the prophecy, and added, 'An' I don't think we'll have any kick a-comin' about the dust termorrer, either."

The time was in the seventies, the locality, No Man's Land, and we were on the old Dodge trail, with 1,600 beeves, bound for Ogalalla. The herd had been put up some seeks before on the Brazos. At Red river crossing we had picked up a bunch that had been lost out of a previous drove belonging to the same company. These steers were placed in our herd against the advice of old Joe. "They air ole stampeders, and they'll spile the whole herd. Let them wait for one of them dogie outfits behind us."

At supper that evening but little was said, even the cook's yarns, told in his inimitable style, fell flat. Every few minutes our foreman would cast uneasy glances at the great black clouds that were slowly rising in the northwest. Instead of picketing the horses, as was the custom, the animals were saddled and tied to the wagon, or to bushes close by.

The first guard had hardly more than taken charge when the rest of the outfit prepared to roll in. The cook, after tying a lantern to the tongue, climbed in the wagon, tied the sheet down and thanked the Lord that he was a cook. The wrangler found a place under the coupling pole that suited his complexion, while the riders unstrapped their little "hot roll" on the ground and piled in without removing even boots and spurs.

For some reason I was restless and unable to sleep. All the slumber produing receipts were tried in vain. I lay on my back and watched the clouds obscure star after star, until the whole heavens were hid. I counted the number of rounds the guards were making, and then fell to watching the lightning and trying to judge how far it was off by seeing how many I could count before I heard the thunder that followed every flash.

After a while, growing weary of this, I turned toward the fire. By it sat one of the guards sipping strong coffee between whiffs at his cigarette. The rattle of the chains on his spurs and bit as his horse jogged along told the whereabouts of an other, while the wild Spanish song that floated from the far side of the bed ground indicated that "Little Jack," in thought at least, was with his black eyed sweetheart on the distant Rio Grande.

I closed my eyes for a few minutes, and when I looked again the guard had left the fire. Little Jack's song was finished, and the only song from the bed ground was the deep breathing of some animal that had just lain down. The thunder had ceased for a few minutes, and the hoot of an owl in the cottonwood made the darkness still darker and the night more dreary.

As I dozed off Old Joe's words kept ringing in my head. "There ain't no danger es long es any of 'em air up an' a grazin', but when they air all down, and it's that quiet you kin hear your own heart beat, then yau wanter git ready ter ride."

I was still semi-conscious when I heard a roar like a mighty tornado and sprang up as some one shouted

"They are gone, fellows! They are gone!"

In less than a minute every man was in the saddle and rushing after the fleeing herd. No need to ask which way, the trained night horses know their duty, and are straining every nerve. The lightning's play is grand, electricity is everywhere, flames dance along the mane, a ball of fire gleams on each ear tip. By the flashes the riders locate the lay of the land in front.

Soon we begin passing the drags. No need to look after them, they'll follow, and the real work is on ahead. Far away in front, above the roar of cattle and thunder, the guards can be heard singing and shouting to the maddened herd. As we dash on the sounds appear to be coming more and more from the left, the leaders are being pressed around, and soon by a flash we see them coming, right in front of the crazed animals, looking like a ghost in his long white slicker, his fiery little night horse lunging and fighting for his head, rode Little Jack, singing, calling and swearing by turns.

By a concerted action, in which good luck, stout lungs and heavy quirts all play important parts, the herd is thrown together and the milling begins. Around and around they go, each animal with its head over the rump of the one just in front—no beginning, no end, just a solid mass, staring, moaning, as only stampeded cattle can. Balls of fire leap from horn to horn. The cowboys are seated on their horses still as statues, all forming a picture that can't be duplicated. The order is passed along to "Give more room!" the riders fall back, the "mill" ceases, and soon is heard a series of coughs. "Jess clearin' their pipes for another dash," some one says.

Now the rain begins, first slow, then increasing, till finally it is coming in a driving sheet. With the first drops the cattle turn and begin drifting with the storm, all the riders getting in front and endeavoring to hold them back.

"If we kin only hold 'em till their hides get wet I b'lieve we've got 'em," Old Joe says.

But it wasn't to be. Something gives them a scare and away they go! No sooner are the leaders checked than others turn leaders, and the whole herd goes thundering after them. Another mill is formed and the same performance gone over again.

So the night wears away. The runs grow shorter, occasionally an animal begins to eat. The rain is over, though the clouds still hang heavy. The lightning has ceased, and the riders sit still and motionless, unable to see even the heads of the horses they ride. Water stands everywhere, and the cattle begin grazing in all directions. The foreman gives orders to ride away, as our presence would only serve to stir up and scatter the herd.

Some unsaddle, roll up in their wet blankets and sleep. Others light pipes and cigarettes and begin watching for signs of the coming morning. With the first gray streaks in the east horses are saddled and the crew gather around for orders.

After a hot breakfast, during which all tell their experiences of the night, and Old Joe swears for the hundredth time that this is his last trip on the trail, beds are dried, fresh horses are caught, the herd is tallied and found correct, and once more we head for Ogalalla.—

Sunrise on Mount St. Elias.

In the morning I was awakened by the croaking of a raven on the snow immediately over my head, and found that the soft blue light of my grotto was replaced at the entrance by a pink radiance, telling that the day had dawned bright and clear.

What a glorious sight awaited me! The heavens were without a cloud, and the sun shone with dazzling splendor on the white-robed mountains. The broad, unbroken snow plain seemed to burn with light reflected from millions of snow crystals. The great peaks were draped from base to summit in the purest white, as yet unscarred by avalanches. On the steep cliffs the snow hung in folds like drapery, tier above tier, while the angular peaks above stood out like crystals against the sky. St. Elias was one vast pyramid of alabaster. The winds were still. Not a sound broke the solitude. Not an object moved. Even the raven had gone, leaving me alone with the mountains.

As the sun rose higher and higher and made its warmth felt, the snows were loosened here and there on the steep slopes and broke away, gathering force as they fell, and rushed down in avalanches that made the mountains tremble and awakened the echoes with a roar like thunder. From a small beginning high up on the slopes the new snow would slip downward, silently at first, and cascade over precipices hundreds of feet high, looking like a fall of foaming water; then came the roar, increasing in volume as the flowing snow involved new fields in its path of destruction, until the great mass became irresistible, and plowed its way downward through clouds of snow spray which hung in the air long after the roar of the avalanche had ceased.

All day long, until the shadows of evening fell on the steep slopes, this mountain thunder continued. The echoes of one avalanche scarcely died away before they were awakened by another roar. To witness such a scene under the most favorable conditions was worth all the privation and anxiety it cost.—Israel C. Russell in Century.

Printers' Epitaphs.

One of the oldest epitaphs upon a printer is that inscribed upon a monument erected in St. Mary's church, Datchet, to Christopher Barker, at one time printer to Queen Elizabeth. It runs as follows:

Here Barker lies, once printer to the crown,
Whose works of art acquired a great renown;
Time saw his worth, and spread around his fame,
That future printers might imprint his name.
But when his strength could work the press no more,
And his last sheets were folded into store—
Pure faith, with hope (the greatest treasures given),
Opened their gates and bade him pass to heaven.

In a different strain is the next epitaph we shall quote. It purports to be written by the defunct himself, but whoever wrote it showed a pretty turn for making a merry quip of a serious topic. No better idea of death being a release from cares and troubles could be conveyed than in the following lines:

No more shall copy bad perplex my brain;
No more shall type's small face my eyeballs strain;
No more the proof's foul page create me troubles
By errors, transpositions, outs and doubles;
No more to overrun shall I begin;
No more be driving out or driving in.
The stubborn pressman's brow I now may scoff,
Revised, corrected, and finally worked off.

Here is a curt complaint:

Weary of distributing pye,
Pressed out of life, I now must die.
I've cut my stick, my fount is sped,
My case is empty, as in life my head;
In fact, my last impression is—I'm dead.
—Manchester Times.

Modern Conversation.

Talleyrand, looking back, declared that he who had not lived before the French revolution knew nothing of the charm of living. Now, however, in England at least, conversation, like letter writing and a hundred other social joys of a quiet and leisurely age, is fled, and in their place we have telegrams, slang and slovenliness. There seems to be a general agreement that in our time conversation is in a bad way. Without repose, without a certain strain of old world courtesy, without manners, in short, conversation is impossible. Many will agree with M. Renan, who finds this to be a pushing, selfish, democratic age, of which "first come first served" is the rule, and which has ceased to pay any heed to civility. Nor is this a question only of manners.

When the philosopher Schopenhauer used to dine in tail coat and white tie at the table d'hote in Frankfort he used daily to place a gold piece beside his plate. "That," he explained when asked, "is to go to the poor whenever I hear the officers discuss anything more serious than women, dogs and horses." The gold piece always reappeared, and I fear it would do so in places nearer than Frankfort. Forty years ago Sir Arthur Helps in "Friends in Council" pronounced the "main current of society dreary and dull." It has not improved since.—Gentleman's Magazine.

The Benediction of Beatrice.

He always said she was a nice girl, but so awfully simple and artless. He said he liked to call and tell her all manner of impossible stories, and notice the open eyed astonishment with which she believed him. She heard what he had said and it did not please her.

One night he found her more lovely than ever. She seemed intensely interested in all he had to say, and so urged him on to finer efforts. Suddenly she heard her mother coming. "Oh, Mr. Ferguson!" she exclaimed, "climb behind the sofa and hide, won't you? It will be such a good joke on mamma."

He did what she wished, and Mrs. Brimmer came in. "Why, Beatrice," she began, "I thought I heard you talking to somebody. Didn't Mr. Ferguson call?"

"Yes, mamma," answered the sweet girl innocently; "he is behind the sofa. He crawled back there when he heard you coming. You know he is awfully bashful."

With a calm, stately walk Mrs Brimmer crossed the room and looked at the culprit. He rose, and, without any attempt at apology, took his hat and left the house.

She never saw him again.—Harvard Lampoon.

Was a Girl in the Case?

A local photographer tells a story of a young man who came into his studio one day and asked nervously if he might have a little conversation with him. The visitor was painfully ugly, and after some awkward blushing and indefinite allusions he asked the artist if he supposed he had among his samples a picture of any young man who looked like him, but was better looking.—Bangor Commercial.

Reason for Doubt.

"He is a sterling fellow in spite of his cheek."

"Can't see it. Can't see it at all. How a man can be sterling and brass at the same time is incomprehensible."—Munsey's Weekly.

A GREAT WORK.

Water From the Great Falls of Niagara Used to Drive Machinery.

WONDERFUL FEAT OF ENGINEERING.

$2,500,000 Spent for 100,000 Horsepower.—But Little Diminution of the Flow Over the Falls.

No engineer ever looked at the spectacle of power displayed by Niagara falls without a feeling that it was a crime to allow the enormous energy there stored up to run to waste from eternity to eternity. The artist is content to steep his soul in the beauty of the scene, but the average utilitarian American is likely to do some figuring on horsepower and available units of work. The prophecies of years are about to materialize in a great power plant which will utilize 100,000 of the 15,000,000 of horsepower going to waste over the falls, and $2,500,000 has been expended, and the water wheels will be in place and the sluices will be opened.

From the early years of the ownership of the falls by the Porter family the advantages of the great water power were freely discussed, but nothing was done until about 1850, when Horace A. Dey caused the construction of a canal, which takes water from a point above the rapids and conducts it to a set of mills built on the banks below the falls and now known as Schoellkopf's mills. The Niagara river makes a bend at a right angle, and the falls are at the apex of that angle. This canal forms the hypothenuse of a right angled triangle, of which the longest side is the river above and the shortest side the river below the falls. The mills are near the falls and are not a picturesque feature of the scenery.

The turbines which drive the mills are sunk in pits only about fifty or sixty feet deep, and consequently their tail races discharge a hundred feet or more above the surface of the rapids below the falls, and half of the available power of the water brought down by the canal is thus wasted. Less than 6,000 horsepower is utilized.

The new works have reversed this plan of a long supply canal and a short tailrace. They have been constructed on a modification of a plan first proposed by Thomas Duershed, a division engineer of the New York state canals. The plan is to have the mills on the banks above the falls and at a distance from the scenic locality, and then to have a long tunnel to carry the waste water down to the rapids.

The mouth of the canal is more than a mile above the falls. As far as constructed the canal is about 1,500 feet long, 12 feet deep, and varies from a breadth of 200 feet at the mouth to 100 feet at its inner end. Along the sides of this canal and of its branches to be built are sunk pits to a depth of 160 feet, and at the bottom of these pits are placed the turbine water wheels. Each of these wheels has 140 feet effective head of water over it. The water is carried down to them in great pipes seven or eight feet in diameter, called penstocks. After the water had done its work on the wheels it is discharged into the big tunnel, which runs away underground to the river below the falls.

This tunnel has been the most difficult and costly part of the work so far. It was cut through solid limestone rock, but the rock was found to crumble so badly after exposure that the whole 7,000 feet of the tunnel had to be bricked up. It is in the form of a horseshoe, twenty-eight feet high and eighteen feet broad, inside dimensions. Starting at a depth of 160 feet it has a downward slope or pitch of four feet in a thousand at first, increasing to seven feet in a thousand. Its mouth where it discharges into the rapids is 214 feet below the brink of the cliffs which form the ravine. Its cross section is 365 square feet, and at the speed of twenty feet a second, with which the water will rush out of it, there will be a discharge of about 50,000 gallons every minute.

And yet this enormous amount of water will not show any appreciable drain whatever on the magnificent volume of Niagara. It will lower the level of the great flood only about one and a half inches. The extent and constancy of this water power can be understood when it is realized that the water service of the great lakes, with the land sloping into them and contributing to the Falls of Niagara, has a total drainage basin of over 240,000 square miles—equal to more than twice the area of Great Britain and Ireland, about 40,000 square miles more than the total area of France, and more than fifteen times the total area of Switzerland. The Horseshoe falls are 158 feet high and 2,000 feet wide. The other channel, in the state of New York, forms the American falls, which are 169 feet high at the eastern side, and 1,000 feet wide, both falls comprising 3,600 linear feet of water.

The extreme limits of variation in the depth of the river at different times above the falls are 3½ feet, but these limits are rarely reached. The ordinary variation is about one foot. Below the falls the extreme variation reaches fifteen feet. Generally a variation of one foot above the falls is followed by a change of level of five feet below the falls. These slight changes are of short duration, and are due mainly to long continued and violent wind or sudden great accumulations of ice.

The average discharge of water at the outlet of Lake Erie into the Niagara river is estimated by some authorities at 265,000 cubic feet a second. Moreover, as far as this or the next two generations are concerned, it doesn't matter whether there is any rainfall, for there are 6,000 cubic miles of water backed up in the little mill pond of the Niagara Falls Power company, which is sufficient to run the falls in their present style for 100 years without the help of another drop from the clouds.—New York Tribune.

INYO INDEPENDENT.

Irv. H. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY FRIDAY.

INDEPENDENCE, CAL.

FRIDAY, APRIL 14.....1893

SUPERVISORS' PROCEEDINGS.

INDEPENDENCE, Inyo Co., California.
THURSDAY, Apr. 6, 1893.

The Board of Supervisors of the County of Inyo, state of California met at the hour of 9:15 a. m. on above named day.

Present, Supervisors Fitzgerald, Freeman Uhlmeyer, Wilson and Chairman Love.

Minutes of preceding meeting read and approved.

Ordered: That official bond of sheep License Collector be and is hereby fixed in the sum of $4,000.

Upon motion the District Attorney was instructed to submit draft of an Ordinance affecting game law in accordance with petition presented by citizens of Bishop Creek.

No. 27. Claim of J. R. Eldred for conveying election booth and ballot box from Alvord to Saline and return allowed on General expense fund in sum of $3.

Petition of T. F. A. Connelly, A. O. Collins et al., asking for establishment of a new county road in Townships Nos. 7 and 8 South, Range 33 East, was laid over till next regular meeting.

Petition of Frank Shaw, J. H. Stoutenborough et al., asking for establishment of a new county road to run from Shaw's residence North through sections 32 and 29, Township 6 South, Range 33 East, was laid over till next regular meeting.

Ordered: That the Road Commissioner of Supervisor District No. 3 be authorized and instructed to establish the lines of road running west between A. K. Engley's and Thomas Williams' in the town of Big Pine Road District No. 4.

Application of W. H. Huff for rebate of the special school taxes paid Independence District for the years 1887 to 1891 inclusive, in the sum of $25 97, for reason that his property is situate in Milton School District was laid over till next regular meeting.

No. 27: Claim of Dr. S. A. Middleton in sum of $25 for post-mortem examination upon body of Henry Boland allowed in said sum on General Expense Fund.

Application of Alexander Clark on behalf of Windsor Lodge, No. 238, I. O. G. T., for $41.40 for value of chairs loaned to and used by the County after the fire of 1886, rejected.

The Board proceeded to open and examine proposals for care of indigent sick of Inyo County as follows:

Bid of Rilla A. Clark for the sum of $750 per year and 90 cents per day for all excess over the average of four patients.

Bid of Margaret Lewis for the sum of $936 per year and 80 cents per day for all patients over the average of four.

Upon consideration said proposal of Margaret Lewis was accepted upon filing of contract in accordance with proposals and terms named and a good and sufficient bond in double the amount of said $936.

Proposals for services of County Physician were opened and examined as follows:

Dr. W. H. George for the sum of $550 per annum, provided care of indigent sick be at Bishop.

Dr. I. J. Woodin for the sum of $500 per year.

Louise L. Woodin M. D. for the sum of $400.

Dr. J. D. Blair for the sum of $500 per annum.

Petitions on file of citizens of the County praying for the appointment of County Physician were read and and considered as follows:

Favor appointment of I. J. Woodin.
Favor appointment of J. D. Blair.
Favor of L. L. Woodin.

Upon poll the vote resulted as follows:

For I. J. Woodin, Supervisors Uhlmeyer. and Wilson.

For L. L. Woodin, Supervisors Freeman, Fitzgerald and Love.

Whereupon L. L. Woodin M. D. was declared appointed County Physician to serve for the year beginning May 10, 1893 and ending May 9, 1894, upon filing of a good and sufficient bond in double the sum of compensation for said services.

Proposals for boarding County Prisoners for the ensuing year ending May 9, 1894, were opened and read as follows:

Bid of Rilla A. Clark, board of prisoners at Bishop Branch Jail at rate of 70 cents per day per head was accepted.

Bid of H. Levy, board of prisoners at County Jail at rate of 35 cents per day, rejected.

Bid of O. I. Mairs for boarding prisoners at County Jail at the rate of 34¾ cents per day per head, accepted.

Ordered: That County Auditor be directed to draw each month an order on the Hospital Fund in sum of $10 in favor of Supervisor Freeman to be expended in the support and care of T. J. Richards, indigent sick.

Whereupon the Board adjourned until 1:30 o'clock p. m., at which hour re-assembled and called to order, all members present as before.

In the matter of publication of Delinquent Tax List of 1892-3, the proposal of I. H. Mulholland to publish same at the rate of 75 cents per square for the first insertion and 25 cents per square for each subsequent insertion was accepted.

Report of County Auditor for the quarter ending March 31, 1893, was examined, accepted and approved.

Quarterly and monthly reports of County Treasurer, for same term, accepted and approved.

Reports of Road Commissioners, Robert Love and W. H. Uhlmeyer for April term, 1893, was accepted and approved

Claims were examined, audited and allowed as follows:

No. 29. Robert Love, labor and material on Bridge Fund, $87.50.

No. 30. W. H. Uhlmeyer, labor and material, $23 30.

No. 31. Walter Harris, Road District No. 7, $10.

No. 32. Tim Madden, labor and material, Road District No. 7, $18 25.

No. 33. F. Fitzgerald, mileage, Road District No. 7, $2.

No. 34. R. Love, mileage, Road District No. 2, $4.

No. 34. R. Love, labor, Road Dist No 2, $72.

No. 35. W. H. Uhlmeyer, mileage, labor and material, Road District No. 4, $86.40.

No. 36. W. H. Uhlmeyer, labor and material, Road District No. 5, $112 08.

The Board established following water rates for Independence Water Company:

Each hotel under ten rooms per wk.,	$1 00
Each hotel over ten rooms and under thirty, per week,	2 50
Each livery stable, per week,	1 00
Each corral, per week,	50
Each wash-house, per week,	1 50
Each Brewery, per week,	2 00
Each family use domestic purposes	50
Irrigating purposes, each lot per wk.	25
Water per 1,000 gallons, owner to pay for meter, per week,	50
Court House and grounds, per week,	1 00
Each store, per week,	50
Each saloon, per week,	50
Each business house,	25

Adjourned until Friday, Apr. 7, 1893, at 9 o'clock a. m.

R. LOVE, Chairman.
Attest: D. J. HESSION, Clerk.

FRIDAY, April 7, 1893.
9 o'clock a. m.

At the hour of 9:30 o'clock of the above named day the Board of Supervisors of the County of Inyo, State of California, met pursuant to adjournment.

Present, Robert Love, chairman; Supervisors Frank Fitzgerald, A. C. Freeman, W. H. Unlemeyer, John Wilson.

Minutes of proceedings of last day of preceding regular meeting read and approved.

Ordered that rates of toll in the Deep Spring Valley and Big Pine toll Road be fixed for the following year as follows:

Each wagon and pair of horses	$1 00
Each additional pair of horses	50
Each horse and rider	25
Each pack animal	12½
Loose stock, per head	10
Sheep, goats and swine, per head	5

Claims were allowed and warrants ordered drawn on funds as follows:

No. 37. S. P. McKnight, surveying road and making field notes and plats, Road District No. 3¼ Fund, $40.

No. 38. Charles Hedges, labor, Road District No. 5 Fund, $8.

No. 39. John Keegan, labor, Road District, No. 5 Fund, $10.

No. 40. W. W. Yandell, viewing road, Road District No. 3¼ Fund, $6.

No. 41. L. Case, viewing road, Road District, No. 3¼ Fund, $6

No. 42. John Wilson, road work, General Road Fund, $15 50

No. 43. John Wilson, material and work, Bridge Fund, $91 44.

No. 44. John Wilson, repairing road machine and freight, Road Fund, $24.77

No. 45. John Wilson, repairing bridge, Bridge Fund, $20 20.

No. 46. John Wilson, road work No. 5¼ Dist Fund, $39 40.

No. 47, John Wilson, road work, District No. 6 Fund, $67.65.

Petition of G. B. Bourland and C. B. Rawson et al. asking for appropriation for bridge across Rawson and Ford ditch, laid over until next regular meeting.

Resignation of C. W. Rathbun, member of Board of Education, received and accepted.

Members of Inyo County Board of Education were appointed as follows:

H. H. Howell and F. E. Densmore to serve for the term of one year, beginning July 1, 1893. Mrs. S. C. Mulholland and H. C. Hampton to serve for the term of two years from July 1, 1893,

Upon motion of Supervisor Fitzgerald, seconded by Supervisor Freeman, Ordered: That R. S. Miner Esq. be authorized and appointed special counsel for Inyo County, to appear in person before the California Supreme Court, in the case of Eldorado County vs. L. Moiss, in all and every stage of proceedings therein; that upon compliance with said conditions said R. S. Miner be allowed at the July term of this Board the sum of $350, and that the Clerk of the Board is directed to notified Mr. Miner hereof.

Board adjourned until 1 o'clock p. m. at which hour re-convened, all the members being present.

Ordered that the sum of $612 82 be transferred from the Special Building Fund to the General Expense Fund; that the sum of $1,500 be transferred from the Salary Fund to the General Expense Fund, and that the further sum of $750 be transferred from the Hospital Fund to the General Expense Fund.

Ordered: That warrants drawn in payment of construction of fire-proof vault be paid out of General Expense Fund.

Ordered: That the Clerk be authorized to procure an official seal for the office of County Auditor.

Ordinance No. 48, relative to and regulating time of hunting certain game in Inyo County was passed, enacted and ordained by the following vote:

Ayes: Supervisors Robert Love, A. C. Freeman, Frank Fitzgerald, John Wilson, W. H. Uhlmeyer.

Noes: None.

Claims allowed, per diem and mileage:

Supervisor Love	$44 70
Supervisor Freeman	42 00
Sbpervisor Fitzgerald	50 40
Supervisor Uhlmeyer	39 10
Supervisor Wilson	34 80

Whereupon the Board adjourned for the term.

(Official.)

Auditor's Report.

Quarterly report of the County Auditor of Inyo county, Cal., for the Quarter ending March 31st 1893

Mar. 31. Exhibit showing the amount of warrants drawn and registered and upon what funds since Dec 31, 1892, date of last report.

Inyo county, (sum total of warrants) drawn		$11 041 99

Inyo county (total indebtedness)	$66,490 55	
Less cash, in County Treasurer's hands subject to pay indebtedness		$31,351 20
Rem'ng Indebtedness		35 139 35
	$66 490 55	$66 490 55

Respectfully submitted to the Board of Supervisors of Inyo County.
D. J. HESSION, County Auditor.

Examined, accepted and approved this 6th day of April, 1893, by the Board of Supervisors.
R. LOVE, Chairman.

(Official.)

Ordinance No. 47.

THE BOARD OF SUPERVISORS OF THE COUNTY OF INYO, STATE OF CALIFORNIA, DO ORDAIN AS FOLLOWS:

SECTION 1. Section 7 of Ordinance No. 43, which was duly passed, enacted and ordained by the Board of Supervisors of the County of Inyo, State of California, at a regular meeting of said Board held on the 8th day of January, 1892, and which said Ordinance No. 43 is recorded in Ordinance Book "B" at pages 89 et seq., is hereby amended to read as fo lows:

Sec. 7. Every person who at a fixed place of business sells any malt or fermented liquors, wines or distilled liquors, whether on commission or otherwise (except vinticultural productions when sold by the producers thereof) must obtain from the Tax-Collector, and for each branch of said business, a license, and pay quarterly therefor the sum of Forty Dollars.

SECTION 2. This Ordinance shall take effect and be in force on and after Twenty-five (25) days from its passage.

SECTION 3. Section 9 of Ordinance No. 43, which was duly passed, enacted and ordained by the Board of Supervisors of the County of Inyo, State of California, at a regular meeting of said Board held on the 8th day of January, 1892, and which said Ordinance No 43 is recorded in Ordinance Book "B" at pages 89 et seq. is hereby repealed.

SECTION 4. This Ordinance shall be published with the names of the members of said Board of Supervisors voting for and against the same in the "Inyo Independent," a newspaper published in said Inyo County, at least two (2) weeks, said publication to be made said time, and before the expiration of said Twenty-five (25) days.

R. LOVE.
Chairman of the Board of Supervisors of the County of Inyo, State of California.
ATTEST:
{SEAL} D. J. HESSION.
Clerk of said Board of Supervisors.

The above and foregoing Ordinance No. 47 was duly passed, enacted and ordained by the Board of Supervisors of the County of Inyo, State of California, at a regular meeting of said Board held on the 5th day of April, 1893, by the following vote:

Ayes: Supervisors A. C. Freeman, W. H. Uhlmeyer, John Wilson, Frank Fitzgerald, R. Love.

Noes: None. R. LOVE.
Chairman of the Board of Supervisors of the County of Inyo, State of California.

Clerk Board of Supervisors.

Propagation License.

Notice to Breeders.

THE ATTENTION OF STOCKRAISERS and breeders in Inyo County is called to the following provisions of Ordinance No. 44, Section 12:

"Every person who keeps a Stallion, Jack or Bull and permits the same to be used for the purpose of propagation, for hire, must annually obtain a license therefor from the Tax-Collector."

Parties failing to procure such Propagation License are guilty of a misdemeanor. Licenses are now due.

J. S. GORMAN, Tax-Collector.
Independence, April 6, 1893.

ANNUAL MEETING

LONE PINE CANAL COMPANY.

Location of principal place of business, Independence, California. Location of works, Inyo county, California.

Ordinance No. 48.

THE BOARD OF SUPERVISORS OF THE COUNTY OF INYO, STATE OF CALIFORNIA, DO ORDAIN AS FOLLOWS:

SECTION 1. It shall be lawful for any person to hunt, pursue, take, and kill grouse, or sage hen, within the County of Inyo, at any time between the first day of August and the first day of January, in each year.

SECTION 2. Every person who, in the County of Inyo, between the last day of December and the first day of August, in each year, hunts, pursues, takes, kills, or destroys any grouse, or sage hen, is guilty of a misdemeanor, and shall be punished by imprisonment in the County Jail, not exceeding sixty days, or by a fine of not more than Sixty Dollars, or by both such fine and imprisonment.

SECTION 3. This Ordinance shall take effect and be in force on and after Twenty-five days from its passage.

SECTION 4. This Ordinance shall be published with the names of the members of said Board of Supervisors voting for and against the same, in the Inyo Independent, a newspaper published in the said County of Inyo at least two weeks, said publication to be made said time and before the expiration of said twenty-five days.

NOTICE OF SALE.

Real Estate to be Sold at Private Sale.

Notice is hereby given that in pursuance of an order of the Superior Court of the County of Yolo, State of California, made on March 13th, 1893, in the Matter of the Estate of W. S. Enos, deceased, the undersigned, the administrator of said estate, will sell at private sale to the highest bidder for cash, and subject to the confirmation of said Superior Court, all the right, title, interest and estate of the said W. S. Enos at the time of his death, and all the right, title and interest that said estate has by appropriation of law or otherwise accrued other than or in addition to that of the said W. S. Enos at the time of his death, in and to all that certain lot, piece and parcel of land situated in Inyo County, California, and described as follows, to wit:

The North-east Quarter, East half of the North-west Quarter, North-west Quarter of the South-east Quarter, and North-east Quarter of the South-west Quarter of Section Twelve, in Township Fourteen, South Range Thirty-five East, Mount Diablo Meridian; also the South-west Quarter of the South-east Quarter, and the South east Quarter of the South-west Quarter of Section One, in Township Fourteen South of Range Thirty-five East, Mount Diablo Meridian; also five hundred inches of water, measured under four-inch pressure, of that certain water right, appropriation or water location, situated in the County of Inyo, State of California, commonly known and designated as the Stevens Ditch Company Water right, also one-ninth interest in and to that certain water ditch commonly known and designated as the Stevens Ditch.

That said sale will be made on and after the 17th day of April, 1893, and that offers or bids for said land will be received at the Law office of R. Clark in Beamer's New Block, at Woodlank, Yolo County, California.

W. F. RUSSELL,
Administrator of said Estate.
Dated March 31st, 1893.

MISCELLANEOUS.

THE ODELL TYPE WRITER.

$20 will buy the ODELL TYPE WRITER with 78 characters, and $15 for the Single Case Odell, warranted to do better work than any machine made.

It combines SIMPLICITY with DURABILITY, SPEED, EASE OF OPERATION, wears longer without cost of repairs than any other machine. Has no ink or ribbon to bother the operator. It is NEAT, SUBSTANTIAL, nickel plated, perfect and adapted to all kinds of type writing. Like a printing press, it produces sharp, clean, legible manuscripts. Two or ten copies can be made at one writing. Any intelligent person can become a operator in two days. We offer $1,000 to any operator who can equal the work of the Double Case Odell.

Reliable Agents and Salesmen wanted. Special inducements to Dealers.

For Pamphlet giving Indorsements, &c., address

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY, the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit Commencing at the South-east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block Nor-4 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, but may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale:—Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

WILLIAM L. HUNTER,
Executor of the Last Will and Testament of John Allen Hannah deceased.

COURT NOTES.

Geo. M. Gill, Superior Judge.

MONDAY, Apr. 10th, 1893.

Estate of John Lubken, decessed—Issued letters testamentary and inventory and appraisement.

Guardianship of R. F. Brooks—Filed account of guardian and account accompanying final account. Filed petition for letters of guardianship; filed order for citation; issued citation.

BORN.

MCKENDRICK—At Independence, April 8, 1893, to Mr. and Mrs. Alex McKendrick, a son.

New Spring goods at Rhine's.

The Independence public school closes to-day.

W. R. Tibbetts was down from Big Pine last Monday.

F. W. Holbert has returned from his trip to Los Angeles.

Ed. Rose went to Bishop last Monday on his way to San Francisco. He expects to remain below.

Mrs. J. B. Steward and Miss Angie McDonald of Big Pine visited Independence early in the week.

Frank Fitzgerald and Arthur Smith visited Big Pine during the week, returning on Wednesday.

The arraignments of Wm. L. Withrow and John Candlin will come up in the Superior Court to morrow.

O. I. Mairs started for Mojave last Monday with four horses to meet Mr. Stock and a party of his friends.

Miss Maud Cook started for Los Angeles on Wednesday, going by way of Mojave. She intends to make an extended visit there.

The weather for the past two weeks is most unusual. It has been the coldest ever known in the Valley for the month of April.

Quite a number of Independence people expect to celebrate the Canal Celebration at Big Pine to-night. A good time is sure to be had.

R. Way came down from Bishop on Wednesday. He has cleared away the ground, and the foundation for the new vault will soon be laid.

Hon. P. Reddy is expected to arrive from San Francisco on this evening's train. Mr. Reddy is counsel for the plaintiffs in the water suit now pending in the Superior Court.

It is reported that a church fair will be given at Lone Pine soon for the purpose of erecting a Catholic church at that place. Full particulars will be given as soon as they are ascertained.

Attention is called to the professional card of Messrs. Mack and Densmore. Both gentlemen have been practising law at Independence for several years past and are well known throughout the County.

Last evening a party of Independence young folks chartered a four-horse conveyance, gayly decorated with bunting and chinese lanterns, and went to Mr. Bell's place at Camp Independence, where a very pleasant evening was spent.

At a meeting of the Directors of the 18th Dist. Agricultural Association held at Independence on Friday evening last, it was decided to hold the Annual Fair of 1893 at Bishop. F. McIver was elected President and Ben. H. Yandell Secretary. The date of the Fair was fixed for September 19th to 22nd inclusive.

P. LABARGE,
Lone Pine, Cal.

Close of School.

To-day is the last day of our school term, and from inquiries made made and the universal expression on the part of parents, it would seem that our teacher, Mr. A. E. Janvier, has has done his duty most conscientiously, and the community is to be congratulated on having had his able services. It is the desire of the Board of Trustees to secure him for the school next term, and with that view have spoken to Mr. Janvier. The gentleman stated that as the Board of Trustees could not enter into any contract for a teacher till after July 1st, he would reserve his answer till a later date. "The teaching of the Independence school" says Mr. Janvier, "is really more than one teacher can attend to with justice to all scholars. I have had as high as thirty-four exercises in a school day, and when you consider that a school day consists of 320 minutes it becomes apparent that some recitations must be greatly curtailed. In the graded schools of cities, where each class of from 50 to 60 scholars is of one grade, it requires the entire day to instruct scholars in all branches. When it is remembered that in a country school there are at least eight grades averaging four studies each, it becomes apparently impossible for one teacher to do all the work as it should be done for the best interests of the children." As our school census does not run high enough to allow us an assistant teacher (70 being the required number and we having only about 43) it would seem that we must make a virtue of necessity and carry on the school with but one teacher, unless the tax-payers of this district are willing to go down into their pockets at the rate of 30 cents per $100 on all their taxable property in the district. Such a tax can be levied according to the provisions of Sec. 1830 to Sec. 1839 of the political code. The assessed value of taxable property in the Independence school district is about $145,000, which at a rate of 30 cents would give us $435—sufficient to pay the services of an assistant teacher for six months. With a principal and an assistant teacher more and better work could be accomplished in six months than is now being done in a seven months term. The Board of Trustees would like to ascertain the feeling of people who are interested in this matter, before taking any action upon it; and for that purpose have called a meeting at the reading room of the Norman House for next Tuesday evening, Apr. 18, where any person wishing to be heard will be gladly listened to on this subject. Mr. Janvier has kindly consented to be present and will address the meeting.

A Road From Independence to Mojave In Frospect.

[Special to the Examiner.]

C. Mulholland of Independence, Inyo County, is in the city, and in conversation with the *Examiner* reporter stated that a plan has been perfected for the construction of a line of railway from Mojave, at the junction of the Southern Pacific and Atlantic and Pacific Railways, to Independence, which will bring to Los Angeles again an immense trade. Mr. Mulholland described how a short time before the great increase of sats city's population, caused by the "boom," the extension of the Carson and Colorado Railroad into Owens Valley diverted all the trade of Inyo County to San Francisco; prior to that time all that trade had come to Los Angeles.

Mr. Mulholland said that within a few weeks parties have become interested in the building of this projected road who appear to be amply able and fuby determined to put it through without delay. A company was organized very recently and duly incorporated according to the laws of the State. A party of engineers are now in Owens Valley surveying the line toward Mojave.

Henry Ryan, a well-known civil engineer, is chief of the party, and it is expected that as soon as possible after his report is made, contracts will be let and work begun.

It will be an easy line to build, the whole distance from Mojave to Independence, the county seat of Inyo County, is less than 150 miles, and it is expected that trains will be running over the line by next fall.

Leaving Mojave the new line will run north across the the open plain about twenty miles There is a low range of hills that puts out from the main range of the Sierra Nevadas. A pass called Red Rock canyon runs through this low range and affords a good route for a railroad. It is now the route traveled by wagon from Mojave to Owens Valley. But the railroad need not follow the canyon—by swinging a little to the east the road can easily go round the low range and enter on the north side of the range, and so on to Independence.—*S. F. Examiner.*

MISCELLANEOUS.

ANTARE.

1st premium Trotting Stallion, 1891-2. Bred by S. L. Akens, Newman, Cal. Foaled April 6, 1887. Stands 15¾ hands high and weighs 1250 pounds. Color, mahogany bay with black points; no white. By ANTEROS, 6020.

1st dam, Sallie W., by Iowa Chief, 525.
2d dam by Tornado, 502.

ANTEROS, 6020.

By Electioneer, 125, the greatest sire of trotters living or dead; 125 of his get having records from 2:08¼ to 2:30. Among this number are Palo Alto, 2:08¼; Sunol, 2:08¼; Arion, 2:10¼ at 2 years; Nutbine, 2:31½ and Bell Bird, 2:26 as yearlings.

1st dam of Anteros, the great Columbine, dam of Anteeo, 2:16½
Antevolo, 2:19½
Antonia
Conrad
Coral, 2:18½
Speedwell

Anteros is the sire of—
Doc Chresle, 4 years, 2:21
Nellie F, 4 years, 2:25
Anterose, 4 years, 2:25
Major Ross, 2 years, 2:30
Wilkeross, 2 years, 2:34¾
Enturia, 3 years, 2:33¼
Montgomery, 3 years, 2:37½
Antero, 3 years, 2:38½
Bessie B, 3 years, 2:17
Anteorian, 3 years, 2:57
Antare, 4 years, 2:57

Antare is a "horse attached to a pedigree," possessing that quality so highly prized among horsemen, INDIVIDUAL MERIT, having the power to transmit both his color and form to his progeny. His record was made after trotting four well contested heats the day previous and is the fastest time ever made by any stallion ever owned in Inyo county over any track in the 18th District.

ANTARE was awarded the first premium over all comptitors at the District Fairs of 1891-2. At the fair of 1893 we propose to exhibit an "Antare Family," of twenty five of his colts, and we challenge the owner of any stallion in the 18th District to exhibit one or more colts two-years-old or under that can compare with the colts sired by this horse.

TERMS FOR THE SEASON, $25 00,

Payable on or before August 1, 1893.

Mares from a distance pastured free of charge but no risks taken.

S. P. SMITH, Manager.

ORDER OF ADJUDICATION OF INSOLVENCY.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of J. V. Skinner, an Insolvent Debtor.

J. V. Skinner, having filed in this Court his petition, schedule and inventory in Insolvency from which it appears that he is an Insolvent Debtor, the said J. V. Skinner is hereby declared to be insolvent. The Sheriff of the County of Inyo is hereby directed to take possession of all the estate, real and personal, of the said J. V. Skinner, an Insolvent Debtor, except such as may be by law exempt from execution, and of all his deeds, vouchers, books of account, and papers, and to keep the same safely until the appointment of an Assignee of his estate. All persons are forbidden to pay any debts to the said Insolvent or to deliver any property, belonging to such Insolvent, to him or to any person, firm, corporation or association for his use; and the said Debtor is hereby forbidden to transfer or deliver any property, until the further order of this Court, except as herein ordered.

It is further ordered, that all the creditors of said Debtor be and appear before the Hon. Geo. M. Gill, Judge of the Superior Court of the County of Inyo, in open Court, at the Court Room of said Court, in the town of Independence, County of Inyo, on the 9th day of May, 1893, at 10 o'clock a. m. of that day, to prove their debts and choose one or more Assignees of the estate of said Debtor.

It is further ordered, that the order be published in the Inyo Independent, a newspaper of general circulation, published in the County of Inyo, as often as the said paper is published before the day set for the meeting of Creditors. And it is further ordered, that in the meantime, all proceedings against the said insolvent be stayed.

GEO. M. GILL,
Judge of the Superior Court.

Dated April 3d, 1893.

A True Old Saying!!

Goods Well Bought Are Half Sold.

Our buyers watch the markets carefully and purchas for cash, thus enabling us to quote telling prices that, compared with value, are small.

85 cents buys one of those gents white unlaundried shirts with a short bosom which does not rumple up or muss made of fine linen. Wamsutta muslin double back and patent continuous strip at neck and sleeve openings.

Windsor ties. As warm weather is at hand 'twill bring a demand for them which we are ready to supply having 100 dozen for you to choose from at 25 cents each. Come in plain colors, stripes checks and plaids.

GENTS OVERSHIRTS.

In this line we are showing the largest lines and strongest values of any retail line on the Coast. Bought direct from the manufacturers, thus saving you the middle-man's profit.

The line that bids fair to be most popular is the Stanley made with starched collars and cuffs, the bodies soft finished insuring comfort in summer. They come in calicoes, percales, cheviots and madras cloths, light and dark shades, stripes or figures. Prices $1 to $2 each.

Black satine overshirts, solid color or in fine hair line stripes from 50cts. to $1.25 each.

Domet flannel overshirts cut full size and well made. Price 25 cents each.

If you have not received one of our illustrated catalogues let us know. Copies sent free on application.

GENTS SHOES.

$3 buys the best calf shoe to be found anywhere for the money. Comfort and style combined. The bottoms are of the best white Oak tanned stock fastened with standard screws. Come in light, medium or heavy soles, suited to dress or every day wear. Sizes 5 to 11 and none genuine unless stamped "Hale's $3 Shoe on the bottom.

Hale's "School Boy's Pride."

These are one of our very best values in Boy's wear. Made on same shaped last as higher grades and thus ensuring a perfect fit. Come in light or heavy soles. Youths sizes 11 to 2. Price $2. Boys sizes 2½ to 5½. Price $2 50.

Ladies, Misses, and childrens shoes in all grades styles and prices

This spring sees many new novelties in wash dress fabrics. Some look like wool goods. Others, like silks, come in all sorts of effects and colorings. Printed Glorioos, printed on pretty grounds, colors cream, tan light and medium blue, 29 in. wide. Price 12½ cts. per yd.

Black brocades. A fine quality of goods with small satin stripes and patterns of white pinhead dots and small figures. 32 in. wide, price 35 cts. per yd.

Cream Crepon Cloths. Something like crinkled seersucker. Very popular. Price 8½ cents per yd.

Samples of dress goods etc. sent free on application.

The New Bread.

ROYAL unfermented bread, made without yeast, avoiding the decomposition produced in the flour by yeast or other baking powder; peptic, palatable and most healthful; may be eaten warm and fresh without discomfort, which is not true of bread made in any other way.

Can be made only with Royal Baking Powder.

Receipt for Making One Loaf.

ONE quart flour, 1 teaspoonful salt, half a teaspoonful sugar, 2 heaping teaspoonfuls Royal Baking Powder, half medium-sized cold boiled potato, and water. Sift together thoroughly flour, salt, sugar, and baking powder; rub in the potato; add sufficient water to mix smoothly and rapidly into a stiff batter, about as soft as for pound-cake; about a pint of water to a quart of flour will be required—more or less according to the brand and quality of the flour used. Do not make a stiff dough, like yeast bread. Pour the batter into a greased pan, 4½x8 inches, and 4 inches deep, filling about half full. The loaf will rise to fill the pan when baked. Bake in very hot oven 45 minutes, placing paper over first 15 minutes baking, to prevent crusting too soon on top. Bake at once. *Don't mix with milk.*

Missouri Commissioners are ordered to raise the figures of railroad valuation.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

CONSUMPTION.

A Lotos of the Nile.

By CHRISTIAN REID.

After dinner Mrs. Brantley claimed his attention. It seemed that there was a plan under discussion for showing the sole lion of the neighborhood—a hill of considerable eminence known as Farley's Mount—to the guests of The Willows. But it was distant twelve miles. What did Maj Clare think of their starting early, breaking the ride by rest and luncheon at Claremont, then going on to the mountain, making the ascent, and returning by moonlight?

"It will not do at all," said Victor. "Twenty-four miles is too much to be undertaken on a July day by a mere party of pleasure. You would break yourselves down and see nothing. I propose an amendment: Take two days instead of one, and spend a night on the mountain. If you have never camped on a mountain, the novelty is well worth experiencing, and these midsummer nights have scarcely any length, you know. Then the sunrise is magnificent."

"That is exactly what we will do," cried Mrs. Brantley, clapping her hands with childish glee. And the proposal, being submitted to the company, was unanimously carried.

Meanwhile Eleanor Milbourne was walking with Mr. Brent in the soft summer twilight on the lawn.

"You should not press me so hard," she said, as they paced slowly to and fro. "I fear I can never give you what you desire, but I cannot tell yet. Grant me a little time."

"A little time! But think how much time you have had!" the gentleman urged, not without reason. "You said when I went abroad that you were not sure enough of your heart to accept me then, but that you would give me a final answer when I returned. You had all the months of my absence to consider what this answer should be, and when I came for it, spending not so much as an hour in tarrying on the road, I found that it was not ready for me—that I had yet longer to wait. Eleanor, is this kind? is it even just?"

"It is neither," said Eleanor, turning to him with a strange deprecation on her fair proud face. "I know that you have been everything that is patient and generous, and I am sorry—oh, I am more than sorry—to have seemed to trifle with you, but what can I do? Remember that when I decide, it is for my whole life. You cannot doubt that I will hold fast to my promise when it is once given."

"I do not doubt it, and therefore I desire that promise above all things."

"But you would not desire the letter without the sprit?" said she eagerly. "I dare not bind myself—I dare not—until I am certain of myself."

"But, good heavens!" said Marston Brent, who, although usually the most quiet and dignified of human beings was now fairly driven to vehemence, "when do you mean to be certain of yourself? Surely you have had time enough. Can you not love me, Eleanor?" he asked a little wistfully. "If that is it—if that is the doubt that holds you back—say so and let me go. Anything is better than suspense like this."

But Eleanor was plainly not ready to say that. She stood still for a moment, then turned to him with a sudden light of resolve in her eyes. "You are right," she said. "This must end. I may be weak and foolish, but I have no right to make you suffer for my weakness and my folly. I pledge myself to tell you to-morrow night whether or not I can be your wife. You will give me till then, will you not? It is the last delay I shall ask."

"I wish you would understand that you could not ask anything which I should not be glad to grant," said he, a little sadly. "For heaven's sake, do not think of me as your persecutor—do not force yourself to answer me at any given time I can wait."

"You have waited," said she gratefully—"waited too long already. Do not encourage me in my weakness. Believe that I will tell you to-morrow night my final decision."

Later in the evening, Victor Clare was leaving the drawing room as Miss Milbourne entered it. They came face to face rather unexpectedly, and while the gentleman fell back the lady extended her hand.

"Have you stayed away so long that you have forgotten your friends, Maj Clare?" she said with a smile which was bright but rather tremulous, like a gleam of sunshine on rippling water. "You have not even said good evening to me, and yet you have an air as if you had said good night to the rest of the company."

"So I have," answered Victor, smiling in turn, partly from the pleasure of meeting her, partly from the sheer magnetism of her glance, "but it is no fault of mine that I have not been able to speak to you: I have found no opportunity."

"But I thought you always said that people made opportunities when they desired to do so?"

"Then the time has come for me to retract my assertion. As a general rule, a man cannot make opportunities: he can only take advantage of them when they come, as I hope to take advantage of the present," he added, smiling.

"But I thought you were going home?"

"I was going home a minute ago, but so long as you will let me talk to you I shall stay."

"It is a very small favor to grant," said Eleanor, blushing a little. "But why were you leaving so early?"

"Partly because I had no hope of seeing you, partly because I am not a 'young duke' to pencil a line to my steward and know that a princely collation will be served at noon to-morrow for half a hundred, or even for a dozen or two people."

"What do you mean?" she asked, for though she caught the allusion to Disraeli's rose colored romance, the application puzzled her.

"I see you have not heard of our gypsy plan," he answered, and at once proceeded to detail it.

She was not so much delighted as he expected, but a pretty, lucid gleam came into her eyes at the mention of Claremont.

"I shall be glad to see your home," she said quietly. "I have heard so much of its beauty and its antiquity."

"It is pretty and it is old," said he, "but it will not be mine much longer. I am negotiating its sale now."

She started: "What! you were in earnest, then? You are really going to Egypt?"

"Yes, I am going to Egypt. Why should I stay? What has life to offer me here save vegetation? There, at least, I can find action."

She looked at him with a strange, wistful expression which struck and startled him. He felt as if a prisoned soul suddenly sprang up and gazed at him out of the clear blue depths of her eyes. "Oh, what a good thing it is to be a man!" she said. "How free you are! how able to do what you please and go where you please—to seek action and to find it! Oh, Maj Clare, you ought to thank God night and day that he did not make you a woman!"

"I am glad, certainly, that I am a man," said Victor, honestly. "But you are the last woman in the world from whom I should have expected to hear such rebellious sentiments."

"I am not rebellious," said Eleanor more quietly. "What is the good of it? All the rebellion in the world could not make me a man; and I have no fancy to be an unsexed woman. But nobody was ever more weary of conventional routine, nobody ever longed more for freedom and action than I do."

It was on the end of Victor's tongue to say, "Then come with me to Egypt," but he caught himself in time. Was he mad to imagine that "the beautiful Miss Milbourne"—a woman at whose feet the most desirable matches of "society" had been laid—would end her brilliant career by marrying a soldier of fortune, and expatriating herself from her country and her kindred? He gave a grim sort of smile which Eleanor did not quite understand, as he said: "Where is your lotos? It ought to make you more content with the things that be."

"I have it," Eleanor said with childlike simplicity. "Mr. Brent remembered and brought it to me. I have not forgotten my promise to share it with you."

"Take it to the mountain to-morrow night, then," said he quickly. "Let us eat it together there. I should like to link you even with my farewell to the past."

And, since an interruption came just then, they parted with this understanding.

The next day Maj. Clare was standing on the terrace of Claremont—a stately, solidly built old house, bearing itself with an air of conscious pride and disdain of modern frippery, despite certain significant signs of decay—when his guests arrived in formidable procession. There was something of the "old school" in his manner of welcoming them—a grace and courtesy which struck more than one of them as at once very perfect and very charming.

"The man suits the house, does he not?" said Mrs. Brantley to Mrs. Lancaster. "It is like a vintage of rare old wine in an old bottle. We fancy that it has an aroma which it would lose in a new cut glass decanter."

"I always thought Maj. Clare had delightful manners," said Mrs. Lancaster, who could not trust herself to say anything more. She felt with a pang how much she would have liked to bring wealth and prosperity and elegant hospitality back again to the old house, if its owner had not been so madly blind to his own interest, so absurdly in love with Eleanor Milbourne's statue like face, so insanely intent upon periling life and limb in the service of the viceroy of Egypt. The pretty widow gave a sigh as she arranged her hair before the quaint, old fashioned mirror in the chamber to which the ladies had been conducted. If he had only been reasonable how different things might be! She walked to a window which overlooked the garden with its formal walks and terraces, its borders of box and summer houses of cedar. "He will change his mind before the month is out," she thought. "A man cannot surrender all the associations of his past and the home of his fathers without a struggle."

This consideration lost some of its consoling force, however, when, a few minutes later, two people, walking slowly and evidently talking earnestly, passed down the vista of one of the garden alleys, and were lost to sight behind a tall clipped hedge. Even at that distance there was no mistaking the figure and bearing of Clare, neither was there another woman who walked with that free, stately grace in a riding habit which Eleanor Milbourne possessed. "If she is engaged to Marston Brent he might certainly put an end to such open flirtation as this," Mrs. Lancaster said between her teeth. "If he were not blind or mad he might see that she is so much in love with Victor that she would go with him to Egypt to-morrow if he asked her to do so."

An old and sensible proverb with which we are all acquainted says that it is never well to judge others by ourselves, and if Mrs. Lancaster had possessed the invisible cap of the prince in the fairy tale, and had followed the pair who had just passed out of sight, she would have received an immediate proof of the truth of this aphorism. They had paused in a square near the heart of the garden—a green, shaded spot, in the center of which an empty basin bore witness to a departed fountain, though no pleasant murmur of water had broken the stillness for many a long day. Round the margin of this still ran a seat on which Eleanor sat down. Victor remained standing before her. A lime tree near by cast a soft, flickering shadow over them, and the tall hedges of evergreen which inclosed the square made a somber but effective background.

"You see that ruin and decay are all that I have to offer you here," Victor was saying with a cadence of bitterness in his voice. "But if you had courage enough to end the life which you despise, to cut loose from all the ties which bind you in America, and go with me to Egypt, there I might have a future and a career for you to share—there at least, you would find freedom and action and life."

A flush came to Eleanor's cheek, and a light gleamed suddenly in her eyes, as if the very wildness of this proposal lent it fascination, but she shook her head, smiling a little sadly. "You are of my world," she said; "you ought to know better than that. I am not so brave as you think. I must do what is expected of me, and I am expected to marry Marston Brent."

"Forget the world and come with me."

"That is impossible. If I had only myself to care for, I would; but there are others of whom I must think." She was silent for a moment, then looked up at him piteously. "They have sacrificed so much for me at home," she said, "and they are so proud of me. They hope, desire, count on this marriage; I cannot disappoint them. Mr. Brent himself has been most kind and patient, and he does not expect very much. I am a coward perhaps, but what can I do?"

Again he said, "You can come with me."

(TO BE CONTINUED.)

Burr's Self Control.

Aaron Burr was by nature and training a man of extraordinary self control. He allowed no circumstance to throw him off his balance. An anecdote told by Rufus Choate to the late Richard H. Dana, recorded in Mr. Dana's "Diary," illustrates the callousness which aided Burr so greatly in controlling himself. Several years after the death of Hamilton—killed by Burr in a duel—Burr visited Boston, and Mr. Devereux, of Salem, paid him some attentions. The visitor was taken to the Boston atheneum, where, while the two men were walking through the gallery of sculpture, Mr. Devereux happened to catch sight of a bust of Hamilton.

The thought flashed across his mind that Burr might not care to be confronted with the sight of the features of the man he had slain. But no; Burr was undisturbed. He also espied the bust, and although Mr. Devereux had instictively turned away he walked up to it and said in a loud tone: "Ah! Here is Hamilton!" Then passing his fingers along certain lines of the face he added, "There was the poetry!" Hamilton's contemporaries gave him credit for possessing a poetic mind.

A Bogus Muzzle.

An amusing deception connected with dog muzzling came to light the other day in the Ternes quarter of Paris. An old lady, whose pet had been seized among others, complained that while her pug was captured the police allowed that of her neighbor, a painter, to roam at will without a muzzle. The inspector assured the lady that the artist's dog was always muzzled, and was somewhat taken aback on learning that the muzzle in question was merely painted on the animal's head.—London Tit-Bits.

FROM "NEW ORLEANS, OUR SOUTHERN CAPITAL."

By Julian Ralph, in Harper's Magazine for February.

The Louisiana lottery being legalized, tickets are openly displayed in the shop windows, and are sold on the sidewalks by men, women and children. One store for the sale of these tickets bears such a legend as this on its sign: This is lucky Number Eleven. More winning tickets sold here than anywhere else in town.

There was a drawing while I was in the city, and knowing that the lottery company was not to ask for a renewal of its privileges, I availed myself of the opportunity to witness its chief public operation and the historic characters who have been induced by large salaries to figure for it. The drawing took place in the theatre called the "Academy of Music," at eleven o'clock in the morning. The yellow gas-jets battled feebly with the daylight in the lobby into which the people were pressing without let or qualification. The theatre was two-thirds full at last. On the stage, set with a parlor scene, was a knot of men between two wheels. The wheel on the right was a band of silver, with sides of glass and with a door in the metal rim. A bushel of little black gutta-percha envelopes, the size of dominoes, had been poured into this wheel, and a white boy, blindfolded with a handkerchief, stood at the handle of the crank by which the wheel was turned. He had one arm in the door of the wheel, and with the hand of the other arm was offering a tiny envelope to Gen. Beauregard—the last surviving general who served on either side in our late war. A fine, most gentlemanly-looking man he is, with the features of a French courtier, with snowy hair, a white moustache, a little goatee, and the pinkest skin a baby ever knew. He was faultlessly dressed. Across the stage, beside a very much larger wheel of parti-colored boards, sat Major-General Jubal A. Early—a perfect type of the conventional figure of Father Time: tall, portly, stoop-shouldered, partly bald, and with a long, heavy, white beard. He was dressed all in the color of the uniform he distinguished by his valor as a soldier.

By each general stood a blind folded boy, taking numbers out of the wheels, and handling them to the generals. From the big wheel to Major-General Early came the numbers of the tickets; from the little wheel to General Beauregard came the numbers of dollars that formed the prize each ticket had won. By each general stood a crier. Early read out, "Twenty-one thousand one hundred and fifty-two"; and Beauregard, having shelled the gutta-percha case off a billet, read out, "Two hundred dollars." Then the criers took the billets and cried the numbers, "Twenty-one thousand one hundred and fifty-two" from one; "Tew hundred dollars" from the other, who, by-the-way, called out tew hundred dollars at least tew hundred times. But all the prizes were not of that amount. I chanced to hear the capital prize read out.

"Twenty-eight thousand four hundred and thirty-nine" said Early. "Three hundred thousand dollars," said Beauregard.

The effect was startling; indeed the startled senses refused to grasp the meaning of the words. The criers repeated the figures. The people in the theatre craned forward, a hundred pencils shot over pads or bits of paper in men's and women's laps. Then a murmur of voices sounded all over the house. The routine on the stage was halted, for the criers took the two bits of paper to some clerks who sat at tables in the farther part of the stage, to allow them to verify the important figures. Then the routine began anew.

Stories of Swift.

I only know one good humored anecdote of Swift. It is very slight, but it is fair to tell it. He dined one day in the company of the lord keeper, his son and their two ladies, with Mr. Cæsar, treasurer of the navy, at his house in the city. They happened to talk of Brutus, and Swift said something in his praise, and then, as it were, recollecting himself, said, "Mr. Cæsar, I beg your pardon." One can fancy this occasioning a pleasant ripple of laughter.

There is another story I cannot lay my hands on to verify, but it is to this effect: Falkner, Swift's Dublin publisher, some years after the dean's death, was dining with some friends, who rallied him upon his odd way of eating some dish—I think asparagus. He confessed Swift had told him it was the right way, therefore they laughed the louder, until Faulkner, growing a little angry, exclaimed, "I tell you what it is, gentlemen, if you had ever dined with the dean, you would have eaten your asparagus as he bade you."—Speaker.

Treatment for Gas Poisoning.

Loosen the clothing at the neck.

Slap the face and chest with the wet end of a towel.

Apply warmth and friction if the body or limbs are cold.

Take the man at once into the fresh air. Don't crowd around him.

Keep him on his back. Don't raise his head or turn him on his side.

If the breathing is feeble or irregular artificial respiration should be used and kept up until there is no doubt that it can no longer be of use.

Give the ammonia mixture (one part in all, aromatic ammonia, to sixteen parts of water) in small quantities at short intervals, a teaspoonful every two or three minutes.—Hall's Journal of Health.

In China soapstone is largely used in preserving structures built of sandstone and other stones liable to crumble from the effect of the atmosphere; and the covering with powered soapstone in the form of paint on some of the obelisks in that country, composed of stone liable to atmospheric deteriortion, has been the means of preserving them intact for hundreds of years.

The number thirteen is supposed by many to be unlucky, and if they find themselves one of a party of that number they will depart with haste. But why should not the number thirteen be just as lucky as twelve, fourteen or any other number? Many instances could be cited to establish this principle were it necessary.

Some of the Icelandic lakes are studded with volcanic isles, miniature quiescent strombelis, whose craters rise from bases green with a prolific growth of angelica and grasses. Even in the bosom of the sea, off the coast, there are hidden volcanoes.

Our readers will serve themselves by noticing the remarkable offerings advertised in another column by the Sherwood Hall Nursery Co. of Menlo Park and San Francisco, who are leaders on the coast in furnishing everything for the farm and garden.

Pimples AND *Blotches*

ARE EVIDENCE That the blood is wrong, and that nature is endeavoring to throw off the impurities. Nothing is so beneficial in assisting nature as Swift's Specific (S. S. S.) It is a simple vegetable compound. Is harmless to the most delicate child, yet it forces the poison to the surface and eliminates it from the blood.

TRADE S.S.S. MARK

I contracted a severe case of blood poison that unfitted me for business for four years. A few bottles of Swift's Specific (S. S. S.) cured me. J. C. JONES, City Marshal, Fulton, Arkansas.

Treatise on Blood and Skin Diseases mailed free. SWIFT SPECIFIC CO., Atlanta, Ga.

Based on the recent school census, Connecticut's population is now 31,000 larger than it was in 1890.

NATURE'S SUREST ALLY.

If nature did not struggle against disease, even in weakly constitutions swift indeed would be the course of a malady to its fatal termination. While nature thus struggles let us, lest worse befall us, aid her efforts with judicious medicinal help. Experience must be our guide in battles with disease, and that "lamp to our feet" indicates Hostetter's Stomach Bitters as a safe, tried and thorough ally of nature. If the blood be infected with bile, if the bowels and stomach be inactive, if the kidneys fail to expel impurities of which they are the natural outlet, a course of the Bitters is the surest reliance of the sufferer, one, moreover, that is sanctioned by professional indorsement and use for nearly half a century. No American or foreign remedy has earned greater distinction as a remedy for and preventive of chronic liver complaint, malaria, constipation, kidney and rheumatic trouble and debility.

Street cleaning contractors—a humorous sort of term, in its way—get $600,000 a year in Philadelphia.

A WONDERFUL MACHINE.

There is no doubt that man is a fine mechanism, but like every other machine he wears out by friction. It is said that he is born again every two or three years. His body is virtually re-made from food. To retard this making over is radically wrong, as a man loses so much vitality in the delayed process that it takes a long time to recuperate. The process of making anew is so accelerated by purging with BRANDRETH'S PILLS that a new man, as it were, may be made in two or three months, and the change in the mechanism is such that the worn out part is replaced by the new without the usual running down of the entire machine. You don't have to stop for repairs. Purge away with BRANDRETH'S PILLS the old, diseased and worn out body. They are purely vegetable, absolutely harmless, and safe to take at any time.

There is some satisfaction, at least, in knowing that it is not J. Hoke Smith.

RUPTURE AND PILES CURED.

We positively cure rupture, piles and all rectal diseases without pain or detention from business. No cure, no pay. Also all *Private* diseases. Address for pamphlet Drs. Porterfield & Covey, 858 Market street, San Francisco.

Inspector (at the penitentiary)—I understand that measles broke out three days ago. Warden—Yes; but the guards caught them.

WRINKLES, and hollow cheeks, and dull, sunken eyes, don't always mean that a woman's old. Half the time, they only show that she's overworked or suffering. To such women, to every woman who is tired or afflicted, Dr. Pierce's Favorite Prescription safely and certainly brings back health and strength. It's a legitimate medicine that corrects and cures; a tonic that invigorates and builds up; a nervine that soothes and strengthens. For all the derangements, irregularities and weaknesses peculiar to women, it is the only *guaranteed* remedy. If it doesn't benefit or cure, you have your money back.

It won't do to experiment with Catarrh. There's the constant danger of driving it to the lungs. You can have a perfect and permanent *cure* with Dr. Sage's Catarrh Remedy.

CURE THAT COUGH WITH SHILOH'S CURE

25cts., 50cts., and $1.00 per Bottle. One cent a dose.

MOORE'S REVEALED REMEDY CURES Rheumatism.

ASTORIA, OREGON, January 10.
I can state with pleasure that by the use of MOORE'S REVEALED REMEDY my husband was relieved from an old case of RHEUMATISM and my youngest boy cured entirely of INFLAMMATORY RHEUMATISM when the best doctor I could get did him no good. Yours in gratitude,
MRS. N. V. STEELE.

An cannot possess a

$10,000 Souvenir

(This sum was paid for the first World's Fair Souvenir Coin minted.)

in the shape of a coin, but many can have **fac-similes** of this valuable work of art—only special coin ever issued by the U. S. Government—for $1 each.

United States Government

World's Fair Souvenir Coins—

The Official Souvenir of the Great Exposition—

5,000,000 of which were donated to the World's Columbian Exposition by the Government, are being rapidly taken by an enthusiastically patriotic people.

As there early promised to be a demand for these Souvenirs that would render them very valuable in the hands of speculators, the Exposition Authorities decided to place the price at

$1.00 for Each Coin

and sell them direct to the people, thus realizing $5,000,000, and using the additional money for the further development of the Fair.

Considering the fact that there were but *5,000,000* of these coins to be distributed among *65,000,000* people, in this country alone (to say nothing of the foreign demand,) and that many have already been taken, those wishing to purchase these mementoes of our Country's Discovery and of the grandest Exposition ever held, should secure as many as they desire at once.

For Sale Everywhere

Realizing that every patriotic American will want one or more of these coins, and in order to make it convenient for him to get them, we have made arrangements to have them sold throughout the country by all the leading Merchants and Banks. If not for sale in your town, send $1.00 each for *not less than five coins*, by Post-office or Express Money-order, Registered Letter or Bank Draft, with instructions how to send them to you, *all charges prepaid*, to

WHICH ONE?

"You don't mean it."

"But I do, though."

"Isn't it a rather sudden conclusion?"

"On the contrary, my dear boy, I have been thinking of it for some time."

Fred Bent gave a low whistle.

"Well, I must say you have kept it mighty private."

"The best policy. If I had told you in the first place you might have persuaded me out of the notion. Now it is impossible."

"But you said you should never marry."

"All blow, my dear fellow. When a man is young, a mere boy, he does well to rail at marriage and declare that he will never wed. When a man arrives at my years and gray hairs he will think better of it."

"But Laurie, honest old fellow, were you never in love?"

"Me—never!" And Laurence Weston laughed scornfully at the idea as he lighted a fresh cigar.

"Then you are not going to marry for love?" inquired Bent.

"No."

"What for, then?"

"Oh, a variety of things, I suppose."

"Money, for one thing, I fancy," he went on, "and then I am growing older; my chances to marry well—to my liking—will not always be as fair as they are now, and I always intended to marry finally."

"Oh, did you?"

"Yes, though I would never own it; but I am in earnest now, and I mean to marry before this year is out."

"Have you selected the lady?"

"There are two of them."

"Oh, you are going over to the Mormons."

"No, but you know a reserve force comes handy. 'If one won't'—you know the rest. Now, my dear Fred, all this nonsense about falling in love is bosh—pure humbug. I never could love one woman any better than another, unless I knew her better and discovered in her nature more lovable qualities. I think it is much better to select a woman whom you think in every way likely to suit you, and then set about learning to like her. When a man is head over ears in love his judgment is warped and his eyesight proverbially poor."

Fred Bent laughed good naturedly.

"I don't know, Laurie. I am always in love, so of course my advice is worthless to you."

"Exactly," said his friend. "Now these two young ladies"——

"Would you object to telling me their names?" interrupted Bent.

"Not in the least. They are both called Blanche."

"What, the two Blanches?"

"Yes, Miss Sturtevant and Miss Wellington—both very suitable in every way, and, as far as I know, 'heart whole and fancy free.'"

"Well, you ought to win," said Bent. "You are good looking, and, by Jove, you have plenty of assurance. But I must be going," and he arose.

At the door he turned and called back: "Shall I see you at the Leonards' tomorrow night?"

"Yes, I shall be there."

The next night found him, faultlessly attired, at Mrs. Leonard's reception.

A shimmer of peach bloom satin in the moving mass of humanity attracted him, and taking a pair of sparkling brown eyes as guiding stars he made his way to the side of Blanche Sturtevant.

As she made room for him beside her she said:

"I thought you didn't like receptions."

"I do not as a general thing," he replied, "but this had a peculiar attraction for me."

The meaning he threw into the glance he bestowed on her sent the delicate rose bloom to her cheeks, and she looked ten times as lovely to his fastidious eyes.

But suddenly, while he gazed at her pretty flushed face, a queer sensation seized him. He felt actually timid about asking this beautiful girl to be his wife, even though he had been for years a man of the world. Somehow he felt as though she could read his very thoughts with those bright eyes.

"Do I look very badly?"

Her musical voice recalled him to his senses.

"I beg your pardon. Was I staring at you? Your dress is beautiful—and you."

"Thank you," she said hurriedly.

"I fancied from the intentness of your gaze you had not quite decided whether I would do or not," and she laughed.

"I was in a brown study," he returned.

The crowd surged around them, and two or three men looked anxiously at the seat occupied by Westoh.

Some music was playing in another room, and when the strain had ended he spoke again.

"Miss Sturtevant," he said, "I wanted to ask you a question tonight, but the crowd is so great that there is not much opportunity for confidential talks. If I write to you tomorrow will you favor me with a reply?"

"Certainly!" and the brown eyes smiled sweetly, and perhaps unconsciously at him, as he rose to relinquish his seat to another admirer.

"There—that was neatly done," was his mental comment; "no fuss, no love making to undergo, nothing disagreeable, and if the fates are kind I shall have one of the finest looking and one of the richest women in C—— for my wife."

He threaded his way carefully among the crowd, replying to a kindly greeting here and there, and presently found himself in the conservatory.

But it was occupied.

Standing under a tall palm, a radiant vision in blue and gold, stood Blanche Wellington.

His face brightened as he approached her, for anything beautiful always appealed strongly to the artistic side of his nature, and what could be more beautiful than this tall, queenly woman, with a crown of golden hair and the deep blue of a violet lurking in the cool depths of her eyes!

What an opportunity there was to win for his own this lovely girl!

His conversation with Miss Sturtevant, a few moments ago, crossed his mind, but he dismissed it with a thought.

He could easily explain to her his request. Thank heaven, he had not committed himself!

Miss Wellington turned to him with a smile.

"So you are here this evening. Do you enjoy it?"

"I have not—until now."

What did it matter if that sweet speech was false, it was very neat. At any rate it brought a beautiful color to the soft cheek of the maiden before him.

"Is it not beautiful in here?" she said.

"Yes, it is a fit setting for you."

"Now you are flattering me."

"Indeed I am not; I am always truthful," and he threw a world of counterfeit tenderness into the dark eyes he turned upon her.

It was only a step from that to something more—and he took it.

Holding her soft, white hand in his, he began:

"Miss Blanche, I am growing very tired of a lonely life. I want some one to share my griefs and joys. Will you be my wife?"

"Really—I—hardly know," she began.

At that moment gay voices were heard coming in their direction, and she drew her hand away from his clasp.

In another moment the lively party were in sight, and he had only time to murmur, "I will write tomorrow—will you reply?"

"Yes," and presently the cool, retired place was invaded by the merrymakers, and Laurence Weston beat a hasty retreat.

The next day he wrote the two letters he had promised—for he was a man of his word.

To Miss Sturtevant he wrote this:

DEAR MISS BLANCHE—I wish to apologize to you for some remarks I made to you last night, and to say that I have changed my mind concerning the matter I spoke of. It was really of no consequence, and I beg you will not give it any thought. It was only an idle question, which merely amounted to nothing, and in fact the cause which existed for my request no longer exists. Please treat the whole affair as a joke, and oblige, Yours,

L. WESTON.

On another sheet of the fine cream note paper he always used he wrote to Miss Wellington thus:

DEAR MISS BLANCHE—Had time permitted last night I should have urged you to accept my hand and heart. But the crowd was so great and the opportunity for private conversation so limited that it was impossible. You promised to write to me—may I hope for a favorable answer? If so, please appoint a time for me to call and tell you all. I would say more fully than I can commit it to paper. Yours,

L. WESTON.

"There," as he folded both letters and placed them in their envelopes, "I feel sure of her reply."

This was in the morning, and in the evening Fred Bent dropped in, as was his custom.

For a few moments the two men smoked in silence.

Then there was a knock on the door, which Mr. Weston answered.

When he came back into the room he held in his hand two letters.

"If you will excuse me, Fred, I will read these," he said.

"Oh, certainly—go ahead. From the fair charmers, I suppose."

Laurence Weston opened the letters at random.

The first read like this:

DEAR MR. WESTON—Although your proposal was a great surprise to me, for I always thought you were not a marrying man, I can say that I am inclined to regard it—and you—favorably. If you will call tomorrow at 10 I shall be glad to receive you. Yours,

BLANCHE STURTEVANT.

Blank dismay was pictured on his features as he opened the other, and read:

Mr. Weston:

DEAR SIR—It is entirely immaterial to me whether your language of last night was a joke or not, and no apologies are necessary. Allow me to advise you, though, that in well regulated society such jokes are considered insults to a woman. Yours,

BLANCHE WELLINGTON.

"What's the matter, Laurie? You look as though you had had a shock," said Bent.

"So I have. Here, read these," and he pushed the letters toward his friend.

Bent read them.

Then he burst into hearty laughter.

"What are you laughing at?" asked Weston.

"Ha, ha! Because really, old fellow, I can't help it. It's too good—well, if it isn't rich. Did you mean to do it?"

"Mean to do what?"

"Can you ask me?" said Bert, tragically, waving the two sheets of scented note paper in the air.

"What have I done? For heaven's sake tell me if you can, Fred."

"Is it possible that you don't know? You are not very shrewd, Laurie, or else you are in love, and love, you know, is 'proverbially blind.'"

"Go on," said Laurence impatiently.

"Why, man alive, you put your letters in the wrong envelopes, as near as I can see."

A sudden ray of intelligence darted over Weston's face.

"I believe I did," he said ruefully, "and see what a scrape I have drawn my devoted head into."

"Could you make it up with Miss Wellington?"

"I feel sure I could. But Miss Sturtevant has practically accepted me, and see how I must insult her."

"And yet," mused Fred, "you ought to explain to Miss Wellington."

"I know it," distractedly, "but if I do I must also explain to Miss Sturtevant."

"Now, honestly, Laurie, do you care anything for either one?"

"No, honestly, Fred, I like and admire one as much as the other."

"Why not give them both up?"

"And get into the mire deeper than I am? Besides, I am determined to marry one of them."

"Well," said Bent, rising to go, "I am sorry for you, Laurie. This is what your assurance and sound common sense have brought you to. For my part, I prefer romance. Goodby, old fellow."

"Goodby," came mournfully from the depths of the easy chair.

At the door Bent halted.

"I say, Laurie, I might help you out. I might marry one of them."

"If you only would; but which one?"

"Aye, that's it," echoed Bent, as he closed the door and went down the hall; and the evening breezes wafted his words back, "That's the rub—which one?"—Agnes L. Pratt in Boston Globe.

A MANIAC'S FREAK

An Insane Negress Throttles an Asylum Superintendent in a Cell.

PERFECTLY HELPLESS IN HER GRASP

The Timely Arrival of Attendants Prevents a Fatal Result—A Thrilling Encounter.

Dr. E. C. Dent, superintendent of the insane asylum on Blackwell's Island, told me of a thrilling experience he had with a mad negress. Dr. Dent has been for ten years connected with the asylum, has treated the most violent cases and has had many narrow escapes from death, but his battle with the giant negro woman, he said, was the closest call he ever had.

When Dr. Dent became superintendent of the institution on Blackwell's Island he abolished all the mechanical restraint apparatus, and he determined that all harsh and repressive measures should be expressly forbidden. His idea was that in the treatment and care of patients they should be made to feel at home and among friends; but in spite of all the care and kind attention and the endeavor to please the patients, there are a number of the latter on the island, the doctor said, who are as ferocious as wild animals. These violent cases occasionally take advantage of the fact that there are no straitjackets or restraining machines in the institution, and they become insulting and aggressive and oftentimes very dangerous.

The negress was one of these cases. She had been in the institution for several years and was incurably insane. All the attendants and nurses in the ward in which she was confined were in mortal dread of her, and they were obliged to keep constantly on the watch for fear of a sudden attack from the mad woman, whose name is Ann Kinney. She is nearly six feet in height and very muscular. She had been a laundress in this city, and during an altercation with her husband she received a blow on the head, as a result of which she became insane.

"I was summoned to the acute ward," said Dr. Dent, "where I found the negress in a terrible rage. She had driven all the nurses out of the ward and the other patients were completely cowed. She was rambling about at will, brandishing half a picture frame she had torn from the wall. Her eyes were bloodshot and she was foaming at the mouth. When I appeared she became more violent, and the other patients were crying out in terror. She began tearing off her clothes, and presented a hideous spectacle.

"There was only one thing to do, and that was to confine the negress before she could kill or maim any of the patients, which, with her strength, she could do in a few moments. There was no time to summon other help, so I opened the door and walked in. The mad woman made a dash for me, and when within half a dozen paces she threw down her picture frame, which was of light pine, and seizing a bench, which she broke with ease, and catching up a heavy oaken bench rung, she prepared to attack me. I spoke to her gently, calling her by name, told her it was all right, that no one wanted to harm her, and to keep quiet. This did not soothe her in the least.

"Thinking to catch her off her guard I grabbed for the arm that held the bench rung. My antagonist dropped the rung and swore that she would kill me, and to tell the truth I was a little afraid she would, for I was only about half her size. The way she chucked me about the floor, picked me up and threw me down again, almost took the life out of me. She played with me as a cat does with a mouse, but, strange to say, though she had me at her mercy, she did not attempt to beat my brains out with her club. It all happened in a very few minutes. When she gave me a breathing spell I appealed to her sympathies and she calmed down considerably, and after talking to her in a conciliatory manner we decided to compromise. She agreed to go to her cell quietly, after I had promised to give her something to ease the pain in her head. I walked to the cell with her, in order to fasten the door on the outside. I opened the cell door, and as I did so she grabbed me around the waist, lifted me from the ground and carried me bodily into the cell, then slammed the door. 'Now I will kill you, sure,' she cried.

"She imagined that it was I who had hit her on the head and had caused her all her sufferings. Her powerful hand was at my throat when the attendants rushed in and rescued me. It was the narrowest escape I had ever had. She was given an opiate to quiet her, while I, more dead than alive, was carried to my office considerably bruised."

"In spite of all the care and supervision and under the most rigid discipline, it rarely happens that the patients are roughly spoken to, much less roughly treated, by the nurse; but, of course, attendants upon the insane, like the ordinary run of mankind, are not universally sweet tempered, nor endowed too liberally with that spirit of Christian forbearance so beautifully inculcated in the Sermon on the Mount.

"We have too few attendants here. We should have at least one for every ten patients, but we have not half that number. The employes are overworked; they are kept busy constantly from the time they get up till they go to bed, with duties of a most trying character. They are cut off for the most part from social pleasures, and their sacrifices are many for small pay. But whenever a case comes to my attention of a nurse or attendant caught in the act of abusing a patient there is an immediate discharge. The patients are encouraged to tell their grievances to their supervisors and physicians, whom they are taught to regard as their friends and protectors, and their reports of ill treatment are investigated carefully when there is the least ground to believe that they are true. We are now investigating the cases referred to in the daily papers, and as far as we have gone we find that our keepers are not at fault. In case we should find otherwise we shall see that justice is done."—New York Telegram.

Bruin Had Fun.

A pet bear belonging to Dewitt McDowell, of Arkansas City, which had been taught to open doors, shake hands, dance, etc., escaped from his cage one night recently, and for a time created consternation among a large number of people.

A fashionable ball was in progress at the time, and bruin was attracted by the music. There was a funny scene in the ballroom when he entered, and, raising himself on his hind legs, volunteered to shake hands and then began to dance. There was a grand rush for the doors, and several ladies attempted to jump out of the windows.

After he had finished his waltz the bear was coaxed from the room, and then began to paint the town and succeeded in frightening half the inhabitants almost out of their senses. Entering the St. Charles Hotel he climbed the stairs and wabbled into one room after another, routing out the guests in their night clothes and incidentally damaging the furniture. Having had all the fun he wanted with the guests, he returned to the street and proceeded to amuse himself by trying to enter the residences of the solid citizens. Being closed to uninvited guests, he was unable to effect an entrance into any of them, but he convinced the inhabitants that burglars were at work, and one alarm after another was sent in to the police station until every officer on the force was on the trail of the marauder.

Meeting one Henry Foster on the street he struck him a playful blow on the side of the head, knocking him down and making some ugly wounds. Finally he entered the National bank building through a side hallway, climbed the stairs to the third floor, and walked into the room of Julius Behrend. That gentleman jumped from bed, prepared to shoot a burglar, but when he saw what it was he rushed into the hall and shut the bear in, where he was soon afterward captured.—Kansas Cor. Philadelphia Press.

Apropos of the Season.

Ah-h-h!

That's about as good a description as could be written of today's weather. It also serves the purpose of describing that very vague and uncertain thing a person would like to do under the newly felt influence of sunshine. Perhaps one would just like to expand himself—a little and slowly, without putting too much effort in the process.

This is a day when the pleasantest thing possible is to stand about and exist. It would be much less troublesome to lie down and exist, but unfortunately that can't be done—at least not in the sunshine, and a person has a lazy hankering after the sunshine. Summer is as yet only skin deep. The lawn looks very attractive, but under it oozes damp pneumonia. Faint traces of winter are still felt, though the temperature has reached 70 degs., and the season has not yet lost its nasal twang, so to speak. The man who imagines he has the grip is still present, describing the 529 aches in various parts of his frame.

One of the strange features of this weather is the sudden change. One cannot see to scrape yesterday's mud off his possessions because of dust in his eyes. The mud of the streets seemed one of the most permanent phenomena of nature, and that the sprinkling cart should be felt necessary so soon after the sky's efforts seems incredible.—Indianapolis News.

For a Cosmopolitan Population.

As an incident of the recent exciting municipal election in Chicago, The Tribune relates that one Sunday's issue of Der Westen contained an editorial twenty-two lines in length, which was reproduced upon the first page in twenty-four languages, occupying seven columns in English, German, French, Italian, Spanish, Portuguese, Russian, Finnish, Polish, Hungarian, Bohemian or Czeckish, Dutch, Swedish, Norwegian, Danish, Flemish, Turkish, Armenian, Arabic, Japanese, Chinese, modern Greek, Latin and Hebrew, besides Volapuk, and in eight dialects, as follows: German dialects of Plattdeutsch, Bavaria, Palatinate, Wurtemberg (Schwabisch), Switzerland, Austria, Luxemburg and of the Jews of Germany.

Baby's Long Voyage in the Driftwood.

A curious story is being told on the streets by one John Sellers, representing himself as living in the Trinity bottoms about fourteen miles east of Ennis. He said that Wednesday a colored woman living along the river bank lost her two-year-old child, a boy just able to walk, and search was made, but unsuccessfully, and the mother gave it up for lost. Further, that some fishermen while returning from an excursion found the baby, alive and well, perched on some driftwood drifting placidly toward the gulf, about twenty miles down the river; that it took the fishermen two days to discover the mother and restore the baby to its home.—Cor. Dallas News.

Jupiter's Double Moon.

The Lick telescope is the most powerful glass in the world. It is reported the observers at Mount Hamilton have kept a sharp eye turned upon the shadow of one of the moons of the planet Jupiter. This shadow seemed double, indicating that the tiny moon which cast it is also double. Since the first hint of the discovery many observations have been made through the Lick glass, all tending to confirm the original impression, to wit: That this particular satellite of the greatest of planets is double—a dot of a moon revolving around the main moon.—Exchange.

A New Time to Sweep.

It is odd that it was never made before—the suggestion that business men sweep their sidewalks in the evening instead of in the morning and thus have the refuse ready for removal by the street sweeper when that comes around in the evening instead of lying all day exposed to the public gaze. The improvement association calls for this reform in a circular signed by Secretary Sherwood.—Springfield Homestead.

CO-OPERATION.

Housekeeping of the Future That Is Practicable and Reasonable.

EXPERIMENT OF AN ENTHUSIAST.

An Immense Apartment House in Which There Is Only One Kitchen—How Meals Are Served.

Mr. Roswell Fisher, of Montreal, whose article on co-operative housekeeping in The Nineteenth Century attracted general attention, gave an address on that theme at the Workingman's school on Fifty-fourth street.

Mr. Fisher told his audience that some two or three years ago, after nearly twenty years' study of the question of co operative housekeeping, he found himself in a position to carry out the conclusions at which he had arrived on a scale not so large as he desired, but sufficiently large to admit the essential feature of professional management. He accordingly built, on the principal residential street of Montreal, an apartment house containing twenty apartments, each with eight or ten rooms, and forming a complete dwelling but for the omission of appliances for cooking.

In the basement, in addition to the furnaces for heating the house, water for baths, etc., and other conveniences of a good apartment house, Mr. Fisher furnished a complete club kitchen, a small private suite for the manager, and a club laundry, with a dining room. The kitchen is in direct connection with every pantry by electric bells and speaking tubes, and there are two dumb waiters at convenient points, each serving into ten pantries, two on each floor.

In addition to the usual kitchen plant there is a butler's tray for each tenant, and sufficient covered tins and white ware in which to send the meals to the individual service rooms.

HOW MEALS ARE SERVED.

In the leases, which are for at least a year, there is a clause requiring each tenant to pay quarterly a uniform tax or kitchen subscription, which assists in covering certain fixed charges of the kitchen, such as the cost of management, the interest on and the depreciation of the plant, fuel and gas, leaving only the wages of the kitchen help, the cost of the food, and a calculated profit of about 6 to 10 per cent. for contingencies.

The service of meals is managed as follows: Every day a simple bill of fare for breakfast, lunch and dinner, conforming to the usual home requirements of the class of tenants in the house, with one or two extras, is made out by the manager for the succeeding day, and is delivered to each tenant at breakfast. Those dishes or meals which are not required are scratched out and the bill returned to the management with wants, complaints, suggestions or remarks added.

The manager then is enabled to arrange for the marketing, and also to make out breakfast, lunch and dinner tables for the cook, showing what each tenant requires, at what hours and for how many persons. Meals canceled before the hour for cooking are allowed for, and all extra orders sent down are carried out, so far as possible. All the bills of fare are filed, and at the close of the week the totals are presented and the accounts are settled.

It was stated that the tariff prices for breakfast, lunch and dinner do not include butter, cream and sugar, which are charged for absolutely as ordered. Nor do they include tea, coffee, fruit and other desserts, which the kitchen does not supply at all. All extra dishes or meals not shown on the bill of fare, but called for, are charged at cost price and 10 per cent. extra. Twenty-four hours' notice is required for large lunch or dinner parties.

ADVANTAGES OF A CLUB.

It will be seen that by this plan Mr. Fisher has been enabled to carry out his purpose, that each tenant of his home club possesses a private and individual dwelling in which he is able to live in such a manner and on such a scale as his habits and tastes and means call for, and with all the elasticity of ordinary home life, free from the publicity of the club, hotel or boarding house, and is at the same time spared the ceaseless worry and annoyances of the private kitchen while enjoying a much better cooking than is possible to the employers of the ordinary cook.

The cost of this system, including the kitchen tax, is, in the case of families of two or three, appreciably less than ordinary living on the same scale, while for families of four to six it is about the same. At the opening of the house Mr. Fisher promised his tenants he would hand back any profits of the kitchen, if there were any, and thus make the kitchen a profit sharing enterprise. This he did for the double purpose of showing the economy of the system and of inducing the tenants to aid this economy by facilitating in all ways the endeavors of the management to cut down waste.

So many of the tenants, though of the better class, showed themselves indifferent to the difficulties of the management and to the waste, both on their own part and on that of their servants, that Mr. Fisher gave notice that in the future this profit, about 7 per cent., will not be shared with them, but will be held to meet the extra trouble and expense of management.

After ten months' trial of this system, with all its initial difficulties, none of the tenants are leaving, and as both the home and the kitchen are satisfactory investments, Mr. Fisher considers that he has introduced a successful though only incomplete method of meeting the domestic difficulties of economic kitchen service.—New York Sun.

Prince Napoleon's Sister.

The Princess Mathilde, sister of Prince Napoleon, and with whom the Empress Eugenie resides when passing through Paris, is a pleasing blue stocking, a friend to artists, but not a politician. She has been early initiated to the sorrows of life by her martyrdom—marriage, till separated—with Prince Demidoff. Though a true blue Bonapartist the Republicans have never had to reproach her with any political incorrectness. She is popular with the rich of all classes and the poor of all degrees.—Paris Cor. Pittsburg Press.

A member of the British parliament, in his address to his constituents, wished he had a window in his bosom that all could see his heart. He was considerably surprised to find that he had been reported as saying "widow" instead of window.

Died of a Spider's Bite.

Word was received today of the death of a six-year-old boy named McKinzie Alexander, at the home of his father, in Sebastian county, from the bite of a spider. The lad was bitten on the arm, and lingered three or four days in great agony.—Little Rock Cor. Louisville Courier-Journal.

DUMMIES FOR DRESSES.

Figures of Zinc That Enable Women to Become Their Own Dressmakers.

Half a dozen ladies were standing outside of a doorway on a down town business block. Two or three of them were rather slenderly built, while the others were inclined to stoutness. Although they remained there together for several hours, none of them said anything. This was probably because they had no heads. In fact they were made of zinc as far down as just below the hips, while beneath there was nothing at all except an iron stick for each one, with a base to stand upon. It was evident that they were dressmakers' dummies.

Unlike most such dummies, however, these represented the figures of real people. A reporter found by inquiry that the manner of making them is rather curious. For example, Mrs. Jones, for reasons presently to be explained, wants to have one constructed after the model of her own shape. She goes and has herself measured as if for a dress and a costume is cut out according to the measurements. But the material, instead of being silk or other cloth, is sheet zinc. When the pieces have been cut out they are soldered together, instead of being sewn, and thus is obtained a reproduction of the figure of Mrs. Jones.

Necessarily the measuring, cutting and shaping have to be done very carefully, inasmuch as the dummy must have precisely the form of Mrs. Jones. She has it sent home and it serves in future for dressmaking purposes as a substitute for herself—that is to say, she has all her dresses fitted upon it instead of having to bother with that part of the business herself. Any woman will testify what an aggravating bore it is to have a dress fitted, requiring as it does hours of standing before the mirror and all sorts of alterations and readjustments, all of which is a trial to both patience and temper.

But with a dummy to fit the dress upon most of this trouble is avoided. If a dressmaker is employed she can do all the fitting on the model, and if the gown fits the latter it will equally satisfy the requirements of Mrs. Jones. Of course this assumes that Mrs. Jones does not get particularly fatter or thinner, in which case she would be obliged to have herself measured for another dummy. However, the greatest advantage of this device is that Mrs. Jones is able to send her dummy to the dressmaker's house and she need not go there or disturb herself again about the matter, having provided the materials, until the gown is sent home all ready to be put on.

Most women are obliged to make their own dresses, and for their purposes such a dummy is invaluable, inasmuch as they are thus enabled to fit their own waists and drape their own skirts as well and as easily as if they were making a costume for somebody else. The zinc dummies cost from eight to twenty dollars. The price of them goes up rapidly with the avoirdupois of the purchaser, so that a dummy with a 48-inch bust costs at least twice as much as one with a 36-inch bust measure. It is probable, therefore, that before long similar dummies will be made for men, who can thus have clothes made for them by their tailors without being obliged to be measured.—Washington Star.

An Eccentric Bishop.

Bishop Wilson, of Calcutta, had as housekeeper a venerable lady who remembered the duel between Sir Philip Francis and Warren Hastings, on Aug. 17, 1780. On entering the cathedral on a Sunday morning, fully robed, lawn sleeves and all, and passing the pew where the old lady sat, he would pause and give her the "kiss of peace" before all the congregation, and this although he had met her at breakfast.

His sermons, too, were racy. Preaching against dishonesty, especially in horseflesh, as one of the great English failings in India, he went on, "Nor are we, servants of the altar, free from yielding to this temptation." Pointing to the occupant of the reading desk below him: "There is my dear and venerable brother, the archdeacon, down there; he is an instance of it. He once sold me a horse; it was unsound; 'I was a stranger and he took me in.'"—Exchange.

Thackeray's Head.

Thackeray, like most Anglo-Indian infants, was sent, when he was about five years of age, to the mother country for mental and physical nourishment. An aunt with whom he lived discovered the child one morning parading about in his uncle's hat, which exactly fitted him. Fearing some abnormal and dangerous development of the brain, she carried him at once to a famous physician of the day, who is reported to have said, "Don't be afraid, madam; he has a large head, but there's a good deal in it!" His brain, when he died—fifty-three years later—weighed 58½ ounces.—Harper's.

A Pretty Hard Corset.

In 1585 the corps pique, a corset, was a hard wooden mold, "into which the wearer was compressed and suffered from the splinters of wood that penetrated the flesh. It took the skin off the waist and made the ribs ride up, one over the other."—St. Louis Globe-Democrat.

A BUSY SCENE.

The Treatment of "Outside Patients" at a New York Hospital.

DRESSING WOUNDS BY THE SCORE.

Monotonous Calling of Numbers—The Brusque Manners of Gentle-fingered Surgeons.

"Is there anybody under seventy?" They are all under seventy, so far as age is concerned, but that is not what the surgeon is crying about. "Is there anybody under seventy?" he repeats, and then, very rapidly, "seventy-one, seventy-two, seventy-three, seventy— So here you are!" And he takes a man, seats him on a stool, flashes a pair of scissors around a bandaged arm, and in a twinkling has laid the flesh bare and is examining it. Then, without asking any questions, he washes, dries, cleans, anoints, runs his ribbonlike bandages around the wounded limb again with swift and skillful fingers, and lifts the man from the stool. It is all done in a flash.

"Come again tomorrow," he says, and then again: "Is there anybody under seventy? Anybody under seventy, seventy-one, seventy-two"——

That is the way it goes on for hours interminably, it seems to the watcher. "Is there anybody under"——

It is in the surgeons' room of a hospital, where the daily flood of wounded humanity is being carried up by the tide of distress to be cared for and bandaged. There are a dozen surgeons there, and always two score or more of patients. The owners of crushed skulls, broken limbs, bruised faces and slashed or burned flesh are let into the room in "batches." They are numbered at the door like checked hats, and they are cared for as their number comes around. No. 1 is first; No. 55 has something of a wait, and No. 132 finds a long interval between the time he is "checked" at the hospital door and the minute he finds himself in a busy surgeon's hands. It is first come, first served, and that is why that monotonous cry constantly arises from the surgeon, "Is there anybody under"——

It is a sorry side of life that one sees here. The people are nearly all of them poor—desperately poor. They cannot afford the luxury of a private physician, however severe their wounds, or however eager they are to get back to their work; and so they come and stand in line, waiting for their numbers to be called, that they may go up and suffer, perhaps a great deal, that afterward they may suffer less. They are of all ages, in rags many of them, some of them limping on crutches, some of them with their heads and faces swathed deeply in bandages, some of them with hands wrapped around and around until they are as big as feather pillows, some of them with feet crushed and mangled, and all of them miserable and suffering. And among them are the white aproned, swift fingered, hurrying surgeons, dressing wounds by the dozen, dressing some of them marvelously quick, and always going on to the next without a pause, with no tremor at the touch of any wound, however deep or foul, and with no twitch of the lips at any cry or flinching from pain.

"Is there anybody under eighty-five? Eighty-six, eighty-seven— So, here you are! No; go to the next table. You can't be dressed here; you are infected. Is there anybody under eighty-eight?"

There is a short pause; then, sharply: "Eighty-nine! Is there anybody under ninety? Ah, here you are. Let me see your card," for every patient has a card, on which is written a little history of his reception at the hospital, his trouble and how he has been treated. "Where's your card?"

No answer to this.

"Where's your card, card, card?"

Still no answer.

"Can't speak English, eh?"

Then follows a series of pantomime. The card is fished out, the patient is placed on the stool, and off come the bandages from his hand. The surgeon's fingers move so lightly and rapidly that before one knows that the man has been touched he has slipped off his stool to the floor, and on his knees, with his stomach pressed close to the stool, his eyes shut, his teeth locked, and his one whole hand clinched and quivering he fights his pain while his wound is dressed. He has not opened his mouth, for these people are used to suffering; they have to bear it, but when he gets up five minutes later with a spotlessly white and clean looking bandage on his hand he looks as if he had marched into the valley of torture and had only crawled out again.

"Come again day after tomorrow," says the surgeon, and then the same old, "Is there anybody"——

It is a boy this time. When the linen strips are removed from his head you see that he has a deep gash over his eye. He is a little pale, but he does not even whimper, for he has been through it all before, and knows what must be, must be.

"Now, when I was a little boy," says the surgeon, taking the boy between his knees and looking down into the young eyes, "you should have seen the cut I had. That was a cut," and he rattles along with his cheerful talk, all the while his skillful fingers flitting around that wound until he leans back, gives a half sigh and says, "You needn't come till next Monday." It is all over before the boy knows it.

"It's a busy day today," he says brightly, and then, "is there anybody below 140? Is there anybody"— And then you get out and walk through into the open air, which is sweet and pure and refreshing. But something seems to follow you. It is the odor of carbolic acid and iodoform, and it sends a dizzying sensation through your brain, so that out in the street, where wheels are pounding on the pavements and men are pushing and hurrying, you can almost hear it—that monotonous, never ending "Is there anybody under"——

—New York Tribune.

A Few Americanisms.

I have always regarded "very pleased" as a vulgarism, only not quite so bad as that favorite expression of the uneducated "a very deal." It would be interesting if your American correspondents would favor us with a list of English idioms which are strange to their ears, and it must be done soon, for the languages are assimilating rapidly. I have gathered from American books that "quite so" is one of these phrases. They may be amused to learn that "quite a number," "quite a few," "he did not have," "he had a good time," "he don't" and "he did not ever do it," were as strange to our ears until a few years ago.—Cor. Notes and Queries.

The Reason Why.

Mistress—Why, Nora, how dusty the chairs are!

Maid—Yes, mim, there's nobody sat on thim today, mim.—Town Topics.

FRIDAY, APRIL 21 1893

Thought Transference.

My father, Mr. A. C. King of Le Roy, Ills., was very sick with la grippe in January, 1892. On the 20th I was sent for and staid with him several days until he was somewhat improved. I then returned to my home, Decatur, Ills., some 50 miles distant, telling my brother Edward to write me every day and if necessary to telephone or telegraph me. For quite awhile the letters came regularly reporting everything favorable. Then they ceased. There had not been any letters for about a week, when, on the evening of the 15th of February I concluded that I would try the experiment of making Brother Edward write me by writing to him and then tearing up the letter, as suggested by Mark Twain in Harper's. I wrote the letter, commencing it, "Dear Brother Edward —I suppose that no news is good news, as if all were not well you would write."

After I had written the letter I concluded that I would send it, as, if the mind influence had acted upon Edward by my writing the letter, the sending thereof would not interfere with it. He would receive it the next day. At 7 o'clock on the morning of Feb. 16, I received a letter from Edward, dated the 15th, saying: "Dear Brother James—I have not written you for several days, because I have had no bad news to report. Recollect, no news will be good news." As near as we can learn, he wrote this letter at the same time that I was writing to him. Is the fact that his thoughts, and even words, were the same as mine a mere coincidence, or something more?—Arena.

The Fault of the Moon.

In a small Vermont town the street lamps, which are few and far between, are under the charge of one of the oldest residents of the place. "Why in the world weren't the lamps lighted tonight, Mr. Jacobs?" inquired a summer resident, who had stumbled down to the postoffice one July evening in the pitchy darkness of a heavy rainstorm.

"They ain't ever lighted on moonlight nights," responded the old man calmly. "That's the rule, an the moon fulled last night, an this is one of best nights in the hull month."

"Best nights," echoed the other in considerable irritation. "What good does the moon do in a pouring rain like this?"

"I can't help that," said Mr. Jacobs. "Accordin to the almanac, this is a moonshine night, an the lamps hev no call to be lit. I rec'on the almanac's a good thing to go by.

"Why," continued the old lamplighter, surveying his critic with suddenly awakened surprise and disgust, "where d'you s'pose I sh'd fetch up ef I was t' go by the weather stid o' the almanac? I persume t' say likely I might hev t' go my round ev'ry night fer a month in dog days. I don't cal'late to hev no sech works as that! Ef the moon don't do her duty, it's unfort'nit, but it ain't any o' my lookaout."

The bystanders murmured assent, and the summer resident was silenced.—Youth's Companion.

Iowa's Wonderful Ice Cave.

One of the greatest curiosities in the Mississippi valley is a natural ice cave which is located in the bluffs of the Iowa river within less than a mile of Decorah, the county seat of Winnesheik county. This unique curiosity is indeed a natural icehouse—a cavern in which great icicles may be found at any season of the year, being especially fine in summer, when the weather is hot and dry outside. The bluff in which the cave is located is between 200 and 400 feet in height, it being necessary to climb about 75 feet up the side of the bluff to reach the mouth of the cave. The entrance is a fissure about 10 feet in width and between 15 and 20 feet in height, from which a constant current of cold air issues.

Thirty feet from the mouth of the cave the passage turns toward the left and downward, toward the river bed. The slope is very gradual, however, and the walls and the roof are within easy reach all the while. After you have reached a spot 100 feet from the opening you entered, it is noticed that the walls and roof are covered with frost. Twenty feet farther a thin coating of ice is noticed, which increases in thickness as you go into the bluff.—St. Louis Republic.

The Sedan Chair.

The sedan chair is named after Sedan, the town where it was first used. The earliest mention of it in England occurs in 1581. Early in the following century the Duke of Buckingham caused much indignation by its use in London. People were exasperated at that nobleman employing his fellow men to take the place of horses to carry him. Prince Charles brought from Spain in 1623 three curiously wrought sedans, two of which he gave to the Duke of Buckingham. A few weeks after their introduction Massinger produced his play, "The Bondman," and in it he thus adverts to the ladies:

> For their pomp and care being borne
> In triumph on men's shoulders.

The reference is doubtless to Buckingham's sedan, which was borne like a palanquin.—"Bygone England."

Caleb Cushing's "Dog Case."

Caleb Cushing's celebrated "dog case" with Fernando Wood went the rounds of all the papers in the country. Being much disturbed and unable to sleep on account of the barking of a dog owned by the latter, Cushing, after trying in vain to have the dog sent away, swore out a warrant against Wood for maintaining a nuisance and appeared in court both as a witness and attorney to prosecute him. After an extended trial and lengthy arguments, the animal was adjudged a nuisance and ordered removed. —Cor. Cincinnati Tribune.

On Time.

First Commuter (at the ferry)—Our train must have arrived on time this morning.

Second Commuter—Why do you think so?

First Commuter—There is no boat in.—New York Weekly.

MISCELLANEOUS.

DO YOU SUFFER?

Rheumatism, Fits [epilepsy] Scrofula, Liquor, Morphine or Tobacco Habit, quickly and permanently cured by the wonderful BI-CHLORIDE of GOLD treatment.

RHEUMATISM (The uric acid entirely expelled from the blood) Cured in from five to thirty days.

(Official.)

Ordinance No. 47.

THE BOARD OF SUPERVISORS OF THE COUNTY OF INYO, STATE OF CALIFORNIA, DO ORDAIN AS FOLLOWS:

SECTION 1. Section 7 of Ordinance No. 43, which was duly passed, enacted and ordained by the Board of Supervisors of the County of Inyo, State of California, at a regular meeting of said Board held on the 8th day of January, 1892, and which said Ordinance No. 43 is recorded in Ordinance Book "B" at pages 89 et seq., is hereby amended to read as follows:

Sec. 7. Every person who at a fixed place of business sells any malt or fermented liquors, wines or distilled liquors, whether on commission or otherwise (except vinicultural productions when sold by the producers thereof) must obtain from the Tax-Collector, and for each branch of said business, a license, and pay quarterly therefor the sum of Forty Dollars.

SECTION 2. This Ordinance shall take effect and be in force on and after Twenty-five (25) days from its passage.

SECTION 3. Section 9 of Ordinance No. 43, which was duly passed, enacted and ordained by the Board of Supervisors of the County of Inyo, State of California, at a regular meeting of said Board held on the 8th day of January, 1892, and which said Ordinance No 43 is recorded in Ordinance Book "B" at pages 89 et seq. is hereby repealed.

SECTION 4. This Ordinance shall be published with the names of the members of said Board of Supervisors voting for and against the same in the "Inyo Independent," a newspaper published in said Inyo County, at least two (2) weeks, said publication to be made said time, and before the expiration of said Twenty-five (25) days.

R. LOVE.
Chairman of the Board of Supervisors of the County of Inyo, State of California.

ATTEST: (SEAL) D. J. HESSION, Clerk of said Board of Supervisors.

Ordinance No. 48.

THE BOARD OF SUPERVISORS OF THE COUNTY OF INYO, STATE OF CALIFORNIA, DO ORDAIN AS FOLLOWS:

SECTION 1. It shall be lawful for any person to hunt, pursue, take, and kill grouse, or sage hen, within the County of Inyo, at any time between the first day of August and the first day of January, in each year.

SECTION 2. Every person who, in the County of Inyo, between the last day of December and the first day of August, in each year, hunts, pursues, takes, kills, or destroys any grouse, or sage hen, is guilty of a misdemeanor, and shall be punished by imprisonment in the County Jail, not exceeding sixty days, or by a fine of not more than Sixty Dollars, or by both such fine and imprisonment.

SECTION 3. This Ordinance shall take effect and be in force on and after Twenty-five days from its passage.

SECTION 4. This Ordinance shall be published with the names of the members of said Board of Supervisors voting for and against the same, in the Inyo Independent, a newspaper published in the said County of Inyo at least two weeks, said publication to be made said time and before the expiration of said twenty five days.

R. LOVE.

NOTICE OF SALE.

Real Estate to be Sold at Private Sale.

Notice is hereby given that in pursuance of an order of the Superior Court of the County of Yolo, State of California, made on March 13th, 1893, in the Matter of the Estate of W. S. Enos, deceased, the undersigned, the administrator of said estate, will sell at private sale to the highest bidder for cash, and subject to the confirmation of said Superior Court, all the right, title, interest and estate of the said W. S. Enos at the time of his death, and all the right, title and interest that said estate has by appropriation of law or otherwise accrued other than or in addition to that of the said W. S. Enos at the time of his death, in and to all that certain lot, piece and parcel of land situated in Inyo County, California, and described as follows, to wit:

The North-east Quarter, East half of the North-west Quarter, North-west Quarter of the South-east Quarter, and North-east Quarter of the South-west Quarter of Section Twelve, in Township Fourteen, South of Range Thirty-five East, Mount Diablo Meridian; also the South-west Quarter of the South-east Quarter, and the South-east Quarter of the South-west Quarter of Section One, in Township Fourteen South of Range Thirty-five East, Mount Diablo Meridian; also five hundred inches of water, measured under a four-inch pressure, of that certain water-right, appropriation or water location, situated in the County of Inyo, State of California, commonly known and designated as the Stevens Ditch Company Water right, also one-ninth interest in and to that certain water ditch commonly known and designated as the Stevens Ditch.

That said sale will be made on and after the 17th day of April, 1893, and that offers or bids for said land will be received at the Law office of R. Clark in Beamer's New Block, at Woodlank, Yolo County, California.

W. F. RUSSELL,
Administrator of said Estate.
Dated March 31st, 1893.

Notice of Executor's Sale

NOTICE IS HEREBY GIVEN THAT IN pursuance of a power to sell, contained in the Last Will and Testament of John Allen Hannah, deceased, (which last will and testament was duly admitted to probate,) the undersigned, the Executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder for cash, lawful money of the United States, and subject to confirmation by the Superior Court of the County of Inyo, State of California, on and after TUESDAY the 8th day of March, 1892, and within six months thereafter, all the right, title, interest and estate of the said John Allen Hannah, deceased, at the time of his death, and all the right, title and interest that the said estate of John Allen Hannah deceased, has, by operation of law or otherwise, acquired other than or in addition to, that of the said John Allen Hannah at the time of his death in and to those certain lots, pieces, or parcels of land situate, lying and being in the County of Inyo, State of California, and particularly described as follows, to wit:

The South half of the South-east quarter and the South half of the south-west quarter of Section No. 10, and the North-east quarter of Section No. 15, all in Township No. 10 South, Range No. 34 East, M. D. M., containing 320 acres.

An undivided one-half interest of in and to that certain lot, piece, or parcel of land situate, lying and being in the said County of Inyo and particularly described as follows, to wit Commencing at the South east corner of the south-east quarter of North east quarter of Section No. 18, in Township No. 13 South, Range No. 35 East, M. D. M., and running thence West eleven chains and 98-100; thence North-east following the meanderings of the bed of the Creek along its North branch to Edwards street, in the town of Independence, thence following said Edwards street along its West line to the place of beginning, six and 80-100 acres; also lot No. 4 in Block No. 9 in the town of Independence, all constituting what is known as the Reddy place.

Lots Nos. 2, 4, 6, 7, 8, 9, 10, 11 and 12, in Block No. 29, in the town of Independence, in the said County of Inyo, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of said Inyo county, having been the residence of said John A. Hahhah, deceased, at the time of his death.

Lots Nos. 2 and 4, in Block No. 22, in the town of Independence, County of Inyo, State of California, as the same appears by the official plat of the said town of Independence, now on file in the office of the County Recorder of the said Inyo county.

Two hundred feet undivided, of in and to that certain mining claim, lead, or lode, situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California, known and designated as the "La Dispricada Lode."

That certain lot, piece, or parcel of land situate, lying and being in the County of Ventura State of California, commencing at a point twelve and nine-twentieth (12 9-20) rods south of the general corner of the North-west quarter and the North-east quarter of Section No. twelve (12), and the South-west quarter and the South-east quarter of Section No. one (1), in Township No. three (3) North, of Range No. twenty-one (21) West, San Bernardino Base and Meridian, running thence South sixty-eight and eleven-twentieth (68 11-20) rods; thence West twenty-three (23) rods; thence North-westerly along a small branch or swale to a point twenty-four (24) rods North of the general corner of the North East quarter and the South-east quarter, and the North-west quarter and the North east quarter of the North-west quarter of Section No. twelve (12), in Township No. three (3) North of Range No. twenty-one (21) West; running thence North forty-four and eleven twentieth (44 11-20) rods thence East eighty (80) rods to the place of beginning, containing thirty acres: Together with ten shares of the Capital stock of the Highland Water Company.

Bids or offers must be in writing, and will be received at the residence of the undersigned at Georges Creek, Cal., and may be left at said place, or at the office of the District Attorney, at Independence, Cal., or delivered to said Executor personally, or may be filed in the office of the Clerk of said Superior Court, at any time after the first publication of this notice, and before the making of sale.

The Executor reserves the right to reject any and all bids.

Terms and conditions of sale: Cash, lawful money of the United States, ten per cent. of the purchase money to be paid to the said Executor when the sale shall be made, balance on confirmation of sale by said Superior Court deed at the expense of purchaser.

WILLIAM L. HUNTER,
Executor of the Last Will and Testament of John Allen Hannah, deceased.

Religious Services.

Rev. H. J. Winsor will preach on Sunday, April 23rd, a special sermon on "Brotherhood" to the various orders. Lone Pine, 11 a. m. Independence, 7:30 p. m.

BORN.

CALLOWAY—At Blackrock, April 12, 1893, to Mr. and Mrs. J. W Calloway, a daughter.

DIED.

BENNETT—At Keeler, April 14, 1893, William F. Bennett, a native of Germany, aged 53 years.

R. Way has the foundation for the new vault laid.

Bert Rhine started for San Francisco on Tuesday's train.

S. P. McKnight C. E. was down from Bishop early in the week.

The special session of the United States Senate adjourned on the 15th.

John H. Wise has been appointed Collector of the Port at San Francisco.

J. W. Lacey was up from Lone Pine during the week. His health has very much improved.

R. S. Miner Esq., arrived at Independence on Monday from Bridgeport, returning next day.

W. R. Johnson came up from Keeler on Tuesday's train and is visiting friends at Independence.

Mr. and Mrs. E. A. Reddy came in from Darwin at the end of last week and spent several days at Independence.

There was a wreck on the V. & T. on Wednesday. A telegram states that nobody was hurt. The accident happened near Franktown.

Mrs. M. E. Curtis will do fashionable dress-making at the residence of Mrs. L. L. Woodin M. D. Perfect fit. McDowell system.

Dan Hall started a team on the Saline Valley Borax road last Monday, making three in all now hauling. About three thousand sacks of borax have accumulated at the works.

Rev. Winsor invites the members of all the orders into church next Sunday. Masons, Oddfellows, G. A. R. Post, Native Sons, Good Templars in regalia. See notice.

Mrs. A. L. Conklin has been very ill with diphtheria. For several days last week it was feared that the dread disease would terminate fatally, but she is now out of danger.

Dr. I J. Woodin went to Keeler last Friday and performed an autopsy upon the body of William F. Bennett. He removed the stomach and forwarded it to Coroner Howell at Bishop.

The potato crop in Mason Valley is about exhausted. People who have recently been scouring the valley for potatoes for export could not find sufficient to load a single car.

A correspondent writes the *Tidings* to say that the leaching plant put up by John Chiatovich & Co. at Silver Peak for the treatment of gold tailings by the cyanide process is a success.

Hon. P. Reddy returned to San Francisco on Tuesday's train. Since his last visit here he has made a tour of the Eastern States, visiting among other places his birth-place in Rhode Island.

A party coming up from Los Angeles on Wednesday met the railroad surveyors at Indian Wells Valley. Mr. Ryan, the engineer in charge, reported very favorably of the route to that place. The heaviest grade at any point is eighty feet to the mile, and that for a short distance only. Mr. Ryan considers the country from Indian Wells Valley out as being very easy, and is quite certain that no trouble will be had in finding a good route all the rest of the way.

The following comes in the form of a circular, which has been circulated all over the Western States. It tells its own story. "The San Francisco Unemployed, in mass meeting assembled, to workingmen of every trade and calling greeting, Brothers: Do not be deceived by false reports. The city of San Francisco is crowded with idle men There are thousands of us tramping the streets hungry, hopeless and destitute. For God's sake keep away from this city. Advertisements for laborers, sailors or mechanics are false. Place no faith in them. There are ten men here for every job now. By order Executive Committee, San Francisco unemployed. W. M. Willey, Chairman, L. C. Fry, Secretary."

The Eastern Horse Market.

The Mason Valley *Tidings* contains the following account of the recent shipment of horses to Kansas:

James Nichols, C. T. Martin and Andy Johnson, who accompanied the horses shipped from this valley to Kansas City, got back Wednesday. A *Tidings* scribe interviewed Mr. Nichols and obtained some general information from him which is of interest to our readers.

"You can say that I consider the Kansas City market the best place to dispose of Nevada horses. The fact of our being able to sell the 250 head which we took from the valley without trouble demonstrates that it is a horse market at all times, although prices are up to-day and down to-morrow—depending as does everything else on the supply and demand.

"Our horses were in good condition when they left the valley, but the trip to Wadsworth followed by eight days confinement in the cars, told on them severely, and when they were unloaded in Kansas City some of them were little more than skin and bones. Our emaciated stock brought poor prices. Every animal that was in condition brought a fair price. A four-year-old bay weighing 1400 pounds, belonging to J. C. Mills, sold for $125. This was the highest figure we obtained.

A saddle horse owned by Napoleon Brisson brought $22 50. This was the lowest price. It would be hard to give you the average, as the prices obtained fluctuated between the figures I have mentioned.

"I shall send other horses to this market next fall, and may decide to drive them across the State to Utah for shipment. From points in that Territory, owing to competition, low rates of freight to the Missouri river can be secured. I obtained considerable information which will be of service in making future shipments. We unloaded to feed three times between Wadsworth and Kansas City. Our horses were used to alfalfa and did not take kindly to the prairie hay that was offered them where we stopped, in many cases refusing to eat it.

"Twenty five miles east of Denver, on the plains, hay in the stack sells from $1.15 to $1 25 per ton. You are here only 45 hours distant from the Missouri river by freight train, and animals after being got in condition can be loaded aboard the cars on short notice and put upon the market at the most advantageous time. You might mention the fact that brand marks, be they ever so small, are considered blemishes by Eastern buyers and dealers, and detract from an animal's value.

"It cost us a total of $17.75 per head to lay down our horses in Kansas City and dispose of them as follows:

Car fare, per horse	$12 81
Feed Bill	1 31
Average fees and commissions	3 00

"I will say in conclusion that while any kind of a horse will sell for something, that carriage and draft animals are what the best class of buyers are looking for. They bring good prices and meet with ready sale at all times."

Interested In Owens Valley.

In Los Angeles very great interest is taken in Inyo county. When Mr. C. Mulholland got into the city two weeks ago representatives from the newspapers called upon him for information about the country. In the *Herald* a long interview was published and the clerks in the office said that at least seventy-five men had called there that day wanting to see Mr. Mulholland. A large card was posted up in the office giving notice that Mr. Mulholland would be there at a certain hour every day while he stayed in the city. The people who called for information were not men asking for work but men with some money to invest. Some wanted to buy land, others wanted to know what quantities of cherries, pears, apples or other fruit could be got. Some made inquiry about butter, chickens and eggs; some about potatoes, and one man wanted to know if the railroad would be built soon enough to carry cucumbers in carload lots to Los Angeles this season. In the *Express* a two column interview was published and there, too, were many inquiries made about Inyo county.

W. C. Wilson of Mojave has certainly developed a good mine near the south line of the county. The location is near the north side of Indian Wells Valley about twenty-five miles north-east from Coyote Hole station. It is in the Argus range, where the chain ends on the edge of the plain. The ledge was well prospected and the extent and value of the ore determined before anything else was done. From an average sample Selby & Co. of San Francisco gave Mr. Wilson the following return per ton. Gold, $134.78; silver, 14 88; total, $144 11. A small mill has been erected and is now about ready for work.

Mr. Turner of Marietta was in town last Saturday. From him we learn that there is likely to be a resumption of activity in that camp. The Eagle mine, the property of Messrs. Paxon, Phipps and Turner, is said to be very valuable. The ledge is three feet wide, and the ore averages $20, which is said to be a low estimate The owners have already 150 tons on the dump, and the work so far done demonstrates that the ledge is permanent.—*Walker Lake Bulletin.*

The ball given by the stock-holders of the Big Pine Canal at Big Pine on Friday evening last was a complete success. Several visitors were present from Bishop and Independence, and the surrounding country turned out *en masse*. The people at Big Pine had good cause for rejoicing. For over fifteen years they have been working on the canal, and when water was turned in at the head and came sweeping in a strong, steady stream clear to the end it was a gladdening sight to those who had labored so many years to accomplish it.

All over Los Angeles buildings are going up. In the central part of the city great structures are being built six and seven stories high. The walls are of immense wrought iron columns with brick between. Iron beams support the floors and connect the walls. The city is extending rapidly south and west toward the ocean. There is great activity in railroad circles, and it is impossible to resist the conviction that Los Angeles is certain to become a great city and that very rapidly.

A meeting of the Democratic County Central Committee will be held at Independence on Saturday, April 29th, at 2 o'clock p. m. Written notices have been mailed to the members of the Committee.

MISCELLANEOUS.

ANTARE.

1st premium Trotting Stallion, 1891-2. Bred by S. L. Akens, Newman, Cal. Foaled April 6, 1887. Stands 15¼ hands high and weighs 1250 pounds. Color, mahogany bay with black points; no white. By ANTEROS, 6020.

1st dam, Sallie W., by Iowa Chief, 525.

2d dam by Tornado, 502.

ANTEROS, 6020.

By Electioneer, 125, the greatest sire of trotters living or dead; 125 of his get having records from 2:08¼ to 2:30. Among this number are Palo Alto, 2:08¾; Sunol, 2:08¾; Arion, 2:10¼ at 2 years; Norline, 2:31½ and Bell Bird, 2:26 as yearlings.

1st dam of Anteros, the great Columbine, dam of Anteeo, 2:16¾

Antevolo, 2:19¼
Antonia
Conrad
Coral, 2:18¼
Speedwell

Anteros is the sire of—

Doc Chresle, 4 years, 2:21
Nellie F, 4 years, 2:25
Anterose, 4 years, 2:25
Major Ross, 2 years, 2:30
Wilkeross, 2 years, 2:34¼
Entruria, 3 years, 2:33¼
Montgomery, 3 years, 2:37½
Antero, 3 years, 2:38¾
Bessie B, 3 years, 2:37
Anteorian, 3 years, 2:57
Antare, 4 years, 2:57

Antare is a "horse attached to a pedigree," possessing that quality so highly prized among horsemen. INDIVIDUAL MERIT, having the power to transmit both his color and form to his progeny. His record was made after trotting four well contested heats the day previous and is the fastest time ever made by any stallion ever owned in Inyo county over any track in the 18th District.

ANTARE was awarded the first premium over all comptitors at the District Fairs of 1891-2. At the fair of 1893 we propose to exhibit an "Antare Family," of twenty-five of his colts, and we challenge the owner of any stallion in the 18th District to exhibit one or more colts two-years-old or under that can compare with the colts sired by this horse.

TERMS FOR THE SEASON, $25 00,

Payable on or before August 1, 1893.

Mares from a distance pastured free of charge but no risks taken.

S. P. SMITH, Manager.

ORDER OF ADJUDICATION OF INSOLVENCY.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California.

In the matter of J. V. Skinner, an Insolvent Debtor.

J. V. Skinner, having filed in this Court his petition, schedule and inventory in Insolvency from which it appears that he is an Insolvent Debtor, the said J. V. Skinner is hereby declared to be insolvent. The Sheriff of the County of Inyo is hereby directed to take possession of all the estate, real and personal, of the said J. V. Skinner, an Insolvent Debtor, except such as may be by law exempt from execution, and of all his deeds, vouchers, books of account, and papers, and to keep the same safely until the appointment of an Assignee of his estate. All persons are forbidden to pay any debts to the said Insolvent or to deliver any property, belonging to such Insolvent, to him or to any person, firm, co-poration or association for his use; and the said Debtor is hereby forbidden to transfer or deliver any property, until the further order of this Court, except as herein ordered.

It is further ordered, that all the creditors of said Debtor be and appear before the Hon. Geo. M. Gill, Judge of the Superior Court of the County of Inyo, in open Court, at the Court Room of said Court, in the town of Independence, County of Inyo, on the 9th day of May, 1893, at 10 o'clock a. m. of that day, to prove their debts and choose one or more Assignees of the estate of said Debtor.

It is further ordered, that the order be published in the Inyo Independent, a newspaper of general circulation, published in the County of Inyo, as often as the said paper is published before the day set for the meeting of Creditors.

And it is further ordered, that in the meantime, all proceedings against the said insolvent be stayed. GEO. M. GILL,

Judge of the Superior Court.

Dated April 34, 1893.

A True Old Saying!!

Goods Well Bought Are Half Sold.

Our buyers watch the markets carefully and purchas for cash, thus enabling us to quote telling prices that, compared with value, are small.

85 cents buys one of those gents white unlaundried shirts with a short bosom which does not rumple up or muss made of fine linen. Wamsutta muslin double back and patent continuous strip at neck and sleeve openings.

Windsor ties. As warm weather is at hand 'twill bring a demand for them which we are ready to supply having 100 dozen for you to choose from at 25 cents each. Come in plain colors, stripes checks and plaids.

GENTS OVERSHIRTS.

In this line we are showing the largest lines and strongest values of any retail line on the Coast. Bought direct from the manufacturers, thus saving you the middle-man's profit.

The line that bids fair to be most popular is the Stanley made with starched collars and cuffs, the bodies soft finished insuring comfort in summer. They come in calicoes, percales, cheviots and madras cloths, light and dark shades, stripes or figures. Prices $1 to $2 each.

Black satine overshirts, solid color or in fine hair line stripes from 50cts. to $1.25 each.

Domet flannel overshirts cut full size and well made. Price 25 cents each.

If you have not received one of our illustrated catalogues let us know. Copies sent free on application.

GENTS SHOES

$3 buys the best calf shoe to be found anywhere for the money. Comfort and style combined. The bottoms are of the best white Oak tanned stock fastened with standard screws. Come in light, medium or heavy soles, suited to dress or every day wear. Sizes 5 to 11 and none genuine unless stamped "Hale's $3 Shoe on the bottom.

Hale's "School Boy's Pride."

These are one of our very best values in Boy's wear. Made on same shaped last as higher grades and thus ensuring a perfect fit. Come in light or heavy soles. Youths sizes 11 to 2. Price $2. Boys sizes 2½ to 5½. Price $2 50.

Ladies, Misses, and childrens shoes in all grades styles and prices

This spring sees many new novelties in wash dress fabrics. Some look like wool goods. Others, like silks, come in all sorts of effects and colorings. Printed Glorioos, printed on pretty grounds, colors cream, tan light and medium blue, 29 in. wide. Price 12½ cts. per yd.

Black brocades. A fine quality of goods with small satin stripes and patterns of white pinhead dots and small figures. 32 in. wide, price 35 cts. per yd.

Cream Crepon Cloths. Something like crinkled seersucker Very popular. Price 8½ cents per yd.

Samples of dress goods etc. sent free on application.

SPECIAL ANNOUNCEMENT.

We have made arrangements with Dr. B. J. Kendall Co., publishers of "A Treatise on the Horse and his Diseases," which will enable all our subscribers to obtain a copy of that valuable work *free* by sending their address (enclosing a two-cent stamp for mailing same) to DR. B. J. KENDALL CO., ENOSBURGH FALLS, VT. This book is now recognized as standard authority upon all diseases of the horse, as its phenomenal sale attests, over four million copies having been sold in the past ten years, a sale never before reached by any publication in the same period of time. We feel confident that our patrons will appreciate the work, and be glad to avail themselves of this opportunity of obtaining a valuable book.

It is necessary that you mention this paper in sending for the "Treatise." This offer will remain open for only a short time.

Lodge 221, F. & A. M.

U. S. Government Baking Powder Tests.

The report of the analyses of Baking Powders, made by the U. S. Government (Chemical Division, Ag'l Dep't), shows the Royal superior to all other powders, and gives its leavening strength and the strength of each of the other cream of tartar powders tested as follows:

	LEAVENING GAS. Per cent.	Cubic in. per oz.
ROYAL, Absolutely Pure,	13.06	160.6
The OTHER POWDERS TESTED are reported to contain both lime and sulphuric acid, and to be of the following strengths respectively,	12.58	151.1
	11.13	133.6
	10.26	123.2
	9.53	114.
	9.29	111.6
	8.03	96.5
	7.28	87.4
	4.98	65.5

Royal Baking Powder is absolutely pure, and of greater leavening power than any other powder.

Mamma (pathetically)—What would my little girl do if I should die? Little Flossie—I don't know. I suppose I should have to spank myself.

SURE CURE FOR PILES.

Sure cure for blind, bleeding and itching Piles. One box has cured the worst cases of ten years' standing. No one need suffer ten minutes after using Kirk's German Pile Ointment. It absorbs tumors, allays the itching, acts as a poultice, gives relief. Dr. Kirk's German Pile Ointment is prepared only for Piles and itching of the private parts, and nothing else. Every box is warranted.

Sold by Druggists and sent by mail on receipt of price, $1.00 per box. J. J. Mack & Co., Wholesale Agents, San Francisco.

"The pleasantest way to take cod liver oil," says an old gourmand, "is to eaten pigeons with it, and then eat the pigeons."

GET your garden ready and **GET**

The Timothy Hopkins Collection of Sweet Peas

Containing twenty-one distinct varieties—a large packet of each—for $1.50, or a packet of the same varieties, mixed, for 10 cents.

12 **Carnations** (distinct varieties) . $1.00

My May.

Hark to the joyful sound! to the revel of rills!
The buds have leaped into leaf on a thousand hills;
The only snow is the snow of the orchard spray;
She cometh across the land, my May, my May!

There springeth a fire at the root of growing things;
There stirreth desire at the heart that awakes and sings;
The breast of the bluebird is shot with a brighter ray;
She cometh across the land, my May, my May!

She cometh with kindling eyes and with morning smiles,
O'er the sapphire shining seas from the golden isles;
Her breath is that of the jasmine bloom and the hay;
She cometh across the land, my May, my May!

She quickeneth drowsing Hope by her calm caress;
She bringeth us heart content for a balm to bless;
O, to lure her feet awhile from the Juneward way!
She cometh across the land, my May, my May!

But enough! She cometh. Rejoice, my soul, rejoice!
Join, O my voice, with the universal voice,
To hail the dream delight of her dream brief stay!
She cometh across the land, my May, my May!
—Clinton Scollard in Ladies' Home Journal.

A Fire Chief's Mad Drive.

That our fire department is the best in the world is due in a great measure to the splendid work of its chief, Dennis J. Swenie. As the department is divorced from partisan politics he has been enabled to hold his position until he has perfected the service and made it what it is. A brave man and an enthusiastic and untiring fire fighter, his presence always inspires his men to heroic deeds, as the presence of a great general upon a battle field spurs his soldiers on to action.

Monday afternoon Chief Swenie stood beside the open grave of one of his oldest firemen at Rose Hill cemetery. As he turned away after the last sad words were spoken, he saw against the southern sky the smoke and flames of the big west side fire. Rushing to the driver of one of the carriages he asked him to drive him to the scene. When the man refused the stalwart chief dragged him from his seat, mounted the box, grabbed the reins and applied the lash to the frightened horses. They dashed madly down the road in a cloud of dust. The chief was in citizen's clothes and wore a silk hat, so few recognized him. Policemen attepted to stop him in his mad career, but such a feat was impossible in exactly forty-five minutes from the time he left the cemetery gate he pulled up the exhausted horses at the scene of the fire, borrowed a helmet and a rubber coat and was soon in the thick of the fight.—Chicago Post.

Hypnotism in Dentistry.

Hypnotism in dentistry is one of the latest developments of the art. An interesting experiment was described the other night at the meeting of the Midland Counties' Dental association by Mr W. R. Roberts, of Litchfield. A lady patient, he said, consulted him recently as to the extraction of a very firmly imbedded right lower first molar. As she had previously been hypnotized for headache and other ailments, and always proved a susceptible subject, her medical adviser suggested that she should be hypnotized before the tooth was pulled.

The lady consented, and the doctor hypnotized her in Mr. Robert's operating room. When she was under the influence she was asked to walk to the dental chair and did so. Mr. Roberts then asked her to open her mouth, and told her that the tooth would be extracted without any pain. She obeyed, and did not evidence the slightest pain while the tooth was being pulled up. The patient was then awakened. She said she had not felt the removal of the tooth, neither had she experienced any discomfort since.—Philadelphia Ledger.

Antlers Imbedded in a Tree Trunk.

A couple of weeks ago Mr. Van Man, a farmer near Zena, in Polk county, was engaged in cutting cord wood on his place. He chopped down an oak tree of about three feet in diameter at the butt and after sawing it into the proper lengths proceeded to split it in the usual manner. In the section about five feet from the ground he struck his ax into what he supposed was a bunch of knots, but as the chips immediately crumbled he made closer examination, and discovered the right side of a pair of deer horns imbedded into the very heart of the oak tree. There are evidences that it had five prongs, and from the growth "rings" of the tree has been in that position for at least a century and a half. The tree is thought to be at least 200 years old.—Salem Statesman.

It is now proposed to drive a tunnel into the very crater of Popocatapetl, and to build from the mouth of the tunnel a railway to connect with the interoceanic road at Ameacameca. The parties who are negotiating with the owner of the volcano are said to represent a rich French syndicate, who expect to get at least 100,000 tons of sulphur annually from the very bowels of the old Mexican landmark.—St. Louis Republic.

Professor Barton W. Everman, of Terre Haute, Ind., has resigned a chair in the State Normal school to accept a position under the national fishery commission. He will be connected with the exploration of the lake and river basins of the United States. He is a naturalist of great ability.

A Lotos of the Nile.

By CHRISTIAN REID.

Again she answered, "It is impossible. Do you not see that it is impossible? Starting forth on a new career, it would be insane for you to burden yourself with a wife. As for me, I am no more fit to marry a poor man than to be a housemaid. Victor, it is hopeless. For heaven's sake, let us talk of it no longer. The only thing we can do is to forget that we have ever talked of it at all."

"Will that be easy for you? I confess that nothing on earth could be harder for me."

"No, it will not be easy, but I shall try with all my strength to do it. God only knows," putting her hand suddenly to her face, "how I shall live if I am not able to do it." Then passionately, "Why did you speak? Why did you make the misery greater by dragging it to the light, so that we could face it, talk of it, discuss it? Oh why did you do it?"

"Because I wanted to see if you were not made of braver stuff than other women," said he, almost sternly. "In my maddest hours I never dreamed of speaking, until—what you said last night. Thinking of that after I came home, I resolved to give you one opportunity to break through the artificial trammels of your life, and find the freedom you professed to desire. It was better to do this, I thought, than to be tormented all my life by a regret, a doubt, lest I had lost happiness where one bold stroke might have gained it."

"And now that you have found that I am not brave, that I am like all the other conventional women of my class, are you not sorry that you have inflicted useless pain upon yourself?"

"Of myself I do not think at all, and even when I think of you I cannot regret having spoken. Let the misery be what it will, it is something to have faced it together—it is everything to know that you love me, though you refuse to share my life."

"You must not say that," said she, starting and shrinking as if from a blow. "How can I venture to acknowledge that I love you when I am going to marry Marston Brent?"

"Are you going to marry him?"

"Have I not told you so?"

He turned from her and took one short, quick turn across the square. Like every man in his position, he felt outraged and indignant, without pausing to think how infinitely more inexorable the laws of society are with regard to women than to men. He could put Mrs. Lancaster's fortune aside and go his way—to Egypt or to the dogs—without anybody crying out against his criminal folly, his criminal disregard of the duties and traditions of his class. But if Eleanor Milbourne put Marston Brent's princely fortune aside and disappointed all her friends, what remained to her but the bitter condemnation of those friends in particular and of society in general?

When he came back she rose to meet him, making a picture worth remembering as she stood in her graceful youth and picturesque habit by the broken fountain, with the somber cedar hedge behind and the intense azure of the summer sky above.

"Let us go," she said. "By prolonging this we only give ourselves useless pain. All is said that can be said. Nothing remains now but to forget; and that can best be done in silence. Victor, let us go."

There was a tone of pathos, a tone as if she was not quite sure of herself, in those last words, which made Clare refrain from answering her. He turned silently, and they entered a green alley which led to the foot of the terrace surrounding the house. As they walked along, Marston Brent's figure appeared at the end of the vista, advancing toward them, and it was this apparition which first made Clare speak: "If you will not think me fanciful—I am sure you will not think me presumptuous—promise me that before you give that man his answer you will share the lotos with me of which you have spoken. I may be superstitious, but I feel as if we shall gain new strength with which to face the future after we have together renounced the past."

She shook her head. "I am not superstitious enough to think that it will enable us to forget one pang," she said. "But if you desire it, I promise."

When the afternoon shadows were lengthening the party from The Willows set forth again and reached the foot of the mountain a little before sunset, making the ascent in time to see the day god's last radiance streaming over the fair, broad expanse of country beneath them. There was a small cabin on the summit which was to be devoted to the ladies, and round the camp fire which was soon sparkling brightly the gentlemen proposed to spend the night on the blankets with which they were all plentifully provided. Meanwhile the party, dividing into groups and pairs, were soon scattered here and there, perched on the highest points of rock, enjoying the cool, fresh air which came as a message of love from the glowing west, and chattering like a chorus of magpies.

When the evening collation was over—a gypsy like repast for which every one seemed to have an excellent appetite—Mr. Brent asked Eleanor if she would not accompany him to the eastern side of the mountain to see the moon rise. While she hesitated, uncertain what to say, Clare's voice spoke quietly at her side. "Miss Milbourne has an engagement with me," he said. "I fear you must defer the pleasure of admiring the moon in her society for a little while, Mr. Brent." Then to Eleanor, "Shall we go now?"

She assented, and they walked away. Mr. Brent, thus left behind, naturally felt aggrieved, and turned to Mrs. Brantley with some slight irritation stirring his usually courteous repose.

"It strikes me that Maj. Clare's manners decidedly lack polish," he said with an air of grave reprehension. "Is it true, as I am told, that he is going to sell that fine old place where we spent the day, and emigrate to Egypt?"

"He is quite ready for a lunatic asylum," said Mrs. Lancaster, who was standing near. "But, whatever his folly may be, I certainly do not agree with you, Mr. Brent, in thinking that his manners need any improvement."

Meanwhile, Eleanor was saying, "You should not have spoken so curtly to Mr. Brent."

"If I can avoid it, I shall never speak to him again," Clare answered. "Don't let us talk of him. I did not bring you away to discuss anybody we have left behind, or anything of which we have talked before. We are to be like immortals—to forget the past and live only in the present."

"Where are we going?" she asked.

"Round to a point from whence we can overlook Claremont."

She said nothing more, and he led her to the eastern side of the mountain where, near the verge of an almost precipitous descent, they sat down together under the shadow of a great gray rock. From this point the view was more extensive than any they had commanded before. The rolling country, with the sunset glory fading from it, lay like a panorama at their feet—shadowy woods melting into blue distance, streams glancing here and there into sight, fields rich with cultivation bounded by fences that looked like a spider's thread. To the left Claremont, seated above its terraces, made an imposing landmark. Behind it the moon was rising majestically in a cloudless sky. After they had been silent for some time, Clare turned and looked at his companion. "How beautiful you are!" he said abruptly. "I wish I had a picture of you as you sit there now. It would be worth everything else in the world to me. But, perhaps, after all, the best pictures are those which are taken on the heart."

"You have forgotten," said Eleanor, trying to smile, "that we are going to eat the lotos in order to efface all pictures."

"Nay," said he. "I thought it was to enable us to forget everything but the present, and this is the present."

"But it will be the past in a little while," said she, "and we must forget it, like all the rest. Victor, we must forget! They say that all things are possible to resolution; let us resolve to do that."

For some time longer they sat silent. Then Clare said, with something like a groan, "Would to God I could die here and now, or else that there was some spell by which one could make memory a blank!"

"Let us try the lotos," said Eleanor. "See, I brought it as you told me."

From her pocket she drew a paper which, being opened, proved to contain the dried petals of a flower, evidently an aquatic plant. Yellow and lifeless as it was, Eleanor looked at it with wistful reverence. "It came from Egypt," she said; then she added, "where you are going."

"We will see if there is any magic in it," said Clare.

So together they took the dried petals and began to eat them, smiling a little sadly at each other as they did so.

"Herodotus says that when the Nile is full, 'and all the grounds round it are a perfect sea, there grows a vast quantity of lilies, which the Egyptians call lotos, in the water,'" said Clare. "He adds that this flower, especially the root of it, is very sweet. If this is the same, it has certainly changed its flavor since that time."

"It is not disagreeable," said Eleanor. "But I fear we shall not find the effect for which we have hoped. It is of the lotos fruit that Homer and Tennyson have written."

"And the lotos flower of mythology is an East Indian, not an Egyptian, aquatic; but since we desire to link our fancy with the flower of the Nile, we will ignore the poets and the Brahmins. After all, we only desire it as a symbol of the renunciation of the past on which we have agreed. Eleanor, what if we should indeed resolve to leave the past behind us from this hour and face our future together?"

He looked at her imploringly and passionately, but instead of replying she put her hand to her head. "How strangely dizzy I am!" she said. "Can it—do you think it can be the lotos?"

"Dizzy!" he repeated. "Then I must take you from the edge of this precipice. Perhaps it is that which affects you. It could not have been the lotos, or I should feel it, too. Come, let me lead you round the rock."

But when he attempted to rise he found that to him, too, a sudden strange dizziness came. A constriction seemed gathering about his heart, a mist seemed rising before his eyes. Before he had half risen he sank back against the rock.

"Do you feel it too?" she asked quickly.

"Yes," he said slowly, putting his hand also to his head. "What can it mean? Could there have been anything wrong in that plant? The lotos itself is harmless, either flower or fruit. Eleanor, my darling!" he cried with sudden alarm. "Good Heavens! what is the matter? How pale you look!"

"I—I do not think it could have been the lotos. It must have been some poisonous plant," she said faintly. "This giddiness and numbness increase." Then she held out her hands tremulously. "Hold me," she said. "The earth seems slipping away from me. Oh Victor, what if it should be fatal!"

"Do not imagine such a thing," he said. "It is impossible! The plant has probably some narcotic property which affects you temporarily. Lean on me until it is over. My God! how mad I was to have suffered you to eat it!"

"Do not blame yourself," she said, clinging to him, her fair head drooping heavily on his breast. "It was I who spoke of it—who sent for it"——

"How strangely dizzy I am!"

She stopped, gasping a little, and pressing her hand to her heart, where an iron clutch seemed arresting the circulation. A glance at her face filled Clare with a terror which he had not felt before. Partly this, partly his own sensations, told him that the poison of the plant which they had shared between them was fatal—one of the swift and terrible agents of death which abound in the East—and a sense too horrible to be dwelt upon came to him, warning him that aid, to avail at all, must be summoned quickly.

But how! The summit of the mountain was large, the rest of the party were far from them. He had purposely led his companion to this remote spot where, even if he had been able to raise his voice, there was none to hear. As for leaving her, he doubted his own ability to walk ten steps. He felt sure that if he succeeded in gaining his feet he should reel and fall like a drunken man.

Still, the attempt must be made, and that instantly. Every second lessened the hope of its success, with every pulse beat he felt the awful, reeling numbness increase. How much longer he could retain his consciousness he could not tell. He saw plainly that Eleanor was losing hers.

"My darling," he said, striving vainly to unclasp the arms that clung to him. "I must go—I must call assistance; this may be more serious than I thought. Try to rouse yourself, Eleanor. I must go!"

Alas! it was easy to say—it was awfully impossible to do. Even when Eleanor relaxed her already half unconscious embrace, and he strove to rise, he found that not even desperation could give the requisite power. He literally could not gain his feet. Every effort failed, he sank back hopelessly.

Then he tried to raise his voice in a cry for help, but it refused to obey his bidding. He was not able to speak above a broken whisper. Finding this to be the case, he turned in an agony of despair to the girl beside him—the girl whom with a last effort, he drew to his breast.

"Eleanor," he said, "it is hopeless. If this is poison we must die! Oh, my darling, can you forgive me? O my God send us help! Eleanor, can you hear me? Eleanor, will you not speak to me?"

For a minute all was silence. Then the fair head raised itself and the lids slowly and heavily lifted from the blue, flower like eyes. The moon, which had now risen high in the cloudless July heaven, shone full on her face as she said, "Kiss me."

For the first time their lips met, when they parted both were cold.

Still clinging together, they were found. At their feet lay a fragment of the deadly poisonous Egyptian river plant which Marston Brent had ignorantly plucked for a lotos.

THE END.

Some of Mr. Gladstone's admirers in Hastings have made advances to his hairdresser, offering to buy as much hair as can be cut from the Grand Old Man's head at "sixpence a strand," as one of the London papers puts it. The information is published primarily to warn Mr. Gladstone.

PROOF OF MERIT.

The proof of the merits of a plaster is the cures it effects, and the voluntary testimonials of those who have used ALLCOCK'S POROUS PLASTERS during the past thirty years is unimpeachable evidence of their superiority and should convince the most skeptical. Self-praise is no recommendation, but certificates from those who have used them are.

Beware of imitations and do not be deceived by misrepresentation. Ask for ALLCOCK'S, and let no solicitation or explanation induce you to accept a substitute.

Tramp—Please, mum, I made a solemn vow twenty years ago that I'd never go to another stroke of work till women was paid th' same wages as men.

RUPTURE AND PILES CURED.
